LOS ANGELES (MAY 7) BUSINESS WIRE - H.F. Ahmanson & Co. (NYSE:AHM), parent company of Home Savings of America, announced Monday that as part of its program to increase its capital ratios it has significantly reduced its recourse liability on $6.2 billion of mortgage loans it previously sold to the Federal National Mortgage Association (Fannie Mae).

Richard H. Deihl, chairman of the board and chief executive officer, said, ''Home Savings of America exceeds by an ample margin all current capital requirements imposed by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). Along with our proposed acquisition of Home Savings Bank of New York, this reduction of recourse liability will help us to achieve our goal of meeting FIRREA's fully phased-in capital requirements as soon as possible in a cost- efficient manner.''

The reduction was accomplished through the use of a letter of credit issued by Credit Suisse and a surety bond issued by Financial Security Assurance. The First Boston Corporation acted as financial advisor to Home Savings of America.

The reduction of its recourse liability will lower the amount of required capital for Home Savings to meet the fully phased-in capital requirements by approximately $215 million. Although the loans sold to Fannie Mae were

of high quality, under the current capital regulations loans sold with recourse liability must be added back to the company's asset base in calculating risk-based capital ratios.

At March 31, 1990, Home Savings of America's capital ratios were:

Tangible capital ratio	3.51 percent
Core capital ratio	4.37 percent
Risk-based capital ratio	7.11 percent

With the reduction of its recourse liability, Home Savings' risk-based capital ratio will increase to 7.57 percent from 7.11 percent and its tangible and core capital ratios will remain the same.

H.F. Ahmanson & Co., with $46 billion in assets, is the parent company of Home Savings of America. Home Savings' $33.7 billion deposit base is the largest of any U.S. savings institution. It operates 358 savings branches in nine states and 102 mortgage lending offices in 18 states.

SAN FRANCISCO (MAY 7) BUSINESS WIRE - Southern Pacific railroad Monday announced a rate increase of 10 percent per boxcar for frozen commodities moving from Oregon, California and Arizona to destinations east of the Rocky Mountain. The new rate is effective June 1, 1990.

''These increases will make it possible to provide a mechanical refrigerator car fleet of the size and quality needed by frozen food shippers'' according to George Woodward, SP's executive vice president - distribution services.

SP is considering a plan to rehabilitate 1,000 reefer boxcars this year to ''support the shipper's needs for many years to come,'' Woodward said.

''In addition, Southern Pacific will also switch this year from a paper to an electronic rate quote system to make it easier for customers to get needed transportation rate information. This will also simplify the administration of this important segment of its traffic base,'' Woodward said.

CHICAGO (MAY 7) BUSINESS WIRE - Baxter expects to improve the profitability of its hospital business and continue building on the strength of its positions in fast-growing high-technology products and services, chairman and chief executive officer, Vernon R. Loucks Jr. told stockholders Monday at the company's annual meeting.

Loucks reviewed the company's performance in 1989, including increases in operating income and earnings per share of 15 percent. But Loucks noted that operating earnings from Baxter's hospital business have been flat during the last three years, due to declining prices in a highly competitive market.

A restructuring program, which the company announced Apr. 4, is designed to improve profitability by consolidating manufacturing plants, streamlining product lines, reducing corporate staff and divesting some non-strategic businesses, Loucks said.

These latter businesses include cardiovascular medicine, diagnostics, renal therapy, blood products and home health care, as well as value-added services to hospitals, such as just-in-time inventory systems.

Stockholders voted to elect Silas S. Cathcart and David W. Grainger and to re-elect Wilbur H. Gantz, Martha R. Ingram, John J. Louis Jr., C.A. (Lance) Piccolo and Fred L. Turner to three-year terms as directors.

Stockholders also voted to ratify the appointment of Price Waterhouse as the company's independent public accountant.

Baxter International Inc., based in Deerfield, Ill., is the leading international manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in 100 countries. The company had 1989 revenues of $7.4 billion.

LOS ANGELES (MAY 7) BUSINESS WIRE - Ruth A. Martin, chairman of the board of Home Bank, and George W. Post, chairman of the board of The Torrance National Bank, announced the signing of a definitive agreement pursuant to which Home Bank will acquire Torrance National.

The purchase price, to be approximately 50 percent cash and 50 percent stock of Home Bank's parent, Home Interstate Bancorp, is anticipated to be in excess of $17 million, or approximately $29 per share for Torrance National shareholders.

The combined institution, according to Martin, will have approximately $462 million in assets and capital in excess of $39 million. Martin cited the opportunity for Home Bank to expand into the Torrance area as a motiviating factor for the acquisition. Home Bank currently has offices in Signal Hill, Redondo Beach, Paramount, Hacienda Heights, Irvine, Lynwood, Los Alamitos, Manhattan Beach, Westminster, Fountain Valley and Brea.

Post, who will join Home Bank's board of directors, stated that he was confident that the combined institutions will offer to the Torrance National customers ''the same level of service they have become accustomed to since we commenced operations 16 years ago.''

The transaction is subject to shareholder and governmental regulatory approvals and is not expected to be consummated until late summer - early fall 1990.

LOS ANGELES (MAY 8) BUSINESS WIRE - Oppenheimer Industries Inc. (ASE:OPP) Tuesday announced that its board of directors has voted to cancel the auction of the 300,000-acre north portion of the Armendaris Ranch, which was scheduled to be held this Wednesday, May 9.

Speaking for the board of directors, William R. Ball, chairman, said: ''In an unanimous vote, the board of directors decided that it was in the best interest of the company and its shareholders to cancel the auction.''

In other business before the board Tuesday, Hubert F. Laugharn III was elected to the seven-member board of directors, to serve until the 1992 annual meeting of shareholders. President of Regal Homes, Orange County, California, Laugharn replaces Joel Ciniero who resigned.

Oppenheimer Industries owns the 380,000-acre Armendaris Ranch in central New Mexico and has been concentrating its efforts on obtaining resources for the development of the lakefront portion of that property.

LOS ANGELES (MAY 7) BUSINESS WIRE - LIVE Entertainment Inc. (NASDAQ:LIVE)

has completed the acquisition of the majority of Munich-based VCL Communications GmbH, the leading home video distributor in Germany, it was jointly announced Monday by Devendra Mishra, president and chief operating officer of LIVE Entertainment, Roger R. Smith president of LIVE Enterprises and Datty Ruth, managing director and minority shareholder of VCL.

The acquisition of VCL, with yearly revenues in excess of $25 million, marks LIVE's debut in the overseas market of home video distribution.

VCL will be renamed VCL/Carolco Communications GmbH and become a fourth operating unit of LIVE. Mishra and David Mount, president and chief executive officer of International Video Entertainment (IVE), LIVE's domestic home video arm, will become managing directors of VCL/Carolco.

Ruth, founder and managing director of the nine-year-old company, will continue in his current capacity overseeing VCL's operations and will remain a minority shareholder.

Rainbow Distribution Services, a wholly owned subsidiary of VCL, handles 3,200 direct accounts, which are serviced by a nationwide sales team. Included in the VCL acquisition is a distribution company, a videocassette duplication facility, a mail-order business and telemarketing services.

VCL's catalog contains more than 800 titles including such upcoming hits as ''Dark Angel,'' ''Next of Kin,'' Sidney Lummet's ''Q & A'' and Michael Cimino's ''Desparate Hours.'' VCL also distributes Heron's Media Home Entertainment catalog for sell-through and is the leader in music video distribution, handling the entire Polygram Music Video catalog among others.

LIVE Entertainment, with headquarters in Los Angeles, is the parent of three wholly owned subsidiaries; International Video Entertainment, Lieberman Enterprises Inc. and the LIVE Specialty Retail Group.

LIVE, a leading producer/distributor of feature films and other material on videocassette, is based in Los Angeles. IVE's catalog contains more than 1,300 titles, including an extensive library of children's programming under the Family Home Entertainment label.

Carolco Pictures owns a 49 percent voting interest in LIVE.

ACTON, MA (MAY 7) BUSINESS WIRE - Bechtel Software Inc., a leading

supplier of automated design and engineering tools, has ported WALKTHRU, its design animation software, to IBM's RISC System/6000 workstations.

The new WALKTHRU version is available immediately and sells for $12,000.

WALKTHRU is an animation and visualization application that allows users to view three dimensional computer models as though they already exist in the real world. By simply loading model files onto WALKTHRU, users can move about the model in real-time, controlling head and body movement.

WALKTHRU users can also simulate the operation of objects inside the model all in fully shaded images. Static and dynamic design interferences in the model are automatically detected by WALKTHRU's intelligence.

By enabling designs to be reviewed for correctness before construction begins, WALKTHRU minimizes charge orders, reducing life cycle costs. It is also valuable for business development, training, and maintenance planning.

In addition to the RISC System/6000, WALKTHRU runs on Silicon Graphics 4D series of workstations. WALKTHRU works with the following CAD systems: Bechtel Software's own 3DM, GDS from McDonnell Douglas, CALMA from Prime, IGDS from Intergraph, MicroStation from Bentley Systems, AISYS from IASA, AUTOCAD from Autodesk, Dimension III from Prime Computervision, IDEAS from SDRC, and IGES.

Additional interfaces have just been added for CADAM from CADAM Inc., CATIA from Dassault Systems, and AES from IBM.

Bechtel Software will demonstrate WALKTHRU on the RS/6000 in IBM's booth at the AEC Systems show in Atlanta this June. For more information on WALKTHRU, contact Bechtel Software at: (508) 635-0580; 289 Great Road, Acton, Mass., 01720.

Headquartered in Massachusetts, Bechtel Software is a wholly owned subsidiary of Bechtel Corp. Bechtel Software markets, sells, and supports integrated, engineering software solutions for plant design and animation, project management and control, electrical wiring and tracking, and expert systems intelligence. Bechtel Software is committed to futuristic technology built on open systems and industry standards.

#90127b0619 05/07/1990 ~Business Wire

ACTON, MA (MAY 7) BUSINESS WIRE - Bechtel Software officials Friday announced that WALKTHRU is now equipped with an optional STEREO 3-D

capability.

When implemented with STEREO 3-D, WALKTHRU delivers real-time engineering design reviews with full depth perception.

WALKTHRU is an animation and visualization application that allows users to view three dimensional computer models as though they already exist in the real world. By simply loading model files onto WALKTHRU, users can move about the model in real-time, controlling head and body movement.

Users can also simulate the motion of objects inside the model, all in fully shaded images. WALKTHRU dynamically checks for interferences as objects are moved. This ability to review designs for correctness before construction begins, minimizes change orders and reduces life cycle costs. WALKTHRU is also valuable for business development, training, and maintenance planning.

STEREO 3-D allows you to see computer-generated images in much the same way you see the real world: stereoscopically, said Cleveland. Your eyes see images from slightly different perspectives due to the space between them. These two images are fused together by your brain, creating one image with depth.

WALKTHRU achieves STEREO 3-D through the use of special eye-wear, CrystalEyes, which were developed by StereoGraphics Corp. of San Rafael, Calif. CrystalEyes receive infrared signals from an emitter on the computer monitor and channel slightly different perspectives of the computer-generated image to each eye. The user's mind fuses these perspectives together, creating in an image with depth; a true feeling of space between objects.

Combining the use of STEREO 3-D, WALKTHRU's video output capability, and a projection system, users can produce life-size 3-D images of designs, with full depth perception.

WALKTHRU works with the following CAD systems: Bechtel Software's own 3DM, GDS from McDonnell Douglas, CALMA from Prime, IGDS from Intergraph, MicroStation from Bentley Systems, AES from IBM, CADAM from CADAM Inc., CATIA from Dassault Systems, AISYS from IASA, AUTOCAD from Autodesk, Dimension III from Prime Computervision, IDEAS from SDRC, and IGES. WALKTHRU runs on Silicon Graphics 4D series and IBM RS/6000 workstations. Prices start at $7,500.

Bechtel Software will demonstrate WALKTHRU's new STEREO 3-D capabilities at the IGUG show from May 7 to 10 in Huntsville, Alabama. For more information, contact Bechtel Software at: 508/635-0580; 289 Great Road, Acton, MA 01720.

Headquartered in Massachusetts, Bechtel Software is a wholly-owned subsidiary of Bechtel Corp. Bechtel Software markets, sells, and supports integrated, engineering software solutions for plant design and animation, project management and control, electrical component tracking, and expert systems intelligence. Bechtel Software is committed to futuristic technology built on open systems and industry standards.

#90127b0621 05/07/1990 ~Business Wire

NEW YORK (MAY 7) BUSINESS WIRE - New Line Cinema Corp. (ASE:NLN) Monday reported results for the first quarter ending March 31.

Revenues for the quarter were $28,962,704, compared with $11,127,220 during the first quarter of fiscal 1989. Net income was $738,739, or 11 cents per share, compared with a net loss of $287,382, or a loss of 4 cents per share, during the same period last year.

The primary and fully diluted wieghted average number of shares outstanding for the 1990 period were 6,865,017 and 6,958,925, respectively while the primary and fully diluted weighted average number of shares outstanding for 1989 was 6,788,664.

New Line's earnings were buoyed by the successful theatrical releases of the first 23 days of ''House Party,'' which opened on March 9, and the first two days of ''Teenage Mutant Ninja Turtles,'' which opened to record-breaking grosses on March 30.

To date, ''House Party'' has grossed over $22 million, while ''Teenage Mutant Ninja Turtles'' has grossed over $100 million at theaters throughout the country.

Since ''Teenage Mutant Ninja Turtles'' opened March 30, only two days of its distribution were recognized in the first quarter. The bulk of the ''Turtle'' theatrical distribution revenues will be recorded in the second quarter of fiscal 1990, which ends June 30. In addition, ''House Party'' is expected to generate revenues in the second quarter.

New Line Cinema is a leading independent producer and distributor of theatrical motion pictures.

MOUNT OLIVE, NJ (MAY 7) BUSINESS WIRE - Zycad Corp.'s Federal Services Group has been awarded a $3.4-million 18-month contract to simulate and verify the integration of the Advanced Avionics Communications Security Unit (AACU) developed by Motorola with avionics systems being developed for the Air Force Advanced Tactical Fighter (ATF).

The contract will be conducted under an Air Force program designed to reduce risk and speed development of the AACU and its integration with ATF avionics. Zycad will expand and apply simulation tools and methodology developed under the current Demonstration of Avionics Module Exchangeability via Simulation (DAMES) program, funded by the Air Force.

Under the terms of the new contract, Zycad will work with Motorola, prime contractor for the ATF AACU, and team members Texas Instruments and Unisys to develop logic-gate-level models of the AACU and significant components of the ATF avionics architecture.

The models will be used by Zycad in conjunction with the firm's Gate-Level System Simulation (GLSS) tools and simulation acceleration hardware in order to test and demonstrate the operation of the AACU in the integrated avionics environment.

Zycad's Federal Services Group (FSG), headquartered in Mount Olive, was formed in November 1988 to provide Risk-Reduction Engineering (R2E) services -- simulation, verification and test support -- for the design of complex military electronics systems.

The staff of about 40 professionals, including specialists in test and analysis, computer science and software development, is organized to help agencies and contractors meet stringent federal quality and cost-effectiveness standards for integrated electronic subsystems designed by multiple vendors.

Zycad Corp. designs, manufactures and markets high-performance logic simulation, design verification and test-generation tools for the computer-aided engineering (CAE) industry.

Zycad's simulation products consist of integrated simulation software, simulators based on the VHDL (IEEE 1076) hardware description language and very high speed, special purpose computers. Zycad products are used to substantially increase engineering productivity in the design, development and test of sophisticated electronic systems and integrated circuits.

#90127b0635 05/07/1990 ~Business Wire

LOS ANGELES (MAY 7) BUSINESS WIRE - A new computer system developed in California has made significant new discoveries automatically by analyzing large databases.

The discoveries range from forest fire prevention to chemical structure identification to securities trading to crime prevention and medicine.

The system -- IXL: The Discovery Machine -- is a computer program developed by IntelligenceWare, a Los Angeles research company. The IXL system automatically searches through large amounts of data and discovers previously unknown information, rules and relationships. It can analyze information 24 hours a day, outputting new discoveries and hidden knowledge continuously.

Nathan Skinner of the U.S. Forest Service used IXL to help predict the damage potential of a particular area of forest or forest stand. ''IXL's discovery has allowed us to reduce the possibility of intense fires in California forests,'' he said.

By using IXL, Dr. David Garabrand of the USC Cancer Registry discovered that the enzyme N-Acetyl-Glucosaminidase, which is usually used in lead poisoning studies, produces skewed results due to its interaction with Iron. ''Based on this IXL discovery, we treat N-Acetyl-Glucosaminidase results differently now,'' he said.

Jeff Brunner of Gilman Securities in New York said: ''We use IXL to discover market reactions to volatility in various financial sectors. We use the system continuously because the structure of the market continues to change. IXL is a vastly more sophisticated way to discover the structure of the market as it changes.''

''IXL marks a new era in science, technology and finance,'' said Dr. Kamran Parsaye, chairman of IntelligenceWare. ''Until now, we had to use our minds and search through our experiences to make new discoveries. Now computers can do this for us.''

''The world's large databases are a tremendous unused asset in our society '' said Parsaye. ''The hidden knowledge in these databases can be used to make society more productive and to make a positive impact on humanity.''

IntelligenceWare Inc. is located at 9800 South Sepulveda Blvd., Los Angeles, Calif. 90045-5228; telephone: 213/417-8896; Telefax: 213/417-8897.

IRVINE, CA (MAY 7) BUSINESS WIRE - Toshiba America Information Systems Inc. (TAIS) has announced the production start-up of state-of-the-art ''surface-mounted'' printed circuit boards (PCBs) at its headquarters facilities in Irvine.

Initially, the company will produce up to 1,000 sets of PCBs per month. Volume will increase substantially over the next 12 months toward a production target of 5,000 in September and 10,000 per month by April 1991.

The expanded production is part of the company's ongoing corporate strategy targeting increased domestic manufacturing capabilities.

The parts sourced in the United States and used in the manufacture of the PCBs will increase significantly over the next two years.

TAIS will be using an advanced, environmentally safe production process in its manufacture of PCBs. ''We have combined the best of American and Japanese surface-mounting technologies in our facility. Our board circuitry will be printed, not punched and will be 'cleaned' with the latest aqueous, non-polluting process, using no flurocarbons.

PCBs for Toshiba laptop computers will be the first produced at the facility to ensure ready availability of these highly successful products.

These products require the double-density ''surface-mounting'' technology offered by the new facility to meet market demands for speed, quality and miniaturization. All PCB manufacturing activities will be based in a new 126,000-square-foot, security-sensitive facility at 34 Parker St. in Irvine.

With headquarters in Irvine, with annual sales of $900 million, TAIS manufactures and markets a wide range of business and information-oriented products in the United States. The current product mix currently manufactured in the United States includes laptop and desktop computers, plain paper copiers, facsimile systems, electronic key telephone and PBX systems and cellular mobile phones.

Toner and developer products for copying systems are manufactured at the company's Mitchell, South Dakota, plant.

TAIS also markets printers and disk drives.

TAIS is an independent operating company, owned by Toshiba America Inc., a subsidiary of the $29 billion Toshiba Corp., world leader in high-technology products with 71 major subsidiaries worldwide.

SAN DIEGO (MAY 7) BUSINESS WIRE - Cam L. Garner has been named president and chief executive officer at Immunetech Pharmaceuticals, according to James C. Blair, chairman of the board.

Garner succeeds Gordon V. Ramseier, who has assumed the newly created position of vice chairman of the board of directors. Garner also remains president of Dura Pharmaceuticals, Immunetech's wholly owned subsidiary.

Blair said the changes are part of a company growth plan set in place last year.

Immunetech is developing a novel anti-allergy peptide, Pentyde, for the treatment of allergic rhinitis. Ramseier said federal Food and Drug Administration approval of Pentyde Nasal Spray is anticipated in 1991. Last year's acquisition of Dura, a regional marketer of drugs and medical devices for the allergy specialist, created a ''launch platform'' for Pentyde, he said.

Dura markets a combination of pharmaceutical products and medical devices for the treatment of allergies, asthma and respiratory disorders in the United States and Canada, as well as U.S. military bases around the world.

Garner said Immunetech has set a goal of becoming the leading U.S. allergy/asthma specialty pharmaceutical company by 1995.

Garner was formerly president of Syntro Corp., a company applying biotechnology to develop animal vaccines and human health care products. He successfully launched the company's first product.

Previously, he was part of the management team that built Hybritech Inc., a division of Eli Lilly & Co., into a multimillion-dollar leader in the development of monoclonal antibodies for use in diagnostic and pharmaceutical products.

As senior vice president, sales and marketing, he directed the domestic and international marketing operations, increasing product sales from $6 million to $60 million in four years.

Immunetech Pharmaceuticals is a pioneer in the emerging field of synthetic peptide technology, focusing its efforts on the design and development of peptide-derived pharmaceuticals for the treatment of human immune system disorders.

#90127b0654 05/07/1990 ~Business Wire

MILPITAS, CA (MAY 7) BUSINESS WIRE - Octel Communications Corp. (NASDAQ/NMS:OCTL) Monday announced a new integration device that supports

full integration between its Aspen line of voice processing systems and Northern Telecom's new Meridian 1 PBX, as well as providing a more cost-effective method for integrating with existing SL-1 telephone switches.

Octel's new integration device provides full integration of the Aspen product line with the SL-1 at a lower cost than the previous integration method which utilized the Integrated Voice Messaging System (IVMS) link. Octel systems integrate with more than 60 different PBXs.

Full integration of a voice processing system with a telephone switch occurs when three criteria are met: external and internal callers are forwarded directly to a personal greeting if the line is busy or if there is no answer; subscribers receive message-waiting notification when messages are received in the mailbox through a message-waiting light or other message-waiting feature; and callers may choose to return to a designated extension for assistance when fowarded to the system.
Availablity and Pricing

Available in June, Octel's new integration device supports the entire Aspen product line, from 2- to 72-port systems, and comes in 12-port increments at a cost of $2,000 per 12-port increment.

Octel Communications designs, manufactures and markets a full line of high-performance voice processing systems. These specialized computers, which integrate with a large number of telephone systems, help companies and individuals solve a range of communications problems.

Octel's Aspen product line is sold in the United States, Canada and overseas to small companies and large multisite corporations. The recently announced Sierra multiple-application platform is a very large capacity system designed to meet the special needs of telephone companies and other voice information service providers.

Among the applications for Octel's products are voice mail, integrated telephone answering, automated attendendant, call routing and audiotex (voice bulletin boards).

Octel Communications was founded in 1982 and has headquarters in Milpitas.

#90127b0659 05/07/1990 ~Business Wire
PROVIDENCE, RI (MAY 7) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Monday net sales from continuing operations of $265,719,000 and a net loss

of $3,300,000 for the first quarter of 1990, compared to net sales of $265,046,000 and a net loss of $2,650,000 for the first quarter of 1989.

Pre-tax operating earnings, before net interest expense and loss on investment and marketable securities, increased slightly in the quarter on comparable sales. However, losses on investment and marketable securities totaling $2.3 million in 1990 vs. losses of $1.8 million in 1989, combined with lower interest and dividend income and nonrecurring charges in connection with various litigation matters contributed to a net loss of $3,300,000 in 1990 vs. $2,650,000 in 1989.

The company continued its debt reduction program by purchasing, at a discount, $11,336,000 face amount of its outstanding subordinated debentures during the first quarter resulting in a net extraordinary gain from debt retirements of $1,700,000 compared to $1,250,000 in 1989.

In addition, subsequent to the first quarter, the company purchased, at a discount, an additional $13 million face amount of its outstanding subordinated debentures.

Fully diluted net loss from continuing operations was 37 cents per share for the quarter compared to a fully diluted net loss from continuing operations of 28 cents per share for the first quarter of 1989. Fully diluted net loss was 24 cents per share for the quarter compared to a fully diluted net loss of 19 cents per share for the first quarter of 1989.

The company reported that, compared to 1989's first quarter, higher sales in its building products, air conditioning and heating products and Dixieline Products sectors were partially offset by lower sales in its wood products and plumbing products sectors. A significant earnings increase in the air conditioning and heating products sector was partially offset by lower earnings in the building products and plumbing products sectors.

Nortek Inc. is a diversified Fortune 500 corporation manufacturing and marketing residential and commercial building products and commercial ventilating and air conditioning systems.

VAN NUYS, CA (MAY 7) BUSINESS WIRE - Superior Industries International Inc. (NYSE:SUP) Monday announced the company has strengthened its international OEM sales and marketing group.

James M. Ferguson has been promoted to vice president, OEM marketing group and Michael D. Dryden has joined the company as vice president, international business development.

Ferguson joined Superior Industries in 1977 and became an officer of the company in 1984. In his new position, Ferguson will assume the additional responsibilities of domestic and international OEM aluminum wheel sales and marketing efforts.

Dryden joins Superior Industries after a nine-year career with the Kelsey Hayes Co., five years of which have been in the Aluminum Wheel division. He has extensive knowledge of the Asian-Pacific market.

A recognized leader in its field, Superior Industries International Inc. supplies cast aluminum wheels for Ford and General Motors, along with other products, and also serves the national automotive aftermarket with a broad range of accessory and RV products.

#90127b0662 05/07/1990 ~Business Wire

TUCSON, AZ (MAY 7) BUSINESS WIRE - American Southwest Mortgage Investments Corp. (AMEX: ASR) announced earnings for the first quarter of 1990 of $2,590,000 (18 cents per share) compared to $1,807,000 (13 cents per share) for the first quarter of 1989 and $1,756,000 (12 cents per share) for the fourth quarter of 1989.

The earnings for the first quarter were net of amortization of hedging costs of $814,000 (6 cents per share).

The company also announced that its estimated taxable income for the first quarter of 1990 was $3,783,000 (26 cents per share). The company has declared and paid dividend totaling 15 cents per share for the same quarter. As a real estate investment trust, the company must distribute annually at least 95 percent of its annual taxable income as dividends to its stockholders.

The increased earnings reflect lower short-term interest rates. The average one-month LIBOR incurred by the company during the first quarter of 1990 was 8.4 percent compared with 9.5 percent during the first quarter of 1989 and 8.8 percent during the fourth quarter of 1989.

At the same time, mortgage prepayment rates for the first quarter of 1990 were slightly faster than the first quarter of 1989 but slower than the fourth quarter of 1989. Increases in mortgage prepayment rates generally reduce earnings.

Jon A. Grove, chairman and chief executive officer said, ''We are pleased with the recent trend in quarterly earnings as a result of improved short-term interest rates. However, we are keeping a watchful eye for any increase in LIBOR as the interest rate market once again focuses on the concern for higher inflation rates. Our LIBOR cap agreements however should mitigate the impact of any significant increase in LIBOR for the remainder of 1990.''

The company also stated that the accounting rules for residual interests are under consideration by the Emerging Issues Task Force of the Financial Accounting Standards Board. It is possible that the final recommendation could materially affect the calculation of accounting income. However, any such changes would not affect taxable income.

NEW YORK (MAY 7) BUSINESS WIRE - Taking aim at leadership in high-end personal computer performance, NCR Corp. (NYSE: NCR) Monday announced a family of powerful i486-based systems using the most advanced Intel Corp. microprocessor available today.

The Micro Channel-based NCR i486 products are among the first introduced in the industry and include high-performance workstations and servers operating at 27 million instructions per second (MIPS). They were unveiled at a news conference here featuring executives from NCR, Intel and Businessland.

The new products are:

- A Micro Channel-based 33MHz desktop personal computer -- called the NCR PC486/MC33TM -- designed for ''power users.'' U.S. list prices for this system start at $14,195.

- A Micro Channel-based 33MHz deskside server -- called the NCR S486/MC33 -- designed as network or data base server for multiple users. Among the first 33MHz i486 servers to come to market, this system starts in price at $16,195.

- A uniquely designed NCR i486 Technology UpgradeTM, which gives NCR's

Micro Channel-based 386SXTM personal computers power and performance exceeding that of the most powerful 33MHz 386TM-based systems on the market. This upgrade is list priced at $3,500.

The 33MHZ Desktop and Server Products

Alok Mohan, vice president of NCR's Workstation Products Division, said NCR's new 33MHz i486 desktop and 33MHz i486 server systems feature enhanced graphics with NCR Super VGA, and enhanced peripheral support through the use of a Small Computer System Interface (SCSI) controller.

Both also feature an NCR-designed Micro Channel chipset that allows users to upgrade the system BIOS via software, without changing the system chips.

The desktop and the server systems run 32 percent faster than most 25MHz i486-based personal computers, and both support UNIX, MS OS/2 and DOS.

The desktop product is ideal for ''power users'' running compute-intensive applications, such as economic and financial modeling, computer-aided design, graphics, statistical analysis, simulations, animation, imaging and network applications.

The server features an optimized Micro Channel bus architecture for faster input/output (I/O) and local area network (LAN) performance.

NCR Corp., with headquarters in Dayton, Ohio, develops, manufactures, markets and supports business information processing systems for worldwide markets.

ARDSLEY, NY (MAY 7) BUSINESS WIRE - CIBA-GEIGY Corp. announced Monday that Richard Barth, president and chief executive officer, will be named to the additional position of chairman of the board.

The position becomes effective when Dr. Otto Sturzenegger, current chairman, steps down from that position at the end of the year. Dr. Sturzenegger will remain a director of CIBA-GEIGY Corp. and of CIBA-GEIGY Ltd., of Basel, Switzerland.

CIBA-GEIGY also announced that Charles O. O'Brien, executive vice

president and chief operating officer, and Dr. Jack Schneller, senior vice president, have elected to retire from the company at the end of 1990. Both will remain members of the board of directors.

In related developments, effective Jan. 1, 1991, the following individuals will be added to the company's board of directors: Leo Bontempo, president, agricultural division; Harold (Tad) Kinne, president, additives division; Vernon Lemaster, president, dyestuffs and chemicals division; Dr. Rolf Meyer, vice president, finance and information systems; and Douglas Watson, president, pharmaceuticals division.

Barth, of Bedford, N.Y., joined CIBA Corp.'s legal department in 1965 at their Summit, N.J. headquarters. After CIBA and Geigy merged he was named general counsel of the corporation.

He was named corporate secretary in 1974, became a member of the board of directors in 1975, was elected chief financial officer in 1979, and served as a senior vice president of the corporation from 1980 - 1986. Barth has served as president and CEO since April 1986.

O'Brien, of Stamford, Conn., joined Geigy Chemical Corp. in 1962 as an attorney in the company's legal department. He held numerous executive positions throughout his career, including the presidency of the company's agricultural divison from 1970 - 1982, and that of the pharmaceuticals division from 1982 - 1986.

CIBA-GEIGY Corp. is a leading developer and manufacturer of agricultural chemicals, pharmaceuticals, dyes, plastics, vision care products, and specialty chemicals in the United States.

It had sales totaling $3.5 billion in 1989. It is a wholly owned subsidiary of CIBA-GEIGY Ltd. of Basel, Switzerland.

HOUSTON (MAY 7) BUSINESS WIRE - Plains Resources (AMEX:PLX) Monday reported a net loss for the quarter ended March 31, 1990, of $193,000, or 5 cents per share, on total revenue of $7,327,000 as contrasted with a net loss of $775,000, or 35 cents per share, on total revenue of $4,172,000 for the first quarter of 1989.

Operating cash flow was $1,836,000 for the period, more than double the $870,000 reported for the corresponding period of 1989.

Plains' oil and gas sales increased 16 percent to $4,048,000 from $3,483,000 in the prior year's first quarter. Oil and gas marketing and transportation revenue was up over fourfold, increasing to $3,179,000 from the $577,000 reported a year ago.

During the quarter, Plains' oil production increased to over 79,000 barrels, more than double the prior year's first quarter level of approximately 39,000 barrels.

The increase in oil production resulted primarily from work performed during the period on oil properties acquired by Plains during 1989. Total gas production for the quarter decreased about 10 percent to approximately 1.2 billion cubic feet reflecting the sale of certain gas properties in the second quarter of 1989.

SUNNYVALE, CA (MAY 7) BUSINESS WIRE - Robert M. Krueger has been appointed vice president of the Network Products Division at Advanced Micro Devices (NYSE:AMD).

Krueger, 42, reports to Anthony B. Holbrook, president and chief technical officer.

Before joining AMD, Krueger spent five years with the Digital Equipment Corp. Most recently he was group engineering manager for Digital's local area network (LAN) products. His responsibilities included certifying that Digital's computer products complied with EthernetR and fiber distributed data interface (FDDI) standards, and development of LAN products for Ethernet and FDDI applications.

At AMD, Krueger directs the company's Ethernet, FDDI and data communication businesses with responsibility for product development, manufacturing and marketing.

''Network computers will drive an increasing share of computer industry

growth in the 90s. Bob Krueger combines a wealth of knowledge and experience in networking products and markets with a valuable systems perspective,'' said Tony Holbrook.

''AMD's Network Products Division is materially strengthened by Bob's appointment as vice president. His primary assignment is to extend AMD's industry leadership position in one of the fastest-growing markets for integrated circuits.''

Krueger received a bachelor's degree in electrical engineering from Purdue University and a master's degree in engineering administration from Southern Methodist University. Before joining Digital, Krueger spent four years with Datapoint Corp. Prior to that, he was with Texas Instruments for 13 years.

Advanced Micro Devices, one of the five largest U.S. manufacturers of integrated circuits, produces microprocessors and related peripherals, memories, programmable logic devices and circuits for telecommunications, office automation and networking applications.

AMD has sales offices worldwide, and has manufacturing facilities in Sunnyvale and Santa Clara, Calif.; Austin, Texas; Atsugi, Japan; Bangkok, Thailand; Penang, Malaysia; Singapore; and Basingstoke, England. In its fiscal year ended Dec. 31, 1989, AMD reported sales of more than $1.1 billion.

#90127b0734 05/07/1990 ~Business Wire

NEW YORK (MAY 7) BUSINESS WIRE - Grace Specialty Chemicals Co. has received the National Association of State Land Reclamationists (NASLR) award for the company's reclamation efforts at its vermiculite mine in Enoree, S.C.

NASLR is a national organization with 300 members representing regulatory agencies in 15 states and Canada. NASLR awards are made for outstanding achievement in site reclamation in several major mineral industries.

The mine, operated by Grace Specialty Chemicals Co.'s Construction Products Division, produces vermiculite - a naturally-occurring mineral used in fireproofing, insulation, and horticultural products.

Linda Hiltabrand, president of NASLR, said that the national association first learned of the company's site restoration efforts through the South Carolina Land Resources Conservation Commission. The state group has

presented reclamation awards to Grace for eight out of the last nine years.

Of the company's award-winning project at Enoree, Ms. Hiltabrand said, "Grace's designing and budgeting for reclamation as part of the pre-mining planning is highly commendable. This extra care certainly paid off with a well-designed pond providing both agricultural and wildlife benefits."

Commented Robert J. Bettacchi, president of Grace's Construction Products Division, "Grace is committed to sound environmental practices in the facilities we operate and the products we manufacture and sell. We are very proud of our reclamation efforts over the years, and it is especially pleasing to see our commitment recognized by such a prestigious award."

Grace's award-winning site was reclaimed by replacing earth that had previously been moved and stockpiled to expose vermiculite ore for mining. The area was then smoothed, terraced to prevent erosion, and planted with ryegrass and sericea lespedeza, a perennial which replenishes soil nitrogen.

Grace predicts that within five years, the restored soil will be nutritionally better than it was originally. The plantings also form a dense ground cover for added erosion protection and provides forage for wildlife.

Before the land was mined, a dam was formed to create a settling basin for rain and groundwater. This was reclaimed and upgraded to a fishing and stock-watering pond that provides a wildlife and wetlands habitat as well as flood control for the area.

BRANDON, FL (MAY 7) BUSINESS WIRE - Silver Screen Cafe Inc. has announced that it will file with the Securities and Exchange Commission this month to go public via an offering of the company's shares.

The public offering will make available units consisting of five shares of stock and four stock purchase warrants for the price of $25.00 through American Wallstreet Securities Inc., a Tampa based investment banking firm 813/229-0887.

Silver Screen Cafe Inc. could raise up to $2.5 million during its public offering tentatively scheduled to begin sales in June. Kevin Ward, the company's president, stresses that the proceeds are earmarked toward fostering the development of upscale restaurant/night clubs dedicated to the theme of the motion picture industry.

Aimed at Florida's ever-growing tourist industry, Silver Screen Cafe's would feature TV monitors highlighting numerous films, original memorabilia from stars, and motion picture inspired decorations. Hard Rock Cafe became a monumental success by similarly tailoring its image and restaurant theme to the music industry.

Ward states that current plans call for a Cafe site within the midst of Orlando's new busy motion picture studio market and a second site to be located in Brandon within the Tampa market. A franchise program to foster further sites within Florida is also highlighted within the company's Prospectus to be filed with the S.E.C.

The company's Business Plan also details options for diversification of funds via limited investments into Florida's emerging independent film production market. William Grefe', long-time producer/director, studio president, and member of Florida's Film Council, is a current shareholder and serves as an advisor to the company's board of directors.

Grefe' is currently president of Film Artists Co.

Ward emphasizes that Silver Screen Cafe Inc. is one company that is definitely gearing up for Florida's emerging role as the next Hollywood. For further information on this upcoming stock offering or on the goals of the company please contact either the company or American Wallstreet at

the numbers provided above.

CLINTON, NJ (MAY 7) BUSINESS WIRE - Foster Wheeler Energy Corp. has received a $60 million contract from Nelson Industrial Steam Co. (NISCO) for two 120 megawatt reheat circulating fluidized bed steam generators.

The boilers will be located at NISCO's cogeneration facility at Westlake, La.

The boilers, which incorporate several Foster Wheeler proprietary design features, will each produce 825,000 pounds of steam per hour (720,000 pounds per hour of reheat steam) at 1005 degrees F. at 1625 pounds per square inch.

The steam will be used to generate electricity for sale to a local utility and will also be utilized in adjacent industrial plants.

The units are being designed at Foster Wheeler's Clinton, N.J. headquarters, and components will be manufactured at the company's plant at Dansville, N.Y. Commercial operation is scheduled for autumn 1992.

Foster Wheeler Energy Corp. -- a major United States subsidiary of Foster Wheeler Corp. -- designs and fabricates steam generating equipment for electric utilities, industrial users and public authorities.

Foster Wheeler Corp. is a diversified international design, engineering, construction, manufacturing, real estate development, environmental and service organization with subsidiaries operating worldwide. Both corporations are located in Clinton.

#90127b0757 05/07/1990 ~Business Wire
EVENDALE, OH (MAY 7) BUSINESS WIRE - CFM International's CFM56-5 engine has been selected by Gulf Air to power 12 firm, 6 option Airbus Industrie A320 aircraft in an engine order valued at more than $225 million.

CFM International is a 50/50 joint company of General Electric of the

United States and SNECMA of France.

''We're very pleased with this decision,'' said Jean Bilien, chairman and chief executive officer of CFM International. ''Gulf Air conducted extensive technical and commercial evaluations over the past several months, and its selection of the CFM56 is a very strong endorsement of the quality and reliability of our engines.''

Gulf Air, jointly owned by four Gulf states, including Bahrain, Oman, Qatar and AbuDhabi (U.A.E.), is headquatered in Bahrain and is celebrating its 40th anniversary this year.

''Gulf Air has much to celebrate,'' said Bilien. ''It is one of the leading airlines in the region in terms of fleet expansion and route structure. Over the past few years, the airline has taken an aggressive approach to structuring itself to meet the increasing traffic demands of the 1990s and beyond. This decision will have a substantial impact on our business.''

The airline plans to use the aircraft to augment its fleet of short-to-medium range aircraft and to replace aging Boeing 737-200s for its domestic and regional routes.

Delivery of the 12 firm A320s, which will be the first CFM56-powered aircraft in Gulf Air's fleet, is scheduled to begin in 1992 and continue through mid-1994. If the airline exercises its six options, the additional aircraft will be delivered between 1994 and 1996.

The CFM56-5 entered service on the A320 in April 1988 and has since logged nearly 200,000 flight hours. There are more than 60 CFM56-5 powered A320s in service with eight airlines worldwide, and nearly 500 additional aircraft are on firm and option order. Currently, three out of every four A320s in service or on order are powered bu CFM56-5 engines.

In the past decade, the CFM56 engine family has become the best-selling transport aircraft engine product line in the world and offers its current 137 customers worldwide many significant advantages. In addition to having an application base that encompasses 17 different aircraft types, CFM56 engines provide outstanding reliability and are backed by the number one customer support organization in the world.

LEXINGTON, MA (MAY 7) BUSINESS WIRE - Unitrode Corp. (NYSE: UTR), a manufacturer of electronic components and subsystems, Monday announced that its board of directors has elected Allan R. Campbell, vice president of the corporation, and general counsel, a newly created position. Campbell will report to Robert Gable, who will assume the position of chairman of the board and chief executive officer on June 5, 1990.

Campbell was admitted to the Massachusetts Bar in 1971 and to the U.S. District Court (Massachusetts) in 1972. Prior to joining Unitrode, he was associate general counsel at Dennison Manufacturing Co. From 1981 until 1988, he held positions of increasing responsibility at Computervision, most recently serving as vice president, general counsel, and secretary.

Commenting on the appointment, Gable said, "Allan Campbell has extensive experience as a key senior officer, advising management on legal matters. At Unitrode he will be responsible for directing and coordinating all internal and external legal activities. I look forward to his joining our management team."

Unitrode manufactures superior quality electronic components and subsystems, including discrete semiconductors, power management integrated circuits, switching power supplies, and data conversion products. Its products are sold throughout the world for a variety of defense/aerospace, industrial, computer/telecommunications, data processing, and consumer applications.

GREAT NECK, NY (MAY 7) BUSINESS WIRE - BRT Realty Trust (NYSE Symbol: BRT) Monday announced results of operations for the six months and second quarter ended Mar. 31, 1990.

In addition, the Board of Trustees declared the regular quarterly cash distribution.

Revenues for the six months ended Mar. 31, 1990 were $16,336,000 compared to revenues of $17,014,000 reported for the same period in the prior fiscal year. Operating income for the first six months of fiscal 1990 was $5,226,000, or $0.71 per share, compared to $8,622,000, or $1.18 per share for the six months ended Mar. 31, 1989.

Net income for the six months ended Mar. 31, 1990 was $5,226,000, or $0.71 per share, as compared to net income for the 1989 six month period of $9,231,000, or $1.26 per share. Net income for the 1990 six month period is after a provision for possible losses of $3,000,000, whereas the provision for the comparable 1989 six month period was $300,000. In the 1989 six month period, the Trust recognized a gain on the sale of marketable securities of $609,000, or $0.08 per share; there was no such gain in the 1990 six month period.

The weighted average number of shares outstanding during the six months ended Mar. 31, 1990 was 7,375,204 compared to 7,338,658 during the first six months of fiscal 1989.

For the three months ended Mar. 31, 1990, revenues were $8,144,000 compared to revenues of $8,546,000 for the comparable three months in fiscal 1989. Operating income for the current three month period was $1,505,000 versus $4,083,000 reported for the quarter ended Mar. 31, 1989. Net income for the three months ended Mar. 31, 1990 was $1,505,000, or $0.21 per share, compared to net income for the comparable quarter in fiscal 1989 of $4,692,000, or $0.64 per share.

Net income for the second quarter of fiscal 1990 is after a provision for possible losses of $2,500,000, whereas the provision for the 1989 three month period was $300,000. In the quarter ended Mar. 31, 1989, the Trust realized a gain on the sale of marketable securities of $609,000, or $0.08 per share; there was no such gain in the comparable 1990 quarter. The average number of shares outstanding during the three months ended Mar. 31 1990 was 7,346,810 as compared to 7,349,357 for the three months ended Mar. 31, 1989.

BRT Realty Trust also announced today that its Board of Trustees has declared a cash distribution of $0.30 per share payable on July 2, 1990 to holders of record on June 15, 1990.

BRT Realty Trust is a mortgage-oriented real estate investment trust (REIT) specializing in short-term mortgage lending.

NEW YORK (MAY 7) BUSINESS WIRE - The following is a summary of a presentation Monday at the New York Society of Security Analysts by Harris J. Ashton, chairman and CEO of General Host Corp.

Harris J. Ashton, chairman and CEO of General Host Corp. (NYSE:GH), told

analysts Monday in New York that a stringent cost-cutting program combined with de-leveraging of the company's balance sheet are among the elements designed to pave the way for higher profitability in fiscal 1990.

Addressing the New York Society of Security Analysts, the chairman of America's largest lawn and garden retailer said operating overhead at its flagship subsidiary, Frank's Nursery & Crafts, will be slashed as much as $14 million this year in line with a highly focused plan to improve profitability.

Ashton referred to strategic cuts in advertising and a recent reduction in headcount at Frank's Detroit headquarters as examples of savings already being felt.

Ashton said the company looked for positive operating results in its first quarter ending May 20 due to sales growth, tight inventory management, limited markdowns and lower operating expenses.

The General Host CEO said the company has taken four steps in the current quarter which, in aggregate, will improve the balance sheet and add about two cents per share to first quarter earnings.

He reported the repayment of $35 million of 12.5 percent senior debt and repurchase of over $5 million of mortgage notes at a substantial discount.

He also said the company will take through its income statement a $2.7 million reserve on an equity investment that was deducted from net worth last year, a charge that will be fully offset by elimination of income tax reserves no longer required.

Ashton reaffirmed General Host's goal to build a nationwide chain of nursery & crafts stores from a current base of 272 stores in 18 states.

He estimated the national market for his company's three product lines at $40 billion, noting that a recent survey by the National Gardening Association showed lawn and garden sales alone totaled $16.5 billion last year.

Ashton voiced support for General Host's recent listing by a major business magazine as one of the market's most undervalued stocks, citing the company's yield, cash position, real estate assets, positive cash flow strong balance sheet and earnings potential.

In his concluding remarks, the General Host chairman said, ''Today we believe our nursery and crafts business is in the best shape ever. We finished 1989 with a strong fourth quarter and the current quarter looks very promising. Our share of the lawn and garden market grew again last year, and high gross margins and new cost controls hold great

promise for improved profitability.''

General Host operates the nation's largest chain of specialty retail stores devoted specifically to the sale of lawn and garden products, crafts and Christmas merchandise. Its primary operating unit is Frank's Nursery & Crafts.

NEW YORK (MAY 7) BUSINESS WIRE - Record trading volumes were achieved in both IPE's Brent futures and options contracts in April 1990.

Trading in Brent crude oil futures increased by six percent in April, exceeding the previous record of 240,585 lots set in January this year. Daily record volumes were also recorded four times during the month in Brent futures, reaching a high of 19,711 lots on April 20th.

Brent crude oil options recorded a 41 percent increase in turnover over the previous monthly high of 11,142 contracts set in March 1990.

A 31 percent increase in Exchange for Physicals (EFPs) was also established in Brent crude futures during April with 47,678 transactions registered during the month.

IPE Trading Statistics - April 1990

#90127b0787 05/07/1990 ~Business Wire

FRAMINGHAM, MA (MAY 7) BUSINESS WIRE - Perini Corp. reports net income of $1,551,000, or 26 cents per common share for the first quarter of 1990, compared with $3,406,000, or 91 cents per common share for the first quarter of 1989.

Construction and Real Estate Development revenues increased to $201,315,000 for the first quarter of 1990, compared with $176,405,000 for the first quarter of 1989.

Backlog of uncompleted construction work at the end of March 1990 was approximately $1.02 billion, compared with $1.07 billion backlog at the same time in 1989.

Domestic construction, led by its heavy construction operations, made a very strong contribution to Perini's operating income. Building operations also made a positive contribution, due largely to increased revenues generated by a high level of activity in the hotel/casino industry.

Perini International contributed to first quarter results, but at a lower level due to a market slowdown. Canadian operations also did not match 1989's favorable results. Although substantial pipeline work is in backlog, the scheduling of field work is such that most of the operating contribution should come later in 1990.

Real estate did not close any major transactions in this period, in contrast to a strong first quarter a year ago.

WASHINGTON (MAY 7) BUSINESS WIRE - Key new telecommunication technologies researched at Bellcore are being displayed as part of one of the Smithsonian's most ambitious and interactive exhibitions ever.

The exhibition, ''Information Age: People, Information & Technology'', opens Tuesday at the National Museum of American History in Washington.

Bellcore has provided a panoramic electronic window for lifelike video exchanges and a sophisticated yet easy-to-use means of visually scanning products and services, as well as advanced communication pathways that can bring tomorrow's video, data and voice communications more efficiently to millions.

The permanent, 14,000-square-foot exhibition traces the history of communications from yesterday's telegraph to today's telephone, and provides a remarkable glimpse of potential future technologies.

In the display, television footage supplied by BellSouth shows last year's Discovery space shuttle lift-off with unsurpassed color, clarity and contrast, made possible by transmitting high-definition signals over fiber phone lines.

Bellcore developed new digital compression techniques which made such advanced TV transmission possible.

Also in the ''Fiber to the Home'' display, visitors will learn about Bellcore-conceived ''gateway'' or electronic menus. Personal computers and special display phones graphically display the following ''gateway'' services: visual home tours, ''lost child'' photo listings, aisle-by-aisle remote supermarket shopping, and listings of local community activities.

The Information Age exhibition also features Bellcore's dramatic, interactive VideoWindow system, an experimental 8 foot by 3 foot rear-projectiion video display system.

At the VideoWindow display, viewers will be able to see and talk to people in the museum's cafeteria one floor below them, as if they were face to face.

Bellcore worked with a Toronto company, Vivid Effects, to integrate animated computer images with the ''live'' images of exhibit visitors on the VideoWindow screen.

Viewers can interact with animated representations of objects on the screen -- such as musical instruments -- simply by pointing toward the area in which the object appears, causing the instrument to play.

Displays in the interactive gallery will be changed periodically to keep up with future technological developments. The ''Information Age'' exhibition will continue indefinitely.

A consortium, made up of Ameritech, Bell Atlantic, BellSouth, NYNEX, Pacific Telesis, Southwestern Bell Corp., U S WEST and Bellcore, is one of the exhibition's founders -- donating in excess of $1 million. Bellcore, the research arm of the group, donated equipment and technical expertise for the VideoWindow, Information Gateways and ''Fiber to the Home'' displays. Bellcore is headquartered in Livingston, N.J.

#90127b0800 05/07/1990 ~Business Wire

ST. CHARLES, MD (MAY 7) BUSINESS WIRE - Interstate General Co. L.P. (ASE: IGC) Monday reported that revenues for the three months ended March 31, 1990, increased to $17,103,000 from $13,240,000 posted in the 1989 first quarter.

Net income rose to $2,982,000, or $.30 per unit, compared to $2,728,000, or $.27 per unit, in the like period one year ago.

The increase in revenues is primarily attributed to IGC's two recent acquisitions. It reflects the company's February 1990 acquisition of American Family Homes, and the first full quarter of rental income from the real estate assets acquired from San Juan Racing Association in December 1989.

Expenses in the year's initial three-month period included nearly $600,000 in non-cash depreciation and amortization related to the real estate assets in Puerto Rico and amortization of $400,000 related mainly to the American Family Homes acquisition.

Investment property transactions enhanced net income in the initial three months of both 1990 and 1989. In the recent quarter, IGC realized a $900,000 gain from the sale of interest in the Chastleton apartments to Interstate Business Corporation, a co-general partner of IGC. Similarly, the 1989 like period included a $700,000 developer fee.

In the areas of community development and homebuilding, Carroll said that

IGC has held its own in the fluctuating real estate market. There was little difference in combined earnings for lot and home sales in the comparable quarters.

In discussing the company's performance, Carroll stressed that IGC's operating results should be evaluated over an extended period of time, not on a quarterly basis, due to the cyclical nature of the company's homebuilding and land development activities.

Founded in 1957, IGC is a diversified real estate and building organization. Headquartered in St. Charles, Md., the company is currently involved in four related area of operation: community development, homebuilding, investment properties and management services. Listed on the American and Pacific stock exchanges, the company is a master limited partnership that first issued units to the public in February 1987.

CHELSEA, MA (MAY 7) BUSINESS WIRE - Town & Country Corp. (AMEX:TNC) Monday reported net income for its fiscal year ended February 28, 1990 was $6,613,097 about even with $6,743,111 in fiscal 1989.

Earnings per share were $.56 compared with the $.65 reported last year.

Fourth quarter income rose sharply from $42,583 to $2,813,250. Earnings per share for the final three months of the year were $.24 compared with zero in the fourth quarter last year.

The per share comparisons reflect an increase of 1.8 million class a common shares outstanding as a result of a second public offering in December 1988. Consolidated net sales for the fiscal year reached $423,938,511 compared with $240,047,652 in fiscal 1989. The substantial revenue increase is due primarily to the inclusion of full-year results from the L.G. Balfour Company and Feature Enterprises, acquired in December 1988. Fourth quarter revenues of $92,640,501 were down slightly from $93,339,854 a year ago.

Town & Country Corporation is an international manufacturer of fine jewelry with facilities in Massachusetts, New York, Texas, Hong Kong, and Bangkok, Thailand. The company's Little Switzerland luxury-products retailing group sells up-scale jewelry, watches, crystal, china and fragrances in duty-free ports of the Caribbean.

NEWARK, NJ (MAY 7) BUSINESS WIRE - Daily 747 service between Newark International Airport and Paris-Orly Airport will be inaugurated by Air France starting July 3, it was announced by Jean-Claude Baumgarten, the airline's U.S.A. general manager.

''We're happy to add Newark to our list of U.S. cities with passenger flights,'' Baumgarten said, noting that Air France already served Newark with all-cargo flights since April 1989.

''Our new service offers more flights to residents of New Jersey and Pennsylvania. It gives metropolitan area residents a choice of either Newark of JFK airports. And now Air France is the only airline to link the New York area with both Paris airports - Orly and Charles de Gaulle.''

Flights depart every evening at 6 p.m., arriving in Paris the following morning at 7 a.m. From Paris-Orly, departures are at 10:30 a.m., arriving in Newark the same day at 12:25 p.m. The 747 aircraft offers 24 Premiere, 56 Le Club and 276 economy class seats.

A special introductory ''Two-for-One'' offer is available on the Newark-Orly route for travel from July 3 - Sept. 7, with savings as much as $160 off the lowest scheduled fare. Travelers purchasing an APEX ticket by June 15, at a roundtrip fare of $836 ($886 for weekend travel), can get a second ticket free for the same class of service. Offer is subject to government approval and to space availability.

Baumgarten noted that Paris-Orly is especially attractive for passengers making connections to other French cities. The domestic airline Air Inter offers frequent flights throughout the day from its Orly hub to more than 40 points in France.

Air France's passenger and cargo service from New York-JFK will continue, offering daily flights, including the supersonic Concorde, to Paris-Charles de Gaulle Airport as well as direct flights to Nice and other French cities. And from its CDG hub, Air France offers convenient connections to nearly 115 other European gateways.

The popular Air France ''European Treasures'' lineup of tour packages has been expanded to incorporate flights departing from Newark.

''European Treasures'' offers holidays of one week and more in Paris, the Riviera and other European destinations.

NEW YORK (MAY 7) BUSINESS WIRE - In a strategic move to supply a terminal server to the low end market that cannot be beat in terms of either price or performance, Datability Software Systems Inc., Monday announced the introduction of VistaWare Server Software, a new software program that converts IBM PC or compatible ports into full function terminal server ports to create the first PC-based communications server ever.

VistaWare converts any IBM-compatible PC, PS/2 or VAXMATE into a high end

dual protocol LAT & TCP/IP Telnet terminal server capable of accessing both DEC VAX systems and UNIX systems. It provides a command interface identical to that offered by DEC's DECservers so end-users will require no retraining whatsoever. It supports full compatibility with DEC's NCP and TSM network management utilities as well as management via industry standard SNMP applications.

Carrying a list price of only $695, VistaWare installs on any IBM-compatible PC PS/2 or VAXMATE computer to provide terminal service for up to four dumb terminals connected to low cost PC serial ports and up to two parallel printers connected to the PC's standard parallel ports, all with multiple simultaneous connections to DEC and UNIX systems (via LAT and TCP/IP Telnet respectively).

Dumb terminals, printers, modems and any other asynchronous devices may be connected to a VistaWare PC in any combination. Users may also install advanced I/O cards such as internal modems, IBM access cards or any specialty I/O cards that appear to the PC as standard COM ports. Users could, for example, set up a VistaWare PC with four internal high speed modems to create a network based modem pool for shared use between DEC LAT and TCP/IP Telnet users.

In addition to converting the PCX to a fully functional terminal server, VistaWare turns the PC keyboard and monitor into a VT220 terminal using Datability's RAF VT220 terminal emulator, which is included with VistaWare.

VistaWare also includes one virtual Network Protocol Translator (NPT) circuit, which, using Datability's unique NPT technology, provides instantaneous, seamless translation between LAT and TCP/IP across a network.

The company, which is privately held, was founded in 1977 as a consulting and software development firm. Datability created the popular RAF Remote Access Facility PC to VAX connectivity software in 1986 and developed the VISTA Communications Platform in 1989. Sales for the company in its current fiscal year are expected to exceed $25 million.

PRINCETON, NJ (MAY 7) BUSINESS WIRE - Prince Manufacturing Inc., a worldwide leading brand in quality tennis products, announced Monday that it has retained Morgan Stanley & Co. Inc. as its financial advisor in connection with the possible sale of the company.

Prince senior management and Brentwood Associates, a Los Angeles-based management buyout firm, purchased Prince from Unilever N.V. in August of 1987. Since that time, sales and profits have grown significantly, both in the United States and internationally, and management believes that the company is poised for continued growth.

For fiscal year 1989, Prince recorded worldwide sales of approximately $158 million, and currently estimates sales of approximately $187 million for fiscal year 1990.

Prince is the leading brand of quality tennis products and a leading brand in squash products around the world. Prince also successfully markets footwear, apparel, string and ball machines, sport bags and string. For younger tennis players, prince markets its ACE FACE and Big Shot lines.

Prince currently sells its products to customers in more than 100 countries around the world, with distributors throughout Europe, the Middle East, Far East, Africa, South Pacific and the Western Hemisphere.

In addition, the company has wholly owned subsidiaries in Spain and the United Kingdom, a branch in France, and international offices in The Hague Netherlands, Hong Kong and Taichung, R.O.C.

Prince Manufacturing Inc. is headquartered in Princeton.

SEATTLE (MAY 1) UPI - Scientists from the Pacific Northwest to California are searching swamps, wetlands and forests for certain species of frogs, hoping their disappearance isn't an environmental croak of doom.

A growing number of experts believe certain kinds of frogs and other amphibians are disappearing, even from areas that have plenty of natural habitat. Many believe the decline may be related to worsening pollution.

A recent conference of amphibian experts at the University of California, Irvine, focused on what many scientists believe is a worldwide amphibian decline.

Some of the most baffling drops were noted in the five species of ''spotted frogs'' in the Northwest. Three of the most common - the western spotted frog, the red-legged frog and the Cascades frog - are no longer found in areas where they once thrived.

Andrew Blaustein, a professor and amphibian expert at Oregon State University, said the western spotted frog once was found throughout Washington and Oregon.

''We found them there up until the mid-1970s, but they are now no longer west of the Cascade Mountains in either state,'' he said. ''We don't know about the east side; we haven't studied that area.''

The red-legged frog appears to be gone from the Willamette Valley in Oregon, where once they were found in vast numbers.

Experts point to mysterious declines of amphibian species in other parts of the world as a sign that the class of vertebrates comfortable in water and on land could be an ''indicator class,'' affected by subtle and complex environmental changes.

Blaustein noted a 1988 study on western spotted frogs showed some died in Oregon's Willamette Valley as a result of spraying DDT on tossock moth infestations.

''We do have some information that some pollutants have caused some declines in some species,'' he said.

Blaustein, however, believes known declines are part of a worldwide phenomenon.

''Here is this whole class of animals that seems to be in decline from North America to South America, Africa to Asia, and we don't know why,'' Blaustein said. ''This could be some long-term, low-level ecological problem that we don't perceive yet, but the implication is that when we do perceive it, it could be too late for us.''

Increased acidity in the water, either from acid rain or other sources, has been held responsible for the disappearances of the tiger salamander in the southern Rocky Mountains and the Natterjack toad in Great Britain.

Experts still have few reliable long-term studies of amphibian populations or even a good baseline for comparison.

''We don't know much about population numbers of the species then as opposed to now, but we do know about the places in which they once lived '' says Kelly McAlister, a Washington Department of Wildlife biologist.

''We have museum collections of hundreds of frogs taken from areas where we know they used to live. We know that the species cannot be found in that range any more. By extrapolation, we can guess there are not as many as there were.''

Amphibians come into contact with the environment in more directly than humans.

Frogs, for example, begin their lives as tadpoles, eating plant matter in the water. Through metamorphosis they become carnivores, feeding on insects, waterborn animals and, sometimes, other amphibians.

Amphibian anatomy permits life on land and in the water. Many amphibians breathe directly through their permeable skins, and some species lack lungs altogether.

''They face the environment in much more direct ways than we do,'' says David Wake of the Museum of Vertebrates and Zoology at the University of California, Berkeley. ''They eat a wide range of intervetebrates once they become carnivores, and they have a fat-body inside their abdomens that concentrates certain kinds of residues.''

Scientists aren't sure whether the retreat of amphibians is a direct response to environmental changes or an indirect result of pollution passed through the food chain.

They note that amphibians' eggs often remain exposed to water and air, that they eat a wide range of food as they change from herbivores to carnivores.

''It could be that what they eat is making them sick,'' Blaustein said. ''We don't know that yet. We don't know, for instance, what's going on with insects that amphibians eat. We don't know if they are in decline or surging in numbers.''

Blaustein and Wake believe amphibians increasingly will become the focus of attempts to register environmental changes that may be either too subtle or too complex for humans to measure easily.

Wake, who co-wrote a paper with Blaustein on amphibian decline, agrees the perceived reduction in some species of amphibians is part of a worldwide decline.

He cites a famous study on the population of amphibians relative to other animals. The Hubbard Brook study examined a plot of land in New Hampshire and found that amphibians made up the largest ''biomass'' of any animal form in the plot.

''In other words, the study found that there were more grams of frogs and salamanders in the area than any other class of animals,'' Wake said. ''That could have fundamental implications.''

Amphibian biomass, he said, could be so important to the food chain that

the decline of amphibians could start a sequence of interruptions in food supply potentially harmful to many animals, including man.

BEIJING (MAY 7) - A Chinese Communist Party (CCP) delegation led by Wen Jiabao, deputy member of the Central Committee office, has left for a goodwill visit to Cuba, China's official news agency said Monday.

The delegation was responding to an invitation by Cuba's communist party, the New China News Agency said.

It did not give the duration of the visit.

The Cuban Communist Party was one of the first to applaud the military crackdown in June on the pro-democracy student movement in Beijing. The Chinese foreign minister, Qian Qichen, traveled to Havana several days after the incident.

Several top-level exchanges have since taken place between the two countries.

#90127d0220 05/07/1990 ~French/German News Agency

TRIPOLI (MAY 7) - Libya has denied a West German report that it planned to build a new chemical weapons factory following a fire at the controversial Rabta facilitity.

''There is no such factory in Libya, neither a new one nor an old one,'' the Tripolis foreign ministry said in a statement distributed Sunday by the official news agency Jana.

The West German news magazine Der Spiegel, quoting western intelligence services, reported at the weekend that Libya was planning to produce chemical weapons at Sabha military base, some 650 kilometres south of Tripoli.

The Libyan statement called the report part of a ''campaign'' by powers ''hostile to the Arab natiion and its technological and scientific progress''.

The Spiegel said intelligence reports indicated that plans for the new project corresponded ''in their essential details'' with those for the plant at Rabta, 65 kilometres southwest of Tripoli.

The reports indicated that the new project was already at an advanced

stage. The intelligence services said that a factory for producing napalm had already been set up at Sabha.

The Sabha project involves at least one West German company, the Spiegel said, quoting a secret report in the possession of the chancellor's office in Bonn. The Thyssen firm was said to be planning to provide hydraulic lifts.

#90127d0260 05/07/1990 ~French/German News Agency

TOKYO (MAY 7) - If Japanese motorists want to know if they are alert enough to drive, all they might have to do is look at their watches thanks to a new development by several Japanese researchers.

The device is a fatigue detector that can be worn around the wrist like a watch and measures the level of lactic acid in perspiration, an official at Nippon Denso, a large manufacturer of electronic car parts that is interested in the invention, said Monday.

The research group was directed by Isao Karube, a professor of bio-electronics at the research center for science and advancd technology at the University of Tokyo.

Researchers said the level of lactic acid increases significantly when a person exercises.

According to reseachers, it will soon be possible to make a device to analyze whether a person is stressed, or even how much alcohol has been consumed.

One practical application for the device would be a security system preventing a car from operating if the driver is drunk or too tired to drive safely, they said.

#90127d0270 05/07/1990 ~French/German News Agency

KABUL (MAY 7P) - The Central Bank of Afghanistan intervened Monday to stop a sharp fall of the local currency by underselling dollars to finance essential food imports, traders said.

The dollar, which fetched 650 Afghanis last week, dropped to 580 Afghanis Monday following the bank's move, traders at a private money exchange here said.

Officials said importers of wheat flour and sugar bought dollars from the Afghanistan bank under a special licence scheme at 480 Afghanis to the

dollar.

The government last week announced a series of measures, including banning state institutions from buying dollars on the open market, to reduce the demand for hard currency.

Prices have been soaring in war-torn Afghanistan because of a steady fall in the local currency against the dollar since the Soviet troop withdrawal in February last year.

#90127d0300 05/07/1990 ~French/German News Agency

KUALA LUMPUR (MAY 7) - Malaysian International Shipping Corp. Bhd. (MISC) said Monday it would invest 615 million dollars (278 million U.S.) over the next two years on new vessels and businesses, Bernama news agency reported.

MISC chairman Raja Muhammad Alias said that 413 million dollars (153 million U.S.) would be spent on new ships and the remaining amount would be slated for land-based operations.

Mr. Muhammad said the investment would be partly financed by a proposed one-for-four bonus issue of 125 million new ordinary shares of one dollar each (37 U.S. cents) and a one-for-four rights issue of 125 million shares of one dollar each priced at 4.50 dollars (1.67 U.S.).

The national carrier's planned fleet expansion includes the construction of four 30,000 tonne chemical tankers, two 16,500 tonne parcel tankers and three 1,200 tonne container ships which were expected to be delivered by early 1992.

MISC is also moving into shore-based warehousing, distribution and intermodal services, Mr. Muhammad said.

The company recently entered into a joint venture with Singapore's Keppel Group to build a 95-million-dollar (35 million U.S.) warehouse on the island city state.

MISC was also considering buying a stake in Malaysia Shipyard and Engineering Sdn. Bhd.

#90127d0470 05/07/1990 ~French/German News Agency

MARLY, FRANCE (MAY 7) - French company Mineur-Becourt is facing financial trouble largely due to the temporary suspension of a 24 million franc (4.2 million dollars) contract for work on a nuclear power plant in China.

Mineur-Becourt is providing special doors for the plant at Daya Bay, but the contract had been temporarily suspended "because of the political situation," managing director Claude Of said.

China has acknowledged that it has found difficulty in obtaining foreign loans to finance Daya Bay since the bloody crackdown on pro-democracy protests in Beijing in June.

A commercial court at Valenciennes in northern France on Monday appointed an administrator to run the company for a six-month period, Mineur-Becourt said.

Mr. Of said that none of the 100 jobs at the company was threatened, as "the order book and estimated turnover will easily enable us to make it to the end of the year."

Mineur-Becourt, which had a turnover of 50 million francs (8.7 million dollars) last year, is also providing doors for the new assembly line for the Ariane rocket in Kourou in French Guinea.

DUBLIN (MAY 7) - Six inmates of Dublin's Mountjoy prison were staging a rooftop protest on Monday against the conditions of detention for prisoners with the AIDS virus, Irish police said.

On Sunday afternoon, 10 inmates overcame prison warders and climbed onto the roof to demand their transfer to another prison. Four have since given themselves up to the authorities.

The prisoners, most of them infected with the Human Immuno-deficiency Virus, are complaining about the standard of medical care offered in the unit where they have been isolated.

Police said the inmates were not planning to damage the prison.

Prison authorities said they had opened negotiations with the rooftop protestors and did not expect the occupation to last long, as the men had no food supplies.

BAGHDAD (MAY 7) - Turkish Prime Minister Yildirim Akbulut left here Monday after two days of talks that left unresolved the question of how to distribute the waters of the Euphrates River.

The two sides agreed to attend a June meeting in Ankara of irrigation ministers from all states using the Euphrates to discuss an accord guaranteing fair water usage.

In addition to Turkey and Iraq, Syria also depends on the Euphrates.

Turkish authorities, in a move criticized by both Damascus and Baghdad, on January 13 cut the flow of the river for one month to fill the huge Ataturk Dam in southeastern Turkey.

Iraq is now seeking a tripartite accord between the three users.

Mr. Akbulut, who arrived here Saturday at the head of a 150-member delegation of businessmen and officials, met with President Saddam Hussein and Iraq's First Deputy Prime Minister, Taha Yassin Ramadan.

Official sources here said the Euphrates issue was holding up progress in other fields, as the completion of accords on security and industrial cooperation was put off until after agreement on water-sharing.

Mr. Akbulut and Iraqi officials also discussed Kurdish guerrilla activities along the Turkish-Iraqi border and Turkey's seizure last month of steel tubing that Baghdad had ordered from a British firm.

Discussion of these two issues encountered "certain difficulties," informed sources said here, without elaborating.

Turkey on April 20 seized six segments of steel tubing that were being transported overland to Iraq. Turkish authorities on Friday returned one of the segments to Britain, where customs officials had seized another shipment of Iraq-bound tubes following allegations that it was part of a giant gun project planned by the Iraqis.

The British manufacturer of the huge tubes, the Walter Somers company, had asked for all six pipes to be returned.

BONN (MAY 7) - West German group Strabag Bau-AG said Monday that it and British company Wimpey would be carrying out the major construction work on the European wind tunnel project in Cologne in central West Germany.

The contract was worth some 62 million Deutsche marks (36.4 million dollars), and work was due to start May 15.

First tests were to be carried out in 1993.

The Cologne wind tunnel, for which investment is to total 560 million Deutsche marks (329.4 million dollars), is a joint project by West Germany, France, Britain and the Netherlands to simulate supersonic speed conditions.

MEIRINGEN, SWITZERLAND (MAY 7) - Four climbers were killed and three were still missing Monday after an avalanche in the Bernese Oberland on Saturday, police said.

All the victims were Swiss from the Zurich region.

Rescue teams were alerted on Sunday night when the party, aged 18 to 27, failed to return from an excursion to the Gauli glacier.

Four bodies were found on Monday morning in the Haslital area.

A spokesman for Swiss air rescue services said the young people had all been well equipped and carrying a radio transmitter.

BEIJING (MAY 7) - Ecuador's foreign minister ended a visit to Lhasa on Monday, saying his South American nation could work with Tibet on development projects.

Diego Cordovez said Ecuador and Tibet could cooperate in many fields, including farm products and medicine, the official New China News Agency (NCNA) quoted him as telling Tibetan officials.

Mr. Cordovez, who began an official visit to China on Thursday, is the first foreign dignitary to visit the Tibetan capital since the May 1 repeal of martial law, imposed in March 1989 after bloody separatist riots.

His next stop after Lhasa was Shanghai, NCNA said.

NEW DELHI (MAY 7) - The government is taking measures to increase the number of elephants left in India with latest estimates down to between 15,700 and 17,500, an official said Monday.

Minister for the Environment and Forests Nilamani Routary said in the lower

house of parliament that most of the elephants were concentrated in northeast.

The minister said the government was setting up a network of national parks and sanctuaries to protect elephants from poachers.

Previous reports had put India's elephant population at 21,000.

Mr. Routary has also said the number of the Great Indian bustards was estimated at between 770 and 1,920, while there were believed to be 43,000 black deer.

LONDON (MAY 7) - A plane carrying Princess Diana made an emergency landing at Gatwick Airport near here on Monday following an electrical failure shortly after takeoff, airport officials said.

The four-engined BAe 146 had taken off from Heathrow Airport on a flight to Budapest via Rome when it developed electrical problems.

It landed safely and the princess and her 20-member entourage left for Rome aboard the same plane one hour later after repairs had been made.

A Buckingham Palace spokesman said the fault was minor. "It was a precautionary diversion rather than a forced diversion."

She was to join Prince Charles in Rome and fly on to Budapest for a four-day visit to Hungary, the first Warsaw Pact trip by Britain's royal family.

#90127d0860 05/07/1990 ~French/German News Agency

BASEL, SWITZERLAND (MAY 7) - Swiss chemical group Roche Holding on Monday strongly criticized Switzerland's policy on genetic engineering and said adoption of a ban on animal testing would have serious repercussions for the country's role as a research site.

Vice-chairman of the board Andres Leuenberger told the group's annual press conference that he was concerned over "continuous attempts to prevent the use in Switzerland of the positive aspects of genetic engineering."

He also warned of the "dangerous repercussions for Switzerland as a research site" if popular calls for a ban on animal testing were translated into action.

The trend in Switzerland was "in flagrant contradiction to the international trend towards liberalisation and harmonisation", he added.

Mr. Leuenberger, announcing that sales grew 14 percent in the first three months of this year to 2.67 million Swiss francs (1.78 million dollars), said that in view of these good figures Roche was expecting a further improvement in its results for the year as a whole.

But he warned that "this may well not be easy in the current climate."

Roche gave no figures for profit in the first quarter, but said it had increased in line with sales.

The pharmaceutical sector saw sales increase 22 percent to 1.22 million Swiss francs, while the plant protection division saw sales up 28 percent at 210 million and the diagnostic materials division was up 15 percent at 371 million.

Perfumes were up only four percent at 293 million francs, and vitamins and fine chemical products saw sales shrink by one percent to 569 million francs.

#90127d0880 05/07/1990 ~French/German News Agency

Essen (MAY 7) - The West German energy, mining and industrial conglomerate Rheinisch-Westfaelische Elektrizitaetswerke (Rwe) said here Monday its turnover for the 1989-90 year may reach some 43.8 billion marks (26.4 billion dollars), up 12 percent.

Rwe said the rise for the year ending June 30 would mainly reflect the business volume of the construction company Hochtief.

For the first nine months of the business year, turnover came to over 31 billion marks, a 6.2 percent rise which does not include any figures from Hochtief, Rwe chairman Friedhelm Gieske said.

Gieske said Rwe expected earnings to be strong enough for not only paying out an 18 percent dividend as last year, but also add to the company's reserves for the first time since 1983-84.

#90127d0930 05/07/1990 ~French/German News Agency

NEW DELHI (MAY 7) - Police in India's central Uttar Pradesh state arrested more than 150 Hindu activists Monday as the crowd attempted to lay the groundwork for construction of a temple at a site also claimed by Moslems.

Reports from Faizabad, near the holy Hindu town of Ayadjya, said the state government has barred public access to the disputed area and sealed off all roads leading to and from the site.

The Times of India newspaper said, however, that more than 10,000 Hindu fanatics were camping at Ayodha despite threats of arrest for anyone attempting to construct a temple in honor of the god Rama, an incarnation of Vishnu, the Hindu creator of the universe.

State authorities had arrested Swami Swarupanand, one of India's four highest-ranking Hindu clergy, along with 11 supporters on May 1 for seeking to lay the temple foundation stone in Ayodhya.

The swami and his backers want to tear down an existing mosque adjacent to the temple site and replace it with a 24-million-dollar temple.

Clashes erupted between Moslems and Hindus in several cities last October over the issue, with at least 25 people killed in Bhagalpur in the northeastern state of Bihar.

#90127d0980 05/07/1990 ~French/German News Agency

FRANKFURT, West Germany (MAY 7) - West German chemicals and plastics group Ruetgerswerke said Monday its consolidated sales rose 15 per cent last year to 3.6 billion Deutsche marks (2.1 billion dollars).

But its profit increase was not so good, with consolidated net profit up 6.8 percent over the 1988 level at 31.3 million Deutsche marks (18.4 million dollars) and operating profit up only three percent at 107.4 million Deutsche marks (63.1 million dollars).

The good sales performance was largely due to the inclusion of new companies in the group after Reutgers made a series of major foreign acquisitions last year, which also boosted foreign sales to 41 percent of the total against 35 per cent in 1988.

"We are looking more to buying large-caliber than small-caliber companies," board chairman Wolfhard Ring said, adding that the group would not hesitate to take over a company with sales of a billion Deutsche marks (588 million dollars).

But he stressed that the group had no concrete target in mind.

Reutgers is seeking to strengthen its production in the most profitable areas, and is also hoping that it will be able to move into East Germany as a subcontractor to auto makers such as Volkswagen in the field of

plastics for the auto industry.

Reutgers is building a new plant in West Germany to make plastic for the Volkswagen Golf, with production due to begin in mid-1991.

Plastics, the group's main activity, saw sales rise 11 percent last year to 1.63 billion Deutsche marks, but raw chemicals saw the biggest sales increase, up 26 percent at 1.35 billion Deutsche marks.

#90127d0990 05/07/1990 ~French/German News Agency

BUCHAREST (MAY 7) - The 21-member executive bureau of Romania's ruling Provisional Council of National Unity was meeting here Monday amid nationwide anti-government protests and mounting electoral violence and intimidation.

But the protests and opposition claims of harassment by supporters of the ruling National Salvation Front ahead of the presidential and parliamentary elections did not appear on the official agenda for the closed-door meeting.

According to the agenda, the bureau is to examine foreign policy matters, draft legislation and an official report on violence between Romanians and ethnic Hungarians in Transylvania in March.

It will also study proposals for providing funds to parties ahead of the May 20 elections and fix a date for a plenary session of the full Provisional Council of National Unity. The full Council has met just once, on April 24.

The executive bureau includes representatives of opposition parties but is dominated by the National Salvation Front, which took power after the December 22 ouster of president Nicolae Ceausescu.

Anti-communist demonstrators continued Monday to occupy central Bucharest's University Square with no sign that their protest movement which has spread to at least 10 provincial cities is losing steam.

The protestors have launched hunger strikes and staked out so-called "communist-free zones" in public squares to show their opposition to the government, which they say still has communists in key positions.

Interim President Ion Iliescu, who denounced the protestors as "hooligans," has since apologized for the remark and promised to meet with them on Tuesday.

Opposition political parties have repeatedly demanded that the elections be

delayed to give them more time to organize and several parties have threatened to boycott the polls if violence against opposition candidates continues.

The latest attack occurred Saturday when Radu Campeanu, the presidential candidate of the National Liberal Party, was attacked by a crowd of Front supporters after an electoral meeting in Braila in eastern Romania.

He said Sunday that he planned to ask Mr. Iliescu to conduct an investigation into what he described as an "assassination attempt."

National Salvation Front officials deny that their supporters have been involved in the violence and claim to be the victims of a propaganda campaign.

According to organizers, more than 60 anti-government demonstrators were still on hunger strike in University Square on Monday.

They began the protest last Monday demanding that known members of the Romanian Communist Party be banned from taking part in the elections.

Anti-government protests and hunger strikes are taking place in Timisoara in western Romania, Cluj in central Romania, Iasi in the north-east and Constanta on the Black Sea among other cities.

#90127d1170 05/07/1990 ~French/German News Agency

ISLAMABAD (MAY 7) - The United States has made hefty concessions to the Soviet Union on Afghanistan as it has sought in recent months to disengage from the conflict, Western analysts here say.

Washington has all but dropped the "military option" and it has agreed that elections for a future Afghan government could be open to President Najibullah and his People's Democratic Party of Afghanistan (PDPA), the analysts noted.

Not long ago, Washington was banking on a forceful overthrow of the "illegitimate" Kabul government, which has been massively supported by the Soviets since they pulled their troops out of Afghanistan in February 1989 fearing turmoil in the Moslem Soviet republics of central Asia.

But a mujahedeen military victory no longer seems likely, nor any wholesale transfer of power to them.

Instead, U.S. policy-makers are leaning toward compromise, and in the next few weeks they may hammer out an election formula with the Soviets that will accommodate the "Najibullah factor."

The United States is even using financial pressure to try to get the Pakistan-based Afghan resistance behind the process, Western sources say.

In the fall, the U.S. Congress may vote to cut off arms entirely, and the Central Intelligence Agency's Afghan operation, a longstanding program carried out in collaboration with the Pakistani secret service, might be halted.

The U.S. about-face comes as the larger strategic picture has been radically altered by the changes in Eastern Europe and in the Soviet Union.

East-West detente stemming from the downfall of communism in the East bloc has prompted Washington to look for ways to cash in on a "peace dividend."

In addition, continued support for the Afghan conflict has begun appearing increasingly impractical.

The United States has been frustrated by deep ethnic divisions among the mujahedeen factions and their dismal military performance since the Soviet pullout, and its inability to control the radical fundamentalists seeking a pure Islamic state in Afghanistan.

The U.S. side also privately resents that the Pakistan secret service gives its main support to the extremist mujahedeen groups, skimping on arms supplies to the so-called "nationalist" resistance commanders, without informing the CIA of the discrepancies.

Afghanistan is not a key strategic factor in U.S. policy in the region.

"We don't want to set up any base hostile" to the Soviet Union, a U.S. diplomat said, stressing however that Washington wants a new Afghan government to be "neutral, non-aligned and Islamic."

He recognized that U.S. interests in Pakistan, the only sure U.S. ally in South Asia, could be threatened if the United States disengaged from the Afghan conflict before addressing the problem of the three million Afghan refugees in Pakistan and the presence in the country of armed anti-Western groups.

Moscow and Washington agree in principle to elections supervised by the United Nations and the Organization of the Islamic Conference, but remain divided over the conditions for the elections.

Washington insists that a transitional government be set up first in Kabul to oversee the administration -- including especially the army, the police and the secret service -- and prevent any "manipulation" of the voting process by Mr. Najibullah's PDPA.

The U.S. and Soviet foreign ministers will discuss the modalities in Moscow,

where they are due to meet May 16 to plan the Bush-Gorbachev summit two weeks later, a U.S. source here said.

Two moderate mujahedeen parties, including royalists seeking a return of the former king, Zaher Shah, have said in private that they would agree to an election, but other factions' positions are unclear.

#90127d1380 05/07/1990 ~French/German News Agency

DAMASCUS (MAY 7) - Syria announced Monday its refusal to attend the proposed Arab emergency summit conference in Baghdad. Damascus suggested instead the convening of an emergency meeting of the council of the Arab League at foreign ministers level in Tunis.

Syrian Foreign Minister Farouk al-Sharaa made the statement during talks here Monday with Arab League Secretary General Chadli Klibi, who arrived Sunday night.

"During the last meeting of the Arab foreign ministers in Tunisia last March, Syria was among the first to demand the holding of an Arab summit, and expressed keenness on a good preparation in order to ensure the success of the summit", the Syrian news agency Sana reported Sharaa as saying.

"Minister al-Sharaa said that the agenda of the summit, as well as the fixing of its place without any prior consultations, in addition to the parades and irresponsible statements issued by the capital (Baghdad) that wishes to host this summit, has put the summit conference, in advance, in a negative atmosphere, and certainly not at the service of the national objectives and interests of the Arab nation", Sana reported.

In an apparent reference to Iraq, Sharaa said "a number of Arab countries, including Syria, have been facing since long years dangerous threats and effective siege measures taken by well-known foreign countries ... and in spite of that, Syria did not use such methods in exploiting any of the former Arab summit conferences".

Sana said Sharaa conveyed to Klibi Syria's suggestion "to hold an emergency meeting of the Arab League's council at the level of foreign ministers in Tunis, to conduct consultations about the convenient place and date to hold the summit, and in order to agree on the topics to be discussed at it, as well as to prepare the necessary studies and recommendations in order to present them to the summit conference".

#90127d1550 05/07/1990 ~French/German News Agency
Brussels (MAY 7) - Foreign ministers of the European Community (E.C.) agreed in principle here Monday on a programme to help five more reform-minded East European countries to revamp their economies.

The ministers approved the plans proposed by the E.C. Commission, which has been given the task of coordinating 24 Western nations' strategy for aiding the East Bloc nations.

So far, the E.C. has provided aid only to Poland and Hungary. But now, the Community will extend help to East Germany, Czechoslovakia, Romania, Bulgaria and Yugoslavia.

Funding, the size of which has yet to be determined, will chiefly go to help these countries improve their economic infrastructure, officials said. Also, money is to be earmarked as venture capital to promote the establishment of private enterprises.

A further top priority in future E.C. aid to the East Bloc is to be for environmental protection, officials said.

On the periphery of Monday's talks, the E.C. and Czechoslovakia signed a new trade and cooperation agreement. Czechoslovak Premier Marian Calva called the accord a significant milestone, at the same time expressing interest in his country becoming a member of the E.C. by the year 2000.

-30- 1390
#90127d1590 05/07/1990 ~French/German News Agency
Bonn (MAY 7) - Anti-government guerrillas in Liberia have kidnapped three young French physicians and a former West German development worker, the Bonn foreign ministry confirmed here Monday.

The group fell into rebel hands near the Ivory Coast border, the centre of guerrilla activity, the ministry said. The German man had gone there on a private trip despite official warnings to avoid the area, it said.

The insurgents reportedly control up to a third of the country after first attacking in December. They are led by Liberian economics expert Charles Taylor, whose goal is to topple President Samuel Doe.

The Bonn ministry said the rebels had promised to release the four Europeans. Similar pledges had been kept in the past, the ministry said, citing reports from the West German embassy in Monrovia.

#90127d1680 05/07/1990 ~French/German News Agency
MOSCOW (MAY 7) - The Soviet parliament has asked Latvia to clarify certain points of its independence declaration, the republic's president, Anatolijs Gorbunovs, said Monday.

Addressing the local parliament in Riga, Mr. Gorbunovs said the request was put to him in a telephone conversation, though he did not specify by whom, the Latvian parliament's press centre said.

Clarification of Friday's declaration was now being prepared by a commission of four lawyers, he told parliament. The declaration of independence also established a "transitional" period to achieve it.

The parliament in Riga was expected Monday to appoint as prime minister Ivars Godmanis, a member of the pro-independence popular front.

Mr. Godmanis, a 39-year-old doctor, is a vice-president of the popular front, and the only candidate for the post of premier.

Soviet leader Mikhail Gorbachev Monday lashed out at those "forces that would like to use the atmosphere of democracy, glasnost and freedom to implement their futile ambitious plans, including separatist plans".

These forces were pursuing an "irresponsible policy leading to a deadlock," Tass news agency quoted him as saying at a meeting of World War II veterans and army officers in Moscow.

But he did not specifically refer to the Latvian declaration.

Soviet Foreign Ministry spokesman Gennady Gerasimov told a news briefing here that the Kremlin had not officially responded to the Latvian move, in the wake of Lithuanian and Estonian declarations restoring their pre-war independence.

"There is no response yet, as I understand it," Mr. Gerasimov said. Alfred Rubiks, Latvia's pro-Moscow communist party chief, quoted by the official Tass news agency, said Saturday that Mr. Gorbachev had rejected the republic's declaration of independence and threatened retaliation.

Mr. Gorbachev considered the Latvian decision "a violation of the constitutional norms" of the Soviet Union, and reserved "the right to adopt retaliatory measures of a political, economic and administrative nature," Mr. Rubiks said on Riga television following a phone conversation with the Soviet president.

Lithuania, which declared independence on March 11, is in the grips of a

Moscow-imposed economic blockade imposed in protest.

#90127d1760 05/07/1990 ~French/German News Agency
STAVANGER, NORWAY (MAY 7) - Norwegian state-owned energy company Statoil said its earnings tripled in the first quarter of this year to 3.1 billion kroner (475 million dollars), two billion kroner more than the same period last year.

Increased oil production, higher oil prices during the winter months and reduced financial costs were the main causes of the improved result, a company spokesman said.

Total revenue increased 1.5 billion kroner to 15.7 billion kroners.

Statoil sold 30 million barrels of oil in the first three months, two million more than last year.

The production and exploration division reported earnings of 2.4 billion kroner, up from 1.3 billion, the gas division 600 million, up from 426 million, and refining and marketing made 84 million, against a loss of 600 million last year, before the Mongstad refinery started production.

Earnings in the petrochemical division were down from 322 to 144 million, mainly due to lower prices for plastics.

#90127d1850 05/07/1990 ~French/German News Agency

WASHINGTON (MAY 7) - Britain's Chancellor of the Exchequer John Major Monday warned there was little likelihood of any drop in interest rates in the major industrialized nations in the immediate future.

Addressing the annual spring meeting of the International Monetary Fund (IMF) interim committee, Mr. Major noted that inflation in the Group of Seven industrialized nations was "still around five percent, only a little below the worrying level it reached a year ago."

The Group of Seven members are the United States, Japan, West Germany, Britain, France, Canada and Italy.

"All the evidence is that once inflation starts to pick up, it can take considerable efforts to bring it down again, as several countries including the United Kingdom have found.

"There can be no question of relaxing our anti-inflationary efforts." Mr. Major said.

In a reference to Sunday's expression by the Group of 24, representing developing nations, of "deep concern" that "the rise in real interest rates is increasing the cost of debt servicing," he offered little hope of interest rate cuts in the near future.

"Since it is clear," he said, "that there will continue to be countries -- most notably the United States -- which will make a large demand on overseas savings, it is all the more important that we should not take action that would reduce global savings, and indeed should do all we can

to boost them."

-30- 1631
#90127d1930 05/07/1990 ~French/German News Agency
WASHINGTON (MAY 7) - Treasury Secretary Nicholas Brady said Monday that agreement by the major industrialized nations to increase the capital resources of the International Monetary Fund (IMF) must be accompanied by an acceptance among developing countries of a tightening of IMF rules.

Specifically, Mr. Brady linked the agreement by the Group of Seven (the United States, Japan, West Germany, Britain, France, Canada and Italy) to increase the IMF resources by 50 percent to a demand that countries in arrears with their debt repayments to the IMF have their membership effectively suspended.

This change in rules would bring the IMF in line with its sister lending agency, the World Bank, which can suspend member states in arrears before expelling them from membership completely.

Currently, the IMF has only the choice of allowing members in arrears to continue with full membership rights or being expelled.

But the developing countries, which have expressed dissatisfaction with what they consider to be a too-low 50 percent increase in IMF resources or quotas, also oppose the idea of having their membership suspended if they fall behind with their debt repayments.

The Group of 24, which represents the developing nations, issued a communique Sunday, saying its members "expressed strong opposition to the attempted linkage" of the increase in resources with a new suspension rule.

But, in a speech Monday to the IMF's interim committee, the international body's chief policy-making body, Mr. Brady complained: "Arrears to the IMF have grown significantly in recent years, despite the adoption of numerous measures.

"They now total four billion dollars from 11 members (in arrears), an amount roughly twice the level of the IMF's reserves."

The treasury secretary insisted: "These arrears pose a fundamental challenge to the IMF's financial integrity and its central role in the world economy. The IMF must strengthen its policies on arrears, as an integral part of the quota review, in order to preserve its role as an anchor for the international monetary system and ensure that increased capital is used effectively."

In other words: even the 50 percent increase in IMF resources will not go

through unless there is a reform of the rules governing member states in arrears."

"The quota increase," said Mr. Brady, "should only become effective when this amendment (allowing suspension of members in arrears) has been ratified and adopted by the necessary majority."

#90127d1990 05/07/1990 ~French/German News Agency
PARIS (MAY 7) - Both Italy and England find themselves drawn into the past for their opening World Cup skirmishes.

The Italians find themselves playing exactly the same teams they met in the 1934 finals, also in Italy. The hosts meet the United States, Austria and Czechoslovakia, just as they did the last time they staged football's showcase event, which they went on to win.

England must overcome the Netherlands and Ireland, who brought them down early in the 1988 European Championships.

The full draw is:

GROUP A (Rome and Florence)

Italy, Austria, United States, Czechoslovakia

June 9: Italy v Austria (Rome, 21.00 local time), June 10: USA v Czechoslovakia (Florence, 17.00), June 14: Italy v USA (Rome, 21.00), June 15: Austria v Czechoslovakia (Florence, 17.00), June 19: Italy v Czechoslovakia (Rome, 21.00), Austria v USa (Florence, 21.00)

GROUP B (Milan, Bari, Naples)

Argentina, Cameroon, Soviet Union, Romania

June 8: Argentina v Cameroon (Milan, 18.00), June 9: USSR v Romania (Bari, 17.00), June 13: Argentina v USSR (Naples, 21.00), June 14: Cameroon v Romania (Bari, 17.00), June 18: Argentina v Romania (Naples, 21.00), Cameroon v USSR (Bari, 21.00)

GROUP C (Turin, Genoa)

Brazil, Sweden, Scotland, Costa Rica

June 10: Brazil v Sweden (Turin, 21.00), June 11: Costa Rica v Scotland (Genoa, 17.00), June 16: Brazil v Costa Rica (Turin, 17.00), June 16: Sweden v Scotland (Genoa, 21.00), June 20: Brazil v Scotland (Turin, 21.00), Sweden v Costa Rica (Genoa, 21.00)

GROUP D (Milan, Bologna)

West Germany, Yugoslavia, United Arab Emirates, Colombia

June 9: UAE v Colombia (Bologna, 1700), June 10: West Germany v Yugoslavia (Milan, 21.00), June 14: Yugoslavia v Colombia (Bologna, 17.00), June 15: West Germany v UAE (Milan, 21.00), June 19: West Germany v Colombia (MIlan 17.00),
Yugoslavia v UAE (Bologna, 17.00)

GROUP E (Verona, Udine)

Belgium, South Korea, Uruguay, Spain

June 12: Belgium v South Korea (Verona, 17.00), June 13: Uruguay v Spain (Udine, 17.00), June 17: Belgium v Uruguay (Verona, 21.00), South Korea v Spain (Udine, 21.00), June 21: Belgium v Spain (Verona, 17.00), South Korea v Uruguay (Udine, 17.00)

GROUP F (Cagliari, Palermo)

England, Republic of Ireland, Netherlands, Egypt

June 11: England v Ireland (Cagliari, 21.00), June 12: Netherlands v Egypt (Palemro, 21.00), June 16: England v Netherlands (Cagliari, 21.00), June 17: Ireland v Egypt (Palermo, 17.00), June 21: England v Egypt (Cagliari, 21.00),
Ireland v Netherlands (Palermo, 21.00)

SECOND ROUND

The eight knock-out matches involve the top two teams from each group plus the four third-placed teams with the best records (chosen on points gained, then on goal difference, and then by lots).

June 23: B1 v A3C3D3 (Naples, 17.00)
A2 v C2 (Bari, 21.00)
June 24: C1 v A3B3F3 (Turin, 17.00)
D1 v B3E3F3 (Milan, 21.00)
June 25: A1 v C3D3E3 (Rome, 21.00)
F2 v B2 (Genoa, 17.00)
June 26 F1 v E2 (Bologna, 21.00)
E1 v D2 (Verona, 17.00)

QUARTER-FINALS

June 30: Winner Genoa v Winner Rome (Rome, 21.00)
Winner Turin v Winner Verona (Florence, 17.00)
July 1: Winner Naples v Winner Bologna (Naples, 21.00)
Winner Bari v Winner Milan (Milan, 17.00)

SEMI-FINALS

July 3: Winner Florence v Winner Rome (Naples, 20.00)
July 4: Winner Milan v Winner Naples (Turin, 20.00)

THIRD-PLACE MATCH

July 7: Bari, 20.00

FINAL

July 8: Rome, 20.00

(Kick-offs are local time)

BERGEN, NORWAY (MAY 7) - A major all-European regional environment conference which opens Tuesday in Bergen will attempt to formulate an action program and commit participants to reduce air and water pollution.

The meeting of the 34-member United Nations Economic Commission for Europe (including Albania, the United States and Canada) is the first of four regional conferences called in response to recommendations of the Brundtland Commission on the environment and development presented to the United Nations in October 1987.

Following the four regional conferences, a world conference on the environment and development will be held in 1992 in Brazil. The Bergen conference, which ends May 16, offers the countries of Europe their first opportunity to formulate a common environment policy after the recent upheavals in Eastern Europe.

Along with environment ministers and officials, representatives from non-governmental organizations, industry and unions will also attend the conference.

A ministerial declaration will be signed at the end of the conference committing participating countries to reducing air and water pollution. The industrial countries are also expected to adopt financial measures permitting developing countries to subscribe to accords on environmental controls.

Beginning Tuesday, work groups will meet to define their action programs and priorities, then on May 16 the environment ministers will meet to adopt the common declaration.

A regional action program will also be adopted by all the participants at the conference, non-governmental organizations and industry included, which will define environment objectives in four areas: energy, industry, public participation and the economy.

ADDIS ABABA (MAY 7)- Ethiopia has issued a special decree on investment in the first concrete action to implement an economic reform policy announced on March 8, the official Ethiopian News Agency (ENA) reported here Monday.

The agency quoted government officials as saying that the full text of the special decree, also broadcast Monday by state radio and television, would be published Tuesday in the official Amharic language by the country's principal dailies and later in English by the official Gazette.

The main thrust of the decree is to provide incentives that can attract foreign investments and to ecourage domestic capital and entrepreneurship to engage more actively in national development to expand job opportunities, especially in agriculture, industry, construction, transport and trade.

The decree allows tax exemption on import of capital required to launch new ventures, guarantees repatriation of profits and provides tax holidays of up to five years.

"It also provides guarantees to Ethiopians living abroad who invest in development projects at home as long as they invest in hard currency like any foreign investor which entitles them to take out their profits in foreign exchange as well", ENA said in a summary report on the decree.

Previous laws considered as impeding private enterprise were to be cancelled - a clear indication that the government was anxious to encourage foreign and domestic capital in order to have the confidence and take advantage of the new economic reform measures, ENA said.

The special decree was viewed by officials here as the most comprehensive ever issued in Ethiopia regarding investment.

HAVANA (MAY 7) - Cuban military and civil defense maneuvers conducted in response to nearby U.S. military exercises began to wind down Monday after five days of activity that reportedly involved hundreds of thousands of Cubans.

In Havana alone, President Fidel Castro's operation "Cuban Shield" defense exercise involved 300,000 people at the weekend, city authorities said in what appeared to be the only official account of the extent of the maneuvers.

Unofficial reports said a million people participated nationwide. There was no word on how much the operation cost.

It started Wednesday and went full tilt until Sunday, with a military-only stage beginning Monday, the defense ministry said.

The maneuvers were carried out in response to simultaneous U.S. exercises called "Global Shield," "Ocean Venture" and "Defex." Those maneuvers are annual, but Cuban officials said this was the first time they were done at the same time.

The Defex operation was carried out at the naval base that the United States maintains at Guantanamo on the eastern tip of the island.

The U.S. State Department Friday rejected Cuban assertions that the U.S. military maneuvers were designed to unnerve Havana. A day earlier, Cuba lodged a protest at the United Nations.

KABUL (MAY 7) - Afghan security forces fought Monday to wrest from rebel control a strategic highway leading to Pakistan, a government spokesman here said.

Government troops were occupying captured guerrilla positions on mountains in the Jalalabad area and were moving to secure the Jalalabad-Torham highway amid stiff rebel resistance, spokesman Humayun Mukammel said.

He said he had no details of the latest fighting, but both sides had admitted losses in the battle for the vital trade route linking Jalalabad and Peshawar in Pakistan.

The highway had been blocked by the mujahedeen guerrillas since the Soviet troop withdrawl in February last year.

Mr. Mukammel said troops had broken guerrilla defences and captured several villages from rebels in the Paghman mountain region, 20 kilometres (12 miles) northwest of here, in the past three days.

He said troops killed 15 mujahedeen fighters, including three alleged Saudi Arabian mercenaries, in the Paghman fighting. Government forces suffered no casualties, he said.

Fighting in Paghman has been continuing since April 13, a day after the mujahedeen fired a rocket at Kabul killing 12 school children.

Mr. Mukammel said the mujahedeen kept up rocket attacks on the Afghan capital Monday and fired two more missiles, killing a civilian and wounding scores more.

Troops also captured five Egyptian-made Sakar-30 rockets just outside a key military air base north of Kabul, Mr. Mukammel said.

He said the five rockets found near the Bagram airbase were probably intended to be fired on Kabul as the city was well within the 30 kilometer (18 mile) range of the Sakar-30 rockets.

Bagram air base was the main launching pad of former defence minister Shah Nawaz Tanai who led a failed coup to oust President Najibullah in March.

#90127d2310 05/07/1990 ~French/German News Agency

RIYADH (MAY 7) - The Saudi cabinet Monday expressed satisfaction with last week's agreement by OPEC to cut production and urged all cartel members to stick to their new quotas in order to halt a recent price slide.

"The cabinet considers this result as an essential step towards stabilizing

the oil market," said Information Minister Ali al-Shaer after a cabinet meeting chaired by King Fahd discussed the May 3 agreement in Geneva.

Mr. Shaer, quoted by the Saudi Press Agency, stressed the need of all OPEC members to "apply the clauses of the agreement and respect output quotas."

The 13-member cartel agreed to reduce production by 1.445 million barrels a day (bd) from OPEC's estimated April output of 23.5 million bd.

Saudi Arabia, Kuwait and the United Arab Emirates, whose over-production was considered responsible for the price slide, pledged combined production cutbacks of 1.03 million bd.

Saudi Arabia and Kuwait said they would reduce output by 400,000 bd while the UAE pledged a cut of 200,000 bd.

The official Saudi quota is 5.38 million bd, or 24.46 percent of total OPEC output.

Traders have said that prices will remain weak until there is concrete evidence that less crude-oil was moving out of the Gulf.

JAMMU, INDIA (MAY 7) - Indian troops shot and killed nine suspected Moslem militants in gunfights on the border with Pakistan, while losing two of their own men, as a general strike crippled the Kashmir valley Monday.

Four civilians and an army employee were killed in other incidents.

Two separate gunbattles erupted between alleged intruders from Pakistan and Indian troops in the Haji Pir and Titwal sectors of the border overnight Sunday, defence authorities said in Jammu, the state's winter capital.

Nine alleged intruders and two army labourers were reported killed in the encounters. Also, nine people, including five suspected militants and four troopers, were wounded.

India charges Pakistan with giving military training to Kashmiri militants and arming them to wage a violent campaign for secession.

Pakistan, which also claims Kashmir, denies the charge, but says it supports the Kashmiris right to self-determination.

Moslem militants shot dead a 16-year-old girl whom they had kidnapped Monday and dumped her bullet-riddled body in the Karannagar area of

Srinagar, police said.

An army employee was also killed in the city.

A Hindu husband and wife were slain by suspected militants in the Sopore area of northern Kashmir, and a woman was killed in the crossfire late Sunday when security forces exchanged fire with Moslem militants in central Srinagar.

The violence was reported as a general strike called by the militant Jammu and Kashmir Liberation Front (JKLF) crippled Srinagar and the rest of the Kashmir valley, the Press Trust of India said.

PRAGUE (MAY 7) - Czechoslovak Interior Minister Richard Sacher sacked Monday 35 senior officials of his ministry, which runs the former communist country's police and domestic intelligence service.

The move follows the disappearance of secret ministry documents. The Czechoslovak news agency Ctk said the officials had been removed from their posts and transferred into the reserves. They had been ordered to surrender their police identity cards.

Those sacked were departmental heads or their deputies. All safes containing documents had been sealed and the ministry's intelligence budget was being blocked, Sacher said.

There have been charges in Czechoslovakia that the security services built up under the communists remain a power unto themselves. Minister Sacher faces a grilling Tuesday from the law and order committee of the federal parliament over his stewardship.

Baghdad (MAY 7) - Turkey's Prime Minister Yildirim Akbulut Monday left for home at the end of three days of talks with the Iraqi government on ways of expanding bilateral cooperation.

They also discussed the vexed question of sharing the waters of the Euphrate which flows from Turkey through Syria and Iraq to the Gulf.

Before Akbulut's departure, both sides signed minutes of discussions on Turkey's ability to help in the post-war reconstruction drive in Iraq and cooperation in the fields of trade and industry.

The two sides agreed to convene a meeting of irrigation ministers of Turkey, Syria and Iraq in June in Ankara to discuss the rights of each of the countries to the Euphrates' waters.

The matter became an issue between Ankara and Baghdad after Turkey diverted much of the Euphrates for a month last January to fill the Ataturk dam reservior.

Turkey said the diversion was needed to enable a major hydroelectric and irrigation project to go ahead in its impoverished southeast province.

During his stay here, Akbulut met with Iraqi President Saddam Hussein and Deputy Prime Minister Taha Yassine Ramadan.

MAPUTO (MAY 7) - Rebels of the Mozambique National Resistance (RENAMO) killed four civilians in a pre-dawn attack Sunday on the town of Mandlakazi, in the southern province of Gaza, Radio Mozambique reported Monday.

The rebels also wounded 11 people, four of them seriously, the radio said.

It was the fourth time that Mandlakazi, about 280 kilometres (170 miles) north of Maputo, has come under rebel attack.

Radio Mozambique also said that during April government troops killed 32 "bandits" in the districts of Inharrime and Zavala in the southern province of Inhambane.

KAMPALA (MAY 7) - Ugandan President Yoweri Museveni criticised Africans for blindly copying ideologies and fashions from Europe and abroad, saying Monday that foreign practices ''have ripped our society apart''.

Earlier in the day, Musaveni blamed ''immorality'' among Ugandans for allowing the spread of the fatal immune deficiency disease Aids.

Opening a social science conference in Kampala, Museveni said that some African countries blindly copied the West while others imitated the East.

History had shown that both directions were erroneous and in some cases disastrous, provoking a crisis in many African countries today, he added.

''Whenever Europe sneezes, Africa coughs. Whenever Europe plays a tune,

Africa dances,'' the president said.

''We should not be xenophobic by being allergic to positive foreign concepts. However, foreign concepts should always be sieved to filter out the negative elements and adopt the positive ones,'' he said.

The Ugandan leader said Africa was dominated and penetrated economically, politically and ideologically. He called for defence pacts among African states, saying since mutual suspicion sapped energy and opened the continent up for more foreign penetration.

NAIROBI (MAY 7) - About 60 Somali soldiers died when rebels ambushed a convoy near the border with Djibouti on Friday, sources in the region on the Horn of Africa said Monday.

Rebels of the Somali National Movement destroyed five reconnaissance vehicles and stole three others in the attack in the Barisleh sector, a dozen kilometres (seven miles) from the border, the sources said.

Three army officers were reportedly among the dead.

The convoy had been heading for Zeila, near Loyada in northern Somalia.

BRUSSELS (MAY 7) - The European Economic Community's Commission on Tuesday will take aim at the clutter of legal obstacles that enable European firms to ward off unwanted corporate raiders, Commission sources said Monday.

The Commissioner in charge of the internal EEC market, former West German economy minister Martin Bangemann, will ask the executive to endorse an action programme to strip away some of the defences as part of an effort to create "a level playing field" in the single EEC financial market, they said.

His ideas, which must be translated into formal proposals by the Commission and then approved by EEC ministers, aim at some of the most notorious anti-takeover practices in the Community.

Britain, the most liberal market in the Community, has launched a crusade against the obstacles, which experts say are present in virtually every other member state, either as law or as government interference.

Mr. Bangemann's proposals will beef up a draft EEC directive to prevent a company from taking certain defensive steps - such as the "poison pill" tactic of issuing shares, thus weakening the stock price - without gaining authorisation from a shareholders' general meeting.

According to a Commission document acquired by Agence France-Presse, Mr. Bangemann's proposals include:

- discouraging a targeted company from acquiring its own shares, or using a subsidiary to do so, during a takeover battle.

Mr. Bangemann suggests that they be allowed to buy only up to 10 per cent of stock during the takeover period, and that the voting rights attached to those shares be suspended.

- enforcing the principle of "one share, one vote." This would outlaw non-preference shares that carry no voting rights; shares that carry multiple voting rights; and articles that say a shareholder must hold a minimum number of shares in order to the right of vote in a general meeting.

#90127d2950 05/07/1990 ~French/German News Agency

BUDAPEST (MAY 7) - Prince Charles and Princess Diana arrived here Monday on a four-day official visit to Hungary, the first by members of the British royal family to a Warsaw Pact country.

The arrival of the royal couple was delayed because Princess Diana's four-engined BAe-146 plane had to make an emergency landing at Gatwick Airport near London following an electrical failure shortly after takeoff.

A Buckingham Palace spokesman said the fault was minor. "It was a precautionary diversion rather than a forced diversion."

The princess joined Prince Charles in Rome to fly on to Budapest together.

The couple's visit comes one month after Hungary turned its back on 40 years of communism in the country's first free elections in four decades.

On arrival, Prince Charles and Princess Diana laid a wreath at Heroes' Square at the tomb of the unknown soldier, and met Hungary's new interim president, veteran dissident Arpad Goencz.

They also chatted with outgoing prime minister Miklos Nemeth and his successor Jozsef Antall, who heads the centre-right Democratic Forum which emerged victorious from the April 8 elections.

The president was to host a banquet for the British visitors later Monday, also to be attended by foreign minister Gyula Horn.

Prince Charles was to make a speech here Tuesday before inaugurating a British trade exhibition.

His wife was meanwhile to tour the Budapest Applied Arts Museum which is showing an exhibition of British fashion in the 1980s.

#90127d3160 05/07/1990 ~French/German News Agency

BRUSSELS (MAY 7) - EEC ministers told the European Commission Monday to speed up work towards creating a "single economic space" with the European Free Trade Association (EFTA), diplomats said.

The six EFTA nations have been waiting several months for the European Economic Community to launch the negotiations, aimed at creating a full free-trade zone and allowing free circulation of citizens, capital and services.

EEC foreign ministers on Monday urged the Commission to complete a draft negotiation mandate that they could approve in order to allow the talks to start by the end of June, diplomats said.

Denmark, a neighbour to EFTA members Norway, Sweden and Finland, expressed deep disappointment at the slow progress and Luxembourg called for an agreement by the end of the year, they said.

The ministers told the Commission to adopt a "flexible" draft mandate, leaving negotiators with the business of sorting out difficult problems, they said.

Commission President Jacques Delors last month placed the blame squarely on the EFTA countries, saying it was unclear how big a role they sought in EEC decision-making; that they lacked a formal structure for dialogue with the Community's institutions; and that they sought too many exemptions from EEC trade rules.

A senior British diplomat last week lashed Mr. Delors for his remarks.

"He's merely covering up for the fact that the Commission has got itself into a bit of a mess," he said, pointing to repeated absences from Brussels by the Commissioner for external trade relations, Frans Andriessen.

"I think they (the EFTA countries) will accept something in the broad ballpark of what the Commission has been talking to them about for the

past 18 months," the diplomat said.

Mr. Andriessen told ministers he hoped the 17-member Commission would adopt the draft mandate on Tuesday, sources said.

However, Spain on Monday urged the Community to take a tough line on exemptions and suggested setting up a working group in which the ministers could closely monitor the Commission's negotiations with EFTA.

A tough approach was also taken by the president of the majority Socialist group in the European Parliament, Jean-Pierre Cot, who warned against involving the EFTA countries in decision-making.

"By insisting that they participate from the outset in Community decisions, they give the European Commission civil servants a dream opportunity to escape the obligations of democratic control," he said.

The idea of a "European economic space" between EFTA and the EEC was promoted in January 1989 by Mr. Delors, in a move widely seen as keeping the six countries on the EEC rim at a friendly arm's-length from full membership.

One of the EFTA countries, Austria, has already applied for EEC membership, but the Community has made it known that only East Germany will gain access to the Community before completion of the 1993 single market.

The other EFTA members are Switzerland and Iceland.

#90127d3720 05/07/1990 ~French/German News Agency

West Berlin, May 7 dpa - Austrian President Kurt Waldheim remains unwelcome in the United States, the U.S. official in charge of investigating war crimes told the World Jewish Congress here Monday.

Neal M. Sher, director of the U.S. Justice Department's Office for Special Investigations (Osi), said Waldheim had several times expressly asked to be taken off the U.S. Immigration Service's ''watchlist''.

But he remained persona non grata in the United States. His case clearly showed that no one was ''above the law'', said Sher.

The U.S. list of Germans with Nazi links and collaborators from European countries occupied by the Germans would be continued, despite ''difficulties and attacks'', said Sher, who met the East German Prosecutor-General Hans-Juergen Joseph on Monday to discuss cooperation with that country in investigating Nazi war crimes.

The Jewish congress discussed the ''German question'' in closed session Monday and ended with an appeal for a United Germany to lay down in its law the principle of protection for minorities.

#90127d3730 05/07/1990 ~French/German News Agency

PARIS (MAY 7) - France is the only country in which the performance indicator for government bonds has risen during the first four months of the year, according to statistics released Monday by Credit Lyonnais bank.

The worst performances among the countries covered by the bank's report came from Britain and Japan.

The performance indicator refers to bond prices and is established on the basis of a sample of government issues with maturities of seven to 10 years. It offers a continuous indication as to the state of the bond market, since it is recalculated after each event affecting the market, such as coupon payments or introduction of a new line.

For France, the sample portfolio consists of the following five issues: the OAT 9.70 percent bond issue due in December 1997, OAT 8.50 percent due June 1997, OAT 9.50 percent maturing in June 1998, OAT 8.125 percent due in May 1999, and OAT 8.50 percent of March 2000, which has just been added to the list.

For France, the performance indicator is up by 1.29 percent for the first four months, and is up by 0.42 percent for April alone.

The worst performance among countries monitored came in Britain, where the indicator plunged by 9.30 percent for the first four months. The next worst was Japan, down 7.41 percent, followed by West Germany, off 7.38 percent, and the United States, down 3.41 percent.

For the 16 months from the end of 1988 through April this year, the index shows French government bonds up by 5.53 percent, but this is outdone by the United States, with 12.41 percent. The figure for Japan is off 9.31 percent,
West Germany 5.66 percent, and Britain 1.50 percent.

#90127d8820 05/07/1990 ~French/German News Agency

MANILA (MAY 7) - The Philippines' gross national product grew by 5.67 percent in 1989, slightly higher than earlier estimated, the official National Statistical Coordination Board (NSCB) said here Monday.

The country's GNP - which measures the output of goods and services plus

incomes of overseas workers - reached 961 billion pesos (42 billion dollars) last year, an NSCB report said.

GNP growth for 1989 was earlier estimated by the government at 5.5 percent.

The 1988 growth rate was officially placed at 6.75 percent.

GNP growth is expected to slow down to only four to five percent in 1990 due to political uncertainty, slow investments and inadequate infrastructure, leading economists say.

#90127d8960 05/07/1990 ~French/German News Agency

BEIJING (MAY 7) - China's light industries are hoping to achieve exports worth 10 billion dollars this year despite a slowdown in output stemming from the government's austerity policy, the China Daily reported Monday.

The figure would be a new record following last year's nine billion dollar record, the official English-language daily said, quoting Liu Shixiao, director of the light industry ministry's export office.

Exports of light industrial machinery and electronics are expected to top two billion dollars, 11 percent up on 1989.

According to customs statistics, China exported 905,264 television sets and 4.1 million tape recorders in the first quarter of this year, an increase of 56 percent and 107 percent respectively over the same period last year, the paper said.

Exports of industrial sewing machines, footwear and toys recorded gains ranging from 16 percent to 43 percent.

Eight percent of China's light industrial exports go to the United States, seven percent to Japan, five percent to West Germany and three percent to Britain, the China Daily said, quoting official figures.

It said the quality of goods had improved and the variety of designs increased, citing as examples bicycles, glassware, clocks, sporting goods and musical instruments.

#90127d8970 05/07/1990 ~French/German News Agency

SINGAPORE (MAY 7) - Indonesia's largest private national foreign exchange bank announced here Monday it would be issuing a 25 million U.S. dollar floating rate certificate of deposit (FRCD).

Bank Danamon said that the proceeds of its first international fund-raising exercise outside Indonesia would be used to meet the Bank's growing U.S. dollar needs in its plans to provide financing for its export customers.

The FRCD will be arranged and managed by Schroder International Merchant Bankers Ltd and the interest rate will be pegged at 0.5 per cent above the six-month Singapore Interbank Offer rate (Sibor).

Thomas Tampi, the bank's executive vice president for credit and marketing, said: "Being a first-time issuer, we are satisfied with the rate offered and we would like to go conservative on this."

As part of its plans to expand internationally, the bank added that it was intending to offer another financial instrument in East Asia and Europe, and "an important step in our plan for Asia-Pacific would be to open representative offices in Singapore and Hongkong before the end of the year."

More offices will be opened in Seoul, Taipei, New York and Sydney between 1991 and 1992, it added.

Danamon has also entered into a joint-venture with Korea Exchange Bank to better serve growing Korean business in Indonesia.

To be called Korea Exchange Bank Danamon, it will be operational in July as a full-licence bank and will be a first between banks from the two countries.

#90127d9000 05/07/1990 ~French/German News Agency

SYDNEY (MAY 7) - Australian and New Zealand wool exporters have frozen sales to the Soviet Union until the cash-strapped communist country pays for orders worth about 75 million U.S. dollars, industry officials said Monday.

Dick Newman, chief executive of the Australian Council of Wool Exporters, said Moscow had asked for extended credit on the sales to sort out its foreign currency difficulties.

New Zealand wool exporters said they had also stopped shipments to the Soviet Union until payment was received for previous purchases.

Mr. Newman said: "It would appear that the Soviet Union is experiencing a crisis and is trying to resolve the issue."

"Wool exporters decided they are not prepared to make further sales to the Soviet Union until payment has been received for past shipments," he said.

More than 100 million dollars (75 million U.S.) of wool shipped had not been paid for, Mr. Newman said. Another 50 million dollars (38 million U.S) worth had been ordered and not shipped.

The Soviet Union is Australia's second largest market for wool, he said. In 1988-89 Moscow bought 924 million Australian dollars (696 million U.S.) of fleece.

Hugh Beggs, chairman of the Australian Wool Corporation, said Australian exporters expected to be paid eventually.

"The Soviet Union has in fact never defaulted on wool payments," he said. "They have been slow sometimes."

The wool industry here is already suffering falling wool and sheep prices. Many wool farmers were hurt last month by the vast flooding in eastern Australia.

#90127d9060 05/07/1990 ~French/German News Agency

TOKYO (MAY 7) - Japanese production of video cassette recorders (VCRs) and color television sets in March declined 9.7 percent and 4.2 percent respectively from a year earlier because of a sharp decline in domestic shipments, the Electronic Industries Association of Japan said on Monday.

It said VCR output totaled 2.227 million units and color TV production came to 1.021 million units in March.

Association officials said domestic shipments of VCRs fell 19.2 percent to 502,000 units but exports increased 3.9 percent to 2.270 million units.

They said VCR exports to Singapore jumped 84.5 percent over a year earlier and exports to the Soviet Union showed a 6.9-fold rise, while exports to Poland increased 27 times more than a year ago.

Domestic shipments of color television sets declined 17.4 per cent to 699,000 units, and exports also fell 8.6 percent to 282,000 units, reflecting growing overseas production by Japanese home electronics makers.

Color television exports to China fell 78.5 percent from a year ago but exports to the Soviet Union recorded a 4.5-fold rise and those to Iraq more than doubled compared to a year earlier.

SUVA (MAY 7) - A major crisis looms in Fiji's sugar industry with militant Indian growers threatening to boycott harvesting of the 1990 crop next month in protest at low payments and government interference.

Sugar is the main export earner for Fiji, still struggling toward economic recovery three years after the shock of two military coups aimed at ensuring the supremacy of native Melanesians over ethnic Indians.

The 23,000 farmers, mainly of ethnic Indian origin, are frustrated by the unilateral imposition of an award for Fiji's key industry which gives 60 per- cent of cane proceeds to growers and 40 percent to millers.

The formula laid down by the state-run Fiji Sugar Corporation has been rejected by the National Farmers Union (NFU) and the Cane Growers Council, the main representative growers' bodies.

NFU secretary Mahendra Chaudhry said the growers wanted to retain the old award under which the farmers received 70 percent and the millers 30 percent of proceeds.

He said they were also upset by a government order which deferred elections for local growers' councils until the end of the harvesting season in this South Pacific island state.

"It's a most disgusting display of authoritarianism," Mr. Chaudhry, former finance minister of the Timoci Bavadra government deposed in 1987, said,

He said the growers have had "enough of this drama from the government and they are bound to show their displeasure."

Other complaints include the level of lorry transport allowances and higher penalties for burning cane, which farmers say makes it easier to harvest.

Some factions within the growers' bodies have resolved to boycott harvesting when the crushing season begins in early June. But others are unsure of their action.

Growers expected to raise the matter during local growers' council elections which are usually forums for discussions among the various factions.

The elections had been scheduled for last week but the government deferred them for nine months in what Mr. Chaudhry said was a move to keep the growers apart.

#90127d9460 05/07/1990 ~French/German News Agency

HONG KONG (MAY 7) - Hong Kong logged its biggest private net capital outflow in 1989, with the June 4 Beijing massacre to blame, a top bank said in its latest monthly economic report.

Hong Kong's net private non-trade capital flight last year was estimated at 22.4 billion Hong Kong dollars (nearly three billion U.S.), its peak since 1984, when Britain agreed to return this British colony to Chinese sovereignty in 1997, said the Hong Kong and Shanghai Banking Corp.

The 1989 reading was mammoth when compared to the equivalent two billion dollar (256 million U.S.) outflow estimated for 1988 by the Hongkong Bank.

It attributed the fast worsening trend to "a consequence of deteriorating confidence in Hong Kong's future, following the events in China in June 1989."

The bank warned in its April economic report that should the trend persist, "large surpluses on the trade in goods and services would be required to finance it, which could in turn restrain the growth rate of the economy."

After three years of handsome economic performances, the colony recorded a meagre 2.5 percent gross domestic product (GDP) growth rate last year and the government has said the downturn was likely to persist this year.

BONN (MAY 7) - West German industrial manufacturing orders were up 2.9 percent in volume terms and three percent in value terms in March over the February level, according to seasonally adjusted figures announced here Monday.

The good showing was largely due to a 10.3 percent increase in foreign orders, due to the signing of major contracts in the aerospace industry, while domestic orders had shrunk 1.6 percent, the economy ministry said.

On a two-month basis, industrial orders in February and March were up 5.3 percent over the same period last year, with foreign orders up 9.1 percent and domestic orders up three percent.

FRANKFURT, West Germany (MAY 7) - The West German trades union federation is against merging with its East German counterpart because of its bad reputation for cooperating with the former communist government.

"The reputation of the FDGB ... means that collaboration would begin on

such a bad footing that we cannot at the moment afford to take that risk," the president of the West German federation Deutscher Gewerkschaftsbund (DGB),

Ernst Breit, said in an interview published Monday in the Frankfurter Rundschau newspaper.

The DGB, which groups 16 unions with a total membership of 7.8 million, would prefer individual East German unions to join it, Mr. Breit said.

If the two federations collaborated too closely, the reputation of the West German federation in East Germany could be damaged, he added.

#90127d9840 05/07/1990 ~French/German News Agency

AMMAN (MAY 7) - Jordan, Iraq and Saudi Arabia have approved an accord that will enable Jordan to take delivery of Iraqi oil via pipeline at a saving of some 50 million dollars a year, reliable sources said here Monday.

Jordan will receive the oil through a connection between an Iraqi-Saudi pipeline and a tapline that currently pumps Saudi oil to Jordan.

Ibrahim Badran, secretary general of the Jordanian Energy Ministry, was to head a delegation of experts on Monday to Baghdad to discuss technical details with Iraqi officials, ministry sources said.

The cost of the new delivery system, according to reliable sources, varies between two and five million dollars a year. It is expected to save Jordan 50 million dollars a year, as costly road transport will be eliminated.

Jordan currently imports 18 million barrels of Iraqi oil a year, or 80 percent of its needs. The remainder comes from Saudi Arabia.

The country's annual bill for imported oil comes to around 400 million dollars.

#90127d9860 05/07/1990 ~French/German News Agency

PARIS (MAY 7) - British Aerospace and French company Aerospatiale said Monday it was to announce a major agreement Wednesday on studies for a new supersonic aircraft, which according to British press reports would be a "super Concorde" project with British Aerospace.

Aerospatiale refused to confirm or deny that its partner would be BAe, saying it would announce full details Wednesday.

British press reports cited BAe officials as saying the agreement would cover a feasibility study for a new version of the supersonic Concorde aircraft to carry 300 passengers.

Development would cost some 100 billion francs (17.5 billion dollars) and the aircraft would go into service at the beginning of the century.

The design of the new Concorde would be developed from two projects unveiled a year ago by BAe, one a 289-seater plane with a range of 10,000 kilometers (6,200 miles) and the other a 12-seater for transatlantic business passengers.

Concorde, which carries 100 passengers, went into operation 21 years ago and only 14 have been sold to Air France and British Airways, although BAe and Aerospatiale had hoped to sell at least 200.

Rolls-Royce, one of the builders of the Olympus engine used in Concorde, is currently working on a new propulsion system which would enable the new generation of supersonic craft to reach speeds of Mach 2.4, against the current Mach 2.

Preliminary studies by the industry and the British, French, U.S. and Soviet governments have suggested that a new generation of supersonic aircraft could by the year 2005 carry at least 200 passengers for more than 12,000 kilometers (7,500 miles) at a speed of Mach 2.5.

British press reports have said however that the new Concorde would fly at the same speed as the present model but would be 40 per cent lighter and quieter.

Whatever project is taken up, it is likely to face the same problems as the original Concorde, notably with financing, the British press said.

The Independent newspaper said that BAe was planning to ask the European Commission for some 10 billion francs (1.75 billion dollars) to get the project off the ground.

#90127d9880 05/07/1990 ~French/German News Agency

LUSAKA (MAY 7) - The Zambia Congress of Trades Unions (ZCTU), the country's largest labour organisation, has called for the scrapping of the national currency, the kwacha, and its replacement by the U.S. dollar or the British pound.

ZCTU general secretary Newstead Zimba said in an interview published in the Times of Zambia newspaper Monday that the government should immediately

accept reality "and adopt a currency that will sustain people's lives and improve their standard of living."

The kwacha's value had fallen to alarming levels since being devalued in June, slashing the value of salaries, he said.

"A managing director's salary is much lower than what a labourer earns in the United Staes."

"The government should swallow its pride and scrap the kwacha and revert to a currency which will help to lower the prices of commodities," Mr. Zimba said, proposing either the U.S. dollar or the British pound.

Zambia's per capita gross domestic product is below 200 U.S. dollars and inflation is running at close to 150 percent.

The government changed the denomination of bank notes in August in a bid to give the kwacha some strength, but the measure had very little effect.

AJACCIO, CORSICA (MAY 7) - Car ferry company the Societe Nationale Corse-Mediterranee (SNCM) said Monday it had chartered three planes to fly out 300 passengers stranded on this French mediterranean island since Sunday due to an indefinite seamen's strike.

They would be flown to Marseilles, where their cars would be taken by cargo vessel, SNCM said.

The seamens' union called the strike to press for the addition of three members to the 10-member crew of the car ferry l'Ile de Beaute on the grounds that it had been enlarged by 20 meters (yards).

The inaugural voyage of the enlarged ferry had been due to take place on May 12, but SNCM said Monday it was cancelling it because of the strike.

PARIS (MAY 7) - French group Aerospatiale said Monday it had signed a long-term cooperation agreement for missile weapon systems with Selenia of Italy.

The two had agreed "to carry out research and development, conceive industrial projects, and carry out commercial promotion together in Europe and the rest of the world," Aerospatiale said in a statement.

The agreement covers existing systems and new projects of both companies.

Aerospatiale and Selenia are already cooperating on ground-to-air systems within Eurosam under an agreement signed between the French and Italian governments in late 1988.

The two groups have also signed an agreement aimed at launching cooperation in the satellite sector, but details have yet to be worked out.

MEXICO CITY (MAY 7) EFE - In one of his first acts during a tour aimed at boosting the Vatican's ties with Mexico, Pope John Paul II beatified five Mexicans, including the country's most revered Indian, at a special mass held in the capital.

During the ceremony, at the Guadalupe Basilica Sunday, the Pope beatified 16th century Indian Juan Diego, the three Child Martyrs of Tlaxcala and 19th century priest Jose Maria de Yermo y Parres.

The mass came just hours after the Pope arrived in Mexico City for a seven-day visit which has fueled hopes of a renewal of diplomatic ties broken in 1867 when Mexico accused the Roman Catholic Church of amassing a vast fortune by exploiting the poor.

The visit is John Paul II's 47th out of Italy and his second to Mexico in 11 years.

Following the Mexican Revolution of 1917, the government denied the Catholic Church institutional legality and included anti-clerical measures in the constitution despite the fact that 90 percent of Mexicans describe themselves as Catholics.

Although officials on both sides have denied that the issue is up for discussion, observers have said a formal renewal of diplomatic ties would be brought up when the Pope meets with President Carlos Salinas de Gortari Monday.

The pontiff was greeted by some three million cheering people waving white handkerchiefs as they lined the route from the airport into Mexico City.

Observers said President Carlos Salinas de Gortari's decision to break the protocol and welcome the pope personally at Mexico City airport on his arrival was a sign of improving relations.

Salinas said he welcomed the pontiff with "emotion, joy and respect" and added he was visiting a "nation with many cultures and a deeply-felt

religiousness."

The Pope, in an address, said he was returning to Mexico for his second visit, "following the path of the first missionaries who arrived in America, almost 500 years ago."

Speaking to reporters during his flight, the Pope referred to the break in diplomatic ties saying there had been various attempts recently to improve matters.

"Naturally there is the problem of the constitution," he added.

Praising Salinas' work as president, John Paul II said, "In the future the situation may change (and be) more normal."

He said one of the reasons he had decided on the trip was to assure Mexicans and Latin Americans that although Western Europe was looking increasingly towards developing democracies among its eastern neigbours "they (Mexicans) have not lost the Pope's heart."

John Paul II also said he supported both Soviet President Mikhail Gorbachev's "perestroika" reforms as well as the Baltic republics' aspirations towards independence, adding that the two issues must be resolved through "dialogue".

"Certainly, perestroika must open up itself and I think it is already opening up to the aspirations of the peoples which comprise the Soviet Union, which (itself) is... a pluralist state," John Paul II told reporters.

"There is a problem of rights, not just of the individual but also of nations, especially nations whose rights have been severely violated," the Pope added.

During his visit, John Paul II will also travel to the cities of Veracruz, Aguascalientes, San Juan de Lagos, Durango, Chihuahua, Monterey, Tuxtla Gutierrez, Villahermosa and Zacatecas.

Over 30,000 policemen and troops have been assigned to guard the Pontiff, who will be using a number of specially-constructed "Popemobiles" to move around during his visit.

Officials estimate some 20 million people will turn out to see him in person while another 60 million will follow the tour on television.

#90127e0004 05/07/1990 ~Latin America New Agency

BOGOTA (MAY 7) EFE - Mushrooming political violence in Colombia has claimed the lives of 815 people in the first five months of the year, averaging nearly seven deaths per day.

Figures complied from the news media and reports of independent human rights groups also indicate that political-related killings account for only 11.71 percent of violent deaths over the same period -- a total of 6,960.

Slightly less than half the victims -- 397 -- of the political violence died in clashes between security forces and leftist guerrillas or gunmen hired by the country's powerful drug trafficking gangs.

Of the remaining 418 people killed betwen January and the end of April, roughly two in every three were labor union organizers, leftist politicians or human rights activists killed by the numerous right-wing death squads operating in the country.

The other victims were mostly cattle ranchers or peasants accused by the leftist guerrillas of being informers. The same proportions apply to the nearly 9,000 political deaths recorded since President Virgilio Barco took office in 1986.

Last year political violence claimed 3,211 lives, up from the 2,990 registered in 1988.

#90127e0005 05/07/1990 ~Latin America New Agency

SAN JOSE (MAY 7) EFE - President-elect Rafael Calderon Fournier Tuesday takes office in Costa Rica, Central America's most stable nation, pledging to resuscitate the social reformist policies introduced by his father and former president a half century ago.

His swearing-in will bring an end to the four-year term of Nobel Peace Prize winner Oscar Arias and to the eight-year rule of the social-democratic National Liberation Party (PLN).

A 41-year-old self acclaimed center-leftist twice unsuccessful in previous presidential polls, Calderon has vowed that improving the plight of the country's poor will be his chief task during his four-year term.

Born in Nicaragua, he is the son of late president Rafael Angel Calderon Guardia (1940-44) who is known as Costa Rica's "great social reformer" owing to the numerous policies he introduced to redistribute the country's resources.

Calderon junior takes office with the Social Christian Unity Party (PUSC),

which he founded in 1983 and which won 29 of the 57 parliamentary seats in elections February 4.

After some years living in Mexico, Calderon's family returned to Costa Rica in 1958 where he took up law studies.

He first became deputy at 25 and was designated foreign minister four years later.

In 1982 he made his first bid for president but was defeated by the PLN's Luis Alberto Monge. Four year's later he sought presidential office again but was pipped by Arias.

Calderon takes power of a nation considered to be the most stable in Central America with an annual economic growth rate average of 5 percent, one of the highest in Latin America.

Unemployment is under 5 percent while inflation has consistently been kept to single-digit figures.

He is committed to continuing Arias' foreign policies with an emphasis on boosting relations with the United States, while respecting the sovereignty of nations and striving for Latin American unity.

On the home front, while promising to concentrate on social policies to alleviate poverty, he has also vowed to speed up agricultural reforms and increase exports in the sector.

In office, he will be supported by two Vice Presidents, lawyer German Serrano, 50, and coffee entrepreneur Arnoldo Lopez, 49.

Married with four children, Calderon is a known baseball, football and tennis enthusiast.

#90127e0006 05/07/1990 ~Latin America New Agency

SANTIAGO (MAY 7) EFE - A deliberate snub last week by former Chilean dictator Gen. Augusto Pinochet is being interpreted as a sign that relations between the current civilian government and the Armed Forces are at an all-time low.

On Friday, Pinochet did not turn up at a luncheon that his successor, civilian President Patricio Aylwin, hosted for the heads of the Army, Navy Air Force and paramilitary Carabineros Police.

Currently Army Commander-in Chief, Pinochet last March handed over the presidency to Aylwin more than 16 years after he seized power in a bloody

coup.

But instead of attending the luncheon, Pinochet sent his number three, Chief of Staff Gen. Hugo Salas Wenzel, the former head of the country's disbanded secret police that had been strongly criticized by Aylwin that same week.

The day before the luncheon, Pinochet and Aylwin met privately for some 40 minutes but both have since declined to comment publicly on their talk.

However, the conservative Santiago daily La Segunda later reported that during the encounter, Pinochet told Aylwin in no uncertain terms that the Armed Forces were extremely upset by three aspects of the new adminsitration's policy.

The first of Pinochet's complaints was Aylwin's reference in a May Day speech to the former government as a "dictatorship". He also critized Aylwin for not consulting with the Armed Forces over policy matters in which they had a legitimate interest.

According to the paper, Pinochet named these as changes in the anti-terrorism and firearms laws and the code of military justice, and charged that Aylwin had an exaggerated fear of appearing to be toadying to the military.

Pinochet also criticized Aylwin's announcement the previous week confirming that a commission would be set up to investigate alleged human rights abuses committed under Pinochet's military government.

It is believed that hundreds of alleged leftist sympathizers were killed in the aftermath of the coup that brought Pinochet to power.

Pinochet is on record as saying, "The minute they touch one of my men, the rule of law comes to an end."

As if to drive home the point, the following day Pinochet sent as his stand-in to the luncheon meeting Gen. Salas, the former head of the National Information Center (CNI) secret police force which has been linked to many of the disappearances.

The paper said that Pinochet was also ticked off because he had requested to meet with Aylwin on April 27 to talk things over but Aylwin begged off, claiming a full schedule but offering to meet the following day.

Pinochet told Aylwin neither he nor his second in command would appear to be indifferent for what they perceived as deliberate slights by attending the Friday luncheon meeting at which the other Armed Forces chiefs, however, were present.

#90127e0007 05/07/1990 ~Latin America New Agency
SANTA CRUZ DE TENERIFE, SPAIN (MAY 7) EFE - Some 70 foreign inmates jailed on Spain's Canary Island of Tenerife entered their sixth day of a hunger strike Monday protesting a recent change in probation regulations, official reported.

They said the inmates, mostly Latin Americans and Africans, began the protest last Wednesday to press the island's prosecutor's office to drop a policy which leaves decisions on probationary release up to the courts where they were sentenced.

The inmates complain that such a policy diminishes their chances of being granted probation and being allowed to return to their home countries as most of them were sentenced by courts outside Tenerife.

Until recently, the jail's designated judge decided on the matter.

Joaquin Garcia, director of the Tenerife II jail, where the strike is being staged, said negotiations were being held to try to resolve the problem.

He said none of the strikers had so far suffered any serious health problems and that they were visited daily by doctors.

There are some 220 foreigners among the jail's inmates.

#90127e0008 05/07/1990 ~Latin America New Agency
JERUSALEM (MAY 7) EFE - A former Israeli Army colonel said Monday that Israeli-made weapons seized from Colombian drug kingpins earlier this year were supplied by Panamanians who had orginally bought them to topple ex-Panamanian dictator Manuel Antonio Noriega.

In comments published by the daily Jerusalem Post, ex-colonel Yair Klein claimed that Pamanamanian exiles had acquired the weapons from Israel in March 1989 in order to use them to overthrow Noriega.

However, the Panamanians called off their coup attempt at the last minute under pressure from the United States and sent the arms on to Colombian drug traffickers.

Klein, head of an Israeli security firm, said he had been asked by the dissident Panamanians to train them in preparation for the strike against Noriega.

The training was to have taken place on the Caribbean island of Antigua where the arms were sent to.

Klein and fellow Israeli Maurice Sarfati have been accused by U.S. officials of sending the arms to the notorious Colombian Medellin cocaine trafficking cartel, while Colombia has claimed that Klein also helped train cocaine traffickers in the use of arms.

The Israeli weapons were discovered in February on a ranch in Colombia owned by Medellin cartel military chief Jose Gonzalo Rodriguez Gacha, who was killed last December in a shootout with police.

Noriega was toppled when the United States invaded Panama in December 1989 and he was sent to Florida to face charges of drug trafficking and money laundering.

Among the Panamanian exiles to have been trained by Klein were former Panamanian ambassador to Tel Aviv, Lt. Col. Emilio Herrera Hasan, sacked from his post by Noriega.

Following Noriega's ouster, Herrera was appointed head of Panama's newly-created Public Force.

Cuban exiles were reportedly also to have taken part in Klein's military training course in Antigua.

The Israeli government has ordered an investigation into the affair.

#90127e0013 05/07/1990 ~Latin America New Agency

LA PAZ (MAY 7) EFE - By the year 2000, Bolivia could lose half its

forests and hundreds of species of plants and animals if timber companies and farmers continue cutting down trees without restrictions, an ecology report warned Monday.

According to a report complied by the independent Enviromental Defense League (LIDEMA), 27.4 million of Bolivia's 55.8 million hectares of forest land could be destroyed within 10 years.

LIDEMA said contracts granted by the government until 1988 had given timber firms control over 44 percent of the country's forests.

The situation has been worsened by farmers cutting down trees to create land for growing crops or for pasturing their animals, said the report.

Tropical rain forest covers 66 percent of Bolivian territory.

LIDEMA warned that the deforestation meant "the destruction of the natural habitat of hundreds of species of flora and fauna and the disappearance of a high percentage of ecological diversity."

It said a government project to replant forests and end concessions to timber companies for five years "makes everyone happy but is incomplete."

The organization said the plan "puts emphasis on forest resources but does not take into account the irrational use of land and the capture and illegal sale of endangered animals."

Between 1940 and 1988, 14.9 million animals, many of which were members of endangered species, were exported, dead or alive, to the United States, West Germany, France and Italy, according to research by enviromentalist Daniel Claure.

According to LIDENA, the true figure is closer to 45 million because hunters usually capture three of four animals to guarantee the export of one.

Bolivia is one of the richest nations in the world in plant, bird and animal species.

A report released recently by the Agriculture and Fisheries Ministry said the government had introduced its "Historical Ecological Pause" program to "put the brakes on the irrational exploitation of woods and to prevent national resources from destruction."

"The misuse of our national resources without any precaution is something that we inherited from colonial days and maintained until now," said the ministry report.

"Mistaken development policies and the lack of projects to preserve national resources have put Bolivia in danger of losing its forests," the report added.

GUATEMALA CITY (MAY 7) EFE - Guatemalan rescue workers have pulled seven more bodies from the rubble and wreckage caused by the weekend crash of a cargo plane in a densely populated area of the capital, raising the death toll to 23, authorities said Monday.

The Aeruak Transic Company cargo plane plunged into a row of houses in the south of Guatemala City Saturday, destroying 20 homes and leaving behind a trail of bodies.

A 200-meter fireball engulfed a group of children playing in the street.

Civil Aeronautics officials said the pilot told the control tower that he had a problem with one of the engines soon after taking off from the La Aurora International airport on a flight to Miami.

The DC-6's three U.S. crewmen died in the crash.

The wreckage of the U.S.-owned cargo plane was Monday being investigated by a team of experts from the United States to determine the cause of the disaster.

#90127e0019 05/07/1990 ~Latin America New Agency
MIAMI (MAY 7) EFE - U.S. Federal Investigation Bureau agents said Monday that they had uncovered a plot to kill members of Colombian President Virgilio Barco's government following the arrest of two Colombians in Florida over the weekend.

An FBI spokesman said the two men, one of whom claimed to be a close associate of Colombian cocaine cartel kingpin Pablo Escobar, were planning to buy Stinger ground-to-air missiles along with other weapons to use against Colombian government helicopters.

The two detainees, named as Luis Fernando Arcila-Giraldo, 28, and Alfredo Antonio Ramos-Tinoco, 47, are accused of receiving stolen goods, illegally exporting arms and possession with intent to distribute marijuana and cocaine.

"But the most interesting thing of all is that they had a million dollars to buy arms, especially missiles such as ground-to-air Stingers, as well as large automatic weapons," said the spokesman.

Asked to confirm press reports that the arms could have been bought to use in an assassination attempt against Barco, the FBI spokesman said, "The only thing we can say is that the arms would have been destined for attacks against the Colombian government."

In August of last year, Barco's government launched a massive crackdown on the country's drug trafficking cartels and began extraditing suspects wanted in the United States.

In retaliation, the narcotics kingpins launched a wave of attacks which have left several hundred people dead.

The FBI said the Colombians were arrested following an undercover operation by their agents posing as arms traffickers.

During meetings this year with the agents, Arcila-Giraldo claimed that he was a close associate of Escobar, the fugitive head of the notorious Medellin cartel and Colombia's most wanted man.

The Colombians offered the undercover agents more than a million dollars, allegedly profits from the sale of drugs, for the weapons.

#90127e0036 05/07/1990 ~Latin America New Agency
SAN SALVADOR (MAY 8) EFE - Salvadoran Deputy Defense Minister Orlando Zepeda denied Monday that he ordered last November's killing of six Jesuit

priests for which five soldiers and four officers, including a colonel, are facing charges.

Zepeda made the denial after a U.S. TV channel reported that Col. Guillermo Benavides, accused of ordering the slaying, reported directly to him.

The report was broadcast along with an interview with ex-Army colonel Sigifredo Ochoa Perez who asserted that Benavides received the order to kill the Jesuits from the top ranks of the Army.

Zepeda told press Monday that his ministerial duties were purely administrative and did not involve planning military operations as the U.S. broadcast had suggested.

Referring to the extent of his authority over the military academy headed by Benavides the deputy minister said, "I give orders for cadets to enter or leave the military school and for salary increases and construction work."

The six Jesuits, their housekeeper and her daughter were dragged from their beds on the Central American University campus and shot to death on November 16 at the height of a left-wing rebel offensive on the capital.

Benavides was in charge of security in the sector of the capital where the university is situated.

The deputy minister described Ochoa Perez's claims as "absurd" and denied that he held any motive to kill the Jesuits, adding that he was due to meet one of the victims, university rector Ignacio Ellacuria, when the slayings occurred.

Zepeda also denied that important evidence had been destroyed, or that the four cadets guarding the campus the night of the massacre had been sent abroad in order to obstruct judicial officials' investigation of the case.

Responding to a report by The New York Times that Benavides' diary and the military school's log book were done away with, Zepeda said, "I don't know if documents have been destroyed. If they have been that should be investigated."

Salvadoran judicial officials told The New York Times the transfer of the four cadets sent to study abroad and the disappearance of the diary and log book were a serious setback to the case.

The officials, who complained of a continued lack of cooperation and obstruction from the authorities, said that two other key witnesses had also not turned up to testify.

No Salvadoran military officer has ever been convicted of human rights crimes.

The U.S. House of Representatives Foreign Affairs Committee has voted to halt El Salvador's dlrs 85 million military aid package unless a thorough investigation into the slayings is carried out.

Human rights groups blame military-backed right-wing death squads for the deaths of up to 40,000 people in El Salvador's decade-old guerrilla war, in which some 75,000 people have been killed.

BEIJING (MAY 7) XINHUA -- LOCALLY-PRODUCED SOFT DRINKS ARE EXPECTED TO HAVE BIG SALES INCREASES THIS SUMMER IN THE CHINESE CAPITAL ACCORDING TO THE COMMERCE DEPARTMENT.

ACCORDING TO A REPORT IN "INFORMATION DAILY," ORDERS FOR NATURAL COCONUT DRINK AND "SHAOLIN COLA" HAVE DOUBLED AND SALES OF THESE DRINKS NOW EXCEED THOSE OF SOME IMPORTED DRINKS.

SALES OF SOFT DRINKS ARE EXPECTED TO REACH 63 MILLION YUAN THIS SUMMER, MATCHING THAT OF LAST YEAR.

THE SALES OF DRINKS IN ALUMINUM CANS AND PAPER CARTONS WILL DROP RESPECTIVELY BY EIGHT AND SIX PERCENT WHILE SALES OF BOTTLED DRINKS WILL INCREASE BY 16 PERCENT, THE COMMERCE DEPARTMENT PREDICTS.

COLOMBO (MAY 7) XINHUA - A 58-YEAR-OLD TAMIL MEMBER OF PARLIAMENT OF BATTICALOA DISTRICT IN EASTERN SRI LANKA WAS TODAY SHOT DEAD HERE AT AROUND 1:30 P.M. BY GUNMEN RIDING A MOTORCYCLE.

FIRST REPORTS SAID THAT TWO MEN ASTRIDE A MOTORBIKE HAD SHOT INTO THE MP'S CAR, KILLING SAM TAMBIMUTTU AND CRITICALLY WOUNDING HIS WIFE, AND THEN RODE OFF.

POLICE SAID THE MP AND HIS WIFE HAD DRIVEN TO THE CANADIAN HIGH COMMISSION TO GET A CANADIAN VISA AND HAD PARKED AT THE ENTRANCE TO THE HIGH COMMISSION WHEN AN UNIDENTIFIED GUNMAN OPENED FIRE.

A SECOND GUNMAN FIRED AT THE MP FROM BEHIND, ALSO INJURING MRS. TAMBIMUTTU. THE MP DIED BEFORE ADMISSION TO HOSPITAL.

THE MP'S WIFE WAS DESCRIBED AS BEING IN A SERIOUS CONDITION. TAMBIMUTTU WAS A LONG-STANDING MEMBER OF THE TAMIL UNITED LIBERATION FRONT (TULF) WHICH HAS 11 MEMBERS IN THE COUNTRY'S 225-MEMBER PARLIAMENT.

THE TULF IS ALIGNED TO THE PRO-INDIA EELAM PEOPLE'S REVOLUTIONARY LIBERATION FRONT (EPRLF), THE RULING PARTY IN THE NORTHEAST PROVINCIAL COUNCIL.

TAMBIMUTTU CONTESTED LAST YEAR'S PARLIAMENTARY ELECTION ON THE TULF COMMON LIST, THOUGH NOMINATED BY THE EPRLF, THE GROUP WITH WHICH HE STAYED.

TAMBIMUTTU WAS FORMERLY CHAIRMAN OF THE BATTICALOA CITIZENS' COMMITTEE AND A PROCTOR BY PROFESSION. HE PRACTISED AT THE BATTICALOA COURTS.

MRS. TAMBIMUTTU AND HER TEENAGE SON WERE ABDUCTED LAST DECEMBER BUT WERE RELEASED ON GOVERNMENT INTERVENTION. SINCE THEN THE FAMILY HAD BEEN LIVING IN COLOMBO.

NAIROBI (MAY 7) XINHUA - A CONSIGNMENT OF LETHAL ARMS WAS RECENTLY

SMUGGLED INTO KENYA THROUGH THE TOWN OF BUSIA BORDE - RING UGANDA, "KENYA TIMES" REPORTED TODAY.

WESTERN PROVINCIAL COMMISSIONER FRANCIS LEKOLOOL CONFIRMED THE ARMS SMUGGLING AND ORDERED CHIEFS AND SECURITY PERSONNEL IN THE PROVINCE TO LOOK OUT FOR THE SMUGGLERS.

THE RULING PARTY NEWSPAPER QUOTED WASIKE NDOMBI, MEMBER OF PARLIAMENT FOR LURAMBI OF THE PROVINCE, AS SAYING THAT THE GUNS WHICH CAME FROM A NEIGHBORING COUNTRY WERE FITTED WITH SOPHISTICATED SILENCERS AND THE SMUGGLERS ARE BELIEVED TO BE THE REMNANTS OF THE ANGOLA-MUSUMBIJI GANG.

KENYAN PRESIDENT DANIEL ARAP MOI SAID LAST WEEK THAT ARMED UGANDAN AGITATORS WERE INFILTRATING INTO KENYA IN AN ATTEMPT TO DISRUPT THE PEACE IN THE EAST AFRICAN COUNTRY.

PRESIDENT MOI REITERATED KENYA'S BELIEF IN GOOD NEIGHBORLINESS BUT ADDED THAT "KENYA WILL HAVE TO RECONSIDER ITS POSITION IF THIS IS NOT STOPPED FORTHWITH."

SHANGHAI (MAY 7) XINHUA -- THE SHANGHAI-DAIKEI DATA PROCESSING CO. LTD, A SINO-JAPANESE JOINT VENTURE, OPENED IN THE SHANGHAI HIGH-TECH PARK TODAY.

THE COMPANY, OPERATED BY JAPAN'S DAIKEI COMPANY AND THE SHANGHAI INVESTMENT AND TRUST CORPORATION, IS INVOLVED IN COMPUTERIZED DATA PROCESSING AND DEVELOPMENT OF HARDWARE AND SOFTWARE. WITH A FLOOR SPACE OF 4,500 SQ M AND WITH 260 EMPLOYEES, IT HAS IMPORTED TECHNOLOGY AND EQUIPMENT FROM JAPAN. THE INVESTMENT AMOUNTS SO FAR TO THREE MILLION U.S. DOLLARS, OF WHICH THE JAPANESE SIDE HAS PROVIDED 80 PERCENT AND THE CHINESE SIDE, 20 PERCENT.

XU HUILIANG, GENERAL MANAGER, SAID THE JOINT VENTURE PLANS TO EXPAND ITS PRODUCTION SCALE NEXT YEAR, INCREASE ITS WORKFORCE TO TO OVER 1,000 AND CONCENTRATE ITS EFFORTS ON DEVELOPMENT OF SOFTWARE.

DAIKEI, A MAJOR JAPANESE DATA-PROCESSING COMPANY, SET UP A JOINT DATA-PROCESSING FIRM IN THE SHENZHEN SPECIAL ECONOMIC ZONE IN 1986.

XU SAID THAT DAIKEI SELECTED SHANGHAI TO SET UP THE SECOND JOINT VENTURE IN CHINA BECAUSE SHANGHAI HAS A LARGE NUMBER OF SCIENTISTS AND SKILLED WORKERS, SUFFICIENT POWER SUPPLY AND DAILY FLIGHTS TO JAPAN.

IN THE SHANGHAI HIGH-TECH PARK THERE ARE 14 SINO-FOREIGN JOINT VENTURE AND WHOLLY FOREIGN-INVESTED FIRMS WITH INVESTMENT TOTALLING NEARLY 200 MILLION U.S. DOLLARS. THE INVESTORS INCLUDE THE 3M COMPANY AND AT&T OF THE UNITED STATES, PHILIPS OF HOLLAND, BELL OF BELGIUM AND AIR-LIQUID OF FRANCE.

JAPAN IS THE THIRD-LARGEST INVESTOR IN SHANGHAI AFTER HONG KONG AND THE UNITED STATES. DIRECT JAPANESE INVESTMENT AMOUNTS TO 380 MILLION U.S. DOLLARS AND THE FIRMS WITH JAPANESE INTERESTS BREAK DOWN INTO 80 JOINT VENTURES, 17 CO-OPERATIVE ENTERPRISES AND FOUR FIRMS WITH SOLELY JAPANESE FUNDS.

HANGZHOU (MAY 7) XINHUA -- A TRADE AND INVESTMENT DELEGATION REPRESENTING 63 TAIWAN COMPANIES AND ENTERPRISES IS VISITING ZHEJIANG PROVINCE.

DURING THEIR THREE-DAY STAY IN THE COASTAL PROVINCE FROM MAY 6 TO 8, THE DELEGATION HAS BEEN DIVIDED INTO EIGHT GROUPS TO LEARN ABOUT THE LOCAL MACHINE-BUILDING, HARDWARE, ELECTRONICS, FOOD, TEXTILE AND CLOTHING, LEATHER AND SHOE-MAKING AND PLASTICS INDUSTRIES.

OFFICIALS FROM THE PROVINCIAL TRADE DEPARTMENTS HAVE BRIEFED THEM ON THE OPEN POLICY, INVESTMENT ENVIRONMENT AND DEVELOPMENT OF FOREIGN ECONOMIC RELATIONS AND TRADE IN RECENT YEARS.

MEMBERS OF THE DELEGATION, IN TURN, HAVE BRIEFED THEIR HOSTS ON TAIWAN'S ECONOMIC SITUATION AND THEIR INVESTMENT PLANS.

ON MAY 7 REPRESENTATIVES FROM THE PROVINCIAL TRADE DEPARTMENTS AND HANGZHOU, NINGBO AND WENZHOU CITIES INFORMED THE DELEGATION ABOUT PREFERENTIAL TREATMENT FOR TAIWAN INVESTORS AND SPECIFIC CONDITIONS IN THE DEVELOPMENT ZONES IN THE THREE CITIES.

THIS EVENING ZHEJIANG GOVERNOR SHEN ZULUN MET WITH XIONG QIFANG, HEAD OF THE TAIWAN DELEGATION, AND THEN HOSTED A BANQUET FOR ALL THE DELEGATES.

SHEN SAID THAT ZHEJIANG HAS MANY ADVANTAGES FOR DEVELOPING ECONOMIC CO-OPERATION AND TRADE WITH TAIWAN AND IT WELCOMES MORE TAIWAN BUSINESSMEN TO VISIT.

XIONG SAID THAT HE HIMSELF AND THE OTHER MEMBERS OF THE DELEGATION HAVE LONG LOOKED FORWARD TO THE VISIT AND INVESTING IN ZHEJIANG. THEIR VISIT HAS ALREADY MADE THEM CONFIDENT ABOUT THE ECONOMIC DEVELOPMENT OF ZHEJIANG PROVINCE, HE ADDED.

COLOMBO (MAY 7) XINHUA - ENGINE FAILURE WAS THE CAUSE OF THE HELICOPTER CRASH IN CENTRAL SRI LANKA LAST SATURDAY (MAY 5) IN WHICH ALL SIX PERSONS ON BOARD WERE KILLED, SRI LANKAN AIR FORCE HEADQUARTERS SAID HERE TODAY.

THE AMERICAN-MADE BELL 212 HELICOPTER CRASHED AROUND 4:35 P.M. SATURDAY OVER THE JUNGLE OFF SIGIRIYA IN CENTRAL SRI LANKA.

SRI LANKAN AIR FORCE AUTHORITIES IN COLOMBO FIRMLY RULED OUT SABOTAGE, AN ATTACK FROM THE GROUND OR INCLEMENT WEATHER AS CAUSES FOR THE CRASH.

A TOP LEVEL INVESTIGATING TEAM IS NOW CONDUCTING AN INVESTIGATION IN SIGIRIYA, SITE OF THE CRASH.

COMMANDER OF THE AIR FORCE, AIR MARSHAL TERENCE GUNAWARDENE, WHO WAS AT SIGIRIYA ON A MISSION AT THE TIME OF THE CRASH, WAS ONE OF THE FIRST TO RUSH TO THE SPOT ON HEARING OF THE CRASH.

THE BODIES OF THE DECEASED WERE BROUGHT TO COLOMBO SUNDAY AND WERE DUE TO BE FLOWN TO THEIR RESPECTIVE NATIVE TO BE HANDED OVER TO THE FAMILIES.

SINGAPORE (MAY 7) XINHUA -- INDONESIA HAS TEMPORARILY ALLOWED THE IMPORT OF 3,000 BUILT-UP TRUCKS OF 2.5 TON TO 24 TON CAPACITIES TO MEET THE DOMESTIC DEMAND, THE JAKARTA POST REPORTED TODAY.

IT QUOTED THE DIRECTOR GENERAL OF MACHINERY, BASIC METAL AND ELECTRONICS INDUSTRIES SOEPARNO PRAWIRODIREDJO AS SAYING THAT THE IMPORT OF BUILT-UP AUTOMOBILES WAS TEMPORARILY ALLOWED AS THE LOCAL PRODUCTION COULD NOT MEET THE DEMAND.

HE SAID THE DEMAND FOR TRUCKS OF 2.5-24 TON CAPACITIES, WHICH REACHED 28,205 UNITS LAST YEAR, IS EXPECTED TO SHARPLY INCREASE TO 44,000 UNITS THIS YEAR.

THE IMPORTS OF 3,000 TRUCKS WILL FILL THE GAP BETWEEN HIGH DEMAND AND ACTUAL PRODUCTION, WHICH WAS STILL BELOW THE INSTALLED CAPACITY OF AROUND 51,000 UNITS A YEAR.

BUILT-UP AUTOMOBILES ARE BANNED FROM IMPORTING IN ORDER TO SUPPORT THE LOCAL AUTOMOTIVE INDUSTRY, WHILE IMPORTS OF AUTOMOBILE COMPONENTS ARE ALLOWED FOR ASSEMBLAGE.

HOWEVER, SOEPARNO SAID THE ASSEMBLERS OF SUCH TRUCKS FAILED TO PRODUCE AT FULL CAPACITY DUE TO DIFFICULTIES IN OBTAINING COMPONENTS LIKE WHEEL RIMS, CHASSIS, TRANSMISSIONS, WHEEL STEERINGS, CLUTCHES, ENGINES AND BODIES.

MANILA (MAY 7) XINHUA - PHILIPPINE NAVY FLAG OFFICER IN COMMAND REAR ADMIRAL MARIANO DUMANCAS ANNOUNCED TODAY THAT THE REVAMP OF MAJOR STAFF AND FIELD COMMAND POSITIONS IS ONGOING IN THE PHILIPPINE NAVY.

DUMANCAS SAID THE RESHUFFLE STARTED WITH THE DESIGNATION OF CAPTAIN EDUARDO DOMINGO AS CHIEF OF NAVAL STAFF AND FOUR OTHER OFFICERS HOLDING NEW POSITIONS IN THE NAVAL STAFF.

DESIGNATED ASIDE FROM DOMINGO WERE NAVY CAPTAIN ERIBERTO VARONA AS ASSISTANT CHIEF OF NAVAL STAFF FOR PLANS AND PROGRAMS; CAPTAIN CAMILO SANTOS AS ASSISTANT CHIEF OF NAVAL STAFF FOR EDUCATION AND TRAINING; CAPTAIN TIRSO ROSAL AS ASSISTANT CHIEF OF NAVAL STAFF FOR WEAPONS, COMMUNICATIONS AND ELECTRONICS; AND COMMANDER REUBEN LISTA AS NAVAL PUBLIC INFORMATION OFFICER AND SPOKESMAN OF THE PHILIPINE NAVY FLAG OFFICER IN COMMAND.

THE PHILIPPINE NAVY CHIEF SAID THE ON-GOING REVAMP IS A MOVE TO ENHANCE CAPABILITY AND EFFICIENCY IN THE NAVAL ORGANIZATION AND TO INFUSE FRESH BLOOD INTO THE SERVICE.

DUMANCAS ADDED THAT THE RESHUFFLE IS ALSO DUE TO THE RETIREMENT OF SEVERAL FLAG OFFICERS LAST MONTH.

#90127h0130 05/07/1990 ~Chinese News Agency

COLOMBO (MAY 7) XINHUA - IN THE SEQUEL TO THE SIGIRIYA VILLAGE HOTEL STORM INCIDENT ON SATURDAY, THE DEFENSE AUTHORITIES IMMEDIATELY WENT INTO THE FORMULATION OF A JOINT POLICE ARMED SERVICES SECURITY PLAN TO PREVENT SIMILAR INCIDENTS, STATE MINISTER FOR TOURISM GAMINI LOKUGE SAID HERE.

THE SECURITY PLAN COMES IN THE WAKE OF A HIGH-LEVEL DIRECTIVE TO THE ARMED SERVICES TO CARRY OUT A COMBINED OPERATION AND FLUSH OUT THE UNKNOWN PERSONS WHO HAD BROKEN INTO TWENTY ROOMS OF THE VILLAGE HOTEL IN CENTRAL ISLAND AND GOT AWAY WITH EXPENSIVE CAMERAS, JEWELLERY AND CASH ESTIMATED AT OVER ONE MILLION RUPEES (25,641 U.S. DOLLARS), THE STATE MINISTER SAID.

HE SAID THAT GOVERNMENT HAS DECIDED TO IMMEDIATELY IMPLEMENT THIS SECURITY PLAN THAT WOULD ENABLE ALL TOURIST HOTELS IN RESORT AREAS TO BE PROVIDED WITH SECURITY COVER BY THE SECURITY FORCES ON A PERMANENT BASIS THROUGH POLICE STATIONS IN AREAS THAT THESE TOURIST HOTELS ARE LOCATED, HE SAID.

UNDER THIS SECURITY ARRANGEMENT, ALL TOURIST HOTELS HAVE BEEN REQUIRED TO PROVIDE STATISTICS OF TOURISTS AND THEIR TRAVEL-ITINERARIES TO POLICE STATIONS IN THEIR RESPECTIVE AREAS DAILY. ADEQUATE SECURITY SUPPORT WOULD BE PROVIDED TO THE HOTELS ON THE BASIS OF SUCH DATA.

TOKYO (MAY 7) XINHUA - THE JAPANESE DEFENSE AGENCY TODAY VIRTUALLY REJECTED A THAI PROPOSAL TO CONDUCT JOINT EXERCISES BETWEEN THE TWO COUNTRIES' NAVIES.

VICE-DIRECOTR GENERAL OF THE DEFENSE AGENCY SEIKI NISHIHIRO TOLD REPORTERS THAT "WE COULD HAVE JOINT EXERCISE WITH ANY NATION IF WE COULD EXPECT MUTUAL TECHNICAL BETTERMENT," AND THAT "THE POINT IS WHETHER IT (A JAPANESE-THAI NAVAL EXERCISE) IS OF MERIT."

THE OFFER WAS MADE BY THAI PRIME MINISTER CHATICHAI CHOONHAVAN LAST WEEK AT A MEETING IN BANGKOK WITH DIRECTOR GENERAL OF THE JAPANESE DEFENSE AGENCY YOZO ISHIKAWA.

EARLIER TODAY, ISHIKAWA BRIEFED PRIME MINISTER TOSHIKI KAIFU ON CHATICHAI'S PROPOSAL, ACCORDING TO LOCAL PRESS REPORTS.

ISHIKAWA SAID HE TOLD CHATICHAI THAT HE WILL LET EXPERTS CAREFULLY

CONSIDER THE THAI PROPOSAL BECAUSE IT IS NECESSARY TO JUDGE WHETHER THE STYLE, SCALE AND PLACE OF SUCH A JOINT EXERCISE IS CONSTITUTIONAL AND WHETHER IT IS REASONABLE FROM A FOREIGN POLICY VIEWPOINT.

A SENIOR DEFENSE AGENCY OFFICIAL, WHO ASKED NOT TO BE NAMED, SAID LATER THAT ISHIKAWA SHOULD HAVE REJECTED CHATICHAI'S PROPOSAL INSTEAD OF GIVING A VAGUE REPLY, ACCORDING TO KYODO NEWS SERVICE.

#90127h0132 05/07/1990 ~Chinese News Agency

MANILA (MAY 7) XINHUA - THE U.S. GOVERNMENT MAY HAVE ADVANCE INFORMATION ON THE FAILED DECEMBER 1989 COUP ATTEMPT IN THE PHILIPPINES, A PHILIPPINE GENERAL DISCLOSED HERE TODAY.

TESTIFYING BEFORE THE PHILIPPINE SENATE COMMITTEE ON NATIONAL DEFENSE AND SECURITY, BRIGADIER GENERAL ARTEMIO TADIAR, SUBIC NAVAL BASE DEPUTY COMMANDER, SAID THAT ONE WEEK BEFORE THE FAILED COUP LAST DECEMBER 1-9, AT LEAST 20,000 U.S. COMBAT TROOPS LANDED AT THE U.S. SUBIC BASE IN OLANGAPO CITY ALLEGEDLY FOR "REST AND RECREATION."

TADIAR SAID THE BUILD-UP WAS HIGHLY UNUSUAL AND COULD ONLY MEAN THAT THE U.S. HAD ADVANCE INFORMATION OF THE IMPENDING COUP.

HE ADDED THAT A U.S. TROOP CONCENTRATION OF THIS SIZE NEVER HAPPENED AFTER THE FEBRUARY 1986 REVOLUTION IN THE PHILIPPINES.

TADIAR SAID THAT DURING THE LAST WEEK OF NOVEMBER 1989, TWO BATTLE CARRIER GROUPS, INSTEAD OF ONE GROUP, DOCKED AT SUBIC BASE. HE SAID ONE OF THE GROUPS, WHICH CAME FROM JAPAN, WAS THE ONE SCHEDULED TO MAKE A CALL AT THE BASE. THE OTHER BATTLE GROUP CAME FROM THAILAND WHERE THE U.S. HAD CONDUCTED A JOINT MILITARY EXERCISE.

TADIAR ALSO SAID THAT ASIDE FROM THE 14,000 MILITARY PERSONNEL THAT MAN THE TWO CARRIER GROUPS, ANOTHER 6,000 MARINES ARRIVED AT SUBIC DURING THE SAME WEEK.

TADIAR SAID USUALLY THERE ARE ONLY 600 TO 800 MARINES IN THE BASE ON ANY DAY, BUT U.S. FIGURES PEG THE USUAL NUMBER OF FORCES STATIONED AT SUBIC AT ABOUT 17,000 SERVICEMEN AND PERSONNEL. THE NUMBER USUALLY FLUCTUATES DEPENDING ON TROOP MOVEMENTS AND REASSIGNMENTS.

TADIAR SAID THAT HE IMMEDIATELY CONFRONTED THE U.S. MILITARY AUTHORITIES REGARDING THE UNUSUAL TROOP MOVEMENT.

THE U.S. MILITARY AUTHORITIES TOLD TADIAR THEY WERE ON R AND R (REST AND RECREATION) AFTER PARTICIPATING IN A BATTLE EXERCISE IN THAILAND.

TADIAR SAID THE U.S. MARINES LEFT ONLY A WEEK AFTER DECEMBER 9, THE LAST DAY OF THE COUP.

PHILIPPINE SENATOR ERNESTO MACEDA, CHAIRMAN OF THE SENATE COMMITTEE, SAID THAT THE ARRIVAL OF AMERICAN SOLDIERS BOLSTERED HIS COMMITTEE'S SUSPICION THAT THE U.S. KNEW (IN ADVANCE) ABOUT THE DECEMBER COUP.

THE DECEMBER COUP, THE MOST SERIOUS AND BLOODIEST IN THE LAST FOUR YEARS, THREATENED THE SURVIVAL OF THE AQUINO ADMINISTRATION. SOME 130 PEOPLE WERE KILLED AND 600 WOUNDED IN THE MILITARY PUTSCH.

MACEDA SAID IF THE U.S. GOVERNMENT HAD INFORMED THE AQUINO GOVERNMENT OF THE PLANNED COUP, "IT COULD HAVE GIVEN US ADDITIONAL INFORMATION TO PREEMPT THE INCIDENT."

#90127h0138 05/07/1990 ~Chinese News Agency

SINGAPORE (MAY 7) XINHUA -- INDONESIA'S TEXTILE EXPORTS REACHED TWO BILLION U.S. DOLLARS LAST YEAR, ACCORDING TO A REPORT BY "THE INDONESIA TIMES" TODAY.

IT QUOTED INDONESIAN INDUSTRY MINISTER HARTARTO AS SAYING THAT FORTY PERCENT OF THE TWO BILLION U.S. DOLLARS OF TEXTILE EXPORTS WENT TO NON-QUOTA MARKET.

THE COUNTRY'S TEXTILE EXPORTS ARE EXPECTED TO INCREASE TO 2.5 BILLION U.S. DOLLARS THIS YEAR, THE REPORT SAID.

ACCORDING TO HARTARTO, 110 NEW TEXTILE PROJECTS WILL BE INAUGURATED BY INDONESIAN PRESIDENT SOEHARTO THIS YEAR. MOST OF THESE PROJECTS ARE EXPORT ORIENTED.

A GROUND-BREAKING CEREMONY FOR THE CONSTRUCTION OF A 70 MILLION U.S. DOLLAR-POLYESTER FIBER PLANT WAS HELD IN PURWAKARTA, WEST JAVA, LAST WEEKEND.

THE PLANT WILL PRODUCE SYNTHETIC FIBER, POLYESTER TEXTURED YARN AND POLYESTER FILAMENT YARN.

INDONESIA WILL NO LONGER IMPORT SUCH PRODUCTS WHEN THE PLANT COMES ON STREAM IN THE MIDDLE OF 1991 AS IT WOULD BE ABLE TO TOTALLY MEET DOMESTIC DEMAND, THE PAPER SAID.

GABORONE (MAY 7) XINHUA - MEMBERS OF THE AFRICAN NATIONAL CONGRESS (ANC)

DELEGATION TODAY BRIEFED 24 SOUTH AFRICAN WHITE CLERICS ON ITS TALKS WITH THE GOVERNMENT LAST WEEK, ACCORDING TO AN AFRICAN NEWS ORGANIZATION REPORT.

AFTER THE BRIEFING, JOE SLOVO, GENERAL SECRETARY OF THE SOUTH AFRICAN COMMUNIST PARTY, SAID THAT IT IS NECESSARY TO WORK OUT A DISPENSATION IN SOUTH AFRICA WHICH COULD ONLY MEAN MAJORITY RULE.

MR. SLOVO ATTENDED THE LAST WEEK TALKS AS A MEMBER OF THE ANC DELEGATION.

THE ANC AND THE GOVERNMENT HAD THREE DAYS OF TALKS ABOUT THE ISSUES THE TWO SIDES REGARDED AS OBSTACLES TO REAL NEGOTIATIONS ON SOUTH AFRICA'S POLITICAL FUTURE. THE ANC AND PRETORIA DESCRIBED THE MEETING AS A SUCCESS AFTER THEY AGREED ON SOME ISSUES.

MR. SLOVO SAID THE MOVE TOWARDS DEMOCRACY IN SOUTH AFRICA IS NOW IRREVERSIBLE.

ON SANCTIONS, HE SAID THAT THE IMPOSITION OF FURTHER SANCTIONS AGAINST SOUTH AFRICA SHOULD DEPEND ON FUTURE POLITICAL PROGRESS IN THE COUNTRY.

SPEAKING ON BEHALF OF THE RELIGIOUS LEADERS, GENERAL SECRETARY OF THE SOUTH AFRICAN COUNCIL OF CHURCHES (SACC) REVEREND FRANK CHIKANE SAID THAT THEY ARE ENCOURAGED BY THE TALKS BETWEEN THE ANC AND PRETORIA.

"RELIGIOUS LEADERS ARE VERY CONCERNED ABOUT THE SITUATION IN THE COUNTRY", HE SAID, ADDING THAT IT IS ONLY THROUGH AN END TO APARTHEID THAT PEACE CAN BE ACHIEVED.

"THAT IS WHY WE CALL FOR NEGOTIATIONS TO SOLVE THE PROBLEMS OF THE COUNTRY " HE SAID.

CAIRO (MAY 7) XINHUA - ICELAND'S PREMIER STEIGRIMUR HERMANNSSON SAID TODAY THAT HIS COUNTRY SUPPORTS EGYPT'S PEACE EFFORTS FOR REACHING A MIDDLE EAST PEACE SETTLEMENT.

THE MIDDLE EAST NEWS AGENCY (MENA) QUOTED HERMANNSSON AS SAYING THIS IN A STATEMENT AFTER HIS MEETING WITH EGYPTIAN PRESIDENT HOSNI MUBARAK HERE.

HE SAID HE DISCUSSED WITH MUBARAK EGYPT'S 10-POINT PEACE PROPOSAL AS WELL AS U.S. SECRETARY OF STATE JAMES BAKER'S FIVE-POINT PLAN ON OPENING DIRECT DIALOGUE BETWEEN ISRAELIS AND PALESTINIANS.

"WE AGREE WITH MUBARAK THAT TIME IS NOT RIPE YET TO HOLD SUCH (PALESTINIAN-ISRAELI) TALKS BECAUSE OF THE CURRENT POLITICAL CRISIS IN ISRAEL AND (ISRAELI CARETAKER PRIME MINISTER YITZHAK) SHAMIR'S

INTRANSIGENT STAND," HERMANNSSON NOTED.

HE STRESSED THAT ICELAND AND EGYPT SHARE IDENTICAL VIEWS REGARDING THE SITUATION IN THE MIDDLE EAST.

MEANWHILE, THE ICELAND PREMIER ALSO HELD OFFICIAL TALKS HERE TODAY WITH HIS EGYPTIAN COUNTERPART ATEF SEDKI.

SEDKI TOLD REPORTERS AFTER THE MEETING THAT HERMANNSSON STRESSED DURING THE TALKS HIS COUNTRY'S UNDERSTANDING AND SUPPORT FOR EGYPT'S ECONOMIC SITUATION IN ALL INTERNATIONAL FORUMS AND FINANCIAL INSTITUTIONS ESPECIALLY THE INTERNATIONAL MONETARY FUND (IMF) AND THE WORLD BANK.

SEDKI ADDED THAT THE TALKS TOUCHED ON BOOSTING BILATERAL RELATIONS, PARTICULARLY IN THE ECONOMIC AND TRADE FIELDS.

HERMANNSSON ARRIVED HERE SUNDAY FOR A SIX-DAY OFFICIAL VISIT TO EGYPT. HE IS EXPECTED TO MEET PALESTINIAN PRESIDENT YASSER ARAFAT IN TUNIS LATER THIS WEEK BEFORE TRAVELLING TO CZECHOSLOVAKIA.

SINGAPORE (MAY 7) KYODO - SINGAPORE'S GROSS DOMESTIC PRODUCT (GDP) GREW 10 PERCENT IN THE FIRST QUARTER OF THIS YEAR, A MORE PROMISING START COMPARED WITH THE 9.6 PERCENT GROWTH POSTED IN THE SAME PERIOD LAST YEAR, THE MINISTRY OF TRADE AND INDUSTRY ANNOUNCED MONDAY.

THE FIGURE WAS ALSO HIGHER THAN LAST QUARTER'S GROWTH RATE OF 8.9 PERCENT.

SINGAPORE'S ECONOMY HAD GROWN 9.2 PERCENT LAST YEAR AND 11 PERCENT IN 1988. THIS YEAR, ECONOMISTS EXPECT THE GROWTH RATE TO SLOW DOWN TO AROUND 6 PERCENT.

EXCEPT FOR CONSTRUCTION, ALL THE MAJOR SECTORS SCORED DOUBLE-DIGIT GROWTHS AND GREW FASTER THAN THE PREVIOUS QUARTER, THE MINISTRY SAID.

THE FINANCIAL AND BUSINESS SERVICES SECTOR LED GROWTH BY EXPANDING 17 PERCENT, FOLLOWED BY THE COMMERCE SECTOR WHICH GREW 14 PERCENT AND THE MANUFACTURING SECTOR WHICH ROSE BY 12 PERCENT.

HOWEVER, GROWTH IN THE TRANSPORTATION AND COMMUNICATIONS SECTOR WAS SLOWER AT 9.9 PERCENT WHILE THE CONSTRUCTION SECTOR LAGGED FAR BEHIND WITH ONLY 4.4 PERCENT EXPANSION.

#90127k0069 05/07/1990 ~Japanese News Agency

TOKYO (MAY 7) KYODO - EXPORTS OF JAPANESE-MADE CIGARETTES HIT A RECORD HIGH IN FISCAL 1989 TO TOTAL 6,307 MILLION PIECES, UP 48 PERCENT FROM THE

PRECEDING YEAR, JAPAN TOBACCO INC. SAID MONDAY.

THE RECORD JUMP REFLECTS BOOMING OVERSEAS TRIPS BY JAPANESE, THE COMPANY SAID.

AN INCREASING NUMBER OF JAPANESE TRAVELING ABROAD, THE COMPANY SAID, HAD BOUGHT THEIR FAVORITE JAPANESE CIGARETTES, SUCH AS ''SEVEN STARS,'' IN VISITED COUNTRIES.

THE COMPANY ALSO CITED THE GROWING POPULARITY IN RECENT YEARS OF JAPANESE CIGARETTES' ''MILD TASTE'' AMONG FOREIGN SMOKERS BEHIND AN INCREASE IN THE COUNTRY'S CIGARETTE EXPORTS.

SOUTHEAST ASIAN NATIONS AND TERRITORIES, INCLUDING HONG KONG, CHINA, AND SINGAPORE, ACCOUNTED FOR ABOUT 70 PERCENT OF THE TOTAL EXPORT VOLUME, FOLLOWED BY THE MIDDLE EAST WITH 20 PERCENT, AND THE UNITED STATES AND OTHER FOREIGN COUNTRIES WITH THE REMAINING 10 PERCENT, ACCORDING TO THE COMPANY'S SURVEY.

OF THE TOTAL EXPORTS, NET EXPORT VOLUME, EXCLUDING SALES AT DUTY-FREE SHOPS AT THE MAJOR INTERNATIONAL AIRPORTS, POSTED A 48 PERCENT JUMP FROM THE PREVIOUS YEAR TO 4,725 MILLION CIGARETTES.

SALES AT SUCH DUTY-FREE SHOPS, WHICH ARE CLASSIFIED AS EXPORTS UNDER TRADE RULES, ALSO SHOWED A YEAR-ON-YEAR INCREASE OF 47 PERCENT TO 1,582 MILLION CIGARETTES, THE COMPANY SAID.

#90127p1320 05/07/1990 ~PR Newswire

SCOTTS VALLEY, CA (MAY 7) PR NEWSWIRE - Plessey Semiconductors is now shipping the world's first intelligent, user-customized, remote-programmable silicon chip.

The chip can be programmed to intelligently and independently change its own wiring, allowing the chip to correct any problems and adapt to new situations. A remote personal computer can also rewire the chip, making it a natural for satellite applications. And costs are low enough that it could wind up in vending machines. In both cases, repairs can be made without picking up a screwdriver.

Traditionally, several weeks are required to program such information. Now, these chips can be programmed in only hours and at virtually zero cost with information to control electronic products at a customer's desk using a personal computer.

Called the "ERA," for electrically reconfigurable arrays, Plessey's chips are different from others on the market because once in use they can be

rewired in less than a thousandth of a second -- while the chip is still operating.

These chips are a type of application-specific integrated circuit (ASIC) called field-programmable gate arrays (FPGA). Plessey anticipates a large demand for its ERA products, especially because field-programmable gate arrays are the fastest growing digital logic market sector.

"In a recent semiconductor survey, Dataquest estimated that the field-programmable gate-array market sector will grow from $28 million in 1988 to $456 million in 1994," said Gleason. "As Plessey Semiconductors intends to be the first vendor to ship field-programmable gate arrays with equivalent gate counts of up 100K, we expect to gain a sizable market share of that dramatically expanding market."

Unlike other offerings in the field-programmable gate-array arena, the design of the ERA will allow customers to move to larger chips without switching to a completely different architecture. Also, there is no non-recurring expense (NRE) in prototyping the ERA devices, which reduces system cost.

Based in Swindon, U.K., and with North American headquarters in Scotts Valley, Plessey Semiconductors has three fabrication facilities in England manufacturing CMOS and bipolar ICs. In addition to its ERA program, Plessey Semiconductors has developed a comprehensive range of standard parts and CMOS and bipolar arrays serving the industrial and consumer application market sectors.

CONTACT: Steve Brightfield of Plessey Semiconductors, 408-439-6074; or Jim Burkhardt of Alliance Public Relations, 408-748-0293, for Plessey Semiconductors.

IRVINE, CA (MAY 7) PR NEWSWIRE - Fluor Corp. (NYSE: FLR) announced today that it has signed an agreement with Homestake Mining Company to acquire their 42.5 percent interest in Doe Run Company for $125 million, giving Fluor full and controlling ownership of its lead investment.

Les G. McCraw, chief executive officer, said: "This purchase does not signal a change in Fluor's long-term strategy of focusing on engineering and construction through Fluor Daniel, its EC unit. Full ownership merely enhances Doe Run's investment value and increases the strategic options available to Fluor."

Completion of the transaction is subject to normal governmental reviews and approvals.

The Doe Run Company is the largest fully integrated lead producer in North America, with approximately 60 percent of the total U.S. market. Doe Run intends to expand its activities in the secondary or recycled lead market. The largest end-market for lead metal is new and replacement batteries for automobiles.

Fluor Corp. is an international engineering, construction and technical services company, with investments in coal and lead.

CONTACT: For media relations: Rick Maslin, 714-975-3967, and for investor relations: Lila Churney, 714-975-3909, both of Fluor

CARTHAGE, MO (MAY 7) PR NEWSWIRE - Leggett & Platt Inc. (NYSE: LEG) announced today that it has extended the expiration date of its cash tender offer to purchase all of the common stock of Dresher Inc. (NYSE: DSR) until 11:59 p.m., EDT, Wednesday, May 9, 1990. The tender offer was originally scheduled to expire on May 4, 1990.

Leggett & Platt is offering to purchase all outstanding shares of Dresher's common stock for $2.50 per share. Leggett & Platt reported that as of May 4, approximately 2,544,000 shares (or 56 percent) of the outstanding Dresher common stock had been tendered, including 11,567 shares tendered pursuant to notices of guaranteed delivery.

The extension is due to the previously announced request by the Antitrust Division of the Department of Justice for additional information

concerning Leggett & Platt's acquisition of Dresher. Leggett & Platt and Dresher continue to believe that the purchase of the Dresher shares under the tender offer will not violate the antitrust laws.

Leggett & Platt and Dresher are both New York Stock Exchange listed companies.

#90127p1350 05/07/1990 ~PR Newswire

MOUNTAIN VIEW, CA (MAY 7) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced the Personal IRIS(TM) 4D/20 is now available for $10,000. This new pricing further expands Silicon Graphics' market position in the computer industry, increases its leadership in visual processing, and eliminates the premium users associate with 3D color graphics. In addition, the 4D/25S Data Station(TM), Silicon Graphics' low cost compute and file server, is now available for $5,900.

"The Personal IRIS has changed the definition of general purpose computing " commented Michael Ramsay, vice president, Entry Systems Divison. "Users are now able to incorporate the use of color and real- time 3D into their computing tasks, and all for the price of a high-end PC. With this price breakthrough, a broader set of developers will be able to bring their software to the IRIS(R) platform, enabling the further expansion of the visual processing market."

Accelerated demand for the Personal IRIS as a volume product, coupled with decreasing component and manufacturing costs, has enabled these price reductions. The aggressive pricing of the Personal IRIS 4D/20 is part of a strategic effort to attract more software to Silicon Graphics' family of binary compatible 3D workstations and high performance server products. By attracting more software and peripherals, the company is further developing such markets as color publishing, computer-aided design and drafting (CADD) and computer-aided engineering (CAE). Increasingly, users in these markets require more color graphics performance than personal computers can deliver. By pricing the Personal IRIS at PC levels, a broader base of users will now gain access to a powerful, fully upgradeable line of visual processing systems. New pricing is effective immediately.

Silicon Graphics Inc. is the leading manufacturer of high performance workstations and computing systems for visual processing applications. The workstations are used by engineers, scientists and creative professionals in the design, analysis, manufacture and simulations of three dimensional products and services. The company's common stock trades on the New York Stock Exchange under the symbol SGI.

IRIS is a registered trademark and Personal IRIS and Data Station are trademarks of Silicon Graphics Inc.

DENVER (MAY 7) PR NEWSWIRE - Manville Corp. (NYSE: MVL) today announced a series of management changes and promotions. Tom Stephens, president and CEO, said that the changes are a further refinement of the organizational structure of the company to continue its efforts to organize around businesses instead of functions and products, make the company more market and customer focused and move decision-making further down in the organization.

Richard A. Kashnow was named president of the newly restructured engineered products group which includes the company's mats, fiber and reinforcements businesses; aerospace, automotive and air filtration businesses; mechanical, air handling and OEM insulation businesses; and the company's Glaswerk Schuller subsidiary in West Germany. Kashnow also was named a senior vice president of Manville Corp.

Ronald W. Mathewson was named president of the newly formed building products group which includes the building insulation and roofing businesses. He also becomes a senior vice president of Manville Corp.

John D. C. Roach, executive vice president for Manville Corp., will become president of the mining and minerals group which includes the filtration and minerals businesses worldwide, the EAME division in Europe, the Stillwater platinum and palladium mining operations in Montana and the No Agua, N.M. perlite mining operations. In addition, he will manage corporate transportation and the railroad friction products business.

Robert Anderson was named senior vice president, science and technology, which includes the health, safety, environment and research functions of the company. Anderson succeeds William A. Sells who has announced that he will retire after 30 years with the company. Anderson has been vice president for science and technology.

Manville Forest Products Corp. continues to be headed by Thomas H. Johnson as president. Johnson, who joined Manville last fall, also is a senior vice president of Manville Corp.

Manville Corp. is an international manufacturing and natural resources company headquartered in Denver. In addition to paper and wood products and packaging, the company's primary businesses include fiber glass and

industrial insulation products, roofing systems and filtration and minerals.

DEARBORN, MI (MAY 7) PR NEWSWIRE - Aetna Life & Casualty (NYSE: AET) today presented an award for excellence in arson prevention to the Mohave County (Ariz.) Fire Investigation Task Force at the International Association of Arson Investigators conference here.

The $10,000 cash award will be presented annually to a community in the United States that has demonstrated outstanding effort in managing a program to curb or prevent arson.

In 1989, the Mohave County task force investigated 89 fires and determined that 44 were deliberately set, causing $1.5 million in property damages. While the national average for conviction of arson- related cases is about 15 percent, the task force has convicted 76 percent of its cases. The task force also saved various insurance companies $661,000 through restitution ordered by the courts against arrestees in 1989.

Nationally, 99,500 deliberately set structural fires caused $1.6 billion in property damage in 1988, and 53,000 set vehicle fires caused another $151 million of damages.

According to Mohave County Sheriff S.D. Cook, the task force's success is due to cooperation between several agencies. Along with the county sheriff's office, the task force encompasses 21 fire districts, three city fire departments, three city police departments, the county prosecutor's office, and the state fire marshal's office.

In addition to the Aetna award, the task force has gained support from local citizens and attention from the media. "We're planning to work with other communities in Arizona who have expressed an interest in starting similar task forces or arson prevention programs," he said.

Cook said that since the task force is a non-funded organization, money from the Aetna award will be used "to help purchase investigation equipment, such as a video camera, tools, lighting, and supplies for collecting samples and evidence at fire scenes."

DEARBORN, MI (MAY 7) PR NEWSWIRE - William H. Fike has been appointed general manager of the Ford Motor Company (NYSE: F) Plastic and Trim Products Division, which combines the operations of the Plastic Products Division of the Automotive Components Group and the Trim Operations of North American Automotive Operations.

Fike, who formerly was executive director of Ford Mexico and Trim Operations, reports to Oscar B. Marx III, executive director of Automotive Components Group.

The Plastic and Trim Products Division manufactures a broad range of interior and exterior plastic components for Ford car and truck operations worldwide. The division has six plants and a product engineering center in the United States and two plants in Mexico; total employment is about 16,000.

Fike joined Ford in 1965 as a manufacturing process engineer with the company's former Paint and Vinyl Operations and later became manager of Ford's Mt. Clemens, Mich., Paint Plant and Milan, Mich., Plastics Plant. He also has been general manufacturing manager for Plastics, Paint and Vinyl Division, Ford Glass Division and Electrical and Electronics Division.

In 1984, Fike was appointed general manager of the Climate Control Division. He was assigned to Ford of Brazil in 1986 as director - vice president, Operations, and became president, Ford of Brazil, in January 1987. He was named executive director, Ford Mexico and Trim Operations, in November 1987.

Fike was born May 30, 1936, in Port Huron, Mich., and holds a bachelor's degree in chemical engineering from the University of Michigan.

HOUSTON (MAY 7) PR NEWSWIRE - Plains Resources (AMEX: PLX) today reported a net loss for the quarter ended March 31, 1990, of $193,000, or $.05 per share, on total revenue of $7,327,000 as contrasted with a net loss of $775,000, or $.35 per share, on total revenue of $4,172,000 for the first quarter of 1989. Operating cash flow was $1,836,000 for the period, more than double the $870,000 reported for the corresponding period of 1989.

Plains' oil and gas sales increased 16 percent to $4,048,000 from $3,483,000 in the prior year's first quarter. Oil and gas marketing and transportation revenue was up over fourfold, increasing to $3,179,000 from the $577,000 reported a year ago.

During the quarter, Plains' oil production increased to more than 79,000 barrels, more than double the prior year's first-quarter level of approximately 39,000 barrels. The increase in oil production resulted primarily from work performed during the period on oil properties acquired by Plains during 1989. Total gas production for the quarter decreased about 10 percent to approximately 1.2 billion cubic feet reflecting the sale of certain gas properties in the second quarter of 1989.

PROVIDENCE, RI (MAY 7) PR NEWSWIRE - Textron Inc. (NYSE: TXT) has named Richard J. Price chairman and Russell G. Downing president of its Randall Division in Cincinnati, Ohio.

B.F. Dolan, chairman and chief executive officer of Textron, said the appointments are part of a planned management succession and are effective immediately.

Price, who will be 65 in November, joined Textron in 1968. He held several positions in engineering and manufacturing before becoming vice president-operations in 1971. He was named executive vice president of the division in 1979 and president in 1980.

Price served in the U.S. Navy and attended Duke University. He received his B.S. degree in engineering from Ohio State University in 1949.

Downing, 44, has spent his entire carrer with Randall, having joined the division as a receiving clerk in 1964. In advancing through the ranks, he held supervisory and management positions in production control and manufacturing. He served as a plant manager, general manager, manager of manufacturing and, most recently, as vice president-operations.

He attended Arkansas State University and served in the U.S. Navy. Randall produces functional and decorative metal and plastic parts, principally for the North American automotive manufactures. Its products include stampings and tubular steel; bright metal and painted moldings; decorative plastic painted components and chrome-plated components; wheel covers, hub caps and trim rings.

Textron is a multi-industry company with operations focused in three business sectors -- aerospace technology, commercial products and financial services.

#90127p1375 05/07/1990 ~PR Newswire
TINTON FALLS, NJ (MAY 7) PR NEWSWIRE - Metallurgial Industries Inc., (NASDAQ: MTALA) a producer of specialized refractory metals and alloys and a provider of turbine component repair services, today announced that it had sustained a net loss of $93,828 for the first three months ended March 31.

This compared with a net profit of $12,715 reported in the first quarter

of 1989. Revenues were $1,329,007 vs. $1,131,626.

Ira L. Friedman, president, noted that unusual items in both the recently completed and year-ago quarters affected the operating improvement between the two periods. "The 1990 quarter included approximately $51,000 in start-up costs for SerMet, our joint venture with Sermatech International subsidiary of Teleflex Inc., while the prior year's reported profit included $150,000 in technology disclosure fees from our venture partner."

Friedman continued: "Initial shipments of a repaired part for the CFM-56 jet engine, resurfaced for the first time through the use of the company's proprietary Metbond(R) process, were made in March to several major airlines. We are now operating that business on a commercial basis and have a large number of other jet engine parts under development. Their commercialization would have a further significantly positive effect on our company. Additionally, SerMet is now shipping turbine components commercially and should reach profitability during the second half of 1990."

#90127p1376 05/07/1990 ~PR Newswire

DETROIT (MAY 7) PR NEWSWIRE - Detroit-area new car dealers have launched a weekly publication that can be mailed directly to 1.4 million metro Detroit households.

The inaugural issue of "Auto Dealer Direct, Car and Truck Marketplace" will be Saturday, May 12. The tabloid will have a minimum of 12 pages per issue with four-color front and back pages.

There will be seven zone editions in the tri-county area. Media, Marketing and Promotion, a Troy-based direct-mail company will edit and publish "Auto Dealer Direct."

Content will include front-page editorial, with an emphasis on automobiles new-car dealer advertising and a sweepstakes competition, according to Gordon Stewart, president of the 260-member Detroit Auto Dealers Association (DADA).

"Auto dealers need an advertising specialty vehicle that efficiently and effectively reaches their customers," Stewart said.

" 'Auto Dealer Direct' is target marketing. With our zone editions, a dealer in one area doesn't have to worry about throwing away ad dollars on people 40 miles away," Stewart added. "Each zone provides a dealer with better penetration into his own back yard.

"Competitive pressures in the retail automotive market are forcing dealers to advertise more," Stewart said.

"Dealers are looking for a means to lower advertising costs and 'Auto Dealer Direct' is a way to help dealers and consumers by keeping advertising costs down," Stewart added.

" 'Auto Dealer Direct' will generate an estimated $12 million in advertising revenue within the first year," Stewart said. "The auto dealers will continue to advertise through conventional media -- daily and suburban newspapers, radio and TV."

According to Carl Fischer, chairman of the DADA's Alternative Media Committee, a 13-week, $292,000 promotion campaign will support the launch of "Auto Dealer Direct."

#90127p1383 05/07/1990 ~PR Newswire

GASTONIA, NC (MAY 7) PR NEWSWIRE - FMC Corp. (NYSE: FMC) today formally dedicated its paper preservation demonstration plant which will preserve and strengthen up to 300,000 books per year.

FMC's Lithium Division developed this patent-pending technology to revitalize books affected by acid decomposition.

"Since 1850, paper-making processes have used sizing chemicals containing acid which slowly weaken the cellulose fibers," explained Dr. Robert S. Wedinger, manager of FMC-Lithium Division's Preservations Systems business. "Over time, the paper deteriorates to the point where it may crumble at touch."

"This facility allows us to demonstrate to library conservators the effectiveness of the FMC process, which not only neutralizes the acid in the paper but strengthens and buffers the pages as well," Wedinger said.

Millions of books throughout the world are in jeopardy. Without the preservation treatment, the acid slowly continues to deteriorate the paper. However, MG-3, the proprietary compound used in the FMC process, arrests this acid decomposition, and helps extend the useful life of books. The treatment has three steps: preconditioning, impregnation with MG-3 in a carrier solvent, and post conditioning. The entire process takes approximately six hours.

FMC has been researching and developing this mass preservation technology for more than three years. "We will respond to a request for preservation services expected soon from the Library of Congress. Future commercial-scale treatment plants will be built based on worldwide demand " said Harold Andrews, Lithium Division manager. Andrews noted that the commercial plants will be capable of processing between 2 and 5 million books annually.

FMC Corp., headquartered in Chicago, is one of the world's leading producers of machinery and chemicals for industry, government and agriculture. The company operates 89 manufacturing and mine facilities in 24 states and 14 foreign countries. The company divides its businesses into five major segments: Industrial Chemicals, Performance Chemicals, Precious Metals, Defense Systems, and Machinery and Equipment.

CONTACT: Judith H. Smeltzer, 215-299-6710, or James Bell, 704-868-5380, both of FMC.

#90127p1389 05/07/1990 ~PR Newswire

HONOLULU (MAY 7) PR NEWSWIRE - Barnwell Industries, Inc. (AMEX: BRN), today reported net earnings of $830,000 (57 cents per share) and $5,380,000 ($3.67 per share, $3.66 per share on a fully diluted basis) for the three and six months ended March 31, 1990 as compared to net earnings of $490,000 (35 cents per share, 34 cents per share on a fully diluted basis) and $930,000 (66 cents per share, 65 cents per share on a fully diluted basis) for the three and six months ended March 31, 1989.

Cash flow from operating activities and net cash flow from the investment in Kaupulehu Developments, a 50.1 percent-owned joint venture, totalled approximately $8,500,000 in the six months ended March 31, 1990.

Morton H. Kinzler, chairman and chief executive officer of Barnwell, stated that "The improvements in fiscal 1990's second quarter earnings as compared to fiscal 1989's second quarter earnings was due to increased

interest income and oil revenues. The increase in earnings for the six month period ended March 31, 1990 was principally due to the closing of a transaction in the first quarter by Kaupulehu Developments which calls for the development of a hotel within the 600-acre Phase I Kaupulehu Resort located at Kaupulehu, North Kona, Hawaii."

Barnwell also declared a regular cash dividend of $0.075 (7-1/2 cents) per share payable June 19, 1990 to shareholders of record June 5, 1990.

#90127p1390 05/07/1990 ~PR Newswire

WILMINGTON, DE (MAY 7) PR NEWSWIRE - An alternative to chlorofluorocarbons (CFCs) for cleaning printed circuit boards has been introduced by Du Pont (NYSE: DD).

The biodegradable cleaning agent, "Axarel" 38, has no ozone depletion potential and can perform many of the functions where CFC-113 is the industry standard. The U.S. Environmental Protection Agency (EPA) estimated that nearly 200 million pounds of CFC-113 were used in 1986 in the electronics industry for applications such as removing flux and other materials from printed circuit boards.

"Axarel" 38 is designed for use in a new process called "semi- aqueous" that combines a solvent wash ("Axarel") and water rinse. For many applications, semi-aqueous cleaning will be preferable to aqueous methods because of its cleaning ability and lower water consumption.

"Board assemblers have been looking for an alternative to CFCs for cleaning, and they have been looking primarily to Du Pont for a solution," said Dick Rosenberg, director of electronic materials for Du Pont Electronics. "'Axarel' 38 can in many cases provide the answer assemblers have wanted."

The new solvent cannot be used with cleaning equipment designed to use CFC-113.

"While 'Axarel' 38 is not a 'drop in' replacement," Rosenberg said, "most conversions to alternatives will require the purchase of new equipment. Right now over a half-dozen manufacturers have batch and high volume, in-line equipment for semi-aqueous processing commercially available."

Du Pont is one of the largest and most diversified suppliers of materials,

components and services to the global electronics industry. It serves the makers of integrated circuits, ceramic circuits, printed circuits, passive components, and users of interconnections, subassemblies and information storage media. Du Pont's 1989 sales to the electronics industry exceeded $1.8 billion.

TAMPA, FL (MAY 7) PR NEWSWIRE - Assix International, Inc. (NASDAQ-NMS: ASIX), which provides leading tire dealers with the Tire Matching(R) service, today reported record net income and revenues for fiscal 1990's third quarter and first nine months ended March 31, 1990.

For the three months, net income was $390,642, or $.09 per share on both a primary and a fully diluted basis, a 158 percent increase over the $151,552, or $.04 per share, recorded for the comparable fiscal 1989 quarter. Revenues for the quarter increased 158 percent to $1,924,325 from $746,980 for the year-ago quarter.

Net income for the nine months was $906,313, or $.22 per share on both a primary and a fully basis, up 132 percent from $390,302 for the year-earlier nine months. Revenues for the nine-month period were $4,673,770, a 137 percent increase over the $1,975,063 for the comparable fiscal 1989 period.

R. Park Newton, president and chief executive officer, said the substantial increases in earnings and revenues resulted primarily from the steadily expanding base of Tire Matching installations. For the last quarter of fiscal 1989, he noted, installations of Assix Tire Matching systems averaged 45 a month, while in fiscal 1990 average monthly installations climbed to 90 the first quarter, 102 the second quarter and 107 the third quarter.

In particular, Newton said, fiscal 1990 revenue and earnings gains are directly attributable to installation of Tire Matching systems at Sears automotive centers nationwide as well as to increases in usage of Tire Matching programs by certain other licensed dealers.

Assix International markets ride-related automotive services, principally the advanced, proprietary wheel-balancing service called Tire Matching. The company is in the final stages of installing Tire Matching at Sears under a nationwide contract to equip approximately 800 automotive service centers in the United States. Assix currently has an installed base of 1,842 Tire Matching programs and expects to have approximately 2,100 programs installed by the end of fiscal 1990, which is June 30, 1990.

Tire Matching is offered to purchasers of new tires by Sears and such other large tire chains as Western Auto Supply (a Sears subsidiary). Winston Tire, and Grand Auto (a subsidiary of PacCar). Tire Matching is considered to be the most advanced and complete wheel balancing available to the motoring public, providing the equivalent of a new car ride and longer tire life.

Primary	4,692,253	4,256,564	4,631,871	4,208,214
Fully diluted	4,922,253	4,256,564	4,716,652	4,208,214

Earnings per common share for the three and nine months ended March 31, 1990, have been computed using the modified treasury stock method. Under this method, common stock warrants and options are assumed to have been exercised at the beginning of the period and a maximum of 20 percent of the outstanding number of common shares are assumed to have been purchased with the proceeds received upon exercise. The excess of the proceed is assumed to have been used to reduce existing debt. The excess of the number of shares issued upon exercise over the number of shares which could have been purchased with the proceeds is added to the weighted average number of shares outstanding for the period. Convertible senior subordinated notes have been included in the computation of fully diluted earnings per share using the if-converted method.

Earnings per common share for the three and nine months ended March 31, 1989, have been computed using the treasury stock method. Under this method, common stock warrants and options are assumed to have been exercised at the beginning of the period, with the excess of the number of shares issued over the number of shares which could have been purchased with the proceeds added to the weighted average number of shares outstanding for the period.

HOUSTON (MAY 7) PR NEWSWIRE - CRSS Inc. (NYSE: CRX) announced today that the Colorado Department of Highways has selected its subsidiary, CRSS Commercial Group, Inc., to provide final design for reconstruction of the I-76 and I-25 interchange in metropolitan Denver.

The $84 million project incorporates bus and high-occupancy-vehicle (HOV) lanes on I-25, improved access to both highways, and increased vehicle capacity with greater safety.

The design and reconstruction includes bridges, retaining walls, roadway, and HOV/bus lanes. The bridges and roadway for the HOV lanes are designed to accommodate light rail transit.

Design services include utility and irrigation ditch relocation, and lighting and hydrology for channel reconstruction in Clear Creek, which runs adjacent to the interchange. CRSS Commercial Group is also providing traffic control, construction phasing, and detour plans.

CRSS Commercial Group, Inc. maintains offices nationwide, including western regional headquarters in Denver.

Through its subsidiaries, Houston-based CRSS Inc. is a diversified design and construction services company. CRSS also has interests in the independent power/co-generation industry and the acid rain/pollution control market.

THOMASVILLE, GA (MAY 7) PR NEWSWIRE - Davis Water & Waste Industries, Inc. (NYSE: DWW) today announced it had reached an agreement in principle to acquire the Taulman Company, a privately held company headquartered in Atlanta. Terms of the agreement were not disclosed.

Taulman has manufacturing facilities in the Atlanta area and sales offices in Charlotte, N.C., and Tampa, Fla. The company is engaged in the environmental pollution control business, primarily through the design, manufacturing and sale of process equipment and control systems used in water and waste water treatment facilities.

Taulman serves municipal and industrial markets nationwide through three

operating divisions -- Turbitrol Company, Taulman Composting Systems and Taulman Sales Company. Taulman's revenues for the fiscal year ended Nov. 31, 1989, were approximately $26.1 million, with assets employed of $16.7 million.

Consummation of the acquisition is subject to the satisfaction of certain conditions, including the negotiation and execution of a definitive agreement setting forth the terms of the transaction.

Commenting on the proposed transaction, R. Doyle White, president and chief executive officer of Davis, stated: "Taulman's business is an extension of Davis' and the acquisition will give us additional product lines and greatly increased sales in the water and waste water treatment areas."

Davis Water & Waste manufactures and markets products relating to the distribution of water and the treatment of water and waste water. The company also designs, engineers, manufactures, sells and installs water and waste water systems and pumping equipment and distributes certain process materials used in treating water and waste water to comply with applicable health and water quality standards.

DALLAS (MAY 7) PR NEWSWIRE - Herbert D. Kelleher, chairman of the board and president of Southwest Airlines Co. (NYSE: LUV), announced today that the company flew 820.8 million revenue passenger miles (RPMs) in April 1990, an 11.5 percent increase over the 736.1 million RPMs flown in April of last year. Available seat miles (ASMs) increased 10.2 percent to 1,327.7 million from the April 1989 level of 1,205.1 million ASMs. The load factor for the month was 61.8 percent compared to 61.1 percent for the same period of a year ago.

Kelleher stated, "We are pleased with the strong April traffic results. This marks the first month in 1990 that we achieved a better load factor than the corresponding month of the prior year. April 1990 also benefited from the inclusion of the Easter holiday whereas Easter in 1989 was in March. Revenue yields per RPM are also up in April as compared to first quarter 1990 levels due to late first quarter fare increases and less second quarter promotional activities. Advance bookings continue to be brisk."

ATLANTA (MAY 7) PR NEWSWIRE - Scientific-Atlanta (NYSE: SFA) today announced a major contract from Frito-Lay Inc., a subsidiary of PepsiCo Inc. for an extensive satellite network.

Scientific-Atlanta will install and maintain a very small aperture terminal (VSAT) satellite network linking 300 locations throughout the United States.

Frito-Lay is the largest manufacturer and marketer of snack chips in the U.S., with annual retail sales of $4.5 billion in 1989. The company uses its data communications network to receive daily information from its 10,000-person sales force and to act rapidly to changing conditions within its highly competitive marketplace.

Dan Smith, Frito-Lay MIS communication consultant, speaking for the combined project team which included Alan Lusk of Frito-Lay's MIS and Robert Goldberg of PepsiCo's MIS, summarized their findings by saying, "VSAT technology through Scientific-Atlanta represented the best opportunity to provide the highest quality, lowest cost network for Frito-Lay."

In a move reflecting an increasing trend today, Frito-Lay switched from its existing terrestrial-based network to a VSAT satellite network. The company's goal was to simplify network operations and lower network costs. Frito-Lay wanted the best price/performance, most flexibility, total end-to-end accountability, superior disaster recovery, and simplified network control.

The system's hub will be located near Frito-Lay headquarters in Dallas. Scientfic-Atlanta will support the hub with contract services, including on-site personnel and 24-hour management of the network. Smith indicated that no additional Frito-Lay personnel are planned to support satellite operations.

Scientific-Atlanta's SkyLinX.25 technology will replace the company's existing network originating from the Frito-Lay data center in Dallas.

Scientific-Atlanta's SkylinX.25 VSAT network will include a seven-meter master earth station (network hub) in Dallas, 300 1.8-meter VSAT terminals turnkey network installation and satellite transponder services for five years.

Scientific-Atlanta competed with six VSAT vendors for the Frito-Lay contract.

Scientific-Atlanta Inc. is a leader in cable television electronics and satellite-based communications networks and is a key supplier of electronic instruments and control systems for industrial, telecommunications and government applications.

BOSTON (MAY 7) PR NEWSWIRE - NYNEX announced today it will provide alternate routing of its Superpath(sm) optical fiber lines serving large business customers in more than 100 buildings in Boston and Manhattan. The company also plans to extend the service to many more buildings in the coming months to protect against service disruptions from cable damage.

"This kind of reliability and assurance is a must for so many of our customers," said Joseph Cornacchio, staff director - Disaster Prevention and Recovery, in a statement issued in conjunction with the annual Eastern Communications Forum here May 7-9.

"Back-up protection is particularly critical to our customers in the financial services and long-distance telecommunications businesses who depend on the smooth, uninterrupted flow of voice and data 24 hours a day to run their businesses," Cornacchio noted.

Both New England Telephone and New York Telephone have been equipping their 1.5 and 45 megabit-per-second data lines in downtown Boston and New York City with backup lines. The lines, which will be activated over the next several months, have been diversely routed from the companies'

central offices to provide continuous service in the event of a cable cut or other failure.

Later this year, the companies will also offer optional access to a second telephone central office to maintain service in the event of a problem occurring in a customer's primary central office.

"We are interested, above all, in assuring our customers that the NYNEX network that serves their telecommunications needs has optimal protection against any possible failure," said Cornacchio.

CONTACT: John Johnson of New England Telephone, 617-743-3433; Tom Pica of New York Telephone, 212-395-0500 or Rosalia Bacarella of NYNEX, 914-644-7253.

#90127p1416 05/07/1990 ~PR Newswire

NEW YORK (MAY 7) PR NEWSWIRE - The Bill of Rights. What does it mean? Six prominent Americans share their thoughts about the Bill of Rights in the second phase of Philip Morris Companies Inc.'s (NYSE: MO) print advertising campaign supporting the National Archives' celebration of the 200th anniversary of the Bill of Rights.

Guy L. Smith IV, vice president of corporate affairs, Philip Morris Companies Inc., said the national campaign will be introduced in May and features actor Charlton Heston; Reverend Theodore M. Hesburgh, C.S.C., president emeritus of the University of Notre Dame; Everett Alvarez Jr., Vietnam POW; Benjamin L. Hooks, executive director of the NAACP; Judith Jamison, artistic director of the Alvin Ailey American Dance Theter; and Valentina Kozlova, principal dancer of the New York City Ballet.

"This second phase of the campaign uses personal stories to convey the enduring value and impact of the Bill of Rights in 1990. These individuals have lived extraordinary lives. Their stories embody the Bill of Rights as a living document -- as relevant today as it was 200 years ago," Smith said.

The advertisements will appear primarily in news, business and general interest magazines including Time, Newsweek, Fortune, Forbes, Business Week, Life and People. U.S.A. Today and The Wall Street Journal will also run selected advertisements from the series.

The new advertisements will continue to offer a free replica of the Bill of Rights through an 800 number (1-800-552-2222). So far, through its print and television ads, the company has received more than two million requests for copies of the Bill of Rights. "We're overwhelmed by this tremendous response. Probably more people have read the Bill of Rights

in the last six months than at any time in its history and we at Philip Morris Companies are very proud of that," Smith said.

The new series is an evolution of the print campaign which was launched in November 1989 to celebrate the bicentennial of the Bill of Rights. The campaign began with an historical approach: The first ad described the colorful and controversial origins of the Bill of Rights; the three subsequent ads highlighted vivid quotations from former President Thomas Jefferson, Abraham Lincoln and Franklin D. Roosevelt.

Philip Morris Companies Inc. is the largest consumer packaged goods company in the world. Its principal domestic operating companies include: Kraft General Foods, Miller Brewing Company and Philip Morris U.S.A.

#90127p1421 05/07/1990 ~PR Newswire

RICHMOND, VA (MAY 7) PR NEWSWIRE - Crestar Mortgage Corporation is offering consumers of jumbo mortgage loans a new loan product featuring interest savings and one-stop shopping.

Called the Crestar Combination, the new product allows the borrower to obtain a conforming first mortgage of $187,450 at a loan-to-value ratio of up to 80 percent and a fixed-rate second mortgage in an amount up to $187,450. The borrower's total combined loan-to-value ratio may not exceed 85 percent. (A jumbo loan is typically a first mortgage exceeding $187,450.)

Unlike other first/second jumbo loan products in Crestar's markets, the Crestar Combination's second mortgage is a fixed rate, 15-year, fully amortizing loan. Further, most lenders can only lend up to a 75 percent loan-to-value ratio on the borrower's first mortgage; however, Crestar, through special negotiations with its investor, is offering an 80 percent loan-to-value ratio on first mortgages. This higher lending ratio has the effect of keeping more of the loan in the lower-interest portion of the financing package.

For example, a typical 30-year jumbo fixed-rate loan of $220,000 would require an 11 percent rate, while the Crestar Combination for the same amount would require an effective rate of 10.57 percent.

"The real advantage for the borrower is savings -- both in money and time " said Sandy Peele, senior vice president of Crestar Mortgage Corporation. "Our combination mortgage generally lowers the borrower's payments, and both the first and second mortgages can be secured at one institution."

Other advantages of the Crestar Combination are as follows:

-- Because the borrower's second mortgage is on a 15-year, rather than a 30-year, amortization schedule, equity is accrued at a faster rate.
-- A larger percentage of the borrower's funds is channeled to principal (instead of interest), resulting in substantial savings in interest charges.
-- The borrower retains the flexibility to lower his or her monthly payment at any time by paying off the second mortgage.

In addition, Crestar's product gives the borrower the opportunity to avoid purchasing the private mortgage insurance usually required for mortgages with loan-to-value ratios over 80 percent.

Crestar Mortgage Corporation has 16 offices in Virginia and Maryland. Information on the Crestar Combination and other mortgage products is available through Crestar's 254 banking offices in Virginia, Maryland, and the District of Columbia.

NEW YORK (MAY 7) PR NEWSWIRE - Harry W. Albright, Jr., chairman and chief executive officer of The Dime Savings Bank of New York (NYSE: DME), today announced that Richard D. Parsons has been elected chief executive officer of the bank, effective July 1, 1990. Parsons will assume the responsibilities of CEO in addition to those of his current position as president.

Parsons, 42 years old, joined The Dime Savings Bank as president in July 1988. Prior to joining The Dime, Parsons was a partner in the New York law firm of Patterson, Belknap, Webb & Tyler. He previously served as a White House staff member and as a counsel to former Governors Nelson A. Rockefeller and Malcolm Wilson.

Albright will continue to serve as chairman of the board of The Dime. In The Dime's annual report, which was released in March of this year, Albright had indicated that Parsons would be his successor as CEO.

The Dime, with assets of $11.7 billion, is one of the largest and best capitalized thrift institutions in the United States. The bank currently operates 50 retail banking offices in New York and eight in New Jersey through its subsidiary The Dime Savings Bank of New Jersey.

Richard D. Parsons is president and chief executive officer of The Dime Savings Bank of New York, FSB. The Dime is one of the largest thrift institutions in the United States with $11.7 billion in assets. Prior to joining The Dime, Parsons was a partner in the New York law firm of Patterson, Belknap, Webb & Tyler.

Parsons received his undergraduate education at the University of Hawaii and graduated from Union University's Albany Law School as valedictorian of his class in 1971. From 1971 through 1974, Parsons first served as an assistant counsel and later as first assistant counsel to former Governor Nelson A. Rockefeller, and as first assistant counsel to former Governor Malcolm Wilson.

In 1975 he became deputy counsel to then Vice President Rockefeller. Later that year, he was appointed general counsel and associate director of the Domestic Council, the national policy formulating and coordinating arm of the White House, a position he held until 1977.

In addition to serving on the board of The Dime, Parsons also serves on the board of the Federal National Mortgage Association (Fannie Mae), Philip Morris Companies, Inc. and American Television and Communications Corp. Parsons is also a member of the boards of the New York Zoological Society, Rockefeller Brothers Fund, The Masters School, and Howard University. In October of 1989, Parsons was appointed by President Bush to the President's Drug Advisory Council.

DALLAS (MAY 7) PR NEWSWIRE - Edisto Resources Corporation (AMEX: EDS) announced today that it has acquired substantially all of the assets of Gulfstar Petroleum Company for approximately $5.6 million in cash and other considerations. Gulfstar Petroleum Company is a general partnership headquartered in Houston. In the transaction, Edisto acquired Gulfstar's interests in 13 offshore Gulf of Mexico blocks. The company has also entered into an agreement to acquire from a third party additional interests in these same blocks.

Two of the blocks contain producing wells and five of the blocks contain completed wells that are shut-in and waiting on production and pipeline facilities. The remaining six blocks contain undrilled prospects that Edisto acquired drilling rights to under existing farm- out agreements. Terms of the agreements require Edisto to drill five wells in 1990. Drilling operations have commenced on the first well.

James R. McNab Jr., chairman, noted that this transaction furthers the company's goal of increasing its reserve base through the acquisition of producing reserves and by providing additional drilling opportunities. "The Gulfstar acquisition provided us with an opportunity to expand our presence in the Gulf by developing reserves in the Mobile Bay Area."

Edisto Resources Corporation is a Dallas-based, Delaware corporation incorporated in 1970. Edisto's consolidated activities include the

production of oil and gas, the exploration for, and development of, oil and gas reserves and the acquisition of oil and gas properties.

#90127p1430 05/07/1990 ~PR Newswire

BRYN MAWR, PA (MAY 7) PR NEWSWIRE - Philadelphia Suburban Corp. (NYSE: PSC) today reported earnings for the first quarter of $1.5 million or 20 cents per share, an improvement of 18 percent compared to the 17 cents reported for the same period in 1989.

Revenues for the first quarter totaled $35.5 million, an increase of 13 percent, compared to the first three months in 1989.

John W. Boyer Jr., president and chairman of Philadelphia Suburban Corp., stated that the earnings of Philadelphia Suburban Water Co. improved for the quarter as a result of a rate increase received in December 1989. He also said that operating income of the non-regulated services companies improved in the first quarter of 1990 compared to the results experienced in the same period in 1989.

Philadelphia Suburban Water Co. filed a request with the Public Utility Commission on March 30, 1990, seeking a 9.7 percent increase in revenues. If approved, the utility's annual revenues would increase by approximately $7.8 million. Boyer said the filing was in response to increased operating expenses and because of costs associated with continuing capital improvements necessary to satisfy the needs of customers in the company's service territory.

Philadelphia Suburban Corp. (PSC) is a diversified company. PSC's largest subsidiary is Philadelphia Suburban Water Co. which serves 234,000 customers in portions of Delaware, Chester and Montgomery counties, north and west of Philadelphia. PSC's non-regulated subsidiaries offer information, telemarketing and engineering services to a broad base of customers with an emphasis on the utility and public sector markets.

The following table shows the comparative earned revenues, net income and net income per share for Philadelphia Suburban Corp. for the quarter ended March 31, 1990, and 1989 (in thousands of dollars):

Quarter ended March 31 (unaudited)	1990	1989
Earned revenues	$35,474	$31,499
Net income	1,508	1,210
Net income per share	$.20	$.17

Average common and common equivalent shares outstanding during the period	7,593,000	7,252,000

LENINGRAD, USSR (MAY 7) PR NEWSWIRE - With the advent of glasnost and perestroika, a wide range of investment and joint venture opportunities have opened to Western business. For this reason, Leningrad is to be the venue for one of the first international investment conferences in the Soviet Union.

Georgeson & Company Inc., through its sister company, Charles Barker International Connections, will co-sponsor the Leningrad Investment Seminar with ACES Public Relations, Novosti Press Agency, and Coopers & Lybrand. The seminar will be held on June 6-8, 1990, at the Hotel Pribaldiskaya in Leningrad. The event will be the third in a series of Charles Barker International Connections-sponsored East European investment seminars.

The seminar will introduce senior managers of Western companies to Soviet business practices, in order to stimulate investment and trade dialogue. Topics will include accounting and financial transactions, free economic zones in Leningrad, Soviet regulations on credit, licensing and joint venture opportunities.

The keynote speaker will be Dr. Nikolai Petrakov of the Central Institute for Econometrics. He will be joined be high-ranking Soviet banking and state officials, as well as businessmen running successful joint ventures in the Soviet Union.

Georgeson & Company Inc. is the largest corporate consultancy offering investor relations, proxy solicitation and shareholder analysis services. The company is a member of Corporate Communications PLC, the holding company for the Charles Barker International Connections network. The network includes over 35 conultancies in 24 countries offering financial, corporate, political, consumer and business public relations.

DALLAS (MAY 7) PR NEWSWIRE - Halliburton Company (NYSE: HAL) announced today that its Brown & Root International, Inc. subsidiary and Offshore Pipelines, Inc. (OPI) have signed a definitive agreement for the sale of certain marine construction assets of Brown & Root to OPI for approximately $80 million cash consideration. The definitive agreement is subject to filings under the anti-trust laws of the United States.

On March 26 Halliburton announced that Brown & Root and OPI had entered

into a letter of intent for such sale, but on April 19 Halliburton announced that Brown & Root had terminated negotiations and was considering other options. Recently, negotiations with OPI were resumed and the parties resolved all essential terms to enable finalization of the definitive agreement.

The assets which will be sold include 23 derrick, pipelay and other marine construction vessels, as well as interests in certain land based marine construction support facilities located in the Far East, Middle East and United States. The assets to be sold do not include Brown & Root's interests in its other marine activities including European Marine Contractors Limited, Rockwater Offshore Contractors, Highlands Fabricators fabrication operations in the United States and Indonesia, and its worldwide marine engineering and project management business.

Brown & Root understands that OPI's ability to complete the sale is dependent upon their ability to arrange definitive financing. Subject to anti-trust clearance and to OPI's financing arrangement, the sale is expected to be completed by mid-August 1990. Pending completion of the sale, Brown & Root will continue to utilize the assets which are to be sold in its marine business with the full support of its entire organization.

FORT SMITH, AR (MAY 7) PR NEWSWIRE - Roland S. Boreham Jr., chairman and CEO of Baldor Electric Co. (NYSE: BEZ), announced that the board of directors, at its quarterly meeting following the annual shareholders' meeting on May 5, promoted three key management people to important positions.

They are Robert L. Null Jr. to the newly created position of vice president of manufacturing, Gregory C. Kowert to vice president of finance and chief financial officer, and Jerry Peerbolte to treasurer of the company.

Null's expanded responsibilities of vice president of manufacturing include Baldor's three largest motor plants and four component supply plants. He previously served as director of manufacturing and group

manufacturing manager for the past six years. He earned degrees in Industrial Engineering and the MBA degree at Oklahoma State University.

As Chief Financial Officer, Kowert assumes the financial duties previously held by Dr. R.L. Qualls, who was recently elected to president of Baldor. Kowert has served as vice president of finance, treasurer, and secretary. He joined the company in 1973 as controller. He earned his B.S. degree in Business Administration at Washington University (St. Louis), and the MBA degree at the University of Arkansas. He is also a CPA.

Jerry Peerbolte was also promoted to the position of treasurer of the company, in addition to his duties as controller. He joined the company in 1982 and holds the CPA certificate. He earned an Accounting degree at Bradley University and the MBA degree at the University of Arkansas.

Boreham said: "We're very pleased with these important appointments. This further strengthens our management team in key areas."

CONTACT: R.S. Boreham Jr., chairman & CEO, or R.L. Qualls, president, 501-646-4711, both of Baldor Electric

IRVINE, CA (MAY 7) PR NEWSWIRE - Fluor Daniel announced today that it has been awarded a contract by Petroleo Brasileiro S.A., Petrobras, the national oil company of Brazil. The value of the contract was not disclosed.

Fluor Daniel's Hydrocarbon Sector, along with its joint venture partner GVA of Sweden, will perform preliminary design and development of a tension leg protection platform to produce 100,000 barrels per day of oil from the Marlin Field. One of the largest and deepest water oil fields in the world, the Marlin Field is located 80 miles off-shore Brazil in 3,280 feet deep water.

Engineering is under way in Fluor Daniel's Houston offices, with study completion scheduled for late 1990.

Tension leg platforms provide an economical means of producing hydrocarbons in deep waters. Fluor Daniel has been developing TLP technology since 1967.

Fluor Daniel Inc., Fluor Corp.'s (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

DALLAS (MAY 7) PR NEWSWIRE - Centex Corporation (NYSE: CTX) announced today that its home building subsidiary, Centex Real Estate Corporation/Centex Homes, has acquired the operating assets of Gold Key Homes, a privately held home builder in Phoenix, Ariz. Terms of the transaction were not disclosed.

The Phoenix operation was founded in 1947 by Dell Trailor. His son, Mike Trailor, became president of the organization in 1985. The Trailor family has a long standing reputation in the Phoenix area for providing home buyers with a quality product and personalized service. Mike Trailor will remain as division president of the new operation which will build and sell houses under the Centex Homes name.

Centex Homes said it will continue to offer Gold Key's existing products, houses 1,200-2,500 square feet in size and priced $70,000- $135,000, and later will offer larger homes, 2,000-3,300 square feet in size and priced $100,000-$160,000.

Currently the largest single-family detached home builder in the country, Centex Homes builds and sells homes in 35 markets in 18 states across the

United States. For its most recent fiscal year ended March 31, 1990, Centex Homes sold and delivered approximately 7,700 units.

The company noted that it has been studying the Phoenix market for several years and that it considers the acquisition an excellent opportunity to expand into one of the largest single-family home markets in the country. Centex Homes noted that it is optimistic about the long-term recovery of the Phoenix housing market as well as Arizona's prospects for growth.

In addition to its home building business, Dallas, Texas-based Centex Corporation, a New York Stock Exchange company, has construction products, general construction, mortgage banking and savings and loan operations.

#90127p1463 05/07/1990 ~PR Newswire

SAN MATEO, CA (MAY 7) PR NEWSWIRE - Electronic Arts (NASDAQ: ERTS) announced today that it has placed its first order with Nintendo of America Inc. for delivery of "Skate or Die 2" by September 1990. According to Trip Hawkins, president of Electronic Arts, "This is an exciting milestone for us. We believe this will put Electronic Arts on the road to becoming one of Nintendo's major licensees." Skate or Die 2 is a sequel to the best-selling "Skate or Die" which sold 1.2 million units on the Nintendo Entertainment System (NES).

In further comments, Hawkins said, "Our initial working with Nintendo has been extremely productive. Nintendo's attention to quality and detail makes them a great partner. In fact, we've decided to expand our relationship on several new fronts, including the highly successful GameBoy hand-held system."

Electronic Arts' five-point plan for becoming a business leader in the Nintendo market includes both product development and distribution strategies.

Electronic Arts will develop a full product line for the NES, under a licensing agreement with Nintendo unveiled recently in a joint announcement with Nintendo. Four additional titles beyond Skate or Die 2 are already in development for the NES. Hawkins added, "Our goal is to develop NES titles with home-run potential."

The company has also begun development for the Nintendo GameBoy hand-held system, with the first products scheduled to ship in 1991. Hawkins said, "The product is already a smash-hit in the marketplace, and is expanding the market for entertainment software. Further, it plays to our proven

strengths and is economical for us to develop GameBoy titles."

In a new distribution strategy, Electronic Arts plans to develop and sell NES and GameBoy titles overseas. Hawkins said, "Until now, the European and Australian video game markets have been fairly small and we have kept the product rights to our full catalog in reserve." Nintendo is beginning an expanded marketing effort in these territories and Electronic Arts plans to either distribute its own products or license them to other companies to sell.

Finally, Electronic Arts plans to act as a sales representative firm for other Nintendo licensees' products. Stated Hawkins, "At present, virtually all Nintendo licensees sell their NES titles through independent rep companies. With the strength of our direct sales force and our strong industry reputation, we believe we will be able to generate additional revenue and profit by acting as a sales agent for other Nintendo licensees."

Entry into the Nintendo market started with licensing the rights to 15 Electronic Arts properties to other Nintendo licensees for distribution in North America. "We believe we have licensed more properties for conversion to Nintendo than any other company," said Hawkins. "This gives us confidence that our titles are marketable in the Nintendo arena." Two of these 15 products are currently shipping and the company expects substantial royalty income from these products in the future.

Analysts estimate that the current generation of 8-bit videogame systems will reach an installed base of 30 million by the end of 1990. "That's three times the base of the original Atari system, and a pretty clear indication that this market is here to stay," stated Hawkins. "With our broadened Nintendo strategy we will participate more fully in the 8-bit market and be in good position to become a market leader as 16-bit systems emerge."

Electronic Arts' mission is to be a leader in providing entertainment software for the mass markets.

RICHMOND, VA (MAY 7) PR NEWSWIRE - Signet Bank/Virginia announced today that it has agreed to buy the First Colonial branch in Virginia Beach of Perpetual Savings Bank, F.S.B. of Alexandria, Virginia. The deposit liabilities to be assumed by Signet totaled approximately $84.4 million at March 31, 1990. The transaction is expected to close in the third quarter of 1990 and is subject among other things to approval of bank

regulatory authorities.

Robert D. Bruton, senior vice president in charge of Retail Banking for the Hampton Roads Region of Signet Bank, said "Signet is looking forward with a great deal of enthusiasm to serving the First Colonial/Hilltop area. We have had the market targeted for years and this purchase is the perfect vehicle for us to establish our presence. We have a large number of customers in the area who will certainly be better served from this branch and we are excited about being a part of this dynamic area."

Signet Bank/Virginia operates 28 branches in the Tidewater area and 140 branches in Virginia. Signet Bank/Virginia is a wholly owned subsidiary of Signet Banking Corporation (NYSE: SBK) which is a $12 billion organization with 240 full-service banking offices throughout Maryland, Virginia and the District of Columbia. It also offers investment services including municipal bond, government, federal agency and money market sales and trading, foreign exchange trading and discount brokerage, an international operation concentrating on trade finance, and specialized services for trust, leasing, asset based lending, cash management, real estate, insurance, consumer financing and investment banking.

DURHAM, NC (MAY 7) PR NEWSWIRE - Liggett Group Inc. (NYSE: LIG), today reported net income of $25,489,000 or $1.06 per share for the year ended March 31, 1990 compared to net income of $30,240,000 or $1.26 per share for the same period last year. Net sales for the year were $572,853,000 compared to net sales of $500,969,000 a year ago.

For the three months ended March 31, 1990, net income was $3,182,000 or $0.13 per share compared to net income of $4,859,000 or $0.20 per share for the same period last year. Net sales for the fourth quarter were $140,154,000 compared to net sales of $121,556,000 for the same period a year ago.

According to K.v.R. Dey, Jr., President and Chief Executive Officer, "Net sales for the quarter and year increased over the same periods last year due to cigarette sales price increases, higher unit sales of cigarettes, and sales of several non-tobacco products. Cigarette unit sales were ahead of the same period last year due to continuing consumer acceptance of Pyramid, an extra-low price brand, and Eve Ultra Lights 120's. The increase was partially offset by the continuing historical decline in unit sales of established brands and other price value products. Net earnings for the quarter and year end were below the same periods last year principally as a result of non-operating expenses.

Liggett Group Inc. manufactures, markets and distributes cigarettes including L&M, Chesterfield, Lark and Eve brands as well as price/value cigarettes such as our Pyramid brand and private label products. The Company also currently markets several sports-related products as well as two confectionery products.

NEW YORK (MAY 7) PR NEWSWIRE - Pan American World Airways Inc. and AT&T Computer Systems today announced they have signed a five-year contract for AT&T to provide networked computers to serve the airline's airport, reservation, and operational and administrative sites worldwide. In addition, AT&T will service and maintain a wide array of existing Pan Am equipment. The contract value is estimated at $40 million.

That long-term Pan Am project calls for eventually automating every point of contact between the airline and its passengers, incorporating such functions as ticket issuing, baggage handling and boarding.

In addition to supplying networked computers, AT&T will maintain other

vendors' equipment, including printers and scanners for tickets, boarding passes and baggage tags at domestic and international locations. Pan Am awarded AT&T the contract following a competitive bidding process.

AT&T's open architecture will protect Pan Am's software-development investments while offering easy access to emerging technologies. For example, additional equipment, including multi-LAN network servers and gateways, can be installed at heavy-volume sites as needed.

BOHEMIA, NY (MAY 7) PR NEWSWIRE - Symbol Technologies, Inc. (NYSE: SBL), the world leader in barcode-based data capture systems, today announced that it has signed comarketing agreements with the Store Technology Division of Citicorp POS Information Services Inc., a leading systems integrator for the supermarket industry; and with Total Control Information (TCI), a major developer and marketer of software systems for the supermarket industry.

Under terms of the agreement with Citicorp POS, Symbol Technologies hand-held terminals, laser scanners and barcode printers will be marketed as key components of the total systems solutions Citicorp POS provides supermarkets and drugstores.

Symbol Technologies also will comarket its hand-held terminals, laser scanners and barcode printers with Total Control Information's supermarket and drugstore software systems to allow stores to fully automate and thoroughly manage information -- from deliveries at the loading dock to sales at the check-out counter.

The integration of Symbol hardware with both Citicorp POS and TCI software will automate a number of supermarket and drugstore applications, including the following:

-- tracking and indexing of records such as UPC codes, and maintaining item descriptions for storewide merchandise; -- simplifying direct-store delivery by wholesale or manufacturer; -- managing inventory; and -- providing detailed summaries and reports for all receiving transactions, which can be transmitted to a host computer.

Symbol Technologies, Inc. is the world leader in barcode-based data capture systems, with more than one million terminals and scanners installed. The company designs, manufactures and markets barcode reading

equipment, portable data terminals and radio frequency data communications products. Its products are used as strategic building blocks in data collection systems for retail, military, manufacturing, distribution, health care and other applications.

#90127p1502 05/07/1990 ~PR Newswire

MORRISTOWN, NJ (MAY 7) PR NEWSWIRE - Bellcore has signed its first agreement to analyze a vital equipment interface for nationally compatible signal transmissions for Integrated Services Digital Networks (ISDN).

Under a contract with NEC of Japan, Bellcore will analyze the company's HMC-3105 ISDN U-interface transceiver, a basic-rate (2B1Q -- see note) "U" microchip, and test it for compliance with standards set by the American National Standards Institute (ANSI). These standards will help to ensure compatibility between ISDN users' equipment and the public telephone networks owned by local exchange companies.

U-interface chips are expected to be widely used in telecommunications devices such as switches, digital loop carrier systems and ISDN customer terminals and telephones. U-interfaces are the points in the public network infrastructure where transmission protocols, or "handshakes," are made between and ISDN customer's location and a telephone company's ISDN central-office network switching equipment. The interface chip provides digital signal processing to enable simultaneous two-way transmissions between customer equipment and a local switch.

With nationally compatible interfaces, Bellcore's owners and other local exchange carriers (telcos) who use them will be able to accommodate a mix and match between ISDN customer equipment and network components from different suppliers. Their customers will then be able to select from an array of forthcoming ISDN equipment.

Bellcore will test the NEC chip for compliance both with standards established in 1988 by the American National Standards Institute (ANSI), and with the extensive set of generic requirements it has developed for basic-rate ISDN U-interface chips, according to Michael Schwartz, Bellcore's division manager responsible for the tests.

Though only about five to 10 manufacturers will produce these chips, the potential market for them in all types of future ISDN network and subscriber equipment will be extensive. The chips are expected to become generally available in the U.S. market later this year, Schwartz also said.

Bellcore provides technical support for the telephone companies of Ameritech, Bell Atlantic, BellSouth, NYNEX, Pacific Telesis, Southwestern Bell Corp. and U S West, as well as Cincinnati Bell Telephone and the Southern New England Telephone Company.

CONTACT: Barbara A. Kaufman of Bellcore, 201-740-4324, or Jennifer Towler of NEC, 214-518-5358.

#90127p1510 05/07/1990 ~PR Newswire

LOS ANGELES (MAY 7) PR NEWSWIRE - ARCO (NYSE: ARC) reported 1990 first quarter net income of $547 million, or $3.28 per share, compared with $704 million, or $4.00 per share, in the 1989 first quarter, ARCO Chairman and Chief Executive Officer Lodwrick M. Cook announced today.

ARCO's return on stockholders' equity for the 12 months ended March 31, 1990, was 27 percent.

"This was an outstanding first quarter as a result of strengthened crude oil prices, higher refined product prices, and increased natural gas sales " Cook said. "Excluding significant special gains and charges for both quarters, ARCO's earnings would have increased 10 percent to $457 million in the 1990 first quarter, compared with $415 million for the same period last year."

The company's 1989 first quarter included a $634 million after- tax gain resulting from the initial public offering of Lyondell Petrochemical Company which was partially offset by $345 million in charges for future environmental and other expenses.

In the 1990 first quarter, ARCO adopted the Statement of Financial Accounting Standards No. 96, "Accounting for Income Taxes." The cumulative effect of this change in accounting principle was a $323 million reduction in the company's deferred tax liability and a corresponding increase in 1990 first quarter net income. This benefit was partially offset by net charges totaling approximately $233 million after tax. The offsetting charges included provisions for taxes and other related issues, future environmental clean-up costs, and high coupon debt redemption and were partially offset by a gain associated with a natural gas settlement.

After-tax earnings for worldwide oil and gas exploration and production operations increased 64 percent to $319 million in the first quarter of 1990, compared with $195 million in the 1989 first quarter.

ARCO's average price for domestic crude oil was $14.72 per barrel in the first quarter, up from $11.85 per barrel in the same quarter of 1989. Average domestic natural gas prices were $1.89 per thousand cubic feet,

compared with $1.80 in the first quarter of 1989.

Worldwide exploration expenses totaled $111 million for the 1990 first quarter, compared with $91 million in last year's first quarter.

ELGIN, IL (MAY 7) PR NEWSWIRE - Jacob Saliba, chairman of Katy Industries Inc. (NYSE: KT) today reported net income of $19,638,000 or $2.96 per share for the quarter ended March 31, 1990 compared to net income of $1,325,000 or $.13 per share for the same period last year. Income from continuing operations for the 1990 quarter was $18,347,000 or $2.76 per share compared to $4,054,000 or $.57 per share in 1989. The 1990 quarter included the previously reported gain on the sale of a minority interest in a German subsidiary of $14,250,000 or $2.19 per share.

Sales from continuing operations for the first quarter were $59,144,000 compared to sales of $43,663,000 for the same quarter in 1989.

Saliba noted that income from continuing operations for both the 1990 and 1989 quarters included non-recurring income items and absent those, the 1990 quarter showed income of $4,097,000 or $.57 per share compared to $2,711,000 or $.36 per share in 1989. He also noted that much of the gain in both sales and adjusted net income came from Katy's German operations.

Saliba, while commenting primarily on results of continuing operations, also noted that the 1990 quarter's net income included a one-time credit of $1,291,000, or $.20 per share, reflecting a required change to the equity method for accounting for Katy's investment in a partially owned entity. The 1989 quarter included a loss of $2,729,000, or $.44 per share, from discontinued operations.

Katy Industries, Inc., with consolidated sales of over $200,000,000, is a major diversified corporation with interests in industrial machinery, industrial components, consumer products and energy resources.

#90127p1521 05/07/1990 ~PR Newswire

PHILADELPHIA (MAY 7) PR NEWSWIRE - Rohm and Haas (NYSE: ROH) executives today confirmed that the company's 1990 operating earnings will likely equal 1989 earnings of $176 million.

Speaking during the company's annual stockholders' meeting, President John P. Mulroney commented that the company could expect to report slightly higher unit volumes and would benefit from lower raw material prices. However, these benefits are likely to be offset by increasing environmental expenditures and the cost of financing the company's capital spending program. He concluded, "These factors suggest that a prudent forecast of 1990 earnings is about equal to that of 1989."

Chairman J. Lawrence Wilson told shareholders that environment- related costs will increase dramatically in coming years. He announced that the company will spend more than $500 million over the next seven years for environmental improvements.

"We expect to reduce toxic air emissions by 75 percent; eliminate nuisance

odors; build on-site incinerators to handle plant wastes; move chemical sewers above ground, and significantly reduce the liquid and solid wastes generated by our production processes," Wilson said.

#90127p1526 05/07/1990 ~PR Newswire

CALGARY, ALBERTA (MAY 7) PR NEWSWIRE - Two new international contracts, one in Jordan and one in Turkey, have been awarded to Novacorp International Consulting Inc., a wholly owned subsidiary of NOVA Corporation of Alberta (Montreal, Toronto, Alberta: NVA).

In Jordan, a team of Novacorp specialists will conduct a natural gas utilization study for the Natural Resources Authority, which is part of Jordan's Ministry of Energy and Mineral Resources. This work is being funded by Petro-Canada International Assistance Corporation (PCIAC) as part of their multi-year program of technical assistance to Jordan.

The study will assess natural gas supplies and markets. It will also focus on the technical and economic feasibility of buidling a pipeline network to transport natural gas to the Amman area and other locations in Jordan from the newly discovered Risha gas field.

In Turkey, Novacorp is working with TUMAS, a Turkish engineering and consulting firm. Together, the consortium will conduct preliminary design work for the addition of three new transmission lines to Turkey's natural gas pipeline system. The project comprises three sections of pipeline totalling 1,800 kilometers in length. The pipelines will be owned by BOTAS Petroleum Pipeline Corporation of Turkey and will expand the geographical area served by natural gas, helping Turkey to meet its objectives of gas utilization throughout the country.

The Jordan contract represents ongoing busines activity for Novacorp in the Middle East. The project in Turkey is part of Novacorp's continued participation in Turkish pipeline development. Earlier, Novacorp provided comprehensive technical consulting services for the pipeline which transports U.S.S.R. gas from the Bulgarian border to various locations in Turkey.

Novacorp provides technologically advanced engineering and operating expertise in pipeline transportation systems and petrochemicals to clients around the world.

NOVA is a widely held, shareholder-owned company operating internationally from world headquarters in Calgary, Alberta, Canada.

DALLAS (MAY 7) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) and Tesoro Petroleum Corporation (NYSE: TSO) today jointly announced the completion of the previously announced sale of substantially all of the rental tool assets and business of Tesoro's wholly-owned San Antonio-based subsidiary, Land & Marine Rental Company, as well as the Land & Marine corporate name, to Grace Energy's Houston-based subsidiary, Homco International, Inc. The purchase price was $15 million in cash.

Homco is one of the largest firms that rents various tools used in the oilfield. It is also an industry leader in fishing and cutting services and pipe recovery wireline services to the oil patch. Land & Marine had 15 operational areas, 13 of which will be combined with the existing Homco operations, while both Kenai, Alaska and Venice, La. will be two new geographical markets to be served by Homco.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of oil and natural gas; and in coal mining.

Tesoro Petroleum Corporation is a natural resource company engaged in the following industry segments: refining, marketing, transportation and crude oil supply; exploration for and production of crude oil and natural gas; and oil field services.

ROCHESTER, NY (MAY 7) PR NEWSWIRE - Kodak Supralife and Photolife batteries will offer U.S. consumers the alkaline battery industry's only unconditional guarantee, Eastman Kodak Company (NYSE: EK) announced today.

Beginning in July, the new "LongLife Guarantee" means Kodak will replace any of its batteries that do not perform to consumer expectations.

Buyers in any way dissatisfied with Kodak cells may return them to Kodak, which will then mail back fresh batteries of the same type and size at no cost. Consumers must send the batteries, postage paid, with their address, phone number, date of purchase and description of usage to Kodak's Ultra Technologies, Customer Service, P.O. Box 227, Newark, N.Y., 14513.

Kodak will mail replacement batteries within six weeks of a claim, but no cash refunds will be given. The guarantee becomes void six months after the "installed by" freshness date on the battery package, and there is a limit of up to 16 batteries per group or address. Retailers and distributors of Kodak batteries are excluded from the offer.

"Dependability has been the centerpiece of our battery brand since its debut," said Peter M. Palermo, Kodak vice-president and general manager of the Consumer Imaging Division. "By making this iron-clad guarantee, we believe retailers will discover that Supralife and Photolife alkaline batteries truly exemplify Kodak's heritage of quality and dependability."

"Our research shows," he added, "that 94 percent of consumers are likely to purchase Kodak batteries with the LongLife Guarantee. They told our researchers they believe that batteries carrying this guarantee would last longer, have especially high quality, and be more dependable."

DENVER (MAY 7) PR NEWSWIRE - Martin Marietta Astronautics Group has been awarded the Contract Management Division's Big "Q" Award for 1989, presented annually to an Air Force contractor that significantly demonstrates its ability to produce a quality product on a continuing basis.

The Air Force's Contract Management Division (CMD) presents the award to one of 26 companies that it monitors for compliance with contract requirements. The award goes to the company that best demonstrates its ability to "build it right the first time," which requires a team effort among engineering, manufacturing, and quality assurance. Measurable improvement in product quality and user satisfaction also are key elements of the Big "Q" Award.

Among notable quality improvments by the Astronautics Group were: reducing the time it takes to build a major component of the Titan IV space launch vehicle from 2,500 hours to 1,200 hours; reducing the time necessary to prepare quarterly contract status reports from 2,000 hours to 750 hours; and improving 123 processes in the Space Systems company that saved more than 71,000 man hours and $10 million.

"All of these improvements are a direct result of our emphasis on achieving continuous improvement in everything we do," said Peter B. Teets Astronautics Group president.

"Last year, more than 5,500 employees at all levels were trained on how to work better together to find more effective ways to do their jobs. People empowerment challenges each employee to become more involved in decisions to improve product quality and productivity, and reduce costs."

Air Force Col. John B. McCabe, commander of the Astronautics Group's Air Force Plant Representative's Office, recently presented the award to Teets at the Group's annual awards night.

"Martin Marietta's strong commitment to innovation, teamwork and quantitative measures was instrumental in their winning the Contract Management Division's 1989 Big 'Q' Award," McCabe said. "It was indeed a pleasure to present this award at the recognition dinner for more than 100 of their most innovative and forward-thinking employees--they are the ones who made the award a reality."

Col. Kenneth G. Miller, commander of the CMD at Kirtland Air Force Base, N.M., said in a letter to Teets, "I congratulate you and your team at Martin Marietta for your Quality performance last year. The success of the Martin Marietta Astronautics Group can be directly traced to the total commitment you have made to quality improvement."

GLENVIEW, IL (MAY 7) PR NEWSWIRE - Kraft USA, an operating unit of Kraft General Foods, Inc., today introduced its Micro-Merchandising System -- a state-of-the-art customer marketing program to help the retail grocery trade develop customized programs for consumers. The announcement was made at the Food Marketing Institute's Supermarket Industry Convention in Chicago.

The Micro-Merchandising System segments shoppers into six categories, each with their own purchasing characteristics. This will allow grocers to better understand the purchase behavior for consumers who shop at their stores, based on profiles of consumer behavior, demographics, lifestyles, product purchases and retail store trading area definitions.

The system uses a sophisticated three-source data base from Information Resources, Inc., Market Metrics and Equifax Marketing Decision Systems. With this program, the Kraft sales force will be able to give grocers store-specific information about where shoppers live, their purchase potential and shopping habits. The system further helps the grocer develop a merchandising program to attract customers in the most

profitable way.

The program is available in Chicago; Philadelphia; Washington, and St. Louis. The Micro-Merchandising System divides shoppers into the following categories: Full-Margin Shoppers, Merchandise-Ables, Planners and Dine-Outs, Commodity Shoppers, Frequent Shoppers, and Mini-Basket Shoppers.

Full-Margin Shoppers are 35-74 years old with few children. They are affluent and shop often, buying what they want and having an average response to merchandising. They have active, busy lifestyles, and they entertain at home.

Merchandise-Ables are from 30 to 54 years old, and relatively affluent. Their households generally include children under age 18. These brand-name buyers shop less frequently and spend more per trip. Merchandise-Ables have both high store loyalty and response to merchandising.

Planners and Dine-Outs range from 30 to 74 years old and have few children. They make fewer shopping trips, but as their name suggests, have great coupon usage and response to feature advertising.

Frequent Shoppers -- singles and couples 19-30 years old -- spend less money per trip. With low to middle incomes, they are responsive to displays and price reductions.

Kraft General Foods, headquartered in Glenview, is the multinational food business of Philip Morris Companies Inc. (NYSE: MO).

#90127p1553 05/07/1990 ~PR Newswire

ATLANTA (MAY 7) PR NEWSWIRE - Eastern Airlines today announced new marketing actions to increase business and leisure traffic leading into the peak summer travel season.

The program includes a money-back, satisfaction-guarantee for business travelers, plus $29 one-way children's fares for Florida travel.

Eastern also will accept most unrestricted coach tickets issued by other airlines and upgrade those passengers to first class, usually with a refund.

"Y-Not" fares are available for 9,000 first class seats daily on Eastern's 800 flights to 85 cities. The fares are unrestricted and fully refundable.

Eastern also unveiled new summer fares for children to travel to any of nine Florida cities for $29 on off-peak days and $39 on peak travel days each way. Kids aged 2 to 17 are eligible, and must accompanied by an adult traveling on an excursion fare.

As an example of the potential savings, two adults and two children can fly from New York to Orlando's Disney World for $472 round trip. That's a

savings of $240 over currently available lowest rates.

The special fares apply for flights to and from Miami, Fort Lauderdale, Orlando, Tampa, Sarasota, West Palm Beach, Daytona Beach, Fort Myers and Melbourne from all cities served by the airline east of the Mississippi and including Kansas City, Mo.

The children's rates are available June 4 to Sept. 8, excluding Labor Day peak travel periods. Trips must be completed by Sept. 9.

Listed below are sample one-way "Y-Not" fares, compared with standard coach and first class levels:

CITY PAIR	"Y-Not"	LOWEST UNRESTRICTED INDUSTRY COACH	INDUSTRY FIRST CLASS
New York-Atlanta	$300	$360	$540
Atlanta-Miami	268	322	481
Chicago-Atlanta	298	360	537
Denver-Atlanta	395	481	718
Atlanta-San Francisco	478	585	875
Miami-Los Angeles	449	549	820
Washington-Atlanta	258	309	459
Boston-Miami	264	317	464

#90127p1558 05/07/1990 ~PR Newswire

SEATTLE (MAY 7) PR NEWSWIRE - The Chilean airline LADECO has selected two new Boeing 757 jetliners for fleet modernization. The privately-owned carrier will take delivery of its first 757 in May 1991 and the second in June 1992. Both aircraft were obtained under lease from International Lease Finance Corp. The airline will replace its Boeing 707s with the new twinjets.

LADECO will use the Boeing 757s to fly nonstop from the airline's home base of Santiago to Miami and New York. The aircraft are to be powered by Pratt & Whitney PW2040 engines.

High-bypass-ratio engines, combined with an advanced wing design, help make the Boeing 757 one of the quietest, most fuel-efficient jetliners in the world. The engines have large-diameter fans which move more air around the outside of the hot core, boosting efficiency while reducing noise.

When compared to any single-aisle jetliner currently in operation, the 757

is unsurpassed in fuel-efficiency. It consumes up to 43 percent less fuel per seat than older trijets. In a typical two-class configuration, the 757 carries 186 passengers.

The flight deck of the 757 is one of the most advanced in service today. Designed for two-crew operation, it is furnished with state-of-the-art digital electronics and cathode ray tube (CRT) displays.

A computerized, fully-integrated flight management system provides for automatic guidance and control of the 757 from immediately after takeoff to final approach and landing. Linking together digital processors controlling navigation, guidance and engine thrust, the flight management system assures the aircraft flies the most efficient route and flight profile for reduced fuel consumption, flight time and crew workload.

To date, a total of 632 Boeing 757s have been ordered by 32 customers worldwide.

#90127p1567 05/07/1990 ~PR Newswire

NEW YORK (MAY 7) PR NEWSWIRE - WMS Industries Inc. (NYSE: WMS) announced today results of operations for the third quarter and nine months ended March 31, 1990.

Revenues for the quarter ended March 31, 1990 were $41,918,000 as compared with $46,271,000 in the corresponding quarter of the prior fiscal year. In response to serious financial concerns recently expressed by the management of Divi Hotels N.V., relating to its inability to fund operating activities and make interest payments on its publicly-held debt, the company has determined that it is appropriate at this time to write-off its investment in the common stock of Divi.

Accordingly, the quarter ended March 31, 1990 includes an unrealized loss of $7,023,000. This write-off was made notwithstanding the existence of an agreement through which the company has the right, under certain circumstances, to sell to The Palmer Group all or portion of the shares owned for a price of $9.50 per share, approximately the average price paid by the company for such shares. (Future sales of Divi shares will be recorded as gains). As a result of this write-off, the company reported a loss of $5,777,000 ($.68 per share) for the quarter ended March 31, 1990 as compared with net income of $6,335,000 or $.76 per share in the prior year's corresponding quarter.

The company's operations in Puerto Rico were adversely affected by a

number of events, including: (a) a misconception that the effects of Hurricane Hugo, which occurred in September 1989, would in some way interfere with vacation plans during the high season winter months; and (b) the company's decision to reduce average room rates in order to maintain occupancy levels in the face of the weakness in the more profitable segments of our hotel/casino business.

Revenues in the company's coin-operated amusement game business were lower in the current third quarter than the prior year comparable quarter primarily because of a lack of meaningful video game sales. This decrease occurred as a result of the company's decision to withhold one video game from the market, because of its failure to achieve satisfactory test results, and the timing of the completion of another video game model originally scheduled for completion in the third quarter of this fiscal year which was not ready for production until the fourth quarter.

WMS Industries Inc. is engaged in the design, manufacture and sale of coin-operated amusement games and the ownership and operation of hotels and casinos.

#90127p1571 05/07/1990 ~PR Newswire

OAK BROOK, IL (MAY 7) PR NEWSWIRE - Clemson University is launching a $10 million environmental research program made possible in part through a $3.6 million of support from Chemical Waste Management, Inc.

The company is providing a $1.6 million corporate gift plus $2 million in guaranteed research funding. Chem Waste's pledge is the largest corporate commitment in the university's history. The balance of funds will come from the university and philanthropic donations.

A primary focus of the program will be developing methods for safely managing "mixed wastes" that contain both radioactive and hazardous constituents. It is now difficult to manage such wastes because they have to be treated and disposed under distinct sets of regulations that are administered by different federal agencies.

"This research is vitally important to our nation as our citizens grow more environmentally conscious and responsible," said Jerry E. Dempsey, president and chief executive officer of Chemical Waste Management, Inc. "Its work will help in safely managing wastes still being produced as well as correcting problems from past mismanagement of these wastes," he added.

"This university-industry partnership will work toward solutions for one of the nation's most critical environmental problems - clean up of the waste created by our industrial society," noted Max Lennon, president of Clemson University.

Chem Waste's newly established subsidiary, Chem-Nuclear Laboratory Services, Inc., will be the first tenant of a two-building research park in Clemson, S.C., that is part of the program. A second building will house Clemson's graduate research program of the university's environmental systems engineering department as well as personnel from Chem-Nuclear Laboratory Services.

In addition to its research into the management of mixed wastes, the joint Chem Waste-Clemson program will conduct research in areas such as waste minimization, recycling, air pollution control and environmental policy issues.

Clemson is one of the few universities in the nation with a separate division in its engineering college for environmental systems engineering. Chemical Waste Management is the nation's largest environmental services company specializing in the recovery, treatment and disposal of hazardous wastes and the cleanup of properties contaminated by such wastes.

DULUTH, MN (MAY 7) PR NEWSWIRE - Minnesota Power's (NYSE: MPL) annual meeting of shareholders in Duluth, Minn., on Tuesday, May 8, is expected to attract a record number of shareholders.

More than 5,200 shareholders have registered to attend, which would make the largest gathering in Minnesota Power's history, and perhaps one of the largest annual meetings ever held by a publicly owned company.

By comparison, attendance this year at GM's annual meeting was 821, and at AT&T, 1,100 shareholders turned out.

Attendance at Minnesota Power's meeting this year is expected to be up sharply from 2,100 last year as a result of a new program to have electric customers also become owners of the company through purchasing shares of common stock. The company is also offering tours of its joint venture paper mill in Duluth, as well as access to other attractions in the Lake Superior port city.

#90127p1581 05/07/1990 ~PR Newswire

WASHINGTON (MAY 7) PR NEWSWIRE - GEICO Corporation (NYSE: GEC) today reported its results for the three months ended March 31, 1990.

The corporation's interim report to shareholders will be mailed on or about May 14, 1990.

Commenting on the corporation's results, Chairman Bill Snyder said: "Net income for the first quarter of 1990 was $46.4 million, compared to $45.5 million for last year's first quarter. On a per share basis, net income was $3.02 this year and $2.94 for the same period in 1989. These results included realized investment gains after tax of 56 cents per share in 1990 and 39 cents per share in 1989. The 1990 realized gains included 48 cents per share resulting from the sale of our 20 percent interest in Bond

Investors Group in January.

"Net income for the quarter also included a $1.1 million, or 7 cents per share, 'fresh start' tax benefit while the benefit was $1.2 million and 8 cents per share in the same period last year.

"When compared with the first quarter of 1989, earnings were flat largely because automobile losses were higher than planned. This led to an unfavorable 98.5 percent consolidated underwriting ratio this year, compared to a quite favorable 94.5 percent ratio achieved in the corresponding 1989 quarter. Auto premiums and expenses were close to plan and auto claims frequency and average severity continued to increase at a relatively steady rate for most coverages. I do not, therefore, regard these first quarter results as being a concern.

"Property and casualty earned premiums were up 5.3 percent over 1989. On a consolidated basis, however, premiums were up only 1.4 percent because premiums from our Medicare Supplement business, which was sold in January 1990, were $15.4 million less than in the first quarter of 1989.

"In GEICO, our principal subsidiary, earned premiums also were up 5.3 percent over the 1989 level. New policy sales were less than planned for the quarter but better than the first quarter of 1989. GEICO's underwriting ratio was 98.6 percent, compared to 94.0 percent in the first quarter of 1989," Snyder said.

HARRISBURG, PA (MAY 7) PR NEWSWIRE - Employees of Pennsylvania Power & Light Co. (PP&L) dominated the annual energy management contest conducted by the Industrial and Commercial Committee of the Pennsylvania Electric Association (PEA), winning seven of 12 awards, it was announced today.

PP&L swept the Industrial Process Application category, placed third in the Space Conditioning Application, and won the General Application category and also received an honorable mention in this category.

Fred J. Brazina, Frank J. Gaida, Kenneth W. Davidson and John F. Muller placed first, second, third and honorable mention in the Industrial Process Application. Karen R. Sheehe was first in General Application. Robert J. McHale was third in Space Conditioning Application, and Frank A. Rogers received honorable mention in General Application.

Lawrence Abramovitz of the Philadelphia Electric Co. placed first in the

Space Conditioning Application, with Vicky S. Napp of Metropolitan Edison Co. second, and Jonathan H. Black of Met-Ed receiving honorable mention. Charles A. Lanager of West Penn Power Co. was second and W. "Bud" Nagle of Met-Ed third in General Application.

First-place winners received a cash award of $200; second place was worth $100 and third place $50.

The contest, sponsored by the Industrial and Commercial Committee, is designed to encourage innovative energy management ideas that promote efficient use of electric energy.

PEA is the trade association of the 11 investor-owned electric utilities in Pennsylvania. These utilities provide electric service to 95 percent of the state's population and supply 98 percent of the electricity consumed in the commonwealth.

ROCHESTER, NY (MAY 7) PR NEWSWIRE - Eastman Kodak Company today (NYSE: EK) today announced national implementation of its program to recycle single-use cameras in the U.S. Under Kodak's program, photofinishers will be reimbursed for the return of Kodak Fling 35, Stretch 35 and Weekend 35 cameras to the company.

Elements of the recycling program were announced in February. This week, photofinishers are receiving details of the program which include reimbursement of shipping charges back to Rochester and payment of a handling charge for each camera returned.

"We have created a closed loop system for our single-use cameras," said Peter M. Palermo, Kodak vice president and general manager of the Consumer Imaging Division. "We manufacture the camera, distribute it for sale, reimburse the photofinisher when the camera is returned for recycling, and distribute another camera made from the recycled material and components."

he observed.

Kodak will examine and reuse portions of the camera while regrinding and remolding other parts. Remanufactured cameras will have to pass the same strict quality control tests imposed for cameras made of entirely new materials.

"We are delighted with the positive response we received from customers, dealers and photofinishers on this program. We are committed to implementing programs that reduce the amount of waste being incinerated and going into landfills. Kodak intends to maintain its leadership role by moving toward producing products that are recyclable or produced from recycled material whenever possible." said Palermo.

In addition to Kodak's program to recycle single-use cameras, the company has put in place programs to recycle 35 mm plastic film canisters and to manufacture film packaging from recycled paperboard.

The single-use camera recycling program will be extended to Europe and other areas of the world in 1991. "We are encouraging photofinishers to return 100% of these cameras for recycling, it's the right thing to do." Palermo concluded.

#90127p1591 05/07/1990 ~PR Newswire

LOS ANGELES (MAY 7) PR NEWSWIRE - To inaugurate their co- production activities in Europe, Twentieth Century Fox has signed a deal with producer John Goldstone to create a film development and production unit which will draw on British talent to make a series of comedy films for the world market, it was announced today by Roger Birnbaum, president, world-wide production for Twentieth Century Fox.

Goldstone commented: "It will be a London-based operation, and its goal is to make comedies that can have the same kind of success in the international market that films like 'A Fish Called Wanda' and the Monty Python films achieved in the last two decades. There has always been a large international market for British comedies, beginning with the films of the Ealing Studios, the Boulting Brothers and the 'Carry On' series. We want to continue that tradition into the nineties.

"Today, the proving ground in Britain for new comedy talent in television. Shows like 'The Comic Strip,' 'Blackadder,' and 'Yes, Minister' have showcased a wealth of new comedy talents who are willing to be tapped. Through our association with Twentieth Century Fox, we can now offer them the opportunity to develop new film ideas for audiences everywhere."

Birnbaum comments: "The formation of such a unit will create a focal point where new ideas and talent can be developed and cross- fertilized with other creative talents both here and abroad, to produce films for the expanding international marketplace. Our first step in that direction was the acquisition of 'Nuns on the Run,' the Eric Idle-Robbie Coltrane comedy directed by Jonathan Lynn, in which Fox was also involved at the post-production stage."

Francesca Barra, vice president, international acquisitions and production adds: "This unit will form part of Fox's overall plans for its newly established European production program."

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

#90127p1598 05/07/1990 ~PR Newswire

CHICAGO (MAY 7) PR NEWSWIRE - Buccino & Associates, one of the nation's leading crisis management firms, today announced an 88 percent increase in first-quarter 1990 operating revenues compared with the same period in 1989.

The company believes the magnitude of this increase reflects the growing number of companies taking early action to prevent the possibility of business failure.

Gerald P. Buccino, president, said, "Historically, our first quarter results usually contribute significantly to the full year's results, and this seasonal spike represents our best first-quarter period ever.

"Operating revenue growth averaged 19 percent for each of the other quarters in the trailing 12 months, which indicates that more firms are becoming proactive and seeking restructuring advice before year-end figures show that cash out has exceeded cash in." Business failures reached a peak in the mid-1980s, then started to decline during the late 1980s," Buccino said.

"This trend, coupled with an increase in turnarounds, makes a good case for our belief that more and more companies are taking preventive action at the first sign of trouble instead of waiting until it's too late to remedy the situation."

Buccino continued, "Interestingly, the number of business failures in the

1980s exceeded that of the Depression decade. For the 1980s, 94 businesses failed per 10,000 in contract with 86 per 10,000 during the 1930s.

"When put into context with the recently compiled figures by Dun & Bradstreet that show business failures declined nine percent to 49,719 in 1989 from 61,111 in 1987, the nine percent increase in failures per 10,000 takes an added significance."

"The record number of failures occurring in the mid-1980s," Buccino said, "In part was due to the record number of new companies that began operating, of which one-third fail in the start-up phase of 1-3 years."

According to Buccino, "We're encouraged that mid-sized companies as well as larger concerns recognize the significance of the business failure problem and are seeking the counsel of firms such as ours in order to avoid failure."

Buccino & Associates, Inc., headquartered in Chicago, is dedicated exclusively to developing and implementing turnarounds and workouts for financially troubled companies. The privately held consulting firm has grown substantially since founded in 1981, and today operates nationally with regional offices located in New York, Los Angeles, Dallas, and Atlanta.

#90127p1600 05/07/1990 ~PR Newswire

NEW YORK (MAY 7) PR NEWSWIRE - For the second quarter of 1990, the General Motors (NYSE: GM) board of directors voted to continue the dividends currently being paid on all three classes of GM common stock.

Holders of GM's $1-2/3 par value common stock will receive $0.75 per share; those owning Class E common will receive $0.14 per share (on a post-split basis); and Class H common stock holders will receive $0.18 per share.

Dividends on all three classes of common stock are payable June 9, 1990 to stockholders of record on May 17, 1990.

The dividend on GM's $1-2/3 par value common stock continues the level established in the first quarter of 1989 when the payout was increased by 20 percent and the stock was split two-for-one.

The Class E dividend was increased 17 percent in the first quarter of 1990

to reflect improved results at GM's Electronic Data Systems subsidiary.

Class H dividends, which are based on the earnings of the GM Hughes Electronics subsidiary, continue the rate established in the first quarter of 1989.

In other action today, GM's Board declared quarterly dividends of $0.28 per share on Series E-I, E-II and E-III preference stock, and $0.36 per share on Series H-I, H-II and H-III preference stock. These dividends are also payable June 9, 1990 to stockholders of record on May 17, 1990.

The board also declared quarterly dividends of $1.25 per share on the $5.00 series preferred stock and $0.9375 per share on the $3.75 preferred stock, payable Aug. 1, 1990 to shareholders of record on July 2, 1990.

#90127p1606 05/07/1990 ~PR Newswire

DALLAS (MAY 7) PR NEWSWIRE - Texas Oil & Gas Corp. (TXO) today announced that the Ozark Gas Transmission System partnership intends to request approval from the Federal Energy Regulatory Commission (FERC) for a major expansion of its 266-mile interstate pipeline system. A TXO subsidiary serves as operator of the Ozark system which bisects the Arkoma Basin and flows west-to-east from major gas producing regions in eastern Oklahoma to its terminus in White County, Ark.

The estimated $12 million expansion will nearly double Ozark's present capacity, increasing it from 170 to 330 million cubic feet per day by adding compression to the system's existing 20-inch diameter mainline.

Ozark also will seek authority from FERC to become an open access transporter. Tennessee Gas Pipeline Co. and Columbia Gulf Transmission Co. are considering plans to build major extensions to Ozark from their existing systems in northwestern Mississippi.

The Ozark Gas Transmission System, which was completed in 1982, is operated by Ozark Gas Pipeline Corp., a wholly owned TXO subsidiary. The TXO unit has a 25 percent interest in Ozark along with Columbia Gulf and subsidiaries of Tenneco Inc. and ONEOK Inc.

The Arkoma Basin, a major onshore source of natural gas, has had several significant Arbuckle Trend discoveries during the past two years which have clearly identified the region as a prolific gas supply area.

Since Ozark already has a strategically located pipeline system in place, this capacity expansion will provide an efficient, low-cost transportation

alternative for Arkoma producers. Gas consumers in the northeastern United States will also benefit from having Ozark's expanded capacity -- and Arkoma Basin gas supplies -- directly linked to pipelines serving that region of the country.

Tennessee Gas Pipeline and Columbia Gulf Transmission Co. will also exercise their rights under existing agreements to increase their firm capacity on Ozark to equal the expanded capacity. Pending necessary FERC approvals, the expanded capacity could be available as early as fall 1990. Construction of the Tennessee and Columbia extensions could begin in early 1991.

Texas Oil & Gas Corp., a principal operating unit of USX Corp., is engaged primarily in the gathering, transportation, marketing, and processing of natural gas, and exploration for and production of gas, crude oil and condensate.

CONTACT: Mike Dixon of Texas Oil & Gas Corp., 214-954-2297; Bill Chaddock of Columbia Gulf Transmission Co., 304-357-2257; Walt Radmilovich of ONEOK Inc., 918-588-7568; or Neil Nixon of Tennessee Gas Pipeline Co., 713-757-3704.

#90127p1607 05/07/1990 ~PR Newswire

WASHINGTON (MAY 7) PR NEWSWIRE - AT&T expressed support today for regulation that caps prices rather than profits of local telephone companies, but said the FCC's current plan will result in much higher, not lower, phone rates.

AT&T made its views known in a filing with the Federal Communications Commission.

"The commission is right in proposing incentive regulation instead of rate of return regulation," said Lawrence Garfinkel, AT&T's vice president of federal government affairs. "Local phone companies should be rewarded for taking risks and introducing innovative new services," he said.

"But this plan will cost American consumers about $5 billion over the next four years," he said. "It's fundamentally flawed."

The FCC plan proposes an automatic stabilizer and sharing of excess local telephone company profits in an attempt to limit the maximum access prices charged to long distance companies like AT&T and, ultimately, borne by long distance customers.

Despite these after-the-fact adjustments, consumers will still be overcharged by billions of dollars, Garfinkel said.

Instead of the FCC's approach, AT&T proposed a simple plan that would prohibit increases or might even require reductions in interstate access rates.

AT&T also outlined other alternatives that would modify the commission's price cap formula so that it more accurately reflects fixed customer line costs, and would increase a so-called "productivity offset factor" component of the formula.

Any of these actions will tend to drive access prices down, AT&T said. The FCC in 1987 proposed price cap plans for both interexchange and local exchange carriers. Last year the commission approved such a plan for AT&T, replacing traditional rate of return regulation.

The intended purpose of price caps is to control carriers' pricing rather than to regulate profits. Properly designed price caps provide incentives for carriers to reduce costs and become more efficient.

#90127p1610 05/07/1990 ~PR Newswire

NEWINGTON, CT (MAY 7) PR NEWSWIRE - TeleConcepts Corporation (AMEX: TCC) announced that net sales for the first quarter of 1990 were $2,235,000 vs. $2,428,000 for the first quarter of 1989. This decrease is primarily attributable to a carryover of the slow deliveries from the company's Korean supplier during the last quarter of 1989 resulting from general labor work stoppages and strikes. This problem will be addressed through the use of a new supplier of these products from a different country.

Gross profit for the first quarter of 1990 increased to 18.5 percent from 10.7 percent during the first quarter of 1989 due to increased selling margins on retail products. The net operating loss for the first quarter of 1990 was $117,000 vs. a loss of $433,000 for the first quarter of 1989. A lower break-even point and a slight profit in the month of March were the principal contributors to the reduced loss. Also, interest costs were reduced from $187,000 in 1989 to $91,000 in the first quarter of 1990 due to reduced borrowing.

Short-term borrowing declined from $1,101,000 at the end of 1989 to $658,000 at March 31, 1990, primarily due to funds generated from the collection of accounts receivable which were used to reduce short-term debt.

#90127p1616 05/07/1990 ~PR Newswire

NEW YORK (MAY 7) PR NEWSWIRE - Unicorp American Corporation (AMEX: UAC) announced today its financial results for the first quarter of 1990, which include the financial results of The Lincoln Savings Bank, FSB.

For the three months ended March 31, 1990, the company reported revenues of $66.4 million and a net loss of $353,000. This compares with revenues of $64.5 million and net income of $4.6 million for the first quarter of 1989.

The company reported a net loss attributable to common shareholders of $578,000 or $0.03 per share, as compared to income of $4.4 million or $0.25 per share for the three months ended March 31, 1989.

The company also announced today the sale on April 26, 1990, of a residential property in Mill Neck, New York for gross proceeds of $3,525,000. Net proceeds of $1,570,000 will be used to fund the company's short-term capital needs.

Additionally, the company announced the sale on April 27, 1990, of an office building in Cincinnati for gross proceeds of $3,250,000 and net proceeds of $900,000. Under the terms of interim agreements between the company and Coscan, Inc., net proceeds from the sale will be used to fund operating deficits relating to the properties subject to the previously announced transaction between the company and Coscan, Inc. Negotiations are continuing on this transaction.

Due to Unicorp American's announced intention to dispose of its real estate operations, and its accounting for these activities as discontinued operations during the year ended Dec. 31, 1989, no gain or loss is being reported on the above described transactions.

Unicorp American Corporation is a real estate and financial services investment company. Among its subsidiaries is The Lincoln Savings Bank, FSB.

NEW YORK (MAY 7) PR NEWSWIRE - The Blackstone Income Trust, Inc. (NYSE: BKT) today released the following May 1990 monthly update:

Distribution Information:

Amount	Payable Date	Record Date	Declaration Date
$0.0875	May 31, 1990	May 15, 1990	May 1, 1990

Investment Advisor Commentary: -- The Blackstone Income Trust, Inc. is fully invested in a diversified portfolio of mortgage-backed securities.

-- During the month of April, the fixed income markets experienced a rapid deterioration in price as overseas buyers became sellers of U.S. securities and domestic investors remained uncommitted. Yields on the 10-year Treasury rose from 8.51 percent as of March 31 to 9.05 percent as of April 27, reflecting a 2.52 percentage drop in price.

-- The value of the trust's investments similarly declined in value, resulting in a net asset value of $7.97 as of April 27. Since mortgage securities performed better than Treasuries on a relative basis, this decline represented only 2.09 percent compared to the March month-end valuation.

-- The trust continues to earn its full dividend from investment income.

Portfolio Databank (as of 4/27/90):

Portfolio composition	Current Percentage
Mortgage pass-throughs	51 percent
Residuals	23 percent
Multiple class mortgage pass-throughs	12 percent
Stripped mortgage-backed securities	11 percent
U.S. Treasury and high-quality money market securities	3 percent

Performance Update	April 27	March 30	Feb. 28
NAV	$7.97	$8.14	$8.29
Price	$8.38	$8.50	$8.88

The Blackstone Income Trust, Inc. is a closed-end fund whose primary objective is to generate high monthly income using high-quality mortgage securities. The trust is advised by Blackstone Financial Management L.P., a registered investment adviser based in New York. Additional information on the trust's assets and performance is contained in the annual report for the period ended Oct. 31, 1989. For further information on the trust, call 212-214-3334.

#90127p1627 05/07/1990 ~PR Newswire

KINSTON, NC (MAY 7) PR NEWSWIRE - Hampton Industries, Inc. (AMEX: HAI) reported that sales for the thirteen weeks ended March 31, 1990 were $34,685,000 as compared to sales of $40,164,000 last year. The Company reported a loss of $509,000, or $.13 per share as compared to net earnings of $1,619,000 or $.41 per share, in the corresponding quarter of 1989.

The 1989 per share amounts have been restated to reflect the 10 percent common stock dividend issued in July 1989.

Mr. David Fuchs, Chairman and Chief Executive Officer of the Company, stated that the decrease in sales volume reflects the softness of current market conditions. The decrease appears more dramatic when compared to the exceptionally strong quarter last year. Smaller profit margins together with lower production levels during the first quarter of 1990 significantly affected earnings. Results of operations were also adversely affected by a provision for possible losses related to the Ames' bankruptcy filing.

Mr. Fuchs indicated that production levels are scheduled to increase to more normal levels beginning in the latter part of May. He also stated that the Company's present advance order position was approximately $105,210,000 as compared to $116,557,000 at this time last year.

	Thirteen Weeks Ended	
	March 31, 1990	April 1, 1989
Net sales	$ 34,685,000	$ 40,164,000
Net earnings (loss)	$ (509,000)	$ 1,619,000
Earnings (loss) per share	$ (.13)	$ .41
Average shares outstanding	3,803,008	3,959,381

#90127p1632 05/07/1990 ~PR Newswire

NEW YORK (MAY 7) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced net income of $2.0 million, or $0.35 per share, for the first quarter of 1990. This compares with a loss of $2.9 million, or $0.65 per share, in the first quarter of 1989.

Alfred T. McNeill, chairman, president and chief executive officer of the Turner Corporation remarked: "Our performance for the first quarter is right on target with our plans. It demonstrates our continued overall profitability in spite of ongoing real estate carrying costs and expenses, and shows the potential for more positive results as the real estate portfolio continues to be liquidated in an orderly manner."

During the first quarter, Turner completed $820 million of construction, up from the 1989 first quarter level of $818 million.

Anticipated earnings from backlog have increased from the year-end level of $110 million to $111 million at the end of the first quarter; however, Turner's total volume of construction backlog has dropped slightly from $4.70 billion at year-end 1989 to $4.62 billion at March 31, 1990.

According to McNeill, "Although both backlog volume and backlog earnings remain virtually constant since year-end, we are anticipating improved overall performance in 1990."

Based in New York City, the Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest builder of commercial, industrial, hospital and healthcare, institutional government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad. During 1989, the Turner Corporation put in place approximately $3.6 billion of new construction.

MIAMI (MAY 7) PR NEWSWIRE - Columbia Laboratories, Inc. (AMEX: COB) today reported that revenues increased markedly to $2,109,589 for the first quarter ended March 31, 1990, compared with revenues in the similar 1989 quarter of $689,764. The sales gain was primarily due to the successful introduction to consumers of the company's major new product Replens(tm), and to continuing growth in the company's line of traditional OTC products.

A net loss of $3,944,397, or 43 cents per share, was reported for the

quarter, due primarily to the start-up selling and distribution expenses for the Replens launch, as well as to continued promotion of Columbia's other products. The 1990 quarter's loss compares with a net loss of $349,154, or 4 cents per share, in the 1989 quarter.

We're very pleased with both the financial and the marketing accomplishments of the first quarter. Based on our progress, we are on target for reaching profitability by the second half of 1990," said Norman M. Meier, Columbia president and chief executive officer.

"Replens, the first product based on our patented bioadhesive delivery system, began to receive strong consumer acceptance during the quarter, and sales have been growing steadily since the initial pharmacy stocking phase. Building on this success, we also expanded Columbia's R&D programs at our laboratory on Wisconsin, to develop and commercial additional bioadhesive technology-based products as rapidly as possible," Meier said.

"Sales of the products we acquired in 1989 -- Legatrin(R), for night leg cramps, and Diasorb(R), a pediatric anti-diarrheal -- have continued strongly," Meier added.

Columbia Laboratories, Inc. is a pharmaceutical company established in 1987 to develop and commerialize proprietary products based on patented drug delivery technology. The company's first technology-based product, Replens, was formally introduced to consumers on March 6, 1990, following professional and trade promotion in 1989.

#90127p1637 05/07/1990 ~PR Newswire

RESTON, VA (MAY 7) PR NEWSWIRE - Freddie Mac (NYSE: FRE) today announced first quarter 1990 net income of $111 million, or $1.85 per share of voting common stock, up 7 percent over $104 million, or $1.74 per share, for the same period a year ago.

First quarter 1990 earnings decreased 3 percent from fourth quarter 1989 net income of $115 million, or $1.91 per share. Per share amounts for 1989 are restated to reflect the retirement of all 100,000 shares of non-voting common stock in February 1990.

The corporation also reported a $400 million before-tax and a $300 million after-tax increase in its mark-to-market net worth between the fourth quarter of 1989 and the first quarter of 1990. This increase is due to growth in the total mortgage portfolio and an increase in the value of the

corporation's servicing portfolio as a result of slightly higher interest rates during the first three months of 1990. The mark-to-market value of Freddie Mac's assets in excess of liabilities before taxes was $5.5 billion at March 31, 1990, compared with approximately $1.9 billion in stockholders' equity under generally accepted accounting principles (GAAP) for the same time period. The most significant difference between GAAP and estimated mark-to-market equity is the value of Freddie Mac's off-balance sheet servicing portfolio, or the net cash flows generated by the mortgages that the corporation has securitized.

Beginning with the first quarter of 1990, Freddie Mac is reclassifying the effect of certain timing differences associated with interest rate changes on adjustable-rate mortgages (ARMs) and corresponding ARM securities. This accounting reclassification decreased management and guarantee fee income and increased net float benefit. Overall earnings were not affected. If this reclassification had been in effect in 1989, the spread on the sold portfolio would have been 22.6 basis points in the first quarter and 22.2 basis points in the fourth quarter of 1989, versus the reported amounts of 23.3 and 23.0 basis points, respectively. They were 22.1 basis points in the first quarter of 1990.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of home ownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in eight American homes, including more than half a million apartment units.

CHICAGO (MAY 7) PR NEWSWIRE - Daniel R. Burke, president and chief operating officer, Capital Cities/ABC, Inc. (NYSE: CCB) and Oprah Winfrey, chief executive officer, HARPO Productions, Inc., are pleased to announce the signing of an agreement under which HARPO Productions will produce for ABC Television four made-for-television movies, two of which will feature Winfrey. The deal also includes television pilots for prime time and a series commitment. The agreement was negotiated by Burke, ABC Entertainment President Robert Iger and HARPO Productions President Jeffrey Jacobs.

"We think being in business with Oprah is great. Her integrity and talent are important in producing the kind of quality projects for which she has become known," said Burke.

Oprah Winfrey said, "ABC has proven they care about quality television programming. I am thrilled to have the opportunity to work with people who are committed to creative and innovative work."

The production deal complements HARPO's current production slate, which includes producing "The Oprah Winfrey Show" for syndication by King World and "Brewster Place" for ABC. HARPO has entered into an agreement with its long-time partner King World under which King World will acquire rights to HARPO's movies for off-network and worldwide distribution. HARPO Productions is based at the HARPO Studios complex in Chicago.

#90127p1644 05/07/1990 ~PR Newswire

MOONACHIE, NJ (MAY 7) PR NEWSWIRE - The Vader Group Inc. (AMEX: VDR) today reported a net loss (applicable to common shares) of $3,386 (less than 1 cent per share) during the second quarter ended March 31, 1990, compared to a net loss of $24,318 (or 1 cent per share) for the same period last year.

For the first six months of the September 1990 fiscal year, Vader had net income (applicable to common shares) of $3,483 (less than 1 cent per share) compared to a net loss of $91,958 (or 4 cents per share) the previous year.

Vader's board of directors retained Paribas Corporation to act as its financial advisor and provide a fairness opinion regarding a possible business combination with Prior Management Inc. Prior Management Inc. (which is privately owned) operates two retail chains: the Canary and the Elephant, Inc. and Another Image, Inc. Canary and the Elephant is an 88-store retailer of costume jewelry, fashion items, and teen and pre-teen novelty items operating in large regional malls in the Northern United States. Prior Management acquired Canary and the Elephant in 1986 when it owned 14 stores and has opened 74 additional stores since then.

Another Image sells salon hair services and products, cosmetics and other related products not generally available to a mass market, in large regional malls in the Midwest. Another Image, which commenced business on a test basis approximately one year ago, is a new concept with three present locations and plans for rapid expansion to more than 100 stores over the next two to three years.

Prior Management Inc.'s sales exceeded $16 million for its last fiscal year ended January 1990.

Vader cannot guarantee if-and-or when a transaction with Prior Management Inc. will take place.

#90127p1645 05/07/1990 ~PR Newswire

MADRID (MAY 7) PR NEWSWIRE - Alfonso Escamez, chairman of the board of directors of Banco Central, S.A., and Miguel Boyer, chairman of the board of directors of Cartera Central, S.A., have satisfactorily finalized the discussions which commenced in mid-April among Alicia Koplowitz and Esther Koplowitz, chairperson and vice-chairperson of the board of directors of Construcciones y Contratas, S.A., Boyer and Escamez, in a luncheon at Banco Central headquarters in Madrid.

The agreement that was reached was unanimously approved by the board of direcors of Cartera Central, S.A., the record owner of the block of shares of Banco Central, S.A. owned by the Construcciones y Contratas Group. The Cartera Central, S.A. Board of Directors includes Boyer, its two chief executive officers, Alberto Cortina and Alberto Alcocer and Justiniano de Miguel, director.

In the agreement, Banco Central guaranteed the placement of the 11.9 million shares of Banco Central owned by Cartera Central. Notice of this agreement has been given to the appropriate Spanish authorities and remains subject to the approval of the Bank of Spain and the National Securities Market Commission.

To place these shares, Banco Central had discussions with important institutional investors who will acquire these securities either for their own portfolios or for subsequent placement in the international securities markets. The agreement will be finalized by the end of May 1990 and each transaction will take place at prevailing market terms. Notwithstanding, Banco Central has made a firm commitment for Cartera Central to receive an initial cash payment for 50 percent of the shares, which will greatly enhance Cartera's liquidity. The remaining 50 percent of the shares will be paid for on May 31, 1991.

This transaction between the company of the Construcciones y Contratas Group and Banco Central also settles the litigation that has separated the two parties in the recent past. Both parties anticipate a new period of cooperation which is expected to be fruitful for both.

STAMFORD, CT (MAY 7) PR NEWSWIRE - According to an announcement made today by Edmund M. Carpenter, chairman and chief executive officer of General Signal Corporation (NYSE: GSX), the company has acquired the assets of MPH Industries, a manufacturer of some of the world's most efficient non-ferrous melting and holding furnaces.

In discussing the purchase, Carpenter noted that, "General Signal is committed to taking full advantage of opportunities to build critical mass and augment product offerings in our businesses. We expect to strengthen our market position in non-ferrous melting equipment through the combination of MPH, which registered sales of $8 million in 1989, and the existing business within our Lindberg unit."

Terms of the transaction were not disclosed. Closely held MPH, with headquarters in Riverside, Mich., will continue to operate under present management but as a division of Lindberg, which is headquartered in Blue Island, Ill. A part of General Signal's process controls sector, Lindberg and its Blue M division produce furnaces, ovens, and environmental equipment for a number of industries.

Stephen E. Speltz, president of Lindberg, observed that, "The acquisition of MPH solidifies our presence in this non-ferrous niche of the heat processing market."

General Signal Corporation, with 1989 sales of $1.92 billion, is a leading manufacturer of equipment and systems for the process control, electrical, semiconductor, and transportation industries.

HOUSTON (MAY 7) PR NEWSWIRE - Star Enterprise today announced that it plans to acquire 128 gasoline/food mart outlets in Florida from TOC Retail Inc. The purchase represents a major acquisition by Star Enterprise and will significantly increase its presence in Florida. Star Enterprise markets its products under the Texaco trademarks.

The outlets have operated under the Citgo and Majik brand names and are located throughout the state, with the largest single concentration being 36 stores in metropolitan Orlando. All but one of the 128 outlets currently sell both motor fuels and convenience food items.

Star Enterprise will begin rebranding the properties to Texaco at the time of closing, which is expected in June. The purchase price was not disclosed.

Don H. Schmude, president and chief executive officer of Star Enterprise, explained why his young company was interested in these properties. "Star Enterprise had a terrific start-up year in 1989. In the 26 state area where Star Enterprise operates, we increased our retail share of the motor fuels market by a full percentage point. These Citgo and Majik outlets are good properties which will increase our overall market share by an additional quarter of a percent. This is impressive growth by any standard."

John G. Curry, regional manager of Star Enterprise's Orlando marketing region, said: "The acquisition of these TOC Retail outlets fits comfortably into Star Enterprise's strategic plan by strengthening our market position in growth oriented areas. We expect that this and other recent acquisitions will move the Texaco brand from fifth to third place in Florida in total sales of motor fuels, which includes all octane grades of gasoline and diesel fuel. We're just delighted about that."

The outlets acquired from TOC Retail are currently averaging approximately 90,000 gallons per month in motor fuel sales. In addition to those

outlets in the greater Orlando area, 32 outlets are located in Broward, Dade, and Palm Beach counties and another 15 are in the Tampa/St. Petersburg area.

Star Enterprise will directly operate its new units. There are now approximately 1,000 people employed by TOC Retail at these outlets. Star Enterprise has indicated that it plans to offer jobs to most of those employees who now work at the retail outlets.

PHILADELPHIA (MAY 7) PR NEWSWIRE - Consolidated Rail Corp. (Conrail) (NYSE: CRR) has sold its Cockeysville Industrial Track to the Maryland Mass Transit Administration (MTA), for $17.5 million, resulting in an after-tax gain of approximately $9 million.

Closing took place May 1. The MTA will use the 14.2-mile line, between Baltimore and Cockeysville, Md., for a future light rail commuter system.

Under an agreement, Conrail will retain an exclusive freight easement over the line, allowing it to serve local industries, including the Cockeysville Industrial Park, at night. Included in the sale to the MTA is Conrail's Mount Vernon Yard in Baltimore. Conrail will retain a section of the yard for its existing Flexi-Flo terminal, where bulk commodities are transferred between rail cars and trucks.

HOUSTON (MAY 7) PR NEWSWIRE - Houston Industries Incorporated (HI) (NYSE: HOU) today reported a consolidated loss of $8.9 million or $.07 per share for the first quarter of 1990, compared to consolidated earnings of $85.2 million or $.71 per share for the first quarter of 1989. Earnings for the first quarter of 1989 would have been $51.6 million or $.43 per share had it not been for the recording in March 1989 of certain cost deferrals related to 1988.

Consolidated earnings for the twelve months ended March 31, 1990 were $319.4 million, or $2.53 per share, compared to $400.9 million, or $3.37 per share, for the same period a year earlier.

HI's consolidated earnings are being adversely affected by costs incurred at the company's electric utility subsidiary, Houston Lighting & Power

Company (HL&P), which are not currently being recovered through electric rates and increased losses at the company's cable television subsidiary related to additional cable systems acquired in March 1989.

HL&P reported income after preferred dividends of $6.4 million for the first quarter of 1990, compared to $76.4 million for the same period in 1989. Last year's first quarter earnings would have been $42.8 million if cost deferrals related to 1988 were excluded.

For the twelve months ended March 31, 1990, HL&P reported income after preferred dividends of $367.3 million, compared to $373.1 million a year earlier.

The decline in HL&P's earnings is primarily attributable to costs associated with the commercial operation of South Texas Project (STP) Unit 2, which are not being recovered through electric rates and the inability to record equity carrying costs on its investment in STP. For the twelve months ended March 31, 1990, these factors were partially offset by the inclusion of $70 million in income related to the settlement of a 1982 rate order recorded in December 1989.

HI is headquartered in Houston. Other subsidiaries include: Innovative Controls, Inc., a manufacturer of consumer lighting products; Houston Industries Finance, Inc., a receivables factoring company; and Development Ventures, Inc., a venture capital company.

CONTACT: Sandy Brendler, 713-629-3123, or Dan Bulla, 713-629-3120, both of Houston Industries.

PITTSBURGH (MAY 7) PR NEWSWIRE - Edward F. Connell, former owner of the bankrupt Airport Star Motor Co., has reached a voluntary agreement with the state Attorney General's Office and will pay $300,000 to former customers of the dealership.

"I approached the Attorney General's Office in early December and made all of my records available in an effort to quickly settle the outstanding consumer issues resulting from the unfortunate bankruptcy of Airport Star " Connell said. Those consumer issues involved some 160 titles and licenses that were in process but incomplete when the dealership was closed, as well as some lien payoffs and other consumer matters.

"I feel that I am a victim, not a villain in the Airport Star saga," Connell said. "While some might question my business judgment in buying the assets of a failing dealership, my motivation was to honestly attempt to save it, as well as my own considerable investment."

The history of Airport Star goes back to 1985, when Connell financed the sale of National Motor Leasing Co. to Monte Asti Buick, in a buyout arrangement. In mid-1987, Monte Asti Buick and National Motor Leasing were experiencing significant financial problems, and payment for the leasing company was in jeopardy.

In the summer of 1988, with the dealership in severe financial difficulty, and his own investment in danger, Connell purchased some of the assets of the dealership in an attempt to salvage some of his loss.

As business for the new dealership softened, additional working capital was invested. "However, when the auto sales market went totally sour in the fall of 1989, Airport Star was left with no alternative but bankruptcy " Connell said. "Since then I have been voluntarily working with the Attorney General's Office to resolve the issues involving former customers of Airport Star.

"I am relieved that this unfortunate turn of events is coming to an end, and that I have been able to make good on the dealership's obligations to its customers even though it has resulted in a severe financial hardship to me and my family," Connell said.

DEERFIELD, IL (MAY 7) PR NEWSWIRE - Baxter's board of directors today declared regular quarterly dividend No. 220 of 16 cents per share on the company's common stock (NYSE: BAX). The dividend is payable on July 2, 1990, to stockholders of record on June 13.

The board declared regular quarterly dividend No. 19 of 87.5 cents per share on the company's $3.50 cumulative convertible exchangeable preferred stock (NYSE: BAXPRB). The dividend is payable on July 2, 1990, to stockholders of record on June 13.

The board also declared regular quarterly dividend No. 19 of 90.625 cents per share on the company's adjustable rate preferred stock (NYSE: BAXPRA). The dividend is payable on July 2, 1990, to stockholders of record on June 13.

The board also authorized the company to repurchase up to 13.5 million shares of its common stock, as well as 3.3 million shares of its adjustable rate preferred stock and 5.4 million shares of its cumulative convertible exchangeable preferred stock. This extends the authorization voted by the board Nov. 21, 1988, for the company to purchase 8.5 million shares of its common stock and 2.25 million shares of its adjustable rate preferred stock.

Baxter International Inc. is the leading manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in more than 100 countries. The company had 1989 revenues of $7.4 billion.

NEW YORK (MAY 7) PR NEWSWIRE - Inside Media editor-in-chief E.S. (Gene) Ely, having successfully completed the launch phase of the nine- month-old magazine, has announced his resignation. Senior writer Steve Ellwanger has been named to replace Ely as editor-in-chief. Ellwanger's selection was announced by Ely and publisher William Holiber. Ely will continue with the magazine as a consultant and a contributing writer.

"I make this move with the profoundest sense of achievement. In a few short months we have created a magazine of enormous impact," said Ely. "We have assembled a staff of strong reporters with an increasingly thorough understanding of media and its implications. Steve is a reporter's reporter and will make a first-rate editor."

Ellwanger's selection was praised by Holiber, who conceived of Inside Media and hired Ely to launch the magazine. "Steve has clearly emerged as the one person who can further advance the magazine on the course Gene and I mapped out almost a year ago. He is widely respected across the advertising industry." Ellwanger was formerly a senior reporter at Adweek and had worked at the Associated Press as an editor.

#90127p1713 05/07/1990 ~PR Newswire

DALLAS (MAY 7) PR NEWSWIRE - Lomas Financial Corp. (NYSE: LFC) today announced that it had provided, in addition to its normal quarterly provision for possible losses of $7.7 million, an aggregate of $505.5 million of incremental reserves at March 31, 1990, to adjust the carrying value of its assets to reflect current market conditions. With the incremental reserve, Lomas reported a loss of $500 million for its third quarter ended March 31, 1990, on revenues of $67.8 million. For the nine months, the company reported losses of $651.4 million on revenues of $220.1 million. Last year, Lomas reported a loss of $12.4 million in its third quarter and income of $5.7 million for the nine months on revenues of $80.7 million and $256.8 million, respectively.

"These incremental reserves do not represent any impairment of the values of the company's core operations, its mortgage banking business," said Jess Hay, chairman and chief executive officer of Lomas. "The company's objectives in establishing this reserve include (i) the write down of its investments in real estate to estimated net realizable value; (ii) the coverage of anticipated losses in the company's portfolio of short-term construction and development loans; and (iii) the reduction of the carrying value of all other investments to realizable value.

Approximately $74 million of the provision is related to the company's $520 million portfolio of short-term construction and development loans. These reserves are designed to cover portfolio losses which are projected to increase as a result of the depressed environment currently confronting the nation's real estate finance markets.

Hay noted that the reserves provide approximately $49 million to cover (i) the company's anticipated cost of completing its new mortgage loan

servicing system; (ii) the estimated cost of converting Lomas's mortgage servicing portfolio to its new servicing system in fiscal 1991; (iii) the cost of converting the mortgage portfolios of the company's external data and systems customers to the new system; and (iv) the write off of the company's remaining investments in economically obsolete systems and related software.

"The new mortgage servicing system, which has been under development since 1984, is expected to be technologically and functionally the most advanced system serving the mortgage finance industry and is expected to enhance the efficiency and profitability of the company's mortgage servicing operations," Hay said.

The remaining $97 million of the March 31 charge derives principally from the write down of the company's investments in discontinued subsidiary operations and other assets to values realizable in the current economic environment.

#90127p1715 05/07/1990 ~PR Newswire

WILMINGTON, DE (MAY 7) PR NEWSWIRE - A Bell Boeing V-22 Osprey tiltrotor aircraft arrived here yesterday after a five-hour, one-stop, cross-country flight from Arlington, Texas.

A typical conventional helicopter would have required nearly 10 hours of flight time and four stops en route to make the 1,210 nautical- mile trip. During the trip, the V-22 averaged 230 knots true airspeed and reached speeds as high as 253 knots.

"The flight went off without a hitch," said Boeing V-22 Program Manager Tim Fehr, "and the aircraft arrived in Wilmington extremely clean and without any major discrepancies."

The flight to Wilmington, site of Boeing Helicopters Flight Test Center, was conducted by Bell Boeing and U.S. Marine Corps pilots. Boeing V-22 project pilot Dick Balzer and Bell V-22 pilot Dick Peasley flew the initial 640-mile leg to Fulton County Airport near Atlanta. Balzer and USMC V-22 test pilot Major Bob Price flew the 570-mile Atlanta/Wilmington leg. The V-22 was restricted to altitudes less than 10,000 feet and did not use all of its internal fuel tanks.

The ferry flight to Wilmington will allow two V-22s to be test flown from that facility, while two others will be flying from the Bell Helicopter

Textron facility in Texas. Aircraft Two will be put to work immediately testing the aircraft's automatic flight control system. The aircraft was retained in Texas after its first flight for the recently completed preliminary government evaluation of the V-22.

The V-22 Osprey is being developed under a contract with the U.S. Naval Air Systems Command by Bell Helicopter Textron Inc. and Boeing Helicopters.

#90127p1727 05/07/1990 ~PR Newswire

SOUTH BURLINGTON, VT (MAY 7) PR NEWSWIRE - Green Mountain Power Corporation (NYSE: GMP) announced Monday its operating results for the first quarter of 1990.

Earnings per share of common stock in the first quarter of 1990 were 88 cents, compared to earnings of 92 cents achieved in the first quarter of 1989. Operating revenues for the first quarter of 1990 were $40.7 million, compared to $38.4 million in 1989.

Edwind M. Norse, GMP's vice president, chief financial officer and treasurer, said, "Warmer than normal winter weather and increased power supply, maintenance and interest expenses in the first three months of

1990 caused the modest decline in earnings per share for the quarter."

Retail electric sales increased by only 1 percent in the first quarter of 1990 primarily as a result of significantly warmer than usual winter weather and a more moderate growth in the company's service territory. The average number of retail customers served grew by 2.5 percent in the first three months of 1990, and wholesale electric sales increased by 11 percent. Although the number of retail customers served and the volume of wholesale electricity sales in 1990 increased, the rate of increase in both categories was lower than in previous years, reflecting the slowdown of the region's economy.

Norse said, "We anticipate that the 3.8 percent rate increase that began in January 1990 will offset power supply cost increases faced by the company in 1990."

Power supply expenses increased 7 percent in the first three months of 1990 as compared to 1989 due to higher costs associated with the Vermont Yankee nuclear plant and to increased purchases of electricity to provide for the increased level of wholesale transactions in 1990. Maintenance expenses increased 30.9 percent during the first quarter of 1990 due to costs of repairs required to restore electrical service following a severe snowstorm in late March. Interest expenses were significantly higher in the first quarter of 1990 as compared to the same period a year ago, reflecting the impact of the company's first mortgage bond sale in June 1989.

#90127p1735 05/07/1990 ~PR Newswire

CHICAGO (MAY 7) PR NEWSWIRE - Foote, Cone & Belding Communications, Inc. (NYSE: FCB) today reported net income for the traditionally weak first quarter declined to $1,341,000, or $.13 per share, in 1990, from $2,285,000, or $.23 per share, in 1989.

FCB said income from U.S. operations was lower due to a shift in the distribution of revenues between quarters. Strong growth in European operations was partially offset by increased interest expense related to the company's alliance with French-owned Publicis.

Consolidated revenues totaled $72,190,000 in the current quarter, down from $77,338,000 in 1989, due to the sale of Golin/Harris Communications, effective April 1, 1989. After adjusting for the divestiture, revenues were flat.

FCB's proportionate share of European revenues rose to $39,182,000 compared to $33,152,000 in 1989. Equity income, consisting primarily of FCB's share of European operations, turned around from a loss of $157,000 in the first quarter of 1989 to income of $888,000 in the 1990 quarter.

Operating margins for consolidated operations declined to $1,544,000 from $4,049,000 in 1989. This reflects both the overall shift in revenues between quarters and additional expenses to service a record volume of new business won in 1989, for which revenue increases will not be realized until later quarters.

Net financing activities, included with other income, showed a loss of $428,000 in 1990 compared to income of $399,000 in 1989. A significantly reduced short-term investment program and a substantial cash payment to complete the Publicis alliance were primary factors in the loss. Net financing for the remainder of the year is expected to be comparable to 1989.

Foote, Cone & Belding is the fifth largest advertising agency in the United States and the seventh largest worldwide. Its network includes more than 125 offices in 40 countries, with worldwide billings, including Publicis FCB European operations, totaling $4.6 billion.

#90127p1745 05/07/1990 ~PR Newswire

LOS ANGELES (MAY 7) PR NEWSWIRE - Angeles Corporation (AMEX: ANG) today estimated that its loss for the third quarter ended March 31, 1990, would be approximately $3.9 million after provision for taxes. A substantial portion of the loss is attributable to one- time charges related to the withdrawal of the company's direct offering of real estate investment programs to the public and the reduction of staff and other support relating to that activity. Over the last two years Angeles has been focusing increased attention on its institutional and other investment

banking relationships.

The most recent action, while resulting in substantial one-time charges, will result in savings approximating $2.5 million of expenses annually.

Angeles Chairman William H. Elliot said, "It is unfortunate that public participation in real estate investment has fallen from favor at a time when opportunities are most attractive. Our commitment to real estate investment management for institutional accounts and existing portfolios, as well as to our other important corporate relationships, will be enhanced by the resources made available by these latest moves."

Angeles currently manages real estate properties valued in excess of $1.7 billion, primarily located in secondary markets. Secondary market cities are also the focus for the company's current acquisitions. Angeles is continuing its major commitments to factory-direct shopping centers and congregate-style residences for the independent elderly.

Angeles also said that, as expected, the company's reported earnings will continue to suffer because of the accounting treatment of its development and direct ownership of congregate-style retirement facilities. Funding of these projects, including full costs during projected lease-up periods, has been provided by participating mortgages from unaffiliated lenders.

Elliot noted that Angeles' wholly owned securities investment advisory subsidiary, First Pacific Advisors Inc., continues to set records in total assets under management, investment performance and corporate earnings.

Final figures for the 1990 third quarter and nine-month periods will be available on or before May 15.

#90127p1758 05/07/1990 ~PR Newswire

LOS ANGELES (MAY 7) PR NEWSWIRE - MCA/Spectacor, the joint venture that manages the Los Angeles Memorial Coliseum and Sports Arena, announced today that Spectacor Management Group will acquire MCA's interest in the venture. The joint venture was formed in 1987 and took over management of the Los Angeles facilities during the summer of 1988.

In making the announcement, both companies cited the evolution of the partnership's role in the Coliseum from one of strictly management to that of an active developer and investor as the basis for this development.

"As members of the Los Angeles community we welcome the aggressive

approach that Spectacor has taken in seeking to privatize the Coliseum. Unfortunately, stadium development, as opposed to management, is not within our current corporate and strategic goals. We applaud Spectacor's efforts and wish them luck in keeping an NFL football team active in Los Angeles," said Al Teller, chairman of MCA Music Entertainment.

"We have valued MCA's participation in the operation of the Coliseum and Sports Arena and look forward to continuing our relationship on other projects in the future. We have no current plan to replace MCA in the venture," says Tony Tavares, president of Spectacor Management Group.

No change in the operation of the Coliseum or Sports Arena is expected since Spectacor Management Group is the managing partner in the venture. MCA and Spectacor have also maintained an association with each other nationally involving the marketing of concert merchandise since 1984 at several arenas operated by SMG. No change in this association is anticipated.

On Mar. 16, 1990, the Los Angeles Memorial Coliseum Commission overwhelmingly adopted a $145 million plan developed by Spectacor Management Group for the possible redevelopment of the Coliseum. The plan if implemented, would be completely funded by the company and involve no public funding or taxpayer risk.

#90127p1778 05/07/1990 ~PR Newswire

CHICAGO (MAY 7) PR NEWSWIRE - Hungary, the first East European country to appoint international advisors for its privatization program, has appointed Baker & McKenzie as legal privatization advisor to help with privatizing state enterprises.

In addition to Baker & McKenzie, which is the largest international law firm and has an office in Budapest, the consortium comprises investment bank Barclays de Zoete Wedd Limited, and Price Waterhouse.

The consortium will help to determine initial policies and operating procedures for the Hungarian State Property Agency, established by the Hungarian Parliament in January with responsibility for privatizing state enterprises and controlling transactions by them.

Dr. Istvan Tompe, managing director of the Agency, said: "Our task is to ensure that all state property sales are completed on terms that are in the public interest. By appointing these specialist advisors, we gain the full benefit of international experience in privatization and we can design policies and action plans that are right for our circumstances."

"We should also be able to proceed with our privatization plans as quickly as we judge appropriate."

Robert W. Cox, chairman of Baker & McKenzie who has just returned from Hungary and the USSR, noted, "Privatization is becoming a specialty of Baker & McKenzie as the governments in countries with primarily state-owned enterprises turn to our local experts who understand the legal political and business issues."

The advisory Consortium was appointed following a two stage competition. A shortlist was prepared on the basis of written submissions by ten groups of advisors using criteria relating to privatization experience, methodological approach, knowledge of Hungary and proposed fees. The final decision was taken after discussions with each of the candidates on the shortlist. Funding for the advisory assignment will be made available by the European community and/or the World Bank.

Price Waterhouse has an office of sixty professional staff established in 1988. Barclays de Zoete Wedd's parent company, Barclays Bank, plans to open a Barclays Group office in Budapest later this year after obtaining regulatory approval.

RICHMOND, VA (MAY 7) PR NEWSWIRE - Richfood Holdings, Inc. (NASDAQ: RCHFA) today announced that it has sold the assets of Garner Wholesale Merchandisers, Inc. to a subsidiary of McKesson Corporation (NYSE: MCK). Through its subsidiary, Mass Merchandisers, Inc., McKesson paid approximately $13 million in cash and assumed approximately $3 million of liabilities of Richfood's non-food distribution business which is headquartered in Greenville, N.C.

Edward Villanueva, acting president and chief financial officer, said "this transaction significantly improves Richfood's financial condition and permits us to focus all of our efforts on continuing to enhance the profitability of our core food distribution business headquartered in Richmond, Virginia."

Garner, as previously reported, recorded significant operating losses in the past two fiscal years and its sales represented approximately 6 percent of total Richfood volume. The sale will be reflected in Richfood's April 28, 1990 fiscal year end financial statements. Because the purchased price approximated net book value, the transaction will not materially affect reported earnings for the recently completed fiscal year.

Villanueva added, "McKesson's Mass Merchandising Division is the leading company in this segment of the distribution industry and our customers should be well satisfied with service levels following the acquisition."

Richfood is the largest wholesale food distributor serving its Mid-Atlantic operating region. It supplies approximately 600 supermarkets with a complete line of grocery products, frozen food, diary, fresh produce and meats.

CONTACT: Edward Villanueva, Acting President and Chief Financial Officer of Richfood Holdings, Inc., 804-746-6780.

#90127u0060 05/07/1990 ~United Press International

CHICAGO (MAY 6) UPI - Steve Larmer scored a pair of goals, Denis Savard had three assists and goaltender Greg Millen provided stellar defense Sunday night, leading the Chicago Blackhawks to a 5-1 triumph over the Edmonton Oilers and a 2-1 advantage in their Stanley Cup semifinal series.

The best-of-seven Campbell Conference final resumes Tuesday night at Chicago Stadium. The series shifts to Edmonton for Game 5 on Thursday.

Millen, starting his second straight game after sitting out the previous five, stopped 31 shots as Edmonton outshot the Blackhawks 32-29. He was especially sharp in the last two periods, when the Oilers turned up the pressure and tested him several times.

Savard, in and out of Coach Mike Keenan's doghouse throughout the playoffs also came up with his second strong effort in a row. The All-Star center had a goal and a pair of assists in Chicago's 4-3 Game 2 victory at the Northlands Coliseum, then assisted on his team's first three goals in Game 3, giving him seven points for the series.

Savard played a part in six straight goals over the last two games until Dirk Graham connected short-handed at 7:27 of the third period to put the game away. Graham, the team captain who was playing only his third game of the postseason while recovering from a broken kneecap, scored his first goal since March 7. He moved in on a breakaway, faking a backhander and

beating goalie Bill Ranford to the glove side to make it 4-1.

Wayne Presley made it a rout with six minutes remaining, ramming in a rebound for his ninth goal of the playoffs. Presley had six goals during the regular season.

After Craig Simpson gave the Oilers a 1-0 lead with a power-play goal six minutes into the game, the Blackhawks tallied twice in less than four minutes to pull ahead 2-1 after one.

Veteran defenseman Bob Murray tied the score 1-1 at 8:41, just six seconds after Edmonton killed off a minor penalty to Esa Tikkanen. Dave Manson's slap shot from the point got caught up in traffic, but the puck bounced out between the circles to Murray, who whirled and fired a shot past Ranford for only his second goal of the playoffs.

Larmer then put his team in front for good at 12:32, trickling a shot between Ranford's pads after taking a behind-the-net pass from Adam Creighton. Ranford appeared to stop the puck with Savard whacking at his pads for a rebound, but the puck found its way underneath.

Edmonton's Petr Klima was given a chance to tie the score late in the first after a dump-in bounced strangely off the board and right in front. But Klima, all alone, was wide left on a quick wrist shot.

Larmer then made it 3-1 at 3:05 of the second, the only goal of the period with a tremendous assist from Savard. Savard carried the puck in over the blue line, made a move around Randy Gregg that sent the defenseman to his knees and fed Larmer at the left side of the crease for an easy goal, his seventh of the playoffs. He has 21 points in the postseason to tie for the league lead.

Millen then shut the door, making great saves on Steve Smith and Mark Messier with Edmonton on the power play midway through the second. One of his biggest saves came with five minutes left in the second, when Jari Kurri appeared ready to fire in a backhander from close range, but Millen dived to his right to block the shot.

The Blackhawks, slow starters in the first two games of the series, came out firing in Game 3, but Ranford made strong saves on Jocelyn Lemieux and Steve Thomas in the first four minutes. Simpson then connected on the power play, taking a perfect centering pass from Messier and one-timing it past Millen's glove side.

SEATTLE (MAY 7) UPI - A profile on national television Sunday night of a labor dispute involving the upscale Seattle-based Nordstrom Inc. retail chain was characterized as fair and balanced by union leaders and store officials.

CBS' ''60 Minutes'' aired a segment titled ''The Nordstrom Boys'' detailing the continuing controversy over Nordstrom labor practices that were characterized by supporters as ''freedom'' for employees to make more money and by opponents as ''pressure'' on workers to make more money for the company while working during off hours.

The program included discussions with the Nordstrom brothers - John, Bruce and Jim, who are co-chairmen of the 60-store retail chain - and Joe Peterson, president of United Food and Commercial Workers Local 1001, which represents 2,000 Nordstrom workers in the Puget Sound area.

''I think it was balanced,'' Peterson said of the 60 Minutes' account. ''I

also think it's unfortunate there had to be a story on national television at all. Had Nordstrom sat down and negotiated reasonably with the union early last summer, the employee issues would never have become so highly publicized.

Nordstrom spokesman Dave Marriott said 60 Minutes ''did a very good job. I think they portrayed the issues accurately.

''I think they did an excellent job. One producer was in town for two to three weeks and had time to talk to a lot of people. Our concern was after the program would we feel we could hold our heads high and I think we can.''

The UFCW has been in bitter and highly publicized contract negotiations with Nordstrom since last summer. The union charges Nordstrom workers are frequently expected to work off the clock.

UFCW Local 1001 has filed several unfair labor-practice complaints against Nordstrom since July 31, when a contract covering about 1,800 workers in six Seattle-area stores lapsed.

During the CBS broadcast, one employee described Nordstrom as a ''snakepit.'' But another described the union as ''an outside organization breeding mediocrity.''

The National Labor Relations Board in April dismissed a petition filed by some Nordstrom employees in Seattle seeking a special election to oust the union. Earlier, the NLRB dismissed a similar petition by Nordstrom workers in Tacoma.

Some workers said they appreciated Nordstrom for allowing them the ''freedom'' to work during off hours to make sales that resulted in higher commissions.

Marriott said Nordstrom employees ''are empowered with the ability to succeed on their own. They do what they want to do to do to serve the customer.''

But Peterson said he was disturbed because the Nordstroms' response to the off-the-clock issue ''was they still don't think they've done anything wrong.''

''They think there's nothing wring with their employee incentives and nothing wrong with employees working off the clock,'' Peterson said.

Nordstrom was founded 89 years ago and has grown to include 60 stores with 30,000 employees.

According to 60 Minutes, Nordstrom workers earn an average of $24,000 annually, although one worker said working off the clock for extra commissions enabled him to earn $82,000 last year.

''I think what makes Nordstrom so different and unique in the industry is employees are empowered to make a lot of decisions, to make a lot of hands-on decisions,'' Marriott said.

But Peterson contends Nordstrom employees should be paid for all the time they work.

''The law says they are clock punchers and Nordstrom is required to pay them for everything they do,'' he said during the broadcast. ''Why should an employee work 60 hours a week and get paid for 40?''

Some employees said they felt pressured to work off the clock to increase sales, thus increasing company profits. A former manager told 60 Minutes some managers who purchased Nordstrom clothes with their own credit cards, then returned the merchandise to another store to avoid detection.

''What's really troubling is the company showed no repentance whatsoever for all the violations of state and federal wage-and-hour laws,'' Peterson said.

While Nordstrom officials disagree with union charges, the company recently set aside $15 million to pay back-wage claims to employees.

#90127u0070 05/07/1990 ~United Press International

(MAY 7) UPI - New York needed a spark after losing six of seven games. Mets outfielder Kevin McReynolds provided some fireworks.

''There were certainly some fireworks today,'' McReynolds said after hitting two homers Sunday - one in each game of the double-header - rallying the Mets to a 7-4 (11 innings), 7-6 sweep of the Houston Astros.

McReynolds snapped a 4-4 tie with a three-run homer in the 11th inning of the first game, and then belted a solo shot in the eighth inning of the nightcap, breaking a 6-6 tie.

''The last three or four days I have been seeing the ball very well,'' said McReynolds, who has four homers this year and three in two days. ''I feel confident and comfortable at the plate.''

New York rallied to win both games. In the opener the Mets trailed 4-3 in the 11th when Tim Teufel, who had four RBI, tied the score with an RBI double off Dave Smith, 0-2.

Smith intentionally walked Howard Johnson to set the stage for McReynolds, who belted a 2-1 pitch over the left-field fence. That made a winner of John Franco, 1-0, who balked home the go-ahead run with two out in the top of the inning.

In the second game the Mets trailed 6-2 in the sixth, but rallied to tie the score 6-6. With one out, Darryl Strawberry lined his fourth home run of the year off Houston starter Mark Portugal. After McReynolds walked and Daryl Boston doubled, Mackey Sasser belted his first homer of the year over the right-field fence.

In the eighth inning McReynolds blasted a 3-1 fastball from reliever Dan Schatzeder, 1-1, into the left-field bullpen, making a winner of Alejandro Pena, 1-0, the third Mets' pitcher.

''The fireworks in the first game may have won the second game,'' said McReynolds, who has hit in 14 of 15 games. ''Sasser's three-run homer was big. We struggled in both games to come back and we got it done both times. I think this may put us over the hump.''

''This is what makes this a tough business,'' Houston Manager Art Howe said. ''We could easily have won both games, instead we lose them. Why did the Mets suddenly start hitting when we got here?''

Elsewhere in the National League, Pittsburgh swept Atlanta in a double-header, 6-4 and 4-2, Montreal blanked San Francisco 7-0, San Diego defeated Chicago 8-3, Cincinnati beat St. Louis 5-1 and Philadelphia outlasted Los Angeles 9-5.

In the AL it was: Cleveland 9, Texas 5, 1st game; Cleveland 3, Texas 0, 2nd; Toronto 11, Detroit 7; Kansas City 7, Chicago 6, 10 inn.; Minnesota 4 Milwaukee 0; Oakland 4, Boston 2; Seattle 5, Baltimore 4; and New York 4, California 2.

-- AROUND THE NL --

Pirates 6, Braves 4, 1st game
Pirates 4, Braves 2, 2nd game

At Pittsburgh, in the first game Sid Bream cracked a three-run home run and Neal Heaton, 5-0, scattered four hits over seven innings. Heaton gave up only two runs in stopping the Braves' five-game winning streak. Scott Ruskin got one out for his first save. John Smoltz, 1-3, allowed five runs and five hits in 4 1-3 innings.

In the nightcap Doug Drabek, 5-1, scattered four hits over seven innings and Jeff King and R.J. Reynolds each collected two hits and drove in a

run. Drabek has allowed just three earned runs in his last 28 innings. Bob Patterson worked two innings for his first save. Derek Lilliquist, 1-4, allowed four runs and eight hits in 6 2-3 innings.

Expos 7, Giants 0

At Montreal, Mark Gardner pitched a six-hitter for his first major-league victory and drove in a run during a six-run sixth inning, leading Montreal. Gardner, 1-2, who struck out eight of the first 10 batters he faced in his last start, ran his scoreless streak to 21 innings. San Francisco's Atlee Hammaker, 2-2, was the loser.

Padres 8, Cubs 3

At Chicago, Ed Whitson pitched his third complete game of the season and Joe Carter drove in three runs, lifting San Diego past Chicago. Whitson, 3-1, allowed eight hits in his third complete game in his last four starts. Chicago's Mike Bielecki, 1-3, lasted 4 2-3 innings. Roberto Alomar had two RBI and Benito Santiago hit a two-run homer for the Padres.

Reds 5, Cardinals 1

At St. Louis, Scott Scudder scattered five hits over 7 1-3 innings in his first start of the season to help Cincinnati to its fourth straight victory. Scudder, 1-0, called up earlier in the week from Triple-A Nashville, retired 11 of the 12 batters he faced between the third and sixth innings. Norm Charlton worked 1 2-3 innings for his first save. Bryn Smith, 3-3, lost for St. Louis, which has dropped four straight.

Phillies 9, Dodgers 5

At Philadelphia, Ricky Jordan capped a six-run seventh inning with the first grand slam of his career, leading Philadelphia over Los Angeles. Jordan hit the first pitch from reliever Tim Crews, the third Dodger pitcher in the inning, for his first home run of the season. Reliever Don Carman, 2-0, was the winner. Mike Munoz, 0-1, suffered the loss.

#90127u0109 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - The sugar lobby made $3.3 million in campaign donations between 1983 and 1989 as part of efforts to maintain the sugar program that puts U.S. sugar prices far above world levels, a consumer group said.

The organization, Public Voice for Food and Health Policy, said the high sugar prices cost consumers millions of dollars each year.

''The powerful sugar lobby is paying millions to keep things just the way the are, and so far they have succeeded,'' said Ellen Haas, executive director of the organization.

In a report scheduled for release Monday, Public Voice said 17 political action committees associated with sugar producers and processors donated $3.3 million from January 1983 through June 1989. Donations were aimed at influential congressmen, either in leadership positions or serving on committees handling sugar and trade legislation.

Congressmen who voted in 1985 against a proposal to reduce the sugar support price received 21 times as much in contributions from the sugar PACs after the vote as did the congressmen who favored the reduction. In addition, Public Voice said, the ''pro-sugar'' congressmen received seven times as much as the ''pro-consumer'' congressmen did before the vote.

The 10 top Senate recipients got 28 percent of the $1.17 million donated to senators from 1983-1989. The top 10 House members got 16 percent of the $2.16 million donated during the same period.

The sugar program guarantees producers a price of at least 18 cents a pound. Quotas restrict imports to filling U.S. demand not met by domestic sugar and corn sweeteners. Defenders say the program prevents volatile prices and assures a domestic source of a vital commodity.

Haas urged reform of the sugar program, saying, ''We cannot repeat 1985 when sugar was the only commodity that escaped much-needed reform.''

The top five Senate recipients from 1983-1989 were Republican Leader Robert Dole of Kansas, $51,250; David Durenburger, R-Minn., $42,601; Rudy Boschwitz, R-Minn., $41,050; Jesse Helms, R-N.C., $37,550 and Pete Wilson, R-Calif., $35,576, according to Public Voice.

The five House leaders, according to the group, were Reps. Arlan Stangeland, R-Minn., $66,150; Byron Dorgan, D-N.D., $36,350; Richard Durbin, D-Ill., 35,150; House Agriculture chairman Kika de la Garza, D-Texas, $33,887, and House Speaker Thomas Foley, D-Wash., $33,000.

-30- 2627

#90127u0134 05/07/1990 ~United Press International

(MAY 7) UPI - House and Senate leaders met with President Bush at the White House Sunday evening for an informal discussion about the federal budget. House Speaker Thomas Foley says the meeting opened the possibility for bipartisan negotiations to reduce the deficit. And Senate Republican Leader Robert Dole called the meeting ''very positive.''

Ex-hostage Frank Reed recounted the details of his captivity in Lebanon

today. The 57-year-old educator described to reporters in Arlington, Virginia, how his captors tried to break his feet with iron reinforcements after he twice tried to escape. In his words- ''I have been been lying on my back for three-and-a-half years, chained to a wall or a radiator.''

Pope John Paul arrived in Mexico Sunday for a one-week visit, a sign of possibly warmer relations between the Vatican and the Central American nation. Mexico and the Holy See do NOT share diplomatic ties. The pontiff was greeted by thousands of people at the airport in Mexico City. He then traveled to a shrine where he blessed four Mexican missionaries from the 16th century.

-30- 1252

#90127u0146 05/07/1990 ~United Press International

(MAY 7) UPI - An explosion aboard a passenger train in northeastern Pakistan has left at least 21 people dead and 30 others injured. Police blame Sunday's blast on a bomb hidden in a toilet. They say there would've been more casualties if the train had been at the station. NO one has claimed responsibility for the attack.

Indiana state police say an Amtrak passenger train line from Indianapolis to Chicago suffered its second crash in four days Sunday when it slammed into a truck... killing its driver. On Wednesday, 30 people were injured when a train on the same line hit a group of boxcars in Crawfordsville. Sunday's accident occurred 50 miles to the north.

South African Archbishop Tutu urged the United States Sunday to continue economic sanctions against his country's government. Tutu said sanctions are necessary until the white minority's lock on political power is broken. He made the comments during a commencement address at Lincoln University in Pennsylvania.

(MAY 7) UPI - The New York Knicks pulled off an escape even Harry Houdini would be proud of.

Akin to being blindfolded, shackeled and immersed upside-down in a water tank, New York completed its death-defying playoff stunt Sunday with an improbable series-clinching 121-114 triumph over the Boston Celtics, overcoming a 2-0 game deficit in the opening round of the Eastern Conference playoffs.

The Knicks, who received 31 points from Patrick Ewing and 26 points and 17 rebounds from Charles Oakley, will play the defending NBA champion Detroit Pistons in the Eastern Conference semifinal beginning Tuesday night in Detroit.

In the opening round of the Western Conference, the Phoenix Suns eliminated the Utah Jazz in their best-of-five series by snatching the deciding game 104-102, gaining a berth in the conference semifinals against the Los Angeles Lakers. Game 1 in the best-of-seven series is scheduled for Tuesday night in Los Angeles.

The Knicks became only the third team in playoff history to capture a five-game series after losing the first two games. The only other teams to recover from such a deficit were the Fort Wayne Pistons over St. Louis in 1956 and the Golden State Warriors over Utah in 1987.

''It may have only been done twice, but it was done today,'' said Oakley.

''They came back and played their best basketball of season,'' said Boston Coach Jimmy Rodgers. ''Timing is everything.''

After dropping the first two games, New York shook off every hindrance that threatened its survival. The Knicks, who were written off by local media, overcame exceptional odds in ousting their Atlantic Division rivals.

Consider this: To advance, the Knicks had to defeat the Celtics at the Boston Garden, where they have been losers 26 consecutive times.

Not only haven't they beaten the Celtics in Boston since Feb. 29, 1984, the Knicks also had to overcome a 16-game playoff losing streak on the Celtics' home court.

And after suffering a 157-128 trouncing in Game 2 on the parquet floor, what hope could the breathless Knicks have for victory on enemy territory?

Just ask Kenny Walker.

''What better opportunity than to go to Boston Garden losing 26 in a row?'' said Walker. ''We're still breathing, we're still alive. It doesn't get any better than this.''

Boston had won 20 of its 26 previous winner-take-all playoff games, including seven of eight since Larry Bird joined the team in 1979.

''This is as low as its been in my career,'' said Bird. ''I'm in shock and I'll probably wake up tomorrow and probably still be in shock.

''This is probably the most embarrassed as I've ever been with the Celtics '' said the 33-year-old forward. ''We had control of this series and we let it slip away.''

Ewing, who led New York with 10 assists, hit 9 of 12 field-goal attempts in the second half and was the focus of the Knicks' offense.

''If you've got a horse, you better ride it, and he's our horse,'' said Walker.

In the second half, New York shot 74 percent and scored a team playoff record 71 points.

For Phoenix, Kevin Johnson sank a jumper with eight-tenths of a second left to lift the Suns over the Jazz.

After Utah's Karl Malone sank a 20-footer to tie the score 102-102 with 14.9 seconds left, Phoenix called a timeout.

Afterwards, Johnson kicked the ball in to Mike McGee, who passed back to the wide open guard. Johnson, who had been bothered by a hip pointer suffered earlier in the series, canned his jumper from the foul line to eliminate the Jazz.

''I was supposed to penetrate as close as I could,'' Johnson said. ''I did that, then spotted Mike McGee on the side and hit him with a pass. I thought he might take the shot, but he fired it back to me and I put it up.''

Second-round action resumes Monday night in the Eastern Conference as the Philadelphia 76ers open their best-of-seven series against the Chicago Bulls at Chicago Stadium.

On Tuesday, the Portland Trail Blazers look to increase their lead on the San Antonio Spurs in Western Conference play. Portland leads the best-of-seven series 1-0 after Saturday's 107-94 triumph.

#90127u0256 05/07/1990 ~United Press International

(MAY 7) UPI - An angry Frank Reed spoke out for the first time Sunday about his ordeal as a hostage in Lebanon. He described beatings, and said he was chained to a wall or radiator during his three-and-a-half years of captivity. Reed also urged the Bush administration to negotiate the release of the remaining American hostages in Lebanon. In his words- ''Let's stop talking about all this geopolitical crap.''

Congressional leaders met with President Bush Sunday evening and emerged to say that bipartisan negotiations concerning the budget are possible. Senate Democratic leader George Mitchell of Maine says the meeting was held with the ''assumption'' that all issues, including taxes, would be negotiable. Congress and the administration have similar target amounts for next year's budget and deficit, but they disagree on how to achieve them.

A spokesman for Emergency Services in Little Rock, Arkansas, says the area is preparing for the worst flooding in 17 years. Heavy rains have pushed the Arkansas River to record levels and flood crests already have forced some people to evacuate. Sandbagging efforts had to be halted Sunday night and barge traffic on the river is at a standstill. Authorities expect the river to crest all along its drainage area from Fort Smith to Little Rock by Tuesday.

On the island of Hawaii, Kilauea Volcano continues on what appears to be on a NON-stop path of destruction. The volcano has all but destroyed the Kalapana Gardens housing area. Sunday, it torched its 138th house since the eruption began in January 1983.

#90127u0260 05/07/1990 ~United Press International

(MAY 7) UPI - Preliminary results show East Germany's conservative Christian Democrats ahead of the communists in Sunday's local elections. But the conservatives did NOT score the resounding victory many expected. The elections are being viewed as a test of Prime Minister Lothar de Maiziere's policies regarding German reunification.

Italians also went to the polls Sunday in local elections. The outcome could change the political line-up in much of the country and shake up Prime Minister Giulio Andreotti's 10-month-old coalition. The elections last for two days and initial results are expected late Monday. Election authorities were a bit concerned though, because many polling stations did NOT open up on time Sunday. Apparently, the warm and sunny weather kept officials from showing up for work as scheduled.

MANILA, Philippines (MAY 7) UPI - The second of two Filipinos described as ''drug addicts'' was arrested Monday in connection with the killing of a U.S. Marine sergeant near the American-run Subic Bay Naval Base, police said.

Police in Olongapo identified the suspects in the killing Friday of Gunnery Sgt. John S. Fredette as Billy Burke and Rey Angeles. Burke was arrested late Sunday and Angeles was picked up early Monday, said Lt. Col. MacArthur Torres, chief of police in Olongapo, 50 miles northwest of Manila.

Torres, who said the suspects were ''drug addicts,'' were sent to the Philippine Constabulary headquarters at suburban Camp Crame in Manila Monday morning for further investigation.

The two were arrested during police raids in residential areas in Olongapo where scores of Filipinos were detained for questioning and then released.

U.S. Navy spokesman Kevin Mukri declined comment on the arrests. He said the investigation into the killing of Fredette, 34, of Buena Park, Calif., was continuing.

Mukri said restrictions remained on all leave and liberty covering some 40,000 American troops, defense department employees and dependents at Subic and five other U.S. installations in the Philippines. The limits were indefinitely imposed Saturday.

Burke and Angeles were identified by four witnesses to the killing, Torres said. Fredette was shot in the back of the head.

Police investigators earlier had said they believed guerrillas of the 19,000-strong New People's Army were involved in the killing. They said the rebels had warned they would kill an American before the talks begin May 14 on the future of U.S. facilities in the Philippines. The lease on the bases expires in September 1991.

Police have attempted to play down reports that insurgents may be behind the slaying of Fredette, hoping U.S. officials would reconsider travel restrictions that have severely affected clubs in Olongapo and other cities catering to U.S. servicemen.

At least eight other Americans have been killed in the Philippines since 1987 in incidents blamed on communist insurgents battling the government the past 21 years.

Three servicemen were killed in the liberty city of Angeles next to the huge Clark Air Base in October 1987. Army Col. James Rowe, an honored Vietnam War veteran and former prisoner of war, was killed in suburban Quezon city in April 1989. Two contract employees with the Defense Department were killed last September.

Two American civilians were killed in two incidents in the central Philippines this year.

The rebels have vowed to kill Americans involved in the government's counter-insurgency operations.

#90127u0386 05/07/1990 ~United Press International

BROOKSTON, Ind. (MAY 7) UPI - Authorities were investigating an Amtrak train accident that killed a truck driver, the second crash in less than a week on Amtrak's Chicago-to-Indianapolis line and the railroad's fourth accident in two weeks, officials said.

William J. McCoy, 74, apparently panicked Sunday and tried to run from his truck, which was parked on the tracks, when he saw the oncoming train, state trooper Kathy Franko said.

Amtrak spokeswoman Renee Banks said McCoy ''froze'' and was pinned between the train and the truck.

On Wednesday, a train running the same ''Hoosier State'' line derailed after running into a group of boxcars in Crawfordsville, Ind., injuring 30 people.

In Sunday's accident, the conductor noticed the truck about a mile before the three-car passenger train reached the crossing, Franko said. The Chicago-bound train, which had its headlights on and was braking from a speed of 70 mph, pushed McCoy and his truck 1,400 feet before stopping, she said.

Police were not sure why McCoy's truck stopped on the track, Franko said. It did not stall, but it was parked on the track ''for some time,'' she said.

McCoy's truck was on the crossing about 50 miles north of Wednesday's accident in Crawfordsville.

The crossing had no barriers and was marked by only a stop sign, Banks said. The train arrived in Chicago about two hours late because of the 11:30 a.m. accident, she said.

The accident was under investigation. It was the fourth such mishap in 13 days involving an Amtrak train.

In Wednesday's accident, National Transportation Safety Board investigators suspect that a manual switch was left open, leading the train onto the wrong track. The train had just made its final stop before Indianapolis and was supposed to switch from a CSX-owned to a Conrail-owned track.

NTSB investigator Russell Seipler faulted the Amtrak crew, saying it should have been more observant of the position of the switch.

On May 3, a New Orleans-bound Amtrak train carrying about 200 passengers slammed into a log truck at a railroad crossing in rural Mississippi, injuring 25 people.

After that accident, Clifford Black, a spokesman for Amtrak in Washington, D.C., said the truck apparently failed to yield to the train as it entered or left a hardware flooring company, passing over a marked railroad crossing.

And on April 23, an Amtrak train carrying 420 people derailed near Batavia Iowa, injuring 97 people. Twenty-seven of the injured were hospitalized. Black said Thursday that the accident was still under investigation.

#90127u0400 05/07/1990 ~United Press International

BONN, West Germany (MAY 7) UPI - West German Chancellor Helmut Kohl said a six-power conference removed all obstacles to uniting the divided country, including an apparent easing of Soviet opposition to a unified Germany belonging to NATO.

''No more obstacles are in the path of realization of the right of self-determination of all Germans,'' Kohl said Sunday about Saturday's meeting of foreign ministers from East and West Germany and the four World War II Allies.

Kohl said in a statement that the Soviet Union, United States, Britain and France all agreed that the process of German unification should proceed ''without delay.''

West German Foreign Minister Hans-Dietrich Genscher said Soviet Foreign Minister Eduard Shevardnadze had accepted the right of the two German states to decide for themselves the timing of unifying Germany, which the Allied powers divided following the defeat of the Nazis in World War II.

Genscher said Shevardnadze had raised the possibility of a ''transitional

period'' for considering the security problems posed by unification, but did not elaborate.

At Saturday's talks, Shevardnadze repeated Soviet opposition to NATO membership of a unified Germany. He called it ''a most negative idea'' that would threaten the security balance in Europe.

Kohl and Genscher stressed their desire to allay such Soviet fears by expanding the functions of the 35-nation Conference on Security and Cooperation in Europe and the forging of security links that transcend alliances.

Kohl said his goal still is membership in ''a changing Western alliance.''

The West German news agency DPA quoted Genscher Sunday as saying that Shevardnadze told the other foreign ministers the issue of German membership in NATO could be decided after unification.

According to DPA, Genscher said Shevardnadze raised the possibility that the questions of unification and military alliances do not have to be resolved at the same time and that a transitional period could be set for security problems arising from the unity.

But the West German Foreign Ministry later said, ''The DPA story is partly distorted and partly false'' and does not correspond to statements Genscher made to the news agency. The ministry did not elaborate what may have been inaccurate about the report.

Kremlin foreign policy adviser Georgi Arbatov was questioned on television about the report Sunday on NBC-TV's ''Meet the Press'' program.

Without confirming the report, Arbatov said, ''The way could be found and will be found'' to remove the NATO issue as a point of contention. By separating the security issue from the unification process, he said, the problem is not necessarily eliminated but ''just delayed.''

SYDNEY, Australia (MAY 7) UPI - Investigators Monday found that emergency brakes on a vintage steam train apparently had been tampered with before it was rammed from behind by a commuter train, police said.

Six people were killed Sunday, and 20 of the 90 people injured were in serious condition Monday following the collision of the two trains that were carrying nearly 600 passengers, a hospital spokesman said.

Police inspecting the wreckage on the main northern line at Brooklyn, 30

miles from Sydney, found the glass case over an emergency brake in the fourth car of the five-carriage steam train was broken, and they believed it had been used to stop the train.

''It appears part of the emergency braking system had been tampered with '' said Inspector Barry Dening. ''We had a scientific squad go in and we have had some parts fingerprinted where it appears the braking system has been interfered with,'' he said.

A railway investigator said, ''Rail enthusiasts often activate handbrakes in order to force the engine to work harder and produce more of the authentic steam engine sound.''

The double-decker InterCity commuter train carrying 330 people rammed into the rear of the historic steam train about 7 p.m. The driver of the InterCity was among those killed.

The steam train was carrying 260 passengers back to Sydney from the Morpeth Jazz Festival in the wine-producing Hunter Valley.

(MAY 7) UPI - Around the world... around the clock... the latest news from U-P-I.

Congressional leaders descibe last night's White House meeting with President Bush as the first step toward achieving a bi-partisan agreement on the budget. The meeting between Capitol Hill's four senior lawmakers and Bush did NOT lead to the discussion of specific budget issues. But the legislators say the meeting fostered a sense of good will on all sides.

Philippine police arrested two men today for Friday's murder of a U-S Marine near the Subic Naval Base. Authorities describe the arrested men as ''drug addicts.'' Philippine and U-S officials had earlier assumed that Gunnery Sergeant John Fredette had been gunned down by communist rebels.

Authorities in Chico, California, say calm has returned to the city following a weekend fraught with violence. Police officials say 10 officers were injured when pelted by rock-tossing youths who gathered in Chico for the city's annual spring celebration. Nearly 100 people were arrested.

Officials in a Chicago suburb will ask a Cook County grand jury to decide if charges should be filed against a 60-year-old man who lost control of his car Saturday and plowed through a Little League baseball park. Three children were killed and another nine people were injured.

South African anti-apartheid leader Desmond Tutu says the United States should NOT remove economic sanctions against his country's white minority government. Speaking at the commencement exercise of Pennsylvania's Lincoln University yesterday... Tutu said U-S pressure should NOT be relieved until Johannesburg shares power with South African blacks.

TOKYO (MAY 7) UPI - At least 334 people died and three others were missing in accidents across Japan during the eight-day ''Golden Week'' holiday, Kyodo News Service reported Monday.

Kyodo said that during ''Golden Week,'' which ended Sunday, 307 people were killed in traffic accidents, the worst record for the period since 1979. Twelve people drowned and 11 were killed in climbing accidents, the news agency said.

Two people were missing in accidents at sea or marine resorts and one climber was unaccounted for, Kyodo said.

Bad weather kept the turnout of holidaymakers low, it said.

The most popular attraction was a port festival in Fukuoka Prefecture on Japan's southernmost main island of Kyushu, attracting 2.1 million people, it said.

The holiday, which began April 28, included four national holidays.

#90127u0428 05/07/1990 ~United Press International

BEIJING (MAY 7) UPI - Prince Norodom Sihanouk again withdrew Monday as leader of the Cambodian resistance and dropped plans for peace talks with Cambodia's Vietnam-backed premier, saying he would launch a personal crusade for the ''rehabilitation of my people.''

The mercurial Cambodian leader, in a statement from his Beijing residence, said he would ask the resistance and the Phnom Penh government to allow him to take U.N. staff into the country to bring international aid to its war-ravaged population.

Western diplomats said they believed Sihanouk was frustrated with a continuing deadlock in efforts to end the 11-year-old guerrilla war in Cambodia, but was also concerned that recent peace proposals threatened to reduce his role in the process.

Sihanouk has since the early 1980s led the three-faction resistance fighting the government installed by Vietnam after Vietnamese troops invaded Cambodia in late 1978. The Vietnamese say they have withdrawn, but the war has continued.

It was not clear what impact Sihanouk's decision would have on recent diplomatic efforts to advance an Australian peace proposal under which the United Nations would temporarily administer Cambodia until free elections could be held.

In his statement, Sihanouk said he would ''take a long leave of absence'' as leader of the resistance and president of the Cambodian government in exile to begin his personal campaign.

''I have the sacred duty of devoting myself, even in the middle of the war to the rehabilitation of my people and the reconstruction of my country '' he said.

He said he would drop plans to travel to Tokyo next month for peace talks

with Cambodian Prime Minister Hun Sen ''because, henceforth, I do not any longer concern myself with political issues or problems of war.''

Although Sihanouk has previously resigned and reinstated himself as leader of the Cambodian government in exile, the statement was unusually passionate, with the 67-year-old prince noting, ''I have very little time left before dying or becoming invalid.''

Sihanouk said he would ask Hun Sen, the United Nations and interested countries to take U.N. staff into areas of Cambodia controlled by the resistance and by Phnom Penh.

He said he hoped to obtain ''enough international assistance, to be administered by the donor countries and not by me, for rehabilitation in all fields, public health, national education, agriculture, water supply, arts, etc., of the Khmer people.''

The move was Sihanouk's latest to show concern for Cambodians. With residences in China and North Korea, he recently returned to set up a home in a resistance-controlled area of the country.

Peace efforts have stalled on insistence by the resistance and its chief military backer, China, that the communist Khmer Rouge, which fields the strongest resistance army, be included in an interim government before elections are held.

Phnom Penh and Hanoi have steadfastly rejected participation by the Khmer Rouge, which was toppled by the 1978 Vietnamese invasion after a four-year reign of terror that killed at least 1 million Cambodians.

#90127u0537 05/07/1990 ~United Press International

(MAY 7) UPI - President Bush and congressional leaders have their first discussion about next year's budget.

Eastern Europe can get larger loans from the International Monetary Fund.

And, flooding on the Arkansas River routs people from low-lying areas.

U-P-I has this and other top news today.

President Bush and top congressional leaders are setting the stage for bipartisan cooperation on the federal budget.

Bush hosted an informal 90-minute meeting in the family quarters of the White House last night. House Speaker Thomas Foley called the meeting part of ''a process'' of negotiations on cutting the deficit in 1991, and

perhaps beyond.

White House officials had said NO substantive decisions were expected from the meeting... but Foley says good-will was evident on all sides.

Senate Republican leader Robert Dole and House G-O-P leader Robert Michel also pledged to seek broad congressional support for negotiations.

The White House had NO immediate comment on the outcome of the meeting. Foley says congressional leadership will report back to Bush later in the week.

The discussions skirted specific issues in the budget debate... but Foley and Senate Democratic leader George Mitchell say the assumption in the meeting was that all issues... including taxes... will be negotiable.

Bush's familiar campaign refrain... ''Read my lips: No new taxes''... has NOT recently been heard. But whether the omission is a signal of flexibility or simply a negotiating ploy is NOT clear. NO Bush aide has suggest Bush's antipathy to increased taxes has been dropped or even softened.

#90127u0546 05/07/1990 ~United Press International
(MAY 7) UPI - Arkansas authorities are bracing for a surge of floodwaters during the next two days. A spokesman for Arkansas Emergency Services says the fulminating Arkansas River is expected to pummel the Little Rock area today and tomorrow.

The anticipated high waters caused by the Arkansas River and other waterways throughout the state comes as Governor Bill Clinton designated 27 counties in northwestern Arkansas as disaster areas.

A federal survey is slated to begin today to determine if the counties- which were smacked last week by flash floods- merit emergency aid from Washington.

The floodwaters rushing into Arkansas are flowing downstream from hard-hit Oklahoma. Both Oklahoma and Texas are trying to cleanup after two weeks of heavy rain created some of the worst flooding in recent memory.

The flipside of the meteorological coin is being felt in Southern California.

The mercury rose to 97 yesterday in Los Angeles, breaking a 49-year-old record. Saturday's 101-degree mark smashed a record post 37 years ago.

However, the heat wave will end today. The National Weather Service says today's mercury in L-A should rise into the 80's.

-30- 1337

#90127u0557 05/07/1990 ~United Press International
(MAY 7) UPI - A consumer group says the sugar lobby has been whispering something more than sweet NOthings to influential lawmakers on Capitol Hill.

Public Voice for Food and Health Policy has compiled statistics that reveal the sugar lobby has contributed nearly three and one-half Million dollars to the campaigns of senators and representatives between 1983 and 89.

The head of Public Voice says the campaign donations go toward keeping the U-S sugar producer's price system propped up above the world market... while disallowing foreign competition in the American marketplace.

The recipients of much of the sugar political action committee's largesse are influential congressional representatives... either those in leadership positions or serving on committees handling sugar and trade legislation.

Public Voice also says that lawmakers who voted against a 1985 proposal to reduce sugar price supports received 21 times as much in contibutions from sugar PACs after the vote as lawmakers who favored the reduction.

#90127u0558 05/07/1990 ~United Press International

UNGENY, Romania (MAY 7) UPI - A weekend invasion of Soviet Moldavia by hundreds of thousands of Romanians fueled hopes Monday for reunification of the two regions, residents of both countries said.

''Anyone who feels Romanian wants Bessarabia back,'' said Romanian Popular Front spokesman Nicolescu Viniciu, using the Romanian name for the region now known as Soviet Moldavia. ''It's just a matter of time.''

Hundreds of thousands of Romanians were allowed to cross the Prut River into the Soviet Union without passports Sunday for the first in 50 years in what many saw as a step toward reuniting Moldavia and Romania.

Massive crowds swarmed across the river at several bridges linking the two countries, and border guards turned a blind eye to teenagers taking advantage of the six-hour frontier opening by swimming to the Soviet Union.

Moldavia, where more than half of the 4 million people are ethnic Romanians, was part of Romania from 1918 to 1940, when it was seized by the Soviets under dictator Josef Stalin.

Since the Romanian revolution that toppled communist leader Nicolae Ceausescu, the mostly Romanian leaders of Moldavia have declared Romanian the official language and even moved the clocks back an hour to be synchronized with Bucharest.

At the border crossing in Ungeny, a hamlet split in two by the Prut, about 40,000 people jammed a small iron bridge over the river, creating a 6-mile-long traffic jam on the Romanian side.

Bunches of spring flowers thrown into the river from both banks mingled symbolically and church bells rang in unison at noon.

Describing his first visit to the Soviet Union, 23-year-old school teacher Teodor Munteanu said Soviet Moldavians gathered around him ''as if I were a star.''

''They just wanted to hear me talk, to hear real Romanian,'' he said. ''The pure Romanian language is lost over there.''

Nicolae Pujoga, 40, a photographer from the old Bessarabian capital Kishinev, said reunification fever also was sweeping the Soviet side.

''We have been demonstrating since the revolution in the city center for reunification,'' he said. ''We are all brothers - not just those of us who have friends and relations on the other side. Reunification is a real dream.''

At one point, the sheer volume of people trying to cross the bridge at Ungeny almost triggered a disaster. When five special trains arrived with thousands more Romanians around 2 p.m., the crush on the narrow bridge became almost suffocating, forcing many to scramble to avoid being trampled.

Authorities said a guard on one of the trains was killed when the locomotive went into reverse and ran over him in the confusion.

#90127u0563 05/07/1990 ~United Press International

(MAY 7) UPI - Argentine authorities have appointed a judicial official to investigate a fire at a prison 35 miles south of Buenos Aires.

The blaze at the Olmos Penitentiary started Saturday night in a wing populated by prisoners commended for good behavior. Prison officials said yesterday 33 of the wing's 58 prisoners were killed in the fire while another 11 were injured.

There are questions surrounding how the blaze started. The prison warden says inmates quarreled among themselves and set mattresses on fire.

His comments appear to contradict a statement made by the penitentiary which said that one prisoner was responsible for the blaze.

''Camp C! Camp C! We're on the summit.''

Those words announced the arrival of an international team of climbers from the United States, Soviet Union and China on the top of Mount Everest the world's highest mountain.

Expedition leader Jim Whittaker of the ''Mount Everest International Peace Climb'' used a satellite telephone from a camp on the mountain to make the call. He said simply... ''It's a great thrill.''

Two Americans are in the team of six that reached the summit... Robert Link, of Crystal Mountain, Washington, and Stephen Gall, of Woody Creek, Colorado.

The climb began nine weeks ago. It's the first joint ascent of Everest by mountaineers from the three countries. Officials say the expedition was

aimed at promoting international good-will and a clean environment.

While descending the mountain, the climbers will pick up two tons of debris and gear left behind by past expeditions.

#90127u0777 05/07/1990 ~United Press International

WARSAW, POLAND (MAY 7) UPI - President Wojciech Jaruzelski, who imposed martial law and forced the Solidarity movement underground in 1981, says that taking that ''huge burden'' on himself averted a Soviet invasion and paved the way for today's Solidarity government, it was reported Monday.

Jaruzelski also reportedly claimed in a meeting with Peasants Party legislators that his harsh measures - including sending thousands of Solidarity activists to prison - contributed to a stability that made it possible for reformer Mikhail Gorbachev to emerge in the Soviet Union.

''I have a feeling of big responsibility for the period in which I played a major role,'' Jaruzelski was quoted by the Solidarity newspaper Gazeta Wyborcza as saying in Friday's meeting. ''I took a huge burden on my shoulders to prevent the worst from taking place.''

Jaruzelski - the former Communist Party leader, defense minister and prime minister who now serves as president in a government controlled by Solidarity - imposed martial law in Poland on Dec. 13, 1981.

He said the Soviet Union - then under the leadership of hard-liner Leonid Brezhnev - had threatened Poland with military invasion unless it clamped down on Solidarity, which was formed in 1980 as the first free labor union in the Soviet bloc.

The imposition of martial law did not complicate the international situation to the extent the military intervention would have done, promoting a stability that allowed Gorbachev and, later, Solidarity Prime Minister Tadeusz Mazowiecki to appear on the political scene, Jaruzelski claimed.

''Otherwise, there would not have been Gorbachev and Mazowiecki,'' he said.

Jaruzelski, 66, who played a key role in persuading the Communist Party leadership to legalize Solidarity last year, described himself as a modest leader. He said he had rejected the rank of marshal when then-communist leader Edward Gierek offered it to him in 1973.

Gierek has depicted Jaruzelski in a recent best-selling book as a career-seeking communist who protected his position by sitting on the fence during vital Communist Party deliberations.

Jaruzelski conceded he had been shocked by the collapse of communist rule in Poland last year.

''Now the word 'socialism' sounds like an insult,'' he said.

Jaruzelski said it would be difficult for him to remain as president to the end of his current term, which expires in 1994. Solidarity leader Lech Walesa has said he would run for the presidency and has criticized Jaruzelski as inefficient.

But the newspaper said Jaruzelski told the legislators during Friday's meeting that replacement should be Mazowiecki.

''He has all best features needed by a president, it is my personal opinion,'' he said.

A recent public opinion survey found that 24 percent of Poles prefer Mazowiecki for president, 19 percent back Bronislaw Geremek, the chairman of the Solidarity Parliamentary Caucus, about 16.5 percent were for Jaruzelski and 16.1 percent supported Walesa.

#90127u0801 05/07/1990 ~United Press International

EAST BERLIN (MAY 7) UPI - The conservative Christian Democrats of Prime Minister Lothar de Maiziere led in East Germany's first municipal balloting since the communists were ousted last fall, but their support has slipped since national elections in March, nearly complete results showed Monday.

The drop in support suggested voters have doubts about de Maiziere's policy of headlong unification with West Germany.

Returns from 20,106 of the 20,120 electoral districts gave the Christian Democrats 34.4 percent of the vote. The Social Democrats, the second largest party in de Maiziere's coalition government, won 21.3 percent.

The communists, who controlled town, city and county councils after rigged elections a year ago, went down to defeat with 14.6 percent of the vote. But they made a strong showing in East Berlin with 30 percent, which gave them second place behind the Social Democrats with 34 percent.

The Christian Democrats won the most votes in Dresden, Erfurt, Halle, Chemnitz, Cottbus, Gera and Suhl. The Social Democrats came out on top in East Berlin, Leipzig, Rostock, Magdeburg, Potsdam and Schwerin.

The local elections were viewed as a test of de Maiziere's policy of pursuing a rapid economic, social and political unification of the two Germanys. A solid victory was expected to reinforce his support for quick German unity.

The Christian Democrat vote total was 6.9 percent less than the party's showing in March 18 parliamentary elections, the country's first free elections since World War II.

''We shall have to consider why we received a lower share of the vote today,'' de Maiziere said when asked about the drop in conservative support. Many small parties and independent candidates gained support.

Many voters interviewed in East Berlin said they feared a ''sellout'' of East Germany to powerful and wealthy West Germany.

De Maiziere, whose coalition government replaced a communist-led East German central government in a national parliamentary election in March,

had called on voters ''to eject the socialists from the local councils.''

''We want to take over in the communities, too,'' he added.

The communists went down to a devastating defeat in the March 18 elections the first free vote in East Germany. They said their goal in the local elections was to win ''many 'red' city halls'' to counter conservative control of the central government.

#90127u0852 05/07/1990 ~United Press International

ATHENS, Greece (MAY 7) UPI - The United States and Greece resumed discussions Monday on the future of U.S. military bases on Greek soil.

The talks, which had been suspended for a year, reconvened a day after Libyan leader Col. Muamar Gadhafi revealed in a television interview broadcast live in Crete that he came close to bombing two U.S. military bases on the island in 1986 when U.S. jets attacked Libya.

Greek Foreign Minister Antonis Samaras appeared briefly at the opening session of the renewed discussions, which were held in the Foreign Ministry. Alan Flanagan headed the U.S. team and Christos Zaharakis led the Greek side.

The discussions are expected to last 10 days but no final agreement will emerge from the talks, officials said. The two sides held 17 rounds of discussions between November 1987 and May last year.

Greece suspended the discussions a year ago as it prepared for general elections but fresh elections had to be held twice more before a stable government emerged and Athens could give its attention again to the future of the bases.

In his TV interview, conducted in Libya and broadcast live in Crete Sunday Gadhafi said he warned the Greek government of then-Prime Minister Andreas Papandreou in 1986 to begin evacuating the civilian population around U.S. military bases on the island.

Gadhafi said he was preparing to bombard the facilities.

The United States operates a naval and an air base on Crete. The future of the two bases is currently under discussion in Athens. Gadhafi did not say why he eventually held off.

The newly elected conservative government of Prime Minister Constantine Mitsotakis said last month that the two sides had already reached agreement on 90 percent of a new document on defense and economic cooperation, on which the future of the bases depends.

Still under discussion was whether the new agreement would run for five or eight years.

An earlier agreement on four major U.S. bases and 20 minor installations expired in December 1988. The United States had until this month to dismantle them, but Greece extended the deadline till November, to allow more time for a new agreement to be negotiated.

Of the four original bases, two are to be dismantled under a decision announced in Washington in January, as part of a program to cut back on military spending.

On April 27, American servicemen began dismantling the naval communications base at Nea Makri, some 15 miles east of Athens. They are scheduled to complete the job by October.

The dismantling of the U.S. air base at Hellenikon, adjacent to the Athens international airport, was scheduled to begin in October.

#90127u0867 05/07/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 7) UPI - Czechoslovakia and the European Community

signed a trade and economic cooperation agreement Monday that extends ties between the two to issues of nuclear energy and nuclear safety.

Czechosolvak Prime Minister Marian Calfa said his country views the agreement as a step toward full membership in the EC.

''This is a landmark on the road to membership in the European Community '' he said. ''We believe that we shall be able to do everything necessary to be able to become a full member of the community between now and the end of the century.''

The agreement calls for closer scientific ties between Czechoslovakia and the EC and also provides for economic cooperation in agriculture, environmental protection, tourism, telecommunications and other areas.

Because the pact also calls for ties on nuclear energy and nuclear safety, the European Atomic Energy Community, known as EURATOM, also is a party to the agreement.

The pact signed Monday replaces a purely commercial agreement signed by Czechoslovakia and the EC in December 1988.

The pact is what EC officials call a ''first-generation'' trade agreement. Negotiations will likely begin this fall on a ''second-generation'' pact, known as an ''association'' agreement, which would provide for even closer trade ties.

Unlike association pacts in the past, however, new association agreements with the democratizing countries of Eastern Europe will not automatically imply eventual EC membership.

#90127u0941 05/07/1990 ~United Press International

SEOUL, South Korea (MAY 7) UPI - President Roh Tae-woo said Monday he will try to bring about political, economic and social stability by the end of the year and calm Koreans' uneasiness.

Roh, in a broadcast speech, presented his views on unrest touched off by a confrontation between the government and labor unions and economic problems including inflation, sagging exports and stock market confusion.

The opposition Party for Peace and Democracy led by Kim Dae Jung has demanded the dismantling of the ruling Democratic Liberal Party and the installation of a non-partisan Cabinet to overcome what it calls ''a grave national crisis.''

The new ruling party was born in February through the merger of Roh's

party and two former opposition groups led by Kim Young-sam and Kim Jong-pil. It will finalize its leadership structure at a national convention scheduled for Wednesday.

In his 13-minute address, Roh said the nation paid a high price during the past three years to usher in democracy and consolidate a new order but conceded that problems continue.

He said the new ruling party provided the basis for political stability but said factional strife that marred the merger process had disappointed the public. He said the government has failed to earn popular trust in its policy consistency and said the people doubt the government's will to achieve stability.

''I will manage state affairs with an extraordinary resolve and posture so that political, economic and social stability is shored up by the year-end to such an extent where our people are free from uneasiness,'' Roh said.

Roh said the government will put an end to speculation in real estate by forcing big business and financial institutions to sell their non-business land holdings. He said he will promote tax reform, including heavier taxes on unearned income.

He said legal labor movements will be guaranteed,but unlawful labor protests and collective action of a political nature outside normal labor-management relations will be dealt with harshly.

He specifically cited labor disputes at the state-run Korea Broadcasting System and the Hyundai Heavy Industries shipyard, where police recently moved in to break up striking union members.

KBS remains crippled because most reporters, producers and technicians have stayed away from their jobs, ignoring repeated government pleas.

The leader of the KBS union said the strike will continue until KBS president Suh Ki-won steps down and 12 union members arrested in a government crackdown on April 28 are freed.

Roh said the government will take measures to encourage business investment and give full support to efforts for greater competitiveness and technological development in the manufacturing sector.

''It is true that our economy is losing competitiveness and our trade balance is turning red, but our economy is not in a crisis,'' Roh said. ''If we strive with confidence, our economy should be able to maintain healthy growth.''

Roh urged businesses to make voluntary efforts to help stability and

called on workers to hold demands for wage increases within the range of increased productivity until the economy recovers.

HOUSTON (MAY 7) UPI - Drilling activity increased in both the Gulf of Mexico and European waters last week, boosting the worldwide utilization rate to its highest level in more than four years, industry monitors reported.

Three more mobile rigs went to work last week in the Gulf, boosting the utilization rate there to 72.8 percent, with 155 rigs working out of a fleet of 213, Offshore Data Services said Sunday.

Strong demand continued for rigs in European waters, where two more units went to work last week. The utilization rate in that area reached 91.7 percent, with 122 rigs working out of a fleet of 133.

The gains boosted the worldwide utilization rate to 82.2 percent, its highest level since January 1986, with 549 rigs working out of a fleet of 668, ODS said.

Baker Hughes Inc. also reported 930 rotary rigs working in the United States last week, compared with 927 the week before and 764 the same week a year ago. There were 337 rotary rigs working in Texas last week, compared with 336 the week before and 246 the same week a year ago.

Other rig counts included Louisiana, 154 last week, compared with 146 the prior week and 125 the same week a year ago; New Mexico, 43, 45, and 34; Oklahoma, 112, 119, and 123; and Canada, 55, 52, and 60.

(MAY 7) UPI - Two weeks of relentless rain in Oklahoma are causing floods in neighboring Arkansas this morning. A spokesman for the state Emergency Service says the Arkansas River is about five to eight feet above flood stage. Residents along low-lying parts of the river north of Little Rock have been evacuated.

Israeli Labor Party leader Shimon Peres says he's NOT averse to forming a coalition government once again with the conservative Likud Party. But Peres says before he's willing to take such a step, Likud will have to agree to hold peace talks with Palestinians in Israel's occupied territories.

A 60-year-old man whose car veered out of control through a Little League

field in suburban Chicago Saturday initially told police that he lost consciousness at the wheel. But the man later refused to talk about the accident. Three children were killed and nine other people were hurt.

East German municipal election results show the popularity of the ruling Christian Democrats is slipping. Although the conservative Christian Democrats out-polled their nearest competitor, the Social Democrats, their margin of victory decreased when compared to mid-March parliamentary balloting.

The World Jewish Congress is meeting on German soil for the first time in more than six decades. Yesterday, the head of the Congress issued a stern message that a united German state must NOT succumb to the ''aggressive nationalism'' that characterized Germany in World Wars One and Two.

WASHINGTON (MAY 7) UPI - Army Gen. Colin Powell, chairman of the Joint

Chiefs of Staff, wants an extensive top-to-bottom review of the military, which could lead to a 25 percent lower defense budget, The Washington Post reported Monday.

Powell, whose comments during a recent interview were published Monday, said ''every single hardware system,'' military base and operational doctrine should be open for review.

Such a review, he said, could be used to restructure a U.S. military force to roughly three-quarters its current size within four to five years, the Post said.

''What I'm trying to put across to the department is (the military threat) really is different,'' Powell said.

Powell said he is not opposed to reasonable spending cuts because ''I think increasingly we can wipe away from our eyes ... these 'evil empire' filters that we used for many, many years'' to view the Soviet militray threat.

Powell said he did not want to reveal his views on future budgets for each military service and function, but he said he believed a ''fundamental break point'' would occur ''somewhere in the neighborhood of maybe a 20 percent to 25 percent reduction from where we are now'' in both force size and military expenditures.

Powell did not specify how many years would be needed to reach a 25 percent reduction.

He said he envisions the future U.S. military having four principal components:

-A so-called heavy force capable of fighting a medium- to high-intensity conflict across the Atlantic, equipped with tactical nuclear weapons.

-A somewhat ''lighter'' force capable of defending U.S. interests in the Pacific, including U.S. troops and equipment in Korea and Hawaii.

-A ''contingency'' force, capable of rapid deployment from U.S. territory into military hot spots such as Panama.

-A ''strategic'' force of nuclear weapons to deter superpower conflict.

WASHINGTON (MAY 7) UPI - President Bush was expected to hold most of his meetings with Mikhail Gorbachev in Washington during the May 30 to June 3

summit, with at least one overnight stay at Camp David being planned, aides said Monday.

Original plans for a five-day summit with more frills were abandoned after Gorbachev passed the word that he wants the summit to be strictly business.

The Kremlin leader will be accompanied by his wife Raisa, but first lady Barbara Bush's staff say that they are as yet uncertain what the Mrs. Gorbachev's agenda will be during her stay.

Under current plans there will be a formal welcome at the White House for Gorbachev and a state dinner in the evening. Most of the talks are expected to be held in the White House.

Both Bush and Gorbachev were expected to sum up their delibertions at a news conference, perhaps jointly as they did at their meeting in Malta last December.

A more relaxed rustic setting for the Soviet leader was expected to take place on Saturday June 2 at the presidential retreat in Western Maryland's Catoctin Mountains.

White House officials have been unable to finalize summit arrangements, partly because of a delay in getting word of the Soviet delegations' preferences.

BRUSSELS, BELGIUM (MAY 7) UPI - A prison board recommended the release of a Palestinian killer seen as the key figure in negotiations to free four Belgians held hostage in the Middle East since 1987, officials said Monday.

Said Nasser is serving a life sentence for a 1980 hand-grenade attack on a group of Jewish schoolchildren in Antwerp. One child was killed and nearly 20 injured.

Under Belgian law, a prisoner serving a life term can win release for good behavior after 10 years. The prison board at the Belgian penitentiary in Louvain said Nasser, who will reach the 10-year mark July 27, has been a model prisoner.

The final decision on an early release rests with the Belgian justice minister, based on recommendations of the prison board and prosecutors.

Belgium's Justice Ministry said the prison board's recommendation was a routine matter but Nasser is far from an ordinary prisoner.

High-level Belgian officials have been negotiating for months to win the release of four Belgians seized aboard a pleasure boat in the eastern Mediterranean in November 1987.

The four, reportedly taken hostage by the Fatah Revolutionary Council, are Emmanuel Houtekins, 44, his wife, Godelieve Kets, 50, and their two children, Laurent, 19, and Valerie, 18.

Houtekins' brother, Fernand Houtekins, was freed April 10 along with his French girlfriend, Jacqueline Valente, and their daughter, Sophie, who was born in captivity.

They had also been on board the pleasure boat, along with Valente's two daughters from a previous marriage, who were released in December 1988 following intervention by Libya.

PARIS (MAY 7) UPI - First-quarter oil consumption by OECD countries was unchanged from the same period in 1989 at 38.5 million barrels a day but is expected to increase by 1.5 percent during the second quarter, the International Energy Agency said Monday.

Production by OECD member countries in the first quarter averaged 16 million barrels a day, a 0.8 percent decline from the first quarter last year. The OECD, founded in 1961, comprises nearly all the industrialized free-market nations of the world.

The IEA said a five percent increase in April oil consumption over March in the OECD Pacific area to 6.5 million barrels a day and a two percent increase in European oil consumption to 13 million barrels a day were offset by a 2.5 percent consumption decline to 19 million barrels a day in North America.

The agency said that in the second quarter consumption in the OECD area is expected to increase by 1.5 percent over the second quarter last year to 36.5 million barrels a day. North America is expected to register a one percent increase to 18.9 million barrels a day while European consumption should rise by 1.5 percent to 12.2 million barrels a day. The OECD Pacific region is expected to see a two percent consumption increase over the second quarter last year to 5.4 million barrels a day.

The agency said the moderate rate of growth expected during the second quarter is in part due to the unusually high 6.4 percent growth rate registered in the second quarter last year. Oil consumption for all of 1990 should increase one percent over 1989 to 38 million barrels a day, the IEA said.

April oil production by countries belonging to the Organization for Economic Cooperation and Development was estimated at 15.9 million barrels a day, about 100,000 barrels a day less than during March, primarily due to a 5.5 percent decline in U.S. output to less than nine million barrels a day, the agency said.

The IEA report said that based on the first three weeks of April, OPEC oil production is estimated at 23.5 million barrels a day for the entire month exactly the same figure released by OPEC itself at an emergency meeting last week of its price monitoring committee in Geneva.

Spot prices for all major crude oils declined significantly last month to their lowest level since late 1988, the agency said. A 25 percent decline in crude oil prices since the start of the year led OPEC ministers to decide last week on a cut of 1.445 million barrels a day in production in an effort to push prices closer to the $18 a barrel reference price set last November by the organization.

The price of a barrel of crude oil was around the $15.70 level late last week. But markets, accustomed to widespread cheating on quotas by Organization of Petroleum Exporting Countries, ignored the promise to cut production, pushing prices even lower late last week.

The IEA said Saudi Arabia had produced 5.7 million barrels a day in April, 100,000 barrels a day more than in March and much higher than its 5.38 million barrels a day a quota.

The Saudis promised to immediately cut daily production by 430,000 barrels at the Geneva meeting, while Kuwait said it will reduce output by 400,000 barrels a day and Nigeria by 140,000 barrels a day.

Production by the United Arab Emirates was put at 2.1 million barrels a day in April by the IEA, the same as in March. The UAE, which has never recognized its 1.095 million barrels a day quota agreed to by OPEC ministers last November, said last week it will cut its daily production by 200,000 barrels for the next three months.

The IEA said Kuwait's daily production in April was 1.7 million barrels a day, just below the 1.8 million barrels it produced in March. Iran reported reduced production to 2.9 million barrels a day from 3.1 million in March while Iraq cut production in April to 2.9 million barrels a day from 3.1 million. Venezuela also registered a production cut to 1.9 million barrels a day from two million, according to the IEA report.

#90127u1184 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - The administration announced a ban Monday on the importation of archeological treasure from Peru to help discourage looting linked to a growing illegal market for pre-Columbian artifacts.

White House press secretary Marlin Fitzwater said the action was taken at the request of the Peruvian government after the discovery of a rich new archoelogical find ''unfortunately generated intense demand for these treasures.''

''The tombs of the Moche nobility, which have produced gold artifacts unlike any previously seen in the pre-Columbian cultures of Peru, have prompted looters to engage in rampant destruction of these sites in order to satisfy the illegal trade in archeological artifacts,'' he said.

''The United States believes that the illegal trade in cultural property does immense damage to our hemispheric cultural heritage and is willing to cooperate with other governments of this region and elsewhere to prevent illegal trafficking in archeological treasures,'' he added.

This is the third time the United States has taken action under federal law and a 1970 U.N. convention to crack down on trade in cultural property. Emergency restrictions were imposed in 1987 on certain articles from El Salvador predating the voyage of Christopher Columbus. In 1989 restrictions were imposed on some antique Andean textiles from Bolivia.

Fitzwater said requests from Canada and Guatemala for similar protections are under consideration by the President's Cultural Property Advisory Committee.

#90127u1203 05/07/1990 ~United Press International
TOKYO (MAY 7) UPI - Bank of Japan Governor Yasushi Mieno said Sunday the central bank will not change its monetary policy following a meeting of the Group of Seven industrial nations in Washington, Kyodo News Service reported Monday. Kyodo, in a dispatch from Washington, said Mieno made the remark at a news conference following the G-7 meeting Sunday.

"Each nation has agreed to take proper action according to its own economic situation, and there will be no upward or downward revision of the key interest rate (by the Bank of Japan)," Mieno was quoted as saying.

A communique issued after an eight-hour closed-door session said the Japanese yen "remained of the view that the present level may have undesirable consequences for the global adjustment process."

"What was said in the communique means the G-7 countries are not satisfied with the yen's current exchange rate (against the U.S. dollar) near the upper end of the 150 yen level," Mieno said, according to Kyodo.

The U.S. dollar closed the morning session at 157.98 yen, down 0.57 yen from Friday's close. The Bank of Japan raised the official discount rate by a full 1.0 percentage point to 5.25 percent from 4.25 percent in March.

#90127u1211 05/07/1990 ~United Press International
GRAND RAPIDS, MI (MAY 7) UPI - Rep. Paul Henry, R-Mich., announced Monday he will seek re-election to a fourth term in Congress.

''I have tried to serve with judgment, integrity and political fairness and I feel I've been an effective voice,'' the 5th District congressman said. ''I've tried to combine a vision for the future with hard-headed realism.''

Henry, 47, who serves on the House committees on education and labor; science, space and technology, and the select committee on aging, said child-care legislation and a national bottle return bill will be among his top priorities.

Henry said he would be relying heavily on a grass-roots campaign, noting he favors campaign finance reforms that would require candidates to obtain at least half of their funding from their districts.

#90127u1235 05/07/1990 ~United Press International

TAMPA, FL (MAY 7) UPI - A rare Sumatran tiger accidentally killed her 2-month-old cub this weekend as a crowd of about 50 visitors, mostly children, watched.

''It was very sad,'' said Michael Hoad, a Tampa man visiting the park Sunday. ''People were just sobbing. Most of the kids didn't pick up on what was happening but it was upsetting the adults.''

Officials at Lowry Park Zoo said the 150-pound tiger, Tuka, one of only 33 in U.S. zoos, apparently picked up the cub, Shere-Khan, incorrectly. Tuka closed her jaws around the cub's neck, rather than carrying him by the scruff of his neck.

The zoo's executive director, David Thompson, said an autopsy showed the male cub's windpipe had been blocked.

''Since this was her first offspring, inexperience may have taken its toll '' he said. ''It's not uncommon for exotic cats not to do real well with their first offspring.''

Witnesses said Tuka and the cub appeared to be playing at first and the mother appeared to be teaching Shere-Khan how to swim. Some people said they believed something was wrong when Tuka began submerging the 16-pound cub as he fought to get away.

''He was pushing his paws against her neck, trying to get away. She wouldn't let it go,'' said Sharon Taylor. ''Obviously, something was wrong.''

The struggle went on for about 10 minutes, witnesses said, before concerned spectators ran to get help.

''If someone had come when that first woman went and said something was wrong, this never would have happened,'' said Julie Carter, who went to the zoo with her husband.

Shere-Khan was the first Sumatran tiger born in this country this year. Sumatran tigers, an endangered species that number only about 800, exist in the wild and can be found only on the Indonesian island of Sumatra.

The cub's parents were brought together through a computer service designed to unite the best of genes and produce stronger Sumatrans to increase the population.

#90127u1253 05/07/1990 ~United Press International
BUCHAREST, ROMANIA (MAY 7) UPI - The provisional government Monday banned

demonstrations and the sale of alcohol and will tighten security during the 48-hour period leading up to the May 20 elections.

Interim Deputy Prime Minister Mihai Draganescu also announced that polling stations would be patrolled by police and soldiers to guard against violence.

Interim President Ion Iliescu, a former communist, is favored to become Romania's first democratically elected president in four decades.

About 1,000 foreign observers, including former president Jimmy Carter, have been invited to monitor the voting.

Fears of election day unrest have been fueled in recent days by a surge of anti-government demonstrations in Bucharest and other cities as well as a series of attacks on political candidates.

Last Saturday, a rock-throwing mob assaulted Radu Campeanu, presidential candidate of the opposition National Liberal Party, after a campaign rally in the southeastern city of Braila.

''The security forces will guarantee correct elections,'' Draganescu said in announcing the two-day ban on demonstrations and alcohol sales May 19-20.

He said police and soliders would patrol a ''security zone'' within a 50-yard radius from each polling station. Political propaganda inside the zone also will be forbidden.

An increased police presence failed, however, to prevent the weekend attack on Campeanu, which authorities confirmed Monday. The presidential candidate escaped serious injury in the assault but the windows of his car were smashed and four of 150 police officers assigned to Campeanu suffered minor injuries.

Last week, a mob led by a club-wielding nurse attacked the wife of the other major opposition presidential candidate, Ion Ratiu of the National Peasant Party. She was not seriously hurt.

Right-wing newspapers said sympathizers of the National Salvation Front, the leading party in Romania's provisional government, were behind the attacks - an allegation denied by the organization.

''The Front ... rejects every possibility of its members stooping to such methods,'' the official news agency Rompres said. ''Its leaders consider that a large number of former Securitate (secret police) members and communists are engaged by the opposition.''

Newly appointed national police chief Corneliu Diamondescu said 105 politically motivated attacks have been reported during the election campaign, but said authorities have no record of slayings of political candidates alleged by opposition groups.

He insisted police would not use deadly force in the event of disturbances on election day.

''Police will just stand in rows in the event of disruption. Only in really extreme cases, mild force may be used,'' Diamondescu said.

#90127u1257 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - The productivity of America's work force plunged one percent in the first quarter of the year in the worst showing since a 1.3 percent fall in the first quarter of 1989, the Labor Department said Monday. The steep decline follows a revised 0.5 percent increase in non-farm worker productivity in the fourth quarter of last year.

Productivity measures the relationship between worker output and the labor time involved. Including farmers, productivity was off 0.5 percent in the first quarter.

The total output of American workers advanced 2.7 percent in January, February and March, and the number of hours they worked increased 3.6 percent, the Labor Department said.

Hourly pay declined by 3.9 percent in the first quarter, when inflation was taken into account. Costs were unusually high because of the effects of the brutal December cold snap on fuel and food prices.

"The number still reflects the flaky weather-related pattern we saw in the first quarter," said Jerry Jordan, chief economist at First Interstate Bancorp in Los Angeles. "I wouldn't attach too much significance to the report."

Not counting inflation, hourly pay increased 3.9 percent in the first quarter of the year, a warning consumer prices may increase further because as productivity dwindled labor costs climbed.

A barometer of inflation tied to the report, the implicit price deflator, shot up to 4.6 percent from 3.8 percent in the fourth quarter, according to the report compiled by the department's Bureau of Labor Statistics.

Joel Naroff, a senior economist at First Fidelity Bancorp in Philadelphia, said, "In general the overall number might have caused concern, but a very positive sign is the strength in manufacturing."

The manufacturing sector, which has been in the doldrums, scored a gain of 4.1 percent in productivity in the first quarter after gaining a revised two percent in October, November and December. The Labor Department said "it is not uncommon for productivity to advance faster in maunfacturing than in the broad business sectors."

"However, first-quarter maunfacturing gains reflected cutbacks in hours at work while hours increased in the broader business sector," the department said. "Manufacturing output showed little growth."

Manufacturing pay increased 3.2 percent for the quarter, but fell 4.5 percent when inflation was taken into account. All the numbers were calculated at an annual rate and adjusted to reflect seasonal factors.

#90127u1300 05/07/1990 ~United Press International

PHILADELPHIA (UYPI) - Former President Jimmy Carter was named Monday the 1990 recipient of the Philadelphia Liberty Medal, which carries with it a $100,000 prize.

Carter, the second medal recipient, was cited ''for his active involvement during the past few years in issues of liberty around the globe and his exemplary use of the post-presidential period,'' said Martin Meyerson, chairman of the 12-member selection committee and former president of the University of Pennsylvania.

Carter, who was defeated by Ronald Reagan in 1980, will receive the medal in a ceremony in front of Independence Hall July 4. President and Mrs. Bush have been invited to attend. Carter also will be honored July 3 in a formal salute at the Walnut Street Theatre and at a dinner.

Since leaving office Carter has devoted his efforts to mediating in international disputes, acting as neutral observer in Latin American elections, and working as a carpenter for Habitat for Humanity, a non-profit group that has helped build housing for the poor throughout the world.

His Carter Center at Emory University in Atlanta draws international scholars and politicians to discuss conflict resolution, global health, food security and human rights.

''President Carter has shown the world that he is a man of many and diverse roles,'' Meyerson said. ''One day he is a mediator attempting to strike peace between rival factions. The next he may be found discussing human rights issues with a head of state. On another, he may be dealing with the realities of famine, poverty, disease control and other issues

which haunt the Third World countries.''

The Liberty Medal was established in 1988 by the We the People 2000 group, a non-partisan alliance of civic and business leaders. The cash award is underwritten by Bell Atlantic Corp.

Gilbert Wetzel, president of the group, said the medal ''was established to recognize individuals or organizations currently fighting for these same tenets'' of freedom and equality put forth by the nation's founders.

The first recipient of the medal was Solidarity founder Lech Walesa, who received the medal in 1989.

#90127u1329 05/07/1990 ~United Press International
HANOI, VIETNAM (MAY 7) UPI - Vietnam would like to negotiate settlement of sea boundary disputes with Thailand, Malaysia, and Indonesia so that joint exploration of potentially oil-rich undersea areas could go forward, a senior Vietnamese official said. "We will try to get agreements through negotiation," said Dao Duy Chu, the director of the state oil company, Petro-Vietnam.

Recent production-sharing agreements between Thailand and Malaysia and between Indonesia and Australia over disputed sea areas provided possible models for setting differences with Vietnam, said Chu in an interview with United Press International over the weekend. "Any solution must be reasonable and profitable for both sides based on international law," he said.

Chu said there were about 15,000 square miles of overlapping claims with Indonesia and about 1,500 square miles of overlap with Thailand and Malaysia. There are also conflicting claims made by the Philippines, Taiwan, and China.

Much of these areas are believed to have good potential for oil and gas he said. Some are adjacent to areas where gas has been found in the Gulf of Thailand. "I have a good feeling that agreements with Indonesia and Malaysia, and even with Thailand, can be reached soon - not very soon, but soon," he said.

Chu said Vietnam has refrained from awarding exploration contracts in most disputed areas so far. But, he said, exploration of undisputed areas was developing quickly. In addition to a joint venture with the Soviet Union, Vietnam had signed six contracts with oil companies from free-market economy countries and was about to sign four more.

In the next few years, he said, most remaining undisputed exploration blocks would be put up for bidding. So, he said, it was important to work for settlement of the disputes.

Chu, who graduated from Beijing University, said the most difficult negotiations were likely to be with China which claims large stretches of sea and two groups of islands also claimed by Vietnam. "We are trying to ameliorate our relationship with China, but I know the Chinese very well, so I know this will take time," he said.

(MAY 7) UPI - President Wojciech Jaruzelski says he assumed what he termed the ''huge burden'' of imposing martial law on Poland in 1981 to avert a Soviet invasion. A Solidarity newspaper reports today that Jaruzelski claimed in a meeting with Peasant Party legislators that his harsh measures contributed to the stability that made it possible for Mikhail Gorbachev to emerge in the Soviet Union.

The F-B-I will conduct a news conference in Miami today to outline the details of the reported arrest of suspects who allegedly were plotting to assassinate top Colombia government officials. Sources say the suspects are associates of cocaine cartel chief Pablo Escobar . They reportedly were arrested during the weekend for trying to buy weapons illegally. They reportedly were after ''Stinger'' anti-aircraft missiles and one-thousand automatic weapons.

The World Jewish Congress meeting on German soil for the first time in 60 years today will discuss the drive for German unification, European issues and the prosecution of Nazi war criminals. Congress President Edgar Bronfman called on reuniting Germans yesterday to cast off what he termed ''your worst traditions,'' citing ''aggressive nationalism.'' West German Chancellor Helmut Kohl attended yesterday's opening ceremonies for the three-day conference.

Closing arguments will be heard today as the trial of two whites in the Bensonhurst, New York, racial killing nears an end after nearly two weeks of testimony. Joseph Fama is accused of shooting Yusuf Hawkings to death last August after a mob of whites surrounded the black teen-ager and his friends in the predominantly white neighborhood of Brooklyn. Fama and Keith Mondello, the accused ringleader of the white mob, are being tried together but before separate juries.

(MAY 7) UPI - The Labor Department says the productivity of America's work force plunged one percent in the first quarter of the year. It was the worst showing since a one-point-three percent fall in the first quarter of 1989. Productivity measures the relationship between worker output and the labor time involved. Hourly pay declined by three-point-nine percent in the first quarter, when inflation was taken into account.

Authorities are investigating the fourth Amtrak train accident in 13 days. Officials say a Chicago-bound Amtrak train struck and killed a truck driver whose truck was stopped on the tracks yesterday in Brookston,

Indiana. Authorities say 74-year-old William McCoy apparently panicked and tried to run from his truck when he saw the coming train but ''froze'' and was pinned between the train and the truck. Police are NOT sure why McCoy's truck was parked on the track.

Radically revamped Teamsters Union election procedures mean that Detroit attorney James Hoffa apparently won't be eligible to follow in his famous father's footsteps and become president of the powerful union. The rules bar ''licensed professional personnel'' from holding office. Chicago attorney Michael Holland... who was appointed by a federal judge to supervise the election procedure... says the election rules canNOT be changed by the union's membership.

BAALBECK, LEBANON (MAY 7) UPI - A pro-Iranian fundamentalist Shiite Moslem leader Monday advised the captors of 16 Westerners in Lebanon against freeing more hostages until the United States responds to the release of two Americans.

''I call on the captors not to show further gestures of good will because that would be stupid and against the interests of the Moslems and the oppressed,'' Hussein Musawi, chief of the Islamic Amal fundamentalist group, told United Press International at his home in this ancient eastern city.

Iran and Syria have repeatedly urged the United States to respond to the recent release of Robert Polhill, 55, and Frank Reed, 57, by a similar gesture of good will.

The captors have demanded the release of some 400 Lebanese Shiites and Palestinians jailed in Israel, among them a key fundamentalist leader Sheikh Abdel Karim Obeid who was seized by an Israeli commando squad last July in south Lebanon.

The captors, who are believed to be pro-Iranian Moslem radicals, have also demanded the freedom of 16 Shiites convicted of terrorist bombing in Kuwait.

Iran meanwhile wants the United States to release between $8 billion to $9 billion in Iranian assets that Washington froze after Iranians seized hostages from the U.S. Embassy in Tehran in 1979.

Musawi's group is believed linked to the pro-Iranian Hezbollah or Party of God, which is suspected of holding many of the 16 remaining Western hostages. Musawi said the captors should prove to the United States and Israel that the Moslems were capable of confronting them.

''Confrontation is the only way to deter the aggression of the Americans and the Israelis,'' he said.

Commenting on reports Washington was pressuring Israel to free hundreds of Arab prisoners, Musawi said ''such talks are misleading ... it is cheating and maneuvering.''

He charged the United States and Israel of being ''one team that adopts anti-Moslem stands.''

President Bush has encouraged the release of ''all hostages,'' presumably including Obeid and hundreds of Shiite prisoners in Israel. But Israel has recently asserted no party or government has asked it to take such a step.

Sunday, at a news conference in Arlington, Va., family members of hostages urged Israel to make the next move.

Peggy Say, sister of longest-held hostage Terry Anderson, said she personally asked Israel, through its ambassador to the United States, Moshe Arad, to release Obeid and hundreds of Shiite prisoners.

Meanwhile, former hostage Reed, who was released April 30 following 44 months of captivity, that the Bush administration should negotiate with the kidnappers still holding six Americans hostage.

''Let's stop talking about all this geopolitical crap,'' Reed told reporters. ''We have an absolute duty to negotiate and not to throw geopolitical slogans around about anti-terrorism.''

White House spokesman Marlin Fitzwater said Monday President Bush has not decided if he would meet with Reed, who has expressed anger that fellow hostages Terry Anderson, Thomas Sutherland, Brian Keenan and John McCarthy remain captive.

On the whereabouts of the remaining hostages, Musawi, said it was unlikely

all hostages were kept in one place.

''No one can imagine putting all eggs in one basket. It is impossible to put them together from a security point of view,'' the fundamentalist leader said, expressing his belief the captors were different groups.

He was commenting on Reed's statements he was kept with Anderson, Sutherland, Keenan and McCarthy during his captivity.

Musawi accused the British government of following the U.S. stand regarding the process of releasing hostages. Washington has refused to negotiate with the captors to gain the freedom of its citizens.

''If the Britons wanted to talk with the captors, they can do that,'' he said. ''The captors will certainly respond to them.''

But Musawi said: ''The Britons should take a clear and independent position, and prove that they are capable of freeing themselves from the American stand.''

He defended the hostage takers saying ''they are spending tremendous security, moral and psychological efforts.'' He also expressed willingness of all Moslems to end the hostages' plight, saying, ''No Moslem in Lebanon has the intention to hold hostages.''

Reed, of Malden, Mass., Sunday revealed beatings and torment he suffered as a hostage blindfolded almost constantly and chained to a wall or radiator.

The educator said as a result of two escape attempts, he was hit ''perhaps 200 times.'' Reed said he suffered a broken jaw, a broken nose and later, broken ribs, which - he quipped - means he ''doesn't look as nice'' in a bathing suit as he once did.

''During the first part of my punishment, they tried to break my feet with iron reinforcements,'' Reed said. ''I did everything in my power not to cry out. But this kind of treatment - nagging, ragging and bagging - went on and on.''

MIAMI (MAY 7) UPI - Two Colombians linked to the Medellin cocaine cartel face charges of trying to buy Stinger anti-aircraft missiles and automatic weapons as part of a plot to shoot down Colombian government helicopters, the FBI said Monday.

FBI Special Agent William Gavin could not confirm an ABC News report that the weapons were to be used to kill Colombian President Virgilio Barco and his Cabinet.

One suspect was arrested in Miami during the weekend and the other was captured in Tampa. Gavin said at least one other arrest was pending.

The suspect arrested in Miami, Luis Fernando Arcila-Giraldo, 28, claimed to be a close associate of Medellin drug cartel leader Pablo Escobar, Gavin told a news conference.

Arcila-Giraldo was arrested without incident Saturday near Miami International Airport and was scheduled to appear Monday afternoon before a U.S. magistrate.

The second suspect, Alfredo Ramos-Tinoco, was arrested in Tampa Saturday and also was scheduled to appear before a U.S. magistrate there Monday afternoon.

Both men were charged with conspiracy to receive stolen property, conspiracy to export arms without a license and aiding and abetting the importation and possession with intent to distribute marijuana and cocaine.

Gavin said both men had negotiated with undercover agents in Polk County to buy Stinger missiles and automatic weapons.

Last Tuesday, undercover agents showed the two suspects a Stinger missile and the two men later agreed to make a $1 million down payment for an unspecified number of Stingers, Gavin said.

The FBI also seized marijuana and semi-automatic weapons and pistols from a Miami house that both men had visited.

''The missiles were to be exported to Colombia to be used against Colombian government helicopters,'' Gavin said. ''We know of no assassination plot in association with this case.''

Gavin said he had no information on the relationship between Arcila-Giraldo and Escobar, except for the suspect's own comments to undercover agents that he was a ''close associate.''

The FBI began an undercover investigation April 18 after the suspects approached Polk County undercover agents asking to buy the $14,000 Stinger missiles, Gavin said.

''The representation was that the money was to come from the proceeds of marijuana and cocaine sales,'' Gavin said.

U.S. Magistrate Paul Game Jr. of Tampa issued arrest warrants for the suspects after the Tuesday meeting with undercover agents, Gavin said. No money or weapons actually changed hands.

''I think putting the money together might have been the continuing portions of the negotiations,'' Gavin said.

The Stinger is manufactured by contract to the U.S. government and cannot legally be sold accept to the government.

''The Stinger can be used quite effectively as a shoulder weapon from the ground,'' Gavin said.

Earlier this year, four Irish citizens were charged in South Florida with negotiating with undercover agents to buy Stinger missiles for the Irish Republican Army.

Asked why the Colombians came to Miami and Tampa to buy the weapons, Gavin said, ''I guess because they thought they could. People seeking arms such as this will go anywhere to buy them.''

Among the weapons seized at the Miami house where the two men were traced were a Baretta .380 semi-automatic, a Brazilian semi-automatic machine gun with a homemade silencer, a Mac-10 machine gun, two .38-caliber Colt pistols, an AR-15 assault rifle, a .22-caliber hunting rifle and a Berringer handgun.

While Gavin could not confirm reports of the Colombian assassination plan, he said, ''I guess anytime you've got anybody negotiating to buy a Stinger missile and possessing the type of weapons seen here, you're involved in a potentially lethal situation.''

JERUSALEM (MAY 7) UPI - Thousands of Israelis demanding electoral reform demonstrated outside the Parliament Monday as it opened its summer session by commemorating the 45th anniversary of Nazi Germany's defeat.

At the gates of the Israeli Parliament, the Knesset, demonstrators booed

and whistled at members arriving for the special session.

''Everyone is disgusted with what's going on,'' said Roni Lottner, 24. ''They offer jobs. They offer bribes to try to form a government. The system is distorted.''

Nearly two months of intense political bargaining to form a government have disillusioned many Israelis and fueled the reform movement. Because neither Likud nor Labor have a majority in the Knesset, the small religious parties and breakaway members of the two major parties hold the power to determine the makeup of the next government.

More than 2,400 demonstrators calling for direct election of the prime minister and Knesset members gathered in the Rose Garden to rally for electoral reform.

''We've just got to change the system so the majority rules,'' said Akiva Ehrlich. ''Today the system we have allows immorality and bribery.''

Two electoral reform bills were introduced Monday in the Knesset.

Staying away from political declarations, acting Prime Minister Yitzhak Shamir reminded the opening session of the thousands of Jews who gave their lives to create the state of Israel.

''Its independence did not come easily. It was the result of many years of political struggle,'' he said. ''It was born out of generations of work ... and it was achieved by the pure blood of thousands of youths who gave their lives.''

Parliament speaker Dov Shilanksy, who escaped the Holocaust, told the members it was their task to remember those who were killed by the Nazis.

''The steps of all of them (the Jewish victims and fighters) are loud in our ears today in the Parliament of the independent Jewish state that was established in the land of Israel,'' he said. ''They shout, 'We are here, here here. We are here in our homeland.'''

In his address to the Knesset, Foreign Minister Moshe Arens focused on the changes in Eastern Europe that have led to renewal of ties with four countries and the mass immigration of Soviet Jews.

''For dozens of years, the Communist world - almost half the world - was hostile toward Israel and unconditionally supported our enemies,'' he said. ''Today a large part of the world has passed from hostility to friendship.''

Throughout the day, coalition talks continued as Shamir pressed ahead with

his efforts to form a government in the wake of Labor Party leader Shimon Peres' failure to assemble Knesset majority.

On Monday, Peres said he would be willing to join another ''national unity'' government with the right-wing Likud Party if it agreed to proceed with the peace process.

Shamir's refusal to approve a U.S. formula for Palestinian-Israeli talks led to the collapse of the Likud-Labor coalition March 11. Labor then brought down Shamir's government two days later in a vote of no confidence.

#90127u1480 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - NATO Secretary-General Manfred Woerner ruled out the idea of a nuclear-free Germany Monday and said it is highly unlikely that the alliance will unilaterally withdraw short-range nuclear weapons.

''I think it's unanimously accepted by all member nations of this alliance that there should be no denuclearization, neither of Europe nor of Germany. ... It would not be acceptable to our alliance,'' he said.

Woerner, who met with President Bush and Secretary of State James Baker, will travel Tuesday with Defense Secretary Dick Cheney to a NATO Nuclear Planning Group meeting in Canada to discuss alliance strategy in a politically reshaped Europe.

The planning group meeting of defense ministers from the 16-nation alliance will be the first NATO ministerial session since Bush announced last Thursday that the United States is canceling plans to modernize its Lance short-range missile and nuclear-tipped artillery in Europe.

Discussions on the military and political changes NATO should make in response to fragmentation of the Soviet bloc are aimed toward a head-of-state summit in London in early July, Woerner said during a breakfast session with reporters.

Several of the same leaders are already scheduled to meet July 9-11 at an economic summit in Houston.

Following his meeting with Bush and Baker, Woerner said NATO has reached ''an important if not decisive phase of its history,'' and added, ''We are looking at this alliance not as an instrument of confrontation but as an element of cooperation in a new security structure.''

Woerner, during the meeting with reporters, said, ''Whatever change we will make in our strategy, one thing is sure: It will remain a combination of conventional and nuclear weapons,'' although ''it has to be decided

what kind of nuclear weapons.''

In addition to reaffirming Bush's initiative on short-range nuclear weapons, the planning group will direct Supreme Allied Commander Gen. John Galvin to conduct a ''thorough review'' of the nuclear stockpile and to estimate the ''minimum deterrence'' necessary and the kinds of weapons needed,'' he said.

''We cannnot and will not renounce nuclear weapons as such,'' Woerner said. ''We want to have a minimum level, if possible agreed with the Soviets. But we cannot renounce.''

In light of Bush's announcement, Woerner was asked if NATO would unilaterally reduce the number of short-range nuclear weapons, since they can only strike Eastern European countries now considered friendly to the West.

''I don't think it's highly likely, but I would not exclude it,'' he said. ''I think that is not likely to happen.''

The NATO summit in July will set the objectives for short-range arms control talks, Woerner said, dismissing speculation the alliance will offer to remove all nuclear weapons from Germany if the Soviets agree to allow the unified country be a NATO member.

''Our goal is clear. We do not want to denuclearize Germany,'' Woerner said. ''You would retain a necessary nuclear presence on the soil of what is now the Federal Republic of Germany. We think that nuclear-free zones do not increase but weaken security.''

After his White House meeting, Woerner predicted the Soviets will conclude that a unified Germany in NATO ''is not only an element of security, but gives them reliable partners - partners in security, partners for political and economic cooperation.''

Earlier, Woerner had said ''there is no danger of a military attack of the Soviet Union on NATO now or in the forseeable future'' with President Mikhail Gorbachev in charge, but the greatest threat is Soviet ''instability combined with a capability.''

Woerner refused to drawn into a discussion about U.S. intentions to replace short-range nuclear weapons in Europe with a new, more powerful air-launched Tactical Short-Range Missile, or TASM.

''It will be up to the review to determine what kind of nuclear weapons you want finally to keep,'' he said.

Woerner added, however, that he did not ''forsee an anguishing round'' of

debate among NATO members about deployment of TASM.

''If you are against denuclearization, you are in favor of some nuclear weapons deployed on your own soil. That's the consequences,'' he said.

#90127u1495 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - The Help-Wanted Advertising Index registered a slight decline in March but signaled an end to the downtrend in the nation's employment, the Conference Board said in a report for release Tuesday.

The seasonally adjusted index, set at 100 in 1967, stood at 139 in March, slightly below a reading of 140 in February, according to the independent organization which conducts economic surveys worldwide.

''Although labor demand was softer in March than three months earlier, it is no longer declining,'' said Ken Goldstein, an economist with the Conference Board.

The Conference Board surveys help-wanted advertising volume in 51 major newspapers across the country every month. The board said 49 percent of the newspapers surveyed showed an increase in the volume of help-wanted ads, up sharply from 22 percent in February.

The March index of 139 was sharply lower than a reading of 151 a year ago, and advertising volume registered declines in five of the nine regions defined by the Conference Board.

The index was up for the Middle Atlantic region, boosted by a strong progression in Rochester, N.Y., and despite a decline in New York City. The index was also up in the East North Central region, where the volume of help-wanted ads rose in Chicago and Cincinnati, and in the East South Central region, where two Tennessee cities, Memphis and Nashville, showed higher demand.

Employers' demand was unchanged in the Pacific region where the index was down in Los Angeles but up in San Francisco, Seattle and Sacramento.

The index showed a decline in New England where labor demand dropped in the three major markets; West North Central with a depressed situation in Kansas City, Mo.; South Atlantic, despite an increase in Baltimore; West South Central; and Mountain, despite an increase in Phoenix, Ariz.

''Regionally, the good news is that some of the hardest hit areas continue to show improvement, although at an anxiety-inducing slow pace,'' Goldstein said.

The Bureau of Labor Statistics recently reported that the unemployment rate in the United States stood at 5.2 percent in March, down from 5.3 percent in both January and February.

#90127u1504 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - Ocumed Inc., Dansol Division, of Sarasota, Fla., has recalled a non-prescription eye wash found contaminated with bacteria that could cause serious vision damage, it was announced Monday.

About 2,800 4-ounce plastic bottles of the eye wash have been distributed nationwide with the ''Rugby'' brand name, officials said.

The bottles have the lot number N4189 stamped on the bottom and are labeled as being manufactured for Rugby Laboratories Inc., of Rockville Centre, N.Y., officials said.

Tests by the company and the Food and Drug Administration found samples of the eye wash contained pseudomonas cepacia, an organism that could cause an infection that could lead to ''a potential for loss of vision'' in people whose eyes are scratched or damaged, a company statement said.

However, no injuries have been reported involving the eye wash, according to the statement, which was distributed by the FDA.

Anyone who has a bottle of the eye wash should return it to the place of purchase, the statement said.

More information can be obtained by calling Ocumed at 1-800-288-3179.

#90127u1517 05/07/1990 ~United Press International

HOUSTON (MAY 7) UPI - LJ Hooker Corp. Inc. has reached an agreement to sell for $4.5 million its Sakowitz specialty stores to Sakowitz Acquisition Partners Inc., a privately held investor group formed specifically to acquire the retailer.

Sakowitz also announced that it has filed papers in U.S. Bankruptcy Court consenting to a petition filed earlier by its minority shareholders seeking to place the retailer into involuntary Chapter 11 bankruptcy, the investor group said Monday.

The filing by Sakowitz will convert the case to a voluntary Chapter 11 with Sakowitz as the debtor in possession.

If a sale is approved by the court, Sakowitz Acquitision Partners will acquire either 100 percent of the stock of Sakowitz Inc., or its assets, and assume some of its liabilities. Hooker owns 80 percent of Sakowitz with minority shareholders owning the remaining 20 percent.

Sakowitz owns six stores in Texas, including four in Houston, and one in Dallas, and one in Cincinnati.

Under the sale agreement, Sakowitz Acquisition Partners will have until May 10 to post a letter of credit to confirm its ability to finance the transaction. Hook said it will move to liquidate Sakowitz if that deadline is missed. Should that occur, Hooker would continue to operate the Cincinnati store to maximize the value of the Hooker-owned mall in which the store is located.

Hooker and many of its subsidiaries filed for Chapter 11 protection in August 1989.

#90127u1523 05/07/1990 ~United Press International

COPENHAGEN, DENMARK (MAY 7) UPI - Denmark's national symbol, The Little Mermaid, has been vandalized by someone who tried to sever the bronze statue's head using a metal cutter, police said Monday.

''Whoever did it seems to have been frightened off in the middle of the job. A 7-inch slice is missing from the left-hand side of the neck,'' Copenhagen police inspector Jens Christensen said.

Damage to the Little Mermaid is always handled by the Copenhagen homicide squad. The famous statue was created by Danish sculptor Erik Eriksen in 1914 in honor of the fairy tale of the same name by Danish storyteller Hans Christian Andersen.

Christensen said the cut was discovered Monday by a Danish man who passed by the small statue, which perches atop a rock overlooking Copenhagen harbor.

Thousands of tourists flock to the harbor each year to view the melancholy mermaid, who spies across the choppy waters of the open harbor.

Christensen said police had no indication as to who had vandalized the statue or why.

It was the third time the Little Mermaid has been cut. In 1964, her head was removed and a new one had to be cast. In the early 1980s, her arm was severed but found and welded on again.

WASHINGTON (MAY 7) UPI - A White House spokesman expressed sympathy Monday for the ''torturous and brutal ordeal'' suffered by former hostage Frank Reed but strongly reaffirmed U.S. policy of not negotiating with kidnappers.

White House spokesman Marlin Fitzwater called for the ''unconditional release'' of all remaining hostages held in the Middle East and warned Iran and Syria that there can be no improvement in relations with the United States until they are free.

Fitzwater also told reporters there is a ''good possibility'' that President Bush will meet with Reed, who was released by his Hezbollah captors in Lebanon a week ago, ''when he's ready. But nothing has been worked out.''

At a news conference Sunday, Reed, 57, of Malden, Mass., who is undergoing an examination at the Andrews Air Force Base Hospital, called for negotiations to win release of six remaining American hostages in Lebanon.

''Let's stop talking about all this geopolitical crap,'' said Reed, whose anger appeared to give strength to his weakened body. ''We have an absolute duty to negotiate and not to throw geopolitical slogans around about anti-terrorism.''

His views are contrary to the Reagan-Bush policies on hostage taking over the past several years. Earlier Monday, Fitzwater indicated that Bush might not meet with Reed.

When asked to respond to Reed's call for a ''more active role'' by the United States in securing freedom for the American hostages, Fitzwater read a prepared statement:

''He (Reed) obviously has been through a torturous and brutal ordeal. It reminds us once again how barbaric it is to be kidnapped off the street, and being held as a private citizen for political ransom.

''But it also reminds us why there can be no deals for hostages. Terrorists cannot be rewarded for blows they strike at Frank Reed's body.

''Nor can they believe that taking more hostages will yield negotiations and political benefit. We once again called for the unconditional release of all hostages. There can be no improvement in our relations with terrorist countries until our hostages are released.''

Fitzwater said Bush ''has indicated he's willing to talk to him (Reed) at

any point and I would expect that as a good possibility. Nothing is worked out yet, and certainly the president is available to talk to Mr. Reed when he's ready.''

Although Reed's views run counter to administration policy, the White House spokesman said ''I think it's fairly reasonable for anyone to understand the frustration and anger that Mr. Reed feels about his captivity. He described yesterday the brutality ... I think it speaks for itself in terms of his mindset.

''Our policy of not making deals with hostages is based on terms he described,'' Fitzwater said. ''We cannot let terrorists steal American citizens and beat them and then just steal more and more.''

Since his release, Reed has spoken publicly about his surprise and anger that fellow hostages Terry Anderson, Thomas Sutherland, Brian Keenan and John McCarthy are still being held.

Iran has called for the release of 400 Lebanese Shiite prisoners taken by the Israeli army in Southern Lebanon and for the freeing of Moslem fundamentalist cleric Sheik Abdul Karim Obeid seized last year.

#90127u1614 05/07/1990 ~United Press International

(MAY 7) UPI - White House spokesman Marlin Fitzwater says President Bush may NOT visit with released American hostage Frank Reed. Fitzwater said Bush ''hasn't decided'' yet whether to meet with Reed, as he did with Robert Polhill, the other recently released American hostage. Reed has urged the Bush administration to negotiate with the kidnappers holding six Americans hostage.

A prison board in Brussels, Belgium, today recommended the release of a man who is a key figure in negotiations for the release of four Belgians held hostage in the Middle East. The Palestinian being held in Belgium is serving a life sentence for a 1980 hand-grenade attack on a group of Jewish schoolchildren in Antwerp.

The Washington Post quotes Army General Colin Powell, chairman of the Joint Chiefs of Staff, as saying he wants a complete review of the military. Powell reportedly said that such a review could be used to re-structure a U-S military force to roughly three-quarters its current size within four to five years.

Authorities say a royal jet carrying Princess Diana made an emergency landing in London today after an electrical problem occurred just after takeoff from Heathrow Airport on a trip to Hungary. The plane landed safely, and the princess and her party of about 20 remained aboard while

engineers fixed the problem.

BOGOTA, COLOMBIA (MAY 7) UPI - Army raiding parties seized a major drug traffickers' complex in the Amazon jungle and a nearby airfield and confiscated more than 14 tons of cocaine, potentially worth more than $1 billion, authorities said Monday.

The ''Operation Autumn'' seizure, the largest in Colombia, was the result of two coordinated raids in the Amazon River basin, a vast area of dense jungle permeated with cocaine laboratories and clandestine airstrips used to fly cocaine to the United States and other locations.

Much of the cocaine, packed in plastic, reportedly appeared to be ready for shipment to the United States. The newspaper El Espectador reported that a plane confiscated in Friday's raids appeared to be ready to fly to the United States and that charts were seized showing various routes into U.S. airspace.

The 28,635 pounds seized could be worth between $455 million and $1.62 billion in U.S. street level sales, according to a December 1989 Drug Enforcement Administration survey. The survey showed street prices ranged from $35 to $125 a gram.

Near La Tunia in the state of Meta, some 200 miles south of Bogota, the army raided an area where cocaine was gathered from various laboratories and stored for shipment in large quantities, said Gen. Humberto Correa, commander of the 4th Division.

''With what I could see on arriving at the location, this was the narcotics trafficking nerve center for the southern region of the country '' Correa said. ''One of the landing strips was 2,400 meters 7,875 feet long and was operating 24 hours a day.''

Officials said 17 people were arrested and two people killed when soldiers raided the cocaine cache. Uncovered were 26,450 pounds of cocaine in storage, authorities said.

At a clandestine airstrip 30 miles away in the state of Caqueta, 220 miles south of Bogota and near Candilejas, soldiers found 2,185 pounds of cocaine and also flight plans and a Cessna airplane.

Officials first reported 12 tons were seized in the two raids, but later raised the number to 14 tons.

A Defense Ministry spokesman said Monday that ''Operation Autumn'' had

turned up other possible transportation sites and that the raids would continue as long as the commanding officer decided they were effective.

The seizures were the largest in Colombia, bettering the 13 tons seized on Mar. 9, 1984, in a raid on a huge industrial complex complex in Meta where cocaine was being processed.

On Sept. 28, 1989, police and drug agents seized 21.4 tons of cocaine stored in a Los Angeles-area warehouse, the largest cache of narcotics ever found in a single location.

A top Colombian police official also denied a report in the New York newspaper Newsday that said U.S. military forces from Panama were involved in the Dec. 15, 1989, operation in which Medellin Cartel kingpin Jose Rodgriguez Gacha was killed.

Newsday reported Friday that a U.S. Special Operations team planned and carried out the operation with the Elite Forces of the Colombian National Police.

''That is totally false,'' said Gen. Octavio Vargas Silva, police director of operations. ''In this operation, only and exclusively personnel of the National Police participated, in the intelligence part and in the operational part.''

#90127u1646 05/07/1990 ~United Press International

(MAY 7) UPI - Flood waters surged down the Arkansas River Monday, forcing at least 200 people to flee their homes and causing millions of dollars in damages to roads, bridges and buildings in what may be the worst flooding in Arkansas in 63 years.

''I have never, ever seen in my life so much water,'' said Gary Talley of the Arkansas Office of Emergency Services.

In North Little Rock, Ark., about 100 residents left their homes during the weekend. Although the river is not expected to reach its peak until Wednesday in Pine Bluff, Ark., about 40 miles downstream, 160 homes on low-lying areas already were flooded by Monday - some with as much as 5 feet of water.

''It's more than we anticipated,'' Talley said.

The National Guard and U.S. Marine reserve units teamed up with residents to build dikes in the area.

At least 100 people were forced to leave their homes in Pine Bluff.

Louis Lea of Toad Suck, Ark., said water moccasins were swimming in what used to be his back yard. He and his 70-year-old mother frantically removed furnishings from his mobile home 25 miles north of Little Rock.

''I've lost so much stuff already it's pitiful,'' Lea said.

High waters also rose in Texas and Oklahoma and flooding was reported in low-lying areas.

Elsewhere in the country, the National Weather Service said California began cooling off Monday after a weekend of record-breaking heat. The East Coast was generally seasonal and pleasant.

In Arkansas, no deaths or serious injuries were reported but officials said by the time it is over, they expect it to be the worst flooding in 63 years.

''All indications this is going to be worse than the 1973 flood in terms of height, but in terms of damage, we're doing a lot better because there was a lot of preparation that took place between '73 and now,'' North Little Rock Mayor Patrick Henry Hays said.

State officials said flood damage to roads, bridges and homes in the western part of the state would exceed $7 million. Governor Bill Clinton declared 27 counties disaster areas.

Forecasters said the Arkansas River will crest 5 feet above flood stage in the Little Rock area Tuesday. It will crest 1 foot above flood state at Pine Bluff on Wednesday.

Barge traffic on the Arkansas River stood at a standstill because navigation markers and locks were under water. The Arkansas normally is navigable from the mouth of the Mississippi River through Arkansas to near Tulsa, Okla.

''We have locks under water in the Little Rock district, so no traffic can get through,'' said U.S. Coast Guard spokeswoman Rita Atkinson.

Flooding was also reported in Oklahoma at the point where the Kiamichi River flows into the Red, and ranchers were being told to move to higher ground with their livestock.

''There's been tremendous flooding on the Kiamichi,'' with loss of livestock and property, said Chris Cochran at the Corps of Engineers facility at Hugo, Okla.

In Madill, Okla., Marshall County Civil Defense Director John Martin

estimated Lake Texoma flooding will cost $5 million to $6 million in lost business alone - about half the normal revenue - in Oklahoma's least populous county.

Torrential rainfall in north central Texas last week will reach southeast Texas by Thursday or Friday, said John Jadrosich of the Trinity River Authority in Arlington.

''If Lake Livingston, which contains 1,750,000 acre feet of water, was completely dry right now, that lake would fill up and we would still flood people with the water we anticipate receiving,'' Jadrosich said.

''It's a tremendous volume of water that's coming ... this is a very large flood. Without question there will be flooding, and there isn't a darn thing we can do to stop it.''

Liberty County authorities estimated up to 7,000 residents may be affected by the impending floods.

#90127u1659 05/07/1990 ~United Press International

BUDAPEST, HUNGARY (MAY 7) UPI - Britain's Prince Charles and Princess Diana arrived in Hungary Monday on a historic trip that got off to a shaky start when the royal jet carrying the princess made an emergency landing just after takeoff from London.

An unspecified electrical fault was detected shortly after the BAE 146 aircraft took off from Heathrow Airport with Princess Diana and her entourage of 20 people aboard.

The Royal Air Force pilot immediately diverted the flight to London's Gatwick Airport, where authorities deployed three fire trucks equipped with foam and a ''rapid intervention'' vehicle as a precaution during the safe landing. The 28-year-old princess and her entourage stayed aboard the aircraft while the problem was fixed.

''It was a very minor fault,'' a senior manager at Gatwick manager said. ''When the aircraft landed they knew they would be off in about one hour. Perhaps where they were going, the technical services would not be the same as in the United Kingdom, so they wanted everything to be perfect.''

Prince Charles, who was in Italy to open his first exhibition of watercolor paintings, joined the entourage before its arrival in Budapest for a four-day visit.

The trip, the first by Britain's royal House of Windsor to a Warsaw Pact country, was viewed as a gesture of good will following Hungary's return

last month to multi-party parliamentary democracy.

When the royal couple arrived, 45 minutes late, at Budapest Airport, the prince and princess of Wales were greeted by acting President Arpad Goncz and a host of dignitaries.

Afterward, the couple placed a wreath at the tomb of Hungary's unknown soldier in Hero's Square and met briefly with Prime Minister-designate Jozsef Antall as well as outgoing Prime Minister Miklos Nemeth.

They were to stay in the government's quietly elegant guest house in the wooded Buda Hills, along with an entourage that includes secretaries, a doctor, hairdressers, butlers and chambermaids.

The royal couple are the highest-ranking foreign officials to visit Hungary since the last month's parliamentary elections, the first multi-party balloting in Hungary in more than 40 years.

Even after four decades of communism, many Hungarians remain unabashed royalists, proud as a nation to have contributed Hungarian blood to the British royal family five generations ago. Queen Elizabeth II's great-great-grandmonther was Countess Redey of Hungary.

The last visit by a prince of Wales to Hungary took place in 1935, a year before his accession to the throne as Edward VIII and 22 months before his abdication due to his affair with the American divorcee Wally Simpson.

Prince Edward was accompanied on that visit by his future wife, and the tabloids at the time reported that the couple took a liking to Hungary's strong apricot liqueur and gypsy music.

The visit by the current heir to the British throne is expected to carry a more somber tone. His itinerary features a lecture at the University of Economics and visits to museums, historic buildings and Budapest's Vigszinhaz Theater for a Hungarian production of Shakespeare's ''King Lear.''

WASHINGTON (MAY 7) UPI - Flanked by Asian American brains, brawn and a beauty queen, President Bush signed a proclamation Monday declaring May as the nation's first Asian-Pacific American Heritage Month.

Citing accomplishments by Asian and Pacific Americans in all fields, Bush said, ''These 7 million Americans show us an example of how strong families can instill an abiding respect for the law, tenacity in the endeavor of life and work, and, most of all, excellence in education.''

Bush was joined at the Rose Garden ceremony by about 300 Asian and Pacific Americans, including several highly accomplished in their fields.

Among them: Taylor Wang, a research director at Vanderbilt University; Samuel Lee, winner of gold medals in platform diving at the 1948 and 1952 Olympics, and Virginia Cha, 1989 Miss Maryland and Miss America first runnerup.

In his proclamation, Bush said: ''The history of Asian and Pacific Americans ... is a long and honorable one. Determined to uphold America's promise of freedom and opportunity for all, generations of Asian and Pacific Americans have helped this nation to grow and prosper.''

The president also said in his remarks that his administration, while promoting democratic reforms in Eastern Europe, is doing the same in the Pacific and Asia.

Bush, who has admitted disappointment at Beijing's hard-line crackdown against a budding democracy movement in China, said, ''We advocate peaceful change. ... We will remain in solidarity with the aspirations of the people of these many lands.''

He said, ''That is why America must stand for more than mere material success. America must remain the beacon of liberty, a light of hope for the troubled, the oppressed, the downtrodden.''

(MAY 7) UPI - The rain-swollen Arkansas River is more than five feet above flood stage and threatening hundreds of homes and forcing evacuations near Little Rock. State emergency services officials say the city of Little Rock is pretty well prepared because it's on the high ground side of the river. But they say North Little Rock isn't so lucky.

South Korean President Roh Tae-woo said today that he will try to restore stability to his nation by the end of the year. In a 13-minute broadcast address, Roh said South Korea paid a high price during the past three years to usher in democracy and consolidate a new order, but he conceded that problems continue.

Talks resumed today between the United States and Greece on the future of U-S military bases on Greek soil. The talks reconvened a day after Libyan leader Moammar Gadhafi revealed that he came close to bombing two U-S military bases on the island of Crete after U-S jets attacked Libya in 1986.

White House aides say President Bush will hold most of his summit meetings with Soviet President Gorbachev in Washington, D-C. However, at least one overnight stay at Camp David is being planned. Initial plans for more frills during the five-day summit beginning May 30th were abandoned after Gorbachev let it be known that he wants it to be strictly business.

#90127u1701 05/07/1990 ~United Press International

DALLAS (MAY 7) UPI - The chairman of Greyhound Lines Inc., sounding confident about the future of his company despite big losses in the midst of a prolonged drivers' strike, said Monday the bus line will be back to almost full service by the middle of June.

Speaking at a news conference, Fred Currey said that the strike is effectively over and that the company is operating its full national network and serving cities and towns that provided 98 percent of its revenue last year. He said new schedules on those routes will be added twice in the next five weeks.

"By June 19, we will have the same frequency of service on all major routes we did last year," Currey said in a statement. "From a driver's point of view, the strike is over, or at least it is irrelevant," he said.

Currey's comments came after parent GLI Holding Co. last week reported a loss of $55.7 million on revenues of $172.5 million in the first quarter. In the same period last year, the company's loss was $14.4 million on revenues of $223.5 million.

The company did not make a lease payment of about $5 million due April 30

on its properties and said it would not make a May 15 interest payment of $9.7 million on debt. Savings would be available for operations, Currey said.

Repeating several times that the company is no longer "driver-oriented" or "driver-inhibited," Currey said: "For the customers, passengers and the 9,000 employees, the labor interruption is over."

But in New York, Standard & Poor's Corp. said it lowered the rating on Greyhound's $150 million of senior notes to CCC from B- and suggested that a filing for protection from creditors under Chapter 11 of the federal bankruptcy code should be considered since this "would defer over $50 million of annual interest expense, improving the company's chances of reorganizing."

S&P further said the notes remained on CreditWatch with negative implications, meaning a downgrading to D on the debt would happen if the company defaults on the May 15 payment.

Responding to questions about the company's financial restructuring and the possibility of a bankruptcy filing, Currey said that those who had provided capital to the company were not surprised by the latest financial disclosure and that they continue to cooperate with the company.

He gave no details of how the company plans to restructure. "It is in the interest of passengers, customers and capital providers to get the system up and running," he said. "We are confident of our ability to balance those constituents."

The company is launching a radio advertisement campaign aimed at increasing passenger traffic, which must reach 85 to 90 percent to avoid bankruptcy, Currey said.

Currey held out little hope that a majority of the striking drivers would be able to return to work after the strike is settled. He said so far some 500 of the 6,000 drivers had returned.

He said the company has determined it can operate more efficiently with about 4,200 drivers and 20 percent fewer buses. In 1987, Greyhound had a fleet of 3,700 buses.

During the weekend, Greyhound presented a new economic package to the striking drivers that the Amalgamanted Council of Greyhound Local Unions said was worse than the one offered prior to the strike. Union leaders said the new package would amount to a four-year wage freeze and the elimination of thousands of jobs.

About 9,300 Greyhound drivers and other employees went on strike March 2.

The walkout has been marked by violence, though no serious incidents were reported in recent days.

#90127u1714 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - A leading group in the fight against AIDS Monday joined a boycott by more than 50 other health organizations worldwide of an upcoming international AIDS conference in San Francisco.

Jeffrey Braff, executive director of Gay Men's Health Crisis, said the action represented a ''last-ditch effort'' to force the United States to change a regulation barring entry to people infected by the virus that causes the disease.

Braff, whose non-profit group is the oldest and largest AIDS service group in the country, said there was no medical justification for the law, sponsored by conservative Sen. Jesse Helms, a North Carolina Republican.

''Walls cannot protect us from AIDS,'' he said, echoing a slogan used in full-page advertisements placed by his group calling for repeal of the law. ''Only knowledge can.''

The conference, held last year in Montreal, is regarded as the premiere scientific meeting on AIDS worldwide. About 12,000 people attended last year's conference and organizers had expected about 16,000 to attend the San Francisco event before the boycott began.

Braff called the 1987 U.S. law ''absurd'' and ''stupid,'' and said the United States was one of a handful of countries, including Iraq, Iran, and South Africa, with such a regulation on the books.

''It's really our last-ditch effort to convince the administration we must do something,'' he said. ''Frankly we have been trying all along ... to try and get this absurd law changed, this absurd regulation lifted. Nothing else works, nothing else has worked.''

Other organizations boycotting the Sixth International Conference on AIDS, scheduled for June in San Francisco, include the League of Red Cross and Red Crescent Societies, the International Planned Parenthood Federation and the National Association of People with AIDS.

The American Foundation for AIDS Research, a co-sponsor of the conference, has also condemmed the law, and said in a statement released Monday that as many as one-fourth of potential registrants may decide not to attend because of the immigration law.

Braff, joined at the news conference by Mike Merdian, executive director

of the National Association of People With AIDS, and Richard Burzynski, executive director of the Canadian AIDS Society, said the boycott was aimed at the travel restrictions, not the conference itself.

Merdian said conference organizers planned to telecast the events to seven countries around the world.

''We have encouraged the opportunity for the information to be exchanged '' he said. ''However we wanted to effectively raise public consciousness around the issue of U.S. immigration policy.''

The 1987 law added HIV, the virus that causes AIDS, to the list of disease that automatically bar visitors from coming to the United States.

Travelers who admit they are infected with HIV may apply for 30-day immigration waivers, and can also, without admitting they are infected, apply for a 10-day waiver to attend ''approved conferences.''

Braff denounced the 10-day waiver as a ''half-measure,'' saying the exceptions ''only underscore the irrationality of the law.''

A proposed law sponsored by Georgia Democrat Rep. Roy Rowland would allow the secretary of Health and Human Services to draw up a new list of dangerous contagious diseases.

''The president's Committee on AIDS, the Center for Disease Control, both have said how stupid this law is,'' he said. ''Basically what has happened in this country is that a public health issue has become a political issue.''

''What the Rowland bill tries to do is to take this political issue and make it what it should be, a public health issue again.''

#90127u1720 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - U.S. and Soviet teams are meeting in Washington to make formal plans for the May 30-June 3 summit between President Bush and Mikhail Gorbachev, White House aides said Monday.

White House press secretary Marlin Fitzwater said the teams already have checked out the White House, where most of the meetings will be held, and Andrews Air Force Base, where the Soviet president is to arrive.

Aides said Bush is expected to invite Gorbachev for an overnight stay in the relaxed setting of Camp David on Saturday, June 2, the eve of the Kremlin leader's departure.

President Eisenhower, who named the presidential hideaway for his grandson entertained Soviet Premier Nikita Khrushchev at the Maryland mountain retreat in 1959 and President Nixon met with Soviet leader Leonid Brezhnev there in 1973.

The first full session between the teams was held Monday, Fitzwater said, although U.S. Chief of Protocol Ambassador Joseph Reed met with Soviet Ambassador Yuri Dubinin last Thursday at Blair House, the president's guest house, to open the planning discussions.

Fitzwater said a 12-member Soviet advance team, headed by P.F. Lyadov of the Soviet Foreign Ministry, arrived last Thursday and met with representatives of the State Department and the National Security Council. They surveyed the White House and Andrews Air Force Base on Friday.

Aides said Raisa Gorbachev will accompany her husband to Washington. Among the events being planned for her by first lady Barbara Bush is a trip to Williamsburg, Va., which has been restored as an example of Colonial culture.

Under current plans, the formal welcome for Gorbachev and a state dinner in his honor will be held May 30.

Both Bush and Gorbachev are expected to provide public summations of the meetings, perhaps with a joint news conference, as they did at the conclusion of their first summit last December on Malta.

Despite difficulties, including the Soviet economic embargo against Lithuania, it is likely the leaders will sign some agreements, ranging from mere window dressing to a trade accord and possibly a ''framework'' agreement on reducing strategic nuclear missiles.

The Gorbachev meeting will open a whirl of diplomacy for Bush, who is already scheduled to host an economic summit in Houston July 9-11 and plans to attend an early July NATO summit in London.

Fitzwater said no definite date has been set for the 16-nation NATO summit expected to last about two days.

#90127u1731 05/07/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 7) UPI - Space agency managers, flight controllers and NASA's launch team geared up Monday for a shuttle disaster simulation Tuesday, an unprecedented drill to test internal communications and contingency planning.

William Lenoir, NASA's associate administrator for space flight, ordered

the test to ''exercise the management response to severe (loss of vehicle/loss of crew) contingencies,'' according to a letter ordering the drill. Two more such disaster simulations are planned before the end of the summer.

With NASA Administrator Richard Truly and other top agency officials on hand at the Kennedy Space Center, engineers planned to work through a mock countown and launch starting at 3 p.m. EDT Tuesday.

At some point during the imaginary shuttle's climb to orbit, a major failure was scheduled to occur, although the nature of the mock malfunction was kept secret to add realism to the simulation.

One likely scenario would involve simulating the premature shutdown of one or more main engines, setting up a ''return-to-launch-site'' abort, or a crew bail-out over the Atlantic Ocean.

In an ''RTLS'' abort, which astronauts routinely practice in computer-controlled simulators, a shuttle crew would attempt an emergency return to the Kennedy Space Center's 3-mile-long shuttle runway. In a bail-out scenario, the shuttle would crash land in the Atlantic.

One bit of realism absent from the test Tuesday involved the news media. Keeping the exercise a strictly-internal affair, reporters were not allowed to listen in on the test as it happened.

As one official put it, ''We don't want to do our own imitation of 'War of the Worlds' and have somebody who doesn't know what's happening'' believe the mock crisis is real.

The simulation was timed to coincide with the first day of a flight readiness review for the shuttle Columbia's May 17 launch on a nine-day Spacelab astronomy mission. As such, top-level managers and planners already were scheduled to be on the scene at the Florida shuttleport.

The test Tuesday marked the first such disaster simulation in the post-Challenger era to involve so many top-level NASA managers. Future preparedness drills will involve a ''contingency'' in orbit and problems during re-entry and landing.

Lenoir ordered the tests ''to exercise shuttle management to make sure that the entire team knows what they're supposed to do in the event of a contingency,'' said an agency spokesman.

''There are three simulations scheduled. One involving a launch contingency, one on orbit and one landing, that will be conducted between now and probably September,'' he said.

For the test Monday, a mock countdown was scheduled to begin at the T-minus nine-minute mark with engineers on station at the launch control center in Florida and in mission control at the Johnson Space Center in Houston.

''Somewhere before orbit insertion, you're going to have some kind of contingency take place,'' the spokesman said. ''There are people within the shuttle team who have to notify outside sources. I think someone has to notify people at the State Department, obviously the White House would have to be notified, things like that.''

In the wake of the Challenger disaster four years ago, NASA management did not announce that the crew had been lost until nearly five hours after the shuttle disintegrated 73 seconds after liftoff Jan. 28, 1986.

Officials said later that agency managers did not follow a contingency plan that was in place for just such emergencies.

WASHINGTON (MAY 7) UPI - First lady Barbara Bush revealed Monday she may have gone into nursing had she not married George Bush and raised a family.

Mrs. Bush made the remarks at a luncheon she gave to celebrate National Nursing Day before departing for Costa Rica as head of the U.S. delegation attending the inauguration of President-elect Rafael Calderon.

The first lady told the gathering - which included representatives of nursing associations, nursing magazines and five nurses who also are wives of congressmen - that they are among the ''most important guests'' who have ever been invited to the White House.

''I'm your greatest fan,'' she said.

''I always thought if I hadn't married George Bush - terrible thought - the second best thing is to be a nurse,'' she confided to loud applause from her smiling audience.

''I stand in awe of nurses,'' she said, and recalled an incident in 1967 when a computer mixup resulted in her invitation to a White House luncheon hosted by Lady Bird Johnson, for women ''doers'' in the nursing profession.

Mrs. Bush said that in the past she had volunteered to work two days a week at the Sloan Kettering Hospital in New York where the Bush's 4-year-old daughter, Robin, was treated for leukemia before she died.

#90127u1746 05/07/1990 ~United Press International
GOLDSBORO, NC (MAY 7) UPI - If you like George Burns, you may love Dr. Henry Merritt Stenhouse, age 100, who wants to be the next congressman from the Third District of North Carolina.

The centenarian takes his first tough step toward that goal Tuesday in a Republican primary battle against two other candidates whose combined ages do not total his 100 years.

Unlike Burns, Stenhouse doesn't smoke cigars, nor is he a standup comedian. But he does have his Gracie - Mary Cleaves Stenhouse, his ''magnificent'' wife of 64 years, who died in 1983.

He met her in 1918, when he was a young Navy medical officer and she a beautiful Goldsboro girl who had been chosen to christen the USS Clemson at the shipyards in Newport News, Va.

He still has a picture of her taken on that day, showing her clutching an armful of flowers as she prepares to crash a bottle of champagne across the bow. He has also written a book about her titled ''My Mary Cleaves, A Navy Wife.''

Sitting in a blue overstuffed chair in the study of his historic nine-room home in what has become a commercial section of Goldsboro, Stenhouse wanders happily between the past and present.

''See that brick house next door? That was the great house of my wife's family plantation,'' he says. ''The plantation stretched from here to Smithfield (a distance of about 24 miles). The federal troops took it over during the Civil War when they came to town.''

But even while he reminisces, he quickly returns to the business at hand.

''I think I have a mission to fulfill in this election,'' he says. ''Otherwise why would God have kept me here this long?''

''I want to help the children, and I want to help you. I pray every day for you and for all men. I pray to the Blessed Virgin and ask her to pray for the children of this country.''

Stenhouse believes the basic building block of the nation - the family unit - has crumbled.

''We have a million young women a year giving birth out of wedlock, and we're paying them to do it, we're paying people to breed,'' he says. ''No damn morals! How did we get in such shape?''

''Welfare,'' he contends, ''is a task for the churches. The federal government should get out of it. We can't do it overnight, but we should phase it out,'' he says.

His two opponents Tuesday are William Kenneth Brosman, 39, a service technician with Rand Oil Co., and Don Davis, 60, a retired Army officer.

Neither has made an issue of Stenhouse's age, but privately some of their supporters fear many voters may find it amusing to indulge a 100-year-old man in his political dreams.

The winner of the Republican nomination will challenge incumbent Rep. H. Martin Lancaster, a Goldsboro Democrat, this fall. Stenhouse says Lancaster ''hasn't a chance.''

''He greased the skids for his own defeat when he and the other congressmen voted themselves pay raises,'' Stenhouse says. ''If I get the pay raise, I'll give it back to the federal government to help reduce our national debt.''

Although slightly stooped, Stenhouse is active of mind and body and doesn't see his age as a limiting factor.

His clear, blue eyes seem to twinkle beneath his shaggy white brows when he laughs about how ''I used to be 5-foot-6 - but I know I've shrunk.''

He has a 57-acre farm that he oversees outside Goldsboro, and he continued his civilain practice as an ophthalmologist up until the first of the year when his campaign started taking up more of his time.

Age has its rewards, he concedes.

''If I were young, no one would listen to me,'' he chuckles.

In fact, his political campaign has brought him international media attention, and he is convinced he will win.

''If publicity can do it, I ought to go over the top,'' he declares.

But if he does get to Washington, he may have difficulty getting around because local authorities have picked up his driver's license.

''They have it in the computer I'm blind,'' he says with disgust.

Asked whether that could be correct, he snapped, ''Hell, no. I'm not blind. I wear glasses when I read, but everyone does when they get to be 90.''

#90127u1776 05/07/1990 ~United Press International

WEST BERLIN (MAY 7) UPI - The World Jewish Congress decision to meet in Berlin this week has sparked a controversy in the Jewish community, with some people boycotting the session and others declining to return to the city where the Holocaust was masterminded, the head of the organization said Monday.

The WJC meeting was timed to coincide with the 45th anniversary of the collapse of Nazi Germany and Victory-in-Europe Day, when the Allied powers accepted the German surrender.

Edgar M. Bronfman, president of the WJC, told a news conference that an Israeli delegation would not participate in the three-day gathering in Berlin.

''There are some Jewish individuals who just cannot face coming to Berlin '' he said. ''I respect their views, just as I respect the views of those who thought it was a right decision to hold this meeting here.''

Many Jews have been deeply offended by the decision of the WJC and the European Jewish Congress to hold a commemoration ceremony Tuesday on the anniversary of the allied liberation of Europe.

The ceremony will be held in front of the Wannsee Villa on the city's outskirts. It was at the lakeside villa in 1942 that leading Nazi officials drew up the blueprints for the ''final solution,'' leading to the executions and gas-chamber murders of millions of Jews in Nazi concentration camps.

A WJC official said one prominent Jewish personality had sought the advice of Israeli Prime Minister Yitzhak Shamir as to whether he should take part in the conference.

''Shamir told him he thought it was right (and) he should attend,'' said the official.

On Sunday night, Bronfman addressed his feelings about convening the WJC on German soil for the first time in 60 years.

''We will visit Wannsee, the place where 11 despicable men and a woman decided to exterminate every Jew in the world. The site of the 'final solution,''' he told the opening session of the congress, attended by Chancellor Helmut Kohl.

''We have memories. We have tears and there is anguish. There are many Jews who could not bring themselves to be in this city because of the anguish, the pain that Berlin signifies ... I tell you that I understand the intensity of their anger and their bitterness,'' Bronfman said.

#90127u1796 05/07/1990 ~United Press International

LONDON (MAY 7) UPI - U.S. Vice President Dan Quayle landed in Britain Monday on the second leg of a three-nation European tour, during which he pledged Washington would always assist the ''democratic revolution'' in Eastern Europe.

Arriving from Rome, Quayle was met at London's Heathrow Airport by U.S. Ambassador Henry Catto and a British delegation led by Tim Sainsbury, the minister of state for the foreign office.

He was to later attend a private dinner given by Prime Minister Margaret Thatcher at Chequers, an Elizabethan mansion that is her official country residence in Buckinghamshire, about 30 miles northwest of London.

Quayle was scheduled to hold 45 minutes of talks Tuesday with Thatcher at Downing Street, call on Foreign Secretary Douglas Hurd and meet members of the British American Parliamentary group before leaving for Paris in the evening.

U.S. Embassy officials said Quayle's trip - his first to Europe as vice president - was to both touch base with allied leaders and to discuss plans marking the 100th anniversary of the birth of Dwight D. Eisenhower.

Various celebrations are planned in June to highlight the life of the supreme commander of World War II allied forces in Europe and U.S. president from 1953 to 1961.

In Rome earlier Monday, Quayle delivered an address to members of both houses of the Italian Parliament during a ''Salute to Eisenhower'' ceremony in a salon of the Chamber of Deputies.

Quayle termed the demise of the communist governments in Eastern Europe as fragile ''revolutionary gains'' which needed encouragement and support.

''The government and people of the United States are determined to help

this democratic revolution,'' Quayle said. ''My generation is deeply committed to this great enterprise.

''As a nation which fought three wars in Europe - two World Wars and the Cold War - the United States has a deep stake in the triumph of this democratic revolution.''

He held discussions with Prime Minister Giulio Andreotti over lunch at the Villa Madama government guest house, accompanied by his wife Marilyn and representatives of the Eisenhower Foundation.

After the lunch, Quayle flew by helicopter to the carrier USS Eisenhower at sea off Anzio, a port south of Rome where allied forces on Jan. 22, 1944, invaded to fight German occupation troops. He was accompanied by Deputy Prime Minister Claudio Martelli and U.S. Ambassador to Italy Peter Secchia.

After watching some of the nuclear-powered carrier's F14 and F16 fighter planes take off and land from the flight deck, Quayle went below to meet members of the 6,000 crew.

''You are the United States and each one of you represents your country,'' Quayle told the sailors. He expressed thanks on behalf of President Bush for their ''patriotism and courage.''

The vice president earlier told the Italian Parliament that the ''new breeze'' of freedom which Bush cited in his inaugural address ''has become a gale force wind.''

''Last year saw the most dramatic changes in Europe since the end of World War II,'' he said in his speech to the Italian poiliticians. ''From the Baltic to the Adriatic, an irresistible idea has taken hold: the idea of democracy.''

Quayle said Washington supported the 12-nation European Community and its moves toward greater unity because ''a strong, united Europe means a strong America and a safer world.''

He said NATO ''can help assure the success of the democratic revolutions in Central and Eastern Europe - and it serves as our insurance against a sudden change of course in Soviet foreign policy.

''At the same time, as Europe's political and security environment changes for the better, we must begin to consider new missions for NATO,'' he said. ''NATO will become the forum where Western nations cooperate to negotiate, implement and verify agreements with the East.''

#90127u1804 05/07/1990 ~United Press International

HIGHLAND PARK, MI (MAY 7) UPI - Chrysler Corp., trying to reverse a precipitous sales slide, unveiled Monday the next phase of its "Advantage: Chrysler" ad campaign with advertisements that take on the carmaker deemed by many as the company setting the industry standard for automobiles - Honda.

The ads are based on an independent survey commissioned by Chrysler that show its smaller cars to be preferred overwhemingly to similarly equipped Hondas by a random sample of 200 owners of General Motors and Ford autos considering buying imports. They were polled last month in the Los Angeles area, where sales of imports are traditionally strong.

The commercials, to begin airing this week, are part of an intense, multimillion-dollar effort by the nation's No. 3 automaker to profitably raise its U.S. vehicle market share to 13.5 percent by the end of the year from about 12.6 percent currently.

Chairman Lee Iacocca, wearing his now familiar trenchcoat, will once again be featured as Chrysler's chief spokesman in many of the spots. "I've been saying we've got advantages over Japanese cars," Iacocca says in one ad. "But even I didn't know how good we are."

The ads are based on results of a sampling done by independent researchers of U.S. Testing Co., Wheeling Ill. The researchers asked 100 consumers to judge 33 key features of Chrysler's Dodge Spirit and Plymouth Acclaim sedans against the Honda Accord, the best-selling car in America last year.

Another 100 were asked to judge Chrysler's Dodge Shadow and Plymouth Sundance subcompacts against the Honda Civic in similar questionnaires. Both tests included a 2.4-mile test drive.

No follow-up surveys are planned on which cars, if any, were actually purchased by the 200 participants, said Dennis Hill, president of U.S. Testing. Chrysler's entire campaign, done with the New York advertising agency Bozell Inc. and begun in March, has an estimated cost of about $60 million.

An industry analyst said the latest strategy of direct product comparisons is a positive move. "There is no question that this is a strong, positive endorsement for Chrysler," said Thomas O'Grady, of Integrated Automotive Resources Inc. in Wayne, Pa.

Chrysler is now doing a good job of laying the groundwork for higher consideration of its brands, he said. "But I notice the study did not include former Chrysler or current import owners because that might have placed a negative bias on the survey," he said. "It also had more than one

consumer in a car at once, which may have favored Chrysler."

American Honda in Gardena, Calif., had no immediate response to Chrysler's latest import defense. "We have not seen the ads yet, so we cannot make a judgment," said company spokesman Kurt Antonias.

Chrysler hopes the direct comparisons, as well as the previous campaign boasting safety features like air bags, will increase buyer consideration for the carmaker's products, said John Damoose, vice president of marketing for Chrysler.

But Chrysler's latest ad campaign - as well as a six-city tour by Iacocca and top Chrysler management that started in late February - has yet to translate into any sales gains.

Chrysler's U.S. car sales, including imports, during the first four months of 1990 slid 21.8 percent from the same period a year ago. Truck sales, including Jeeps and minivans, are off 7.9 percent.

"We haven't done an effective job of communicating what our products are," acknowledged Damoose during a press preview at the company's Highland Park headquarters.

The sales declines primarily reflect a cutback in unprofitable fleet sales and the absence of a true subcompact car in the company's product line after Chrysler discontinued its aging Omni and Horizon models earlier this year, he said.

To fill that gap, Chrysler plans to introduce a "decontented" version of its Shadow/Sundance subcompacts this fall to sell substantially below the current base prices of about $8,800. Chrysler last week posted an 80 percent slide in first-quarter profits to $71 million.

#90127u1807 05/07/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 7) UPI - Foreign ministers of the 12-nation European Community agreed Monday to lift visa requirements for citizens of East Germany, which is expected to be incorporated into the EC soon.

The foreign ministers also agreed that visas should soon be dropped for citizens of Hungary and Czechoslovakia, but delayed a formal decision.

It will actually be up to each EC country to bilaterally lift the visa requirement for East Germans, but the foreign ministers went on record as saying visas should no longer be required.

Italy is scheduled to formally lift its visa requirement for East Germans

this week. Holland, Belgium, Luxembourg, France and West Germany - which share a pact on visas - are expected to formally follow suit in mid-May.

The foreign ministers stopped short of calling for the visa requirement to be dropped for Hungary and Czechoslovakia, but officials said they expected such a decision within the next few months.

''Italy wanted the visa requirement lifted now for those countries as well '' said one diplomat. ''Nobody said they were really opposed to such a move, but several countries said they wanted time to reflect on it. There were really no dissenters.''

Although citizens of Hungary and Czechoslovakia are expected to be allowed to travel to the EC without visas soon, a similar decision for Poland and other countries of Eastern Europe is considered a long way off.

''Their economies are so bad we fear there would be massive illegal immigration into the Community, especially into West Germany,'' an official said.

Some diplomats said the decision on East Germany was really a formality because East Germans could get into other EC countries by obtaining a West German passport.

At a summit last month, EC leaders agreed to incorporate East Germany into the Community, without any changes in the EC treaties, through East Germany's unification with West Germany.

#90127u1848 05/07/1990 ~United Press International

(MAY 7) UPI - F-B-I officials announced today that they arrested one Colombian in Miami and another in Tampa this weekend and charged them with trying to buy ''Stinger'' anti-aircraft missiles and automatic weapons to shoot at Colombian government helicopters. The suspect arrested in Miami claimed to be a close associate of Medellin drug cartel leader Pablo Escobar.

Vice President Quayle spoke before leaders of both houses of the Italian Parliament today at a ''Salute to Eisenhower'' ceremony in Rome. He said the United States will continue to support both the drive for democracy in Eastern Europe and European unity. From Rome Quayle goes to London and Paris to attend similar Eisenhower tributes. The European trip is Quayle's first as vice president.

With almost all of the votes counted from yesterday's municipal elections in East Germany, the Christian Democratic party of Prime Minister Lothar de Maiziere is ahead with 34-point-four percent of the vote. Social

Democrats had 21-point-three percent. The figures show that the Christian Democratic party's support has slipped since national elections in March. Communists went down to defeat yesterday with 14-point-six percent of the vote.

The provisional government of Romania today announced stern measures intended to prevent trouble in the period leading up to the May 20th elections. Demonstrations and the sale of alcohol will be banned in Romania during the 48-hour period leading up to the elections. The government also announced that polling stations will be patrolled by police and soldiers to guard against violence.

#90127u1874 05/07/1990 ~United Press International

(MAY 7) UPI - There was a dramatic development today in the Bensonhurst racial killing trial in New York minutes before final arguments in the explosive case. State Supreme Court Justice Thaddeus Owens denied a petition by the prosecution's star witness to recant his testimony that he saw the accused triggerman, Joseph Fama, shoot a black teen-ager last August. Owens told the attorney for witness Frank Tighe, ''it's too late now.'' The judge then ordered closing arguments to proceed.

Police in the Chicago suburb of Riverside today asked a grand jury to subpoena the medical records of a man whose car careened through a Little League field and killed three children. Nine other people were injured in Saturday's accident. Police won't speculate if charges will be filed against the driver, retired tavern owner James Harasek.

Authorities in Portland, Oregon, are trying to find vandals who smashed open a mausoleum vault at a cemetery and removed a human skull, which was later found in a nearby phone booth. The skull was found on top of the telephone with a red plastic straw protruding from its mouth and a red liquid poured over the skull and phone. Police say the vandals also toppled 20 to 30 tombstones at the cemetery.

#90127u1878 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - Leaders of the AFL-CIO and ten unions at the New York Daily News mapped out their strategy Monday for a national support campaign on behalf of the newspaper's embattled unions.

"Nobody working for the Daily News is looking for a strike," said George McDonald, head of the the Allied Printing Trades Council, an umbrella group of the newspaper's ten unions. "We're looking for a settlement."

Michael Alvino, president of the independent drivers union that is part of

the trades council, and Theodore Khell, a union adviser, joined McDonald in meeting with United Steelworkers President Lynn Williams, AFL-CIO Secretary Treasurer Tom Donahue and other union leaders. Williams leads the labor federation's support group.

The union leaders discussed plans for bringing managers at the Daily News back to the contract negotiating table. Contracts for the newspaper's nearly 3,000 union workers expired at the end of March. Labor officials have accused the company of having slight interest in bargaining an agreement.

The solidarity meeting took place one day after between 500 and 600 workers rallied at the home of Daily News publisher James Hoge to demand the company - owned by the Tribune Co., which also publishes the Chicago Tribune - begin negotiations in good faith.

Williams told reporters midway through the session with the newspaper's union leaders that the unions are seeking "an honorable settlement of this dispute."

"We believe it (the Daily News) should survive," Williams said. "It is clearly important that this newspaper stay in business. "Certainly there is no confusion in our mind ... that the unions want a settlement and have been working very hard for that."

But none of the labor leaders would disclose what steps the solidarity campaign on behalf of the newspaper's unions would take. "Struggles are not won by announcing battle plans," Williams said.

He said the group discussed a variety of possible steps the labor federation and its members could take to aid the New York workers. The unions would not rule out a "corporate campaign" aimed at the Tribune Co., he said.

The Daily News, with a circulation of 1.2 million, has said it needs to eliminate as much as $70 million a year in "excess" labor costs and has taken particular sight at what it calls featherbedding in the pressmen's union.

Daily News management has begun training replacement workers for a number of jobs, according to union officials, and has hired the law firm of King & Ballow, widely regarded as a union-busting operation.

#90127u1894 05/07/1990 ~United Press International

CHICAGO (MAY 7) UPI - A rally in soybean oil carried across the floor Monday on the Chicago Board of Trade.

Grain futures were higher at the close and soybeans were sharply higher in active trading and fairly heavy volume.

The early weakness in soybeans quickly gave way to aggressive commission house and professional buying. Beans were up more than 15 cents at one point with soybean oil and meal also trading sharply higher.

Much of the support in the oil was attributed to news that Pakistan would be in the market later this week for 60,000 tons of soyoil.

Soybean meal rallied on spillover from the rest of the complex.

Gains in soybeans were tempered by continued heavy deliveries of the May contract.

Steady buying interest provided underlying support for the grains, although favorable weather conditions across the Grain Belt limited the gains.

Taiwan and South Korea bought a small amount of corn and Egypt was expected to be in the market Tuesday for 150,000 tons.

Hopes of additional near-term export business underpinned wheat values.

Country movement was described as light.

At the close, corn was up 1 1/2 to 3 1/2, soybeans up 10 1/4 to 11, wheat up 3 to 5 3/4 and oats up 1 1/4 to 2.

#90127u1908 05/07/1990 ~United Press International

MANAGUA, Nicaragua (MAY 7) UPI - To avoid economic ruin and ''lift its head up,'' Nicaragua urgently needs $300 million in U.S. aid held up as a result of a political dispute between President Bush and Congress, the president of Nicaragua's Central Bank said Monday.

Francisco Mayorga said the newly installed government of President Violeta Chamorro would bring down the hyperinflation that has wracked Nicaragua's economy within three months of taking office.

But the nation's chief economic official warned Monday the economy would be in ruins if the aid does not come through soon.

The aid, part of a $2.3 billion emergency spending package that also includes $420 million for Panama, has been held up by Senate amendments to the bill that would allow the District of Columbia to use public money for abortions.

Bush, who had hoped to have the aid ready in time for Chamorro's April 25 inauguration, has vowed to veto the legislation if the abortion language is included in the compromise version to be hammered out by House and Senate conferees.

''We need the $300 million in emergency aid that could arrive gradually over the next six months,'' Mayorga said in a television interview.

He said the money was needed to reactivate the economy and control inflation, which ran at a 1,700 percent in 1989, down from about 30,000 percent in 1988.

''Frankly, without that kind of aid, this country will not be able to lift its head up,'' Mayorga warned.

Mayorga has come under fire for his economic policies following the devaluation of the cordoba, Nicaragua's currency, from about 70,000 to more than 144,000 to the dollar at government-controlled exchange houses.

He said the new gold cordoba will come into circulation in July and will be worth one to a U.S. dollar.

Mayorga said Nicaragua has access to credit lines while waiting for the U.S. aid, with $15 million coming from West Germany for imports.

Last week, a $12.3 million food aid package was channeled through the U.S. government's Agency for International Development. The food aid does not require congressional approval.

#90127u1909 05/07/1990 ~United Press International

CALGARY, ALBERTA (MAY 7) UPI - Coach Terry Crisp, who guided the Calgary Flames to the 1989 Stanley Cup, was fired Monday for failing to take his team past the first round of this season's playoffs.

''I am not trying to hang Terry Crisp for our loss to Los Angeles in six games, but that must be shared by everyone in our organization,'' said Cliff Fletcher, the team's president and general manager.

Crisp coached the Flames for three years and compiled a record of 144-63-30. The Flames were twice regular-season champions and finished second this past year. But Crisp's downfall was his playoff coaching record - 15 wins in 37 games.

''In order to maximize the potential of our hockey club we needed to change the coach,'' Fletcher said.

Fletcher said he has no timetable in naming a successor. Possible candidates include Assistant General Manager Doug Risebrough, who was an assistant coach for the Flames for two years.

''My position is one of assistant general manager and I'll look at the type of coach we will need in the organization,'' Risebrough said.

Another possibility is Dave King, the coach of Canada's national team. He has turned down several offers from NHL clubs to remain with the national program.

However, with Calgary, King would merely have to change offices in the Saddledome and not uproot his family.

He has an excellent relationship with the Calgary owners and is respected by the Flames as a coach. He is also highly regarded in the community.

King rose to prominence in 1982, coaching Canada to the gold medal at the World Junior Championships. He coached Canada to the silver medal at the

1989 World Hockey Championships at Sweden.

WASHINGTON (MAY 7) UPI - Led by metal prices, non-fuel commodity prices increased 2.6 percent in dollar terms on world markets during March, but remain lower than a year ago, the International Monetary Fund said Monday. In the IMF's Special Drawing Rights - based on a basket of the main international currencies - commodity prices rose 4.6 percent in March.

The multilateral organization noted that the March hike in commodity prices was the largest monthly increase in 20 months. The IMF's dollar and SDR indexes of commodity prices were, nevertheless, 12 percent lower than in March 1989.

During last month, large increases were recorded in the dollar prices of most metals, and of coffee, cocoa, sugar, and palm oil, the IMF said.

Coffee prices rose 12 percent, while cocoa prices were up ten percent.

Free-market sugar prices advanced five percent, to 15.31 cents a pound, their highest level since July 1981.

According to the IMF, metal prices rose 11 percent in March, following a cumulative decline of 15 percent from August to February. A combination of strikes in some countries, production problems in others and a sizable fall in the stocks of some metals on the London Metal Exchange led to market concern over the availability of these metals for near-term delivery.

This concern was the main factor underlying the particularly sharp price increases for lead, 36 percent; nickel, 33 percent; zinc, 15 percent; copper, 11 percent; and aluminum, eight percent. Lead prices, which topped $1,000 a ton in March, reached their highest level since March 1980, the IMF said.

Yet, prices in March for fishmeal declined ten percent; tea, nine percent; bananas, nine percent; coconut oil, five percent; and logs, five percent.

#90127u1920 05/07/1990 ~United Press International

DETROIT (MAY 7) UPI - The recently named president of Ford Motor Co. said company operations will be pruned so that the automaker can make substantial reinvestments in its core business of building cars and trucks.

Philip E. Benton, who became president of Ford on March 1, said in an interview published Monday in Automotive News that the nation's second largest automaker plans to reinvest heavily in its car and truck business, and spend more during the first half of the 1990s than the $25 billion spent during the last half of the 1980s.

Benton said Ford plans eventually to divest itself of its aerospace, tractor and farm implement operations, but retain its financial services operations.

The moves by Ford to rid itself of non-auto related businesses counters the trend during the 1980s, when all of the nation's major carmakers sought to purchase such operations to cushion themselves from the cyclical nature of the vehicle market. "You have to make up your mind where you want to play your chips," Benton told the weekly trade publication.

Ford currently has its aerospace operation up for sale, and last December sold an 80 percent share in its Rouge steelmaking operations. Ford is also looking for a partner for its tractor and heavy-duty truck operations. Several weeks ago it announced such discussions are under way with Italy's Fiat.

While Ford does not intend to exit the heavy truck business, Benton hinted Ford might eventually leave the tractor and farm implement operations. "The tractor and implement business is screaming for consolidation; worldwide there are too many players and it's got to be narrowed down to fewer players," Benton said.

On the reinvestment into cars and trucks, Benton said those "abnormal sums" will take a toll on the company's North American profits, but that he sees Ford once again earning nearly $4 billion. Ford earned $3.8 billion in 1989 and a record $5.3 billion in 1988.

Last week, however it posted profits of $506 million, down 69 percent from the first three months of 1989 because of sharply lower production rates and costly buyer incentives.

Benton said Ford expects to improve its sales outlook as it fills dealer lots with its new Escort subcompact cars introduced last month, as well as its new Explorer sport utility vehicle introduced this spring as a replacement for its Bronco II vehicle.

WASHINGTON (MAY 7) UPI - The average annual inflation rate of developing nations accelerated in 1989 to 86.3 percent, a record level, from 59.5 percent in 1988, the International Monetary Fund said Monday.

In Latin America and the Caribbean, inflation averaged 350 percent in 1989 up from 218 percent in 1988. The rise in the region's inflation rate largely reflected quadruple-digit inflation in Peru, 3,398.6 percent; Argentina, 3,079.3 percent; and Brazil, 1,287 percent, the IMF noted.

In the developing countries of Europe, inflation averaged 232.3 percent in 1989, strongly up from 80.1 percent the previous year. The rise in the region's inflation rate primarily reflected quadruple-digit inflation in Yugoslavia, 1,239.9 percent; and triple digit inflation in Poland, 244.5 percent.

In the developing countries of Asia, inflation dropped to 10.2 percent in 1989 from 11.8 percent in 1988, the IMF said. The multilateral organization did not have inflation statistics for the developing countries of Africa and the Middle East.

#90127u1955 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - Pan American World Airways Inc. said Monday it signed a five-year, $40-million agreement for American Telephone & Telegraph Co. to provide computer equipment for the airline.

AT&T computers of the 6386/SX and 6386/25 lines will be installed to upgrade Pan Am's computerized operations at airports, administrative offices and reservation centers worldwide, the carrier said.

"Installation of the AT&T systems at about 100 locations will form the foundation for what we call the airport of the future," said Robert Wagner Pan Am's vice president of information services.

The airline plans to automate every transaction involving passengers and travel accomodations, including ticketing, luggage handling, boarding and services such as car rentals and hotel booking.

"Passenger check-in functions will be conducted in a matter of seconds, with usage of personal computer's animation, magnetic strip cards and documents, and bar code scanning," Wagner said. The airline estimated the value of the contract, including maintenance, at about $40 million.

#90127u1958 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - The attorney for the accused triggerman in the Bensonhurst racial slaying trial said Monday the prosecution's star witness wanted to recant his testimony that he had seen Joseph Fama shoot a black teenager.

''It's too late now,'' state Supreme Court Justice Thaddeus Owens told attorney David DePetris, in denying the petition. ''The whole thing seems suspicious to me.''

The dramatic development came minutes before closing arguments in the trial of the accused killer in the case that has increased racial tensions throughout the city.

When the trial resumed, prosecutor Edward Boyar gave a rousing final argument, ending it by pointed his finger at Fama.

''You pulled the trigger,'' he said, as the 19-year-old Fama stared back defiantly.

Judge Owens was expected to charge the jury later Monday. Final arguments for accused ringleader Keith Mondello, 19, in the unusual two-jury trial were scheduled for Tuesday.

Much of the prosecution's hopes for a guilty verdict for Fama rested on the testimony of Frank Tighe, 20, a neighborhood buddy of Fama with a history of mental problems, who said he saw Fama fire a pistol four times, killing Yusuf Hawkins, 16, last August after a mob of young white men surrounded the black youth and three friends.

In asking for testimony to be reopened, DePetris told Judge Owens that Tighe ''indicated to me he was not on 69th Street at the time of the shooting, and that he had been pressured by a number of individuals to say that he had been on 69th Street.''

Boyar leaped to his feet, shouting, ''I'd like to know which relatives aided Mr. Tighe in this decision. I smell a big rat here.''

Owens told DePetris he would have to wait for a verdict and then ask for a new trial if he wished to pursue the issue.

As the attorneys wrangled, Tighe waited in a room just down the hall from the courtroom, pacing back and forth, a scared expression on his face.

In his summation, DePetris went down the list of the prosecution's witnesses and questioned their credibility, including jailhouse informants Robert Russo and Charles Brown, each of whom testified that Fama bragged he had shot Hawkins.

But he saved his heaviest scorn for Tighe.

''Frankie Tighe has a cronic history of audio and visual hallucinations, meaning he was hearing things and seeing things that weren't happening,'' DePetris told the jury.''

In his final arguments, Boyar told the jury it was Fama who took the gun, ''and with a wanton disregard for human life, shot again and again and again and again - until Hawkins slumped to the ground.

He blasted what he described as the ''silent sisters and brothers of Bensonhurst who were watching, but not seeing, hearing but not listening from the stoops'' near where Hawkins was shot.

He described in graphic terms the doctor's autopsy on Hawkins, causing the victim's mother, Diane Hawkins, to cover her ears and sob, rocking in her seat.

Boyar at one point picked up a ''Big Man'' baseball bat, reportedly used in the attack, and struck the bench with it, the sound echoing through the courtroom.

He pulled out a large photograph of Hawkins and put it up on a stand.

''Meet Yusuf Hawkins,'' he said, as some of Fama's family twisted in their seats. A few got up and left the courtroom.

He told the jury that Tighe ''was not hallucinating on the night the killing took place ... he was telling you what happened that night.''

''The evidence places the blame right where it belongs,'' Boyar said, winding up his summation by spinning around and pointing his finger at Fama.

''Mr. Fama, you are responsible for the death of Yusuf Hawkins. You had the gun. You pulled the trigger.''

Fama, who had appeared nervous earlier, stuck out his chin and glared back at Boyar.

Mondello and Fama have separate juries because Mondello has implicated Fama as the gunman in the attack.

The two are the first of eight young men to be tried in the case. The other six were scheduled to go on trial next month.

Hawkins was slain Aug. 23 during an attack by a gang of about 30 whites, some wielding baseball bats, who had waited outside the home of Gina Feliciano.

Mondello and his friends allegedly whipped themselves into a frenzy over rumors that a gang of blacks and Hispanics were coming to the neighborhood to visit Feliciano, a neighborhood girl who had been dating minorities.

GRAND RAPIDS, MN (MAY 7) UPI - Twelve actors who played Munchkins in the movie ''The Wizard of Oz'' will be in Grand Rapids for the Judy Garland Festival June 8-12.

Festival organizers are billing the event as the largest gathering of

Munchkins since the movie was produced in 1939 by Metro-Goldwyn-Mayer.

The festival to honor Garland, who was born in Grand Rapids, will also feature an exhibit of private photographs of her and a parade.

There also will be a film festival, seminars, a dinner-dance, talent contest, one-act plays and fan club forum.

#90127u1984 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - Government-sponsored tests of promising drugs are failing to meet the needs of people infected with the AIDS virus, particularly blacks, women and children, activists told the National AIDS commission Monday.

Although blacks make up 27 percent of AIDS patients, only 10.2 percent of people enrolled in government-sponsored drug tests as of Feb. 1 were black

said Jim Eigo of AIDS Coalition to Unleash Power, or ACT-UP. Hispanics, women, children and intravenous drug users are also ''slightly to grossly under-enrolled'' in such trials, he said.

''As this epidemic moves more and more into these populations, their underrepresentation becomes more and more severe - as does the imperative that the (government-backed) AIDS Clinical Trial Group do something to address this disparity,'' Eigo said. ''Equity demands it, but so does practicality.

Low enrollment of minorities, women and children not only denies them experimental treatments, but is also bad news for all people infected with the AIDS-causing human immunodeficiency virus or HIV, Eigo told the 15-member panel formed by Congress to oversee America's fight against acquired immune deficiency syndrome.

Unless the government moves to address the disparity, he said there is ''no hope'' it will ever complete widescale drug tests quickly enough to help HIV-infected people who are sick today.

As of Feb. 1, about 121,645 AIDS cases had been reported to the federal Centers for Diseases Control, yet only about 6,300 people with AIDS or AIDS-related complex were particpating in government-sponsored drug tests, Eigo said.

Qualifying for drug tests can be difficult even for white men with AIDS, he said, noting a Seattle researcher reported he had to screen more than 100 AIDs patients for every dozen he found eligible.

Dr. Anthony Fauci, head of the National Institute of Allergy and Infectious Diseases, which oversees the drug testing effort, agreed some entry requirements for AIDS drug trials should be relaxed. ''We need to make it more of a real-life setting,'' he said.

Fauci said he has written all researchers directing the drug tests, encouraging them to enroll more minorities and telling them future funding may hinge on such efforts. In addition, the NIAID director said he is encouraging sophisticated medical centers where such tests often take place to team up with hospitals with a greater percentage of minority patients.

Belinda Mason, a commission member who was infected with HIV during a blood transfusion, said she was heartened by Fauci's comments on widening both the availability - and array - of experimental AIDS drugs. ''But it remains to be seen if the substance matches the style,'' she said.

Rosa Martinez of Tampa, Fla., whose 8-year-old adopted daughter Eliana died of AIDS in November, said Eliana was turned away from drug trials in

Miami and and Durham, N.C., before gaining entry to tests at the National Institutes of Health in Bethesda, Md.

''I feel strong that the clinical trials on pediatric AIDS are presently extremely restrictive. The access and process to them are fatally slow,'' Martinez said.

#90127u2040 05/07/1990 ~United Press International

ATLANTA (MAY 7) UPI - Eastern Airlines' newly appointed trustee vowed Monday to bring the embattled carrier out of bankruptcy successfully, offering an unprecedented money-back guarantee to first-class flyers as a way of luring back business travelers.

Martin R. Shugrue, appointed by a judge last month to take control of the airline from Frank Lorenzo, chairman of Eastern's parent Texas Air Corp., made his first public appearance as trustee in Atlanta, the airline's largest flight hub.

"I've accepted the position as trustee with a great deal of enthusiasm because I firmly believe that Eastern can be made into a very viable airline company," Shugrue said at a news conference at Hartsfield International Airport.

In giving Shugrue control of Eastern April 18, U.S. Bankruptcy Court Judge Burton Lifland said the trustee would be mandated to run Eastern as a "going concern." Addressing that mandate, Shugrue said, "I did not come here to liquidate. I have come here to manage this company out of bankruptcy successfully."

Shugrue offered no specifics on a reorganization plan scheduled to be released in August, beyond announcing a marketing plan featuring a money-back guarantee on the airline's "Y-not" fares aimed at business

travelers. Under the plan, any flyer not completely satisfied with the carrier's first-class service is eligible for a full refund.

The carrier's "Y-not" promotional program, which went into effect three weeks ago, offers first-class seats at rates 15 percent below standard coach fares.

"No one has ever done this in the industry," Shugrue said. "We are offering an unrestricted money-back guarantee ... The offer is so good and so simple that you would be a fool not to try it."

Shugrue said the promotion is designed to win back the large number of business travelers who have switched to other airlines. "We are making these moves in the market place because the fundamental thing that has to get accomplished here to restore viability to this company is to get that frequent business flyer back on the airline," he said.

Eastern also hopes to attract more leisure travelers with low-cost children's fares for the summer, he said. From June 4 to Sept. 8, Eastern will offer children's fares to nine Florida cities for $29 during peak travel days and $39 on off-peak days.

"We have done a good job at attracting the leisure traveler with pricing," Shaugrue said. "We are going to continue to attract that market with good innovative pricing as is evidenced by the kids' fare."

He voiced confidence about Eastern's future, saying the carrier has "basic strengths here that can be built on in terms of the route system, in terms of facilities, in terms of fleet."

"We've got some outstanding employees, led by seasoned airline managers who have all the capability needed to restore this company to profitability," he said.

Shugrue offered no details about ongoing negotiations with Eastern's striking machinists or the rehiring of its pilots and flight attendants. Eastern filed for bankruptcy protection in March 1989, five days after its three major unions launched crippling strikes. The pilots' and flight attendants' unions have since called off their walkouts, but the International Association of Machinists remains on strike.

In naming Shugrue trustee, the bankruptcy court judge said the management of Eastern and Texas Air were "not competent to reorganize" the embattled carrier. Shugrue faces a daunting task. Eastern lost $852.3 million in 1989, and has projected a $330 million loss for 1990.

The carrier's unsecured creditors, who are owed an estimated $980 million, had requested a trustee be appointed, saying they had lost all faith in

Eastern's management.

The naming of Shugrue was a victory for the unions, especially the machinists who had repeatedly cited Lorenzo's removal as key to settling the labor dispute.

Shugrue repeatedly reassured creditors they will be paid back and that the airline has enough cash for operating expenses. When he named Shugrue trustee, the bankruptcy court judge also allowed Eastern to use $80 million in proceeds from assets sales to fund operations through mid-year. Eastern already has used $320 million in asset sale proceeds to fund operations.

#90127u2051 05/07/1990 ~United Press International

(MAY 7) UPI - The F-B-I has arrested two people and says at least one more arrest will be made in an alleged plot to buy weapons to shoot down Colombian government helicopters. F-B-I officials say they arrested two

Colombians linked to the Medellin cocaine cartel on charges of trying to buy ''Stinger'' anti-aircraft missiles and automatic weapons. One suspect was arrested in Miami and the other in Tampa.

In Lebanon today, a pro-Iranian fundamentalist Shiite Moslem leader told U-P-I that he is advising the kidnappers of 16 Westerners in Lebanon NOT to free any more hostages until the United States responds to the release of two Americans. Iran and Syria have repeatedly urged the United States to respond to the recent release of Robert Polhill and Frank Reed with a similar gesture of good will.

President Bush sent a mixed message to Congress today concerning his stand against new taxes. White House spokesman Marlin Fitzwater says Bush will agree to place any options on the table during deficit-reduction talks with Congress. At the same time, Fitzwater said Bush ''hasn't changed his mind on anything.'' Bush has long refused to consider any new taxes.

Pope John Paul met with Mexican President Carlos Salinas de Gortari for more than an hour this morning on the second day of his eight-day visit to Mexico. The talks apparently reflected warming relations between the Roman Catholic Church and Mexico. However, there was NO indication that official diplomatic ties would be established.

#90127u2066 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - The Soviet Union, the No. 1 customer for U.S. export grain, is the buyer of 1.75 million metric tons of corn, the Agriculture Department reported Monday.

The sale, involving the equivalent of 68.9 million bushels, was worth about $201 million, based on Chicago prices. It came on the heels of a Soviet purchase of 600,000 tons of corn last Friday, worth about $67.9 million.

With the purchase, the Kremlin has purchased 18.9 million tons of American-grown corn and wheat this fiscal year. Its corn purchases - 15.63 million tons - are only 700,000 tons short of last year's sales total with five months remaining in this fiscal year.

An Agriculture Department official said the Soviet purchase tied for the sixth-largest corn sale reported since it began monitoring sales in 1973. The purchase included 1.15 million tons in new sales and 600,000 tons that initially were listed as going to an unknown buyer. The government list counts only new sales.

The largest one-day sales figure for corn is 2 million tons, sold to the Soviet Union last Oct. 3.

During fiscal 1989, the Kremlin bought a record 21.7 million tons of U.S. corn and wheat, the two commodities covered by the grain agreement between the superpowers.

The Soviet Union has been a grain importer since the early 1970s as a result of a decision to expand livestock production.

In recent months, the Kremlin has focused on purchases of feed grains, such as corn, partly because of more attractive prices than were available for wheat. The Soviets also had a large wheat crop last year.

U.S. analysts have forecast the Kremlin would import 38 million tons of foreign grain this marketing year. The Foreign Agricultural Service is due to update the estimate later this week.

(MAY 7) UPI - The president of the American Chamber of Commerce in Hong Kong is urging the United States to renew China's most-favored-nation status. John Kamm says that revoking the classification would cost U-S companies at least three-BILLION dollars. Numerous U-S lawmakers have demanded that President Bush let the favored trade status expire following China's crackdown last June on the democracy movement. The status comes up for renewal on July 3rd.

In the Philippines, police today arrested the second suspect in the killing of a U-S Marine sergeant near the U-S Subic Bay Naval Base on Friday. Police say the two... described as ''drug addicts''... were arrested during police raids in residential areas in Olongapo, where scores of Filipinos were detained for questioning and then released. Billy Burke and Rey Angeles were identified by four witnesses to the shooting of Gunnery Sergeant John Fredette.

#90127u2129 05/07/1990 ~United Press International

KATMANDU, NEPAL (MAY 7) UPI - Nepal's new multi-party government Monday began the process of abolishing powerful government organizations that owed their allegiance to the king in an effort to solidify civilian rule.

The month-old government also announced that it is relaxing by one hour a nighttime curfew imposed on the capital and neighboring towns because of violent pro-democracy demonstrations that toppled 29 years of crown rule.

Minister Krishna Prasad Bhattarai said Monday the post of 14 zonal commissioners would soon be abolished along with the National Sports Council, both of which had been controlled by the monarchy.

''You will soon hear the news that the office of the zonal commissioners has been abolished,'' Bhattarai told 500 cheering government supporters.

The Himalayan mountain kingdom is divided into 14 zones and 75 administrative districts. The 14 commissioners are appointees of the king and directly responsible to him, while administrators of the 75 districts are civilian appointees of the government.

Bhattarai said the Cabinet also decided to dissolve the controversial National Sports Council, which had been used by the previous regime for clandestine political activities.

Council members have been accused of manipulating local elections, surpressing the pro-democracy movement and being involved in cases of looting and arson in the capital after the announcement of the multi-party government last month.

''A section of the council was involved in terrorist activities and they had created a law and order problem,'' the premier said. ''These decisions should have come sooner, but the government was involved in restoring the peace to the country soon after assuming office.''

On Sunday evening, King Birenda pledged his full support to the government in a meeting with Giriji Prasad Koirala, secretary general of the Nepali Congress Party.

The king, according to Koirala, said, ''I will fully cooperate with the government. I will OK anything that the Cabinet proposes.''

The 11-member government is a coalition of representatives from the Congress Party, seven communist parties, independents and the king's representatives.

''The formation of an interim government alone is not sufficient. Power has also to be delegated,'' Koirala said he told the king.

Although given full power to run the country, Bhattari has complained that state agencies, such as the police, were not cooperating with the government.

Nepal's newspapers, meanwhile, were savoring their new freedoms and reported brisk business and increased sales.

''Sales of our newspaper, Nepali Awaj, has gone up considerably now,'' said Janardan Acharya, managing director of Trishakti Ppublications.

Nepali Awaj is the largest circulated weekly newspaper in the private sector. The newspaper was subject to censorship and harassment during the seven-week pro-democracy movement launched on Feb. 18.

''We were publishing under very difficult circumstances. But we managed to survive,'' Acharya said. ''Right now we are like a person just released from prison and without a home.''

Acharya said the Nepalese press presently sufferes lack of infrastructure. ''We are working under greater freedoms. This has brought about competition among newspapers. This is healthy development,'' he said.

During the previous regime, journalists were jailed, their publications banned or seized and foreign publications critical of the government were outlawed and confiscated.

Foreign coverage critical even of the king and other members of the royal family are now sold openly in the market. Previously they were distributed through a clandestine network by photocopying such material.

CHICAGO (MAY 7) UPI - Playboy Enterprises Inc. Monday announced a recapitalization plan that includes a reverse stock split, an increase in the authorized number of common shares and creation of voting and non-voting classes of common stock.

The plan also calls for distribution of a dividend of three shares of the new non-voting Class B stock for each share of Class A stock on a post-split basis.

"We believe that the proposed recapitalization will provide Playboy with increased flexibility to use equity in future acquisitions, financings and employee benefit plans without diluting the voting power of existing stockholders," Playboy Chairwoman Christie Hefner said. The recaplitalization is subject to a vote by shareholders, but is certain to be approved.

Ms. Hefner's father - Playboy founder Hugh Hefner - holds 70.6 percent of the company's stock and has indicated he will vote in favor of the recapitalization.

The recaplitalization includes a one-for-two reverse split of existing Playboy common stock. Under the plan, every two shares of currently outstanding Playboy common stock will be reclassified as a single share of Class A common stock, having one vote per share.

To participate in the recapitalization, stockholders must own at least two shares. All fractional shares resulting from the reverse split will be bought out.

Following the split, a non-taxable dividend of three shares of new

non-voting Class B common stock will be distributed for each share of Class A common stock.

The total authorized number of shares would be increased from the present 15 million to 37.5 million - which would include 7.5 million shares of Class A voting stock and 30 million shares of non-voting Class B stock.

Playboy had an average of 9.5 million common shares outstanding in its third-quarter, which ended March 31. Under the recapitalization plan, 9.5 million shares would be converted into 4.75 million shares of Class A voting stock and 14.25 million shares of Class B non-voting stock, leaving 2.75 million Class A shares and 15.75 million Class B shares for future distribution.

A Playboy statement announcing the recapitalization plan said the company believes the two classes of stock "should trade at approximately equal price."

With the exception of voting rights, Class A and Class B stock will have substantially the same rights - including dividend rights, the company said.

Ms. Hefner said the recapitalization plan includes a minority protection feature to ensure that the two classes of stock trade at approximately equal market prices and that holders of Class B stock participate in any premiums paid by outside buyers seeking a significant block of Class A stock.

Following implementation of the recapitalization, anyone purchasing ten percent or more of the new Class A voting stock without owning an equal or greater amount of Class B non-voting stock must acquire a proportional share of Class B stock within 90 days. The company said it will seek approval of the recapitalization plan in consent soliciation to shareholders of record as of May 16.

The board of directors set June 7 - or the date both classes of stock are accepted for trading on the New York Stock Exchange - as the date for determination of whether the recapitalization plan has been approved by stockholders. That date also will be the record date for participation in the recapitalization - and the accompanying Class B stock dividend.

Playboy is among the first New York Stock Exchange-listed companies to propose a recapitalization under new exchange rules permiting listing of companies with voting and non-voting class stock structures.

HOUSTON (MAY 7) UPI - The U.S. Coast Guard Commandant Monday said another major oil spill on the scale of the Exxon Valdez incident is "inevitable," despite increased efforts by government and industry to prevent it.

"No matter what we do to minimize the possibility of a catastrophic spill, we must recognize that another large spill is inevitable," Adm. Paul Yost told participants of the Offshore Technology Conference. "No matter how good our preventive fixes are or how firm our resolve that it never happen again, it will."

"We must, as we always have, continually seek ways to improve the design and operating characteristics of ships, maintain proper licensing standards for crews and do all we can do to make ports safe places for ships to operate," the Coast Guard chief said.

Yost said the public can expect higher taxes and higher fuel prices as a result of these efforts. "It's going to be a very hefty bill," he said. "The bottom line is the potential for a major oil spill is always with you when you are moving great quantities of oil by ship. The American people, you and I, are going to pay for that."

Yost praised Exxon for its efforts in cleaning up Prince William Sound after the Valdez ran aground on March 24, 1989, spewing 11 million gallons of crude oil and creating the nation's largest oil spill.

"I have every confidence that cleanup will go forth in an effective way and by the end of the summer all that man can do will have been done," to clean up the Alaskan beaches, he said.

The Coast Guard expects soon to approve Exxon's summer cleanup plan, Yost said, adding most of the efforts will be manual and there will be little, if any, high-pressure water used as was the case last year.

"We're talking about tens of miles of beach instead of hundreds of miles of beach," Yost said. He called upon the public, the shipping industry, the oil industry and all levels of government to cooperate in efforts to prevent oil spills, and to be prepared to respond when they do happen.

ALBANY, NY (MAY 7) UPI - Gov. Mario Cuomo recommended Monday tribal leaders establish a Mohawk police force on the war-torn reservation where Indians buried a second victim of last week's gambling-related violence.

The governor also said the progress of talks with Mohawk leaders on ways to guarantee the safety of residents - bitterly divided over the issue of casino gambling - would determine how long hundreds of State Police troopers remain on the 28,000-acre reservation straddling the Canadian border near Massena.

Negotiations to resolve the dispute could begin ''as soon as tomorrow (Tuesday),'' said Cuomo spokesman Darren Dopp.

''It is my hope that I will hear today from State Police Superintendent

Thomas Constantine that the three conditions I set forth on Apr. 30 for the initiation of discussions with tribal authorities have been met,'' Cuomo said in prepared statement.

The governor said negotiations would not begin until the violence stopped, roadblocks were taken down and the casinos are closed.

All three conditions appeared to have been met Monday, the fifth consecutive day of calm on the reservation where on Tuesday a raging gun battle killed two Mohawks.

Cuomo said the first question to be addressed should be the establishment of an indigenous police force on the American side of the reservation that could potentially operate on the Canadian side as well.

While both pro- and anti-gambling leaders have each called for an independent tribal police force, it will be difficult to hash out whose interests that police force would protect.

''I'd leave that for discussion,'' Cuomo said. ''I think what you need is the support of the Indian community.''

Nor did Cuomo discuss the proposal in detail, saying questions of the makeup, responsibility and powers of such a force is an issue for the Mohawks to deal with.

Canadian Indian Affairs Minister Tom Siddon, who had been at odds with Cuomo's handling of Mohawk violence, looked favorably on the governor's proposal for a tribal police force.

''I would like to express my appreciation to Governor Cuomo for this most constructive proposal,'' Siddon said. ''It is one that I believe could help in restoring peace and order on the Akwesasne reserve.''

Akwesasne is the Mohawk name for the St. Regis Indian Reservation and the officially recognized name for it in Canada.

Siddon reiterated the view of all the governments that any solutions must be developed with the Mohawk community.

Meanwhile, J.R. Edwards, 32, who was described as apolitical on the gambling issue, was buried Monday following a funeral closed to reporters.

Edwards' body was found some 100 yards from the spot where Matthew Pike, 22, had been shot dead in a gun battle between the divided factions. It is not known when, or why, he was killed.

#90127u2188 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - Executives of the $33 billion diet industry

boasted about the success and safety of their weight-loss programs Monday but acknowledged at a House hearing that some advertising claims are exaggerated and controls are needed.

Rep. Ron Wyden, D-Ore., chairman of a House Small Business subcommittee, said, ''The diet industry is rife with advertising hucksterism.'' He said the industry is ''out of control'' because of no federal oversight or industry self-policing.

Wyden said it is ''high time'' for requiring diet conselors to be trained and for weight-loss ads to reveal health risks and actual weight loss. He also called for collection of data on dieters' health problems, weight gain after participation and the drop-out rate.

Executives of Weight Watchers Inc., Jenny Craig International, The Diet Center, Physicians Weight Loss Centers and Nutri-System gave the panel versions of the pitches used to tout their service - all basically stating their diets are not offering quick fixes, but rather planned programs for achieving weight loss and developing good eating habits. They also dwelled on the seriousness of obesity.

Presidents of three medically supervised liquid diet programs - Optifast, Health Management Resources and Medifast - claimed their low-calorie diets are safe and effective.

Weight Watchers President Charles Berger said his company offers a ''go-slow'' weight loss approach, but that other companies have over-promised.

''There are no recognized speed limits. Weight loss claims should stay within speed limits,'' Berger said. ''It can't be left to industry self-policing.''

But Ellen Destray of Jenny Craig said her company supports privately funded research. ''We believe that responsible members of the industry can best define problems and propose effective solutions.''

However, Charles Sekeres of the Physicians program said no more regulation is necessary, although he said some ''guidance'' may be necessary.

''I do not believe that we need new laws and regulations in this area. We already have a regulatory framework in place,'' he said.

Wyden said he believes the industry can clean its own house but, ''if legislation is the only way patients can get the protection they deserve, so be it.''

The diet industry attracted 65 million Americans in 1989, generating $33

billion in revenues, Wyden said.

Wyden pointed out problems with many of the companies' ads, including claims of weight loss of more than one or two pounds a week, which he said is what medical experts recommend.

A Physicians Weight Loss Centers ad claim offers ''guaranteed weight loss of 3-7 pounds per week.'' Sekeres acknowledged that is the usual loss for an extremely obese person, not the typical program participant.

A Diet Center ad states a person can lose 10 pounds in two weeks, but Diet Center President Alan Stewart conceded that represents a first-week loss, not the amount for subsequent weeks.

A Jenny Craig ad shows a woman claiming to have lost 95 pounds in ''just over six months.'' Destray conceded that is not a typical for the program.

Also, Wyden produced letters from the American Heart Association, American Dietetic Association and American Medical Association that asked Nutri-System officials to stop referring to the groups in company ads.

#90127u2193 05/07/1990 ~United Press International

GREENBELT, MD (MAY 7) UPI - The Hubble Space Telescope could snap its historic first picture of the heavens as early as Friday, officials said Monday.

Operators at NASA's Goddard Space Flight Center planned to begin a 36-hour process Tuesday in preparation for the first picture.

The ''bootstrap'' process involves beaming computer commands to the telescope to practice positioning the 12-ton observatory, locking its sensors onto stars and focusing the so-called wide field planetary camera.

The camera is the instrument that will take the first image since the crew of the space shuttle Discovery placed the long-awaited telescope into orbit 381 miles above Earth on Apr. 25.

''We could take the first picture as early as Friday,'' said NASA's Mike Harrington, adding that officials should have a more definite idea of when the picture will be taken by the end of the day Tuesday.

''It could be as early as Friday but it might be Saturday,'' said Harrington.

The subject of the picture, which is intended as a test and not to produce any new discoveries, will be a 3 billion-year-old star cluster known as

NGC 3532, about 1,500 light years from Earth in the constellation Carina.

NASA had hoped to take the picture last week, but a series of problems in the initial stages of turning on the $1.5 billion telescope put what will be a painstaking eight-month process more than a week behind schedule.

Technicians have resolved most of the problems but were studying unusual movement in the telescope whenever it goes into or out of sunlight, Harrington said.

''It's just a very small disturbance ... that carries on for a few minutes '' Harrington said. ''It has something do with entering and exiting sunlight.''

Engineers Monday began sending 24 hours of computer commands to the observatory instructing it to continue finding and locking onto stars to test the craft's guidance system.

The telescope is expected to help astronomers gain fundamental new understanding about how the universe was formed, the age of the cosmos, how galaxies are structured and perhaps the ultimate fate of the universe.

Equipped with five highly advanced instruments and placed above Earth's obscuring atmosphere, the telescope will enable astronomers to study planets, stars and galaxies in greater detail than ever before.

#90127u2217 05/07/1990 ~United Press International
WASHINGTON (MAY 7) UPI - President Bush is willing to discuss raising taxes with congressional leaders during compromise budget talks but remains opposed to new taxes to reduce the deficit, the White House said Monday.

Bush wants to hold the deficit-reduction talks summit without setting any conditions, White House spokesman Marlin Fitzwater confirmed a day after top congressional leaders met with the president to explore procedures for reaching a budget compromise.

Democratic congressional leaders, who were unhappy with the results of similar budget talks last year, met Monday to discuss what tack to take in such a budget summit and to weigh Bush's willingness to consider every option.

''The only thing the president has decided is something needs to be done about the deficit, that the existing process has not produced results and we need to jump-start the system and come up with some kind of process that will produce a realistic budget,'' Fitzwater said.

While ''anything is available for discussions,'' Bush ''hasn't changed his mind on anything,'' including his 1988 campaign pledge of ''no new taxes '' Fitzwater said. He refused to speculate on where top-level budget talks may lead despite widespread concern that deep cuts in the deficit will be difficult without steeply increased revenues.

Senate Democratic leader George Mitchell of Maine, one of the four top congressional leaders to meet Sunday with Bush, said he detected no change in Bush's opposition to new taxes.

''All that's happened is the president has asked us to participate in discussions on the budget,'' Mitchell said. ''I recognize the desire to draw large and sweeping conclusions on events, but I find I have no basis for doing so.''

Mitchell, House Speaker Thomas Foley, D-Wash., Senate Republican leader Bob Dole of Kansas and House Republican leader Robert Michel of Illinois - the participants at the White House meeting - began consulting with their

members Monday about summit sentiment.

Most key congressional Republicans have pushed for a budget summit for weeks while Democrats, especially in the Senate, have been more reluctant, stemming from the unsuccessful results of last year's budget summit.

Last year's summit produced what participants called a ''slide-by'' package no one liked and which could not be implemented.

One key Capitol Hill staffer said a budget summit could start as early as this week - before the full Senate takes up the $1.2 trillion budget plan passed last week by the Senate Budget Committee.

The House last month passed its own $1.2 trillion spending plan for the fiscal year starting Oct. 1. Both Democratic-authored budget plans make deeper cuts in defense than Bush wants and both significantly rearrange the spending and savings priorities in the $1.2 trillion budget Bush submitted to Congress in January.

Fitzwater, at the White House, kept Bush's specific feelings on taxes ambiguous but noted that Bush's budget for fiscal year 1991 contained $13.9 billion in new taxes and revenues.

Tax increases often discussed on Capitol Hill include raising gasoline taxes, which bring in about $1 billion for every penny per gallon increase and which has some GOP support. Raising so-called sin taxes on alcohol and tobacco products also may have wide support.

A $5-a-barrel oil import fee, which would raise $8.5 billion in fiscal 1991 and $47 billion over five years, was defeated on a tie vote last week in the Senate Budget Committee.

Democrats want to correct what they see as an inequity in the 1986 Tax Reform Act in which those with the highest incomes pay a lower income tax rate than people making less.

Bush will likely push to cut the capital gains tax on profits from the sale of assets - a move he claims will spur economic growth and investment and create jobs. Democrats call it a money-losing break for the rich.

(MAY 7) UPI - White House spokesman Marlin Fitzwater says that while the Bush administration sympathizes with hostages held in Lebanon, the United States will continue its ''NO deal'' policy. Fitzwater re-affirmed Washington's stance following former American hostage Frank Reed's emotional appeal yesterday for negotiations.

The F-B-I says it arrested two Colombians in Florida this weekend and charged them with trying to buy ''Stinger'' anti-aircraft missiles and automatic weapons. One suspect was arrested in Miami and claimed to have close ties to the Medellin cocaine cartel. The second suspect was captured in Tampa.

Colombian special forces say they have made their biggest seizure of cocaine ever. The army raided a major drug traffickers' complex in the Amazon jungle and confiscated 14 tons of cocaine. The ''Operation Autumn'' bust resulted from two co-ordinated raids in dense jungles full of drug laboratories.

NATO Secretary-General Manfred Woerner is ruling out any possibility of Germany becoming nuclear-free, saying- ''It would NOT be acceptable to our alliance.'' Woerner met with President Bush and Secretary of State Baker in Washington today and later remarked that NATO is in a ''decisive'' phase of its history.

Conservative Christian Democrats have emerged as a strong favorite in East Germany's first municipal election since the communists were ousted from power last fall. Yesterday's election results are widely viewed as a test of Prime Minister Lothar de Maiziere's policies, which include rapid unification of Germany.

BELGRADE, YUGOSLAVIA (MAY 7) UPI - An opposition party of right-wing nationalists will have a majority in Croatia's Parliament after defeating Communists in the first free elections in the republic in 50 years, preliminary results showed Monday.

Multi-party elections have been held in only two Yugoslavia's six republics. They are the first multi-party elections in Yugoslavia since the Communists came to power in 1945.

In both Slovenia and Croatia, the most industrialized and liberal of the Yugoslav republics, the Communists were replaced by opposition parties in elections held last month.

In the first round of the Croatian elections April 22-23, the Croatian Democratic Community (HDZ) won 104 seats out of 131 that were decided. The remaining 225 seats were decided in elections last weekend.

Although the HDZ won 80 percent of the seats up for grab in the first round of voting, they were only expected to win 55 to 65 percent in the second round, according to election experts in Zagreb, the Croatian capital.

The results would be enough to give them control of the parliament.

''The results are preliminary and unofficial and it will be Wednesday or Thursday when more complete results (are available),'' said a leader the Croatian election committee said.

The new parliament is tentatively set to convene early in June.

Croatia, with a population of 5 million, is the second biggest state in Yugoslavia's loose federation, which has been undermined by feuding nationalist leaders struggling for power following Tito's death in 1980.

Serbia, with its 10 million people, is the biggest and most populous state in the federation. It held its single-party elections in November to strengthen the ruling Communist Party's power.

#90127u2253 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - Stock prices closed broadly higher Monday in light trading with many players out of the market awaiting the results of this week's Treasury auctions.

The Dow Jones industrial average, which rose 14.19 Friday, gained 11.26 to 2721.62.

Among broader market gauges, the New York Stock Exchange composite index rose 1.07 to 186.45 and Standard & Poor's 500-stock index rose 2.14 to 340.53. The price of an average share added 19 cents.

Advances led declines 942-564 among the 1,992 issues crossing the NYSE

tape. Big Board volume was 132,760,000 shares, compared with 140,572,830 shares traded Friday.

The Treasury's $30.5 billion quarterly refunding begins Tuesday with the sale of three-year notes, continues Wednesday with the sale of ten-year notes and wraps up Thursday with the auction of 30-year bonds.

Many investors headed for the sidelines Monday waiting to see how strong demand for the securities would be and what level of interest rates would attract investors.

Analysts said they expect the auction to be well received by investors since Friday's weak April employment data reduced the chances of a credit-tightening by the Federal Reserve, taking much of the upward pressure off interest rates.

Japanese investors normally buy about 30 percent of the securities auctioned during quarterly refundings. Japanese life insurance companies have said they would actively participate in the auctions starting Tuesday citing the recent surge in bond yields.

Yields fell sharply Friday after the weak job data. They rose slightly Monday to 8.84 percent as bonds lost 9/32 to 96 3/8. But the sharp rate drop took its toll on the dollar, which was down to 1.6552 marks in Monday afternoon trading from 1.6660 late Friday.

Edward Nicoski, chief technical analyst at Piper, Jaffray & Hopwood in Minneapolis, called the market's gains Monday an extension of last week's 65-point rally in the Dow industrials, but he said the dollar's weakness could stand in the way of further stock market gains.

"The dollar was very weak," he said. "The mark, the yen and the pound all pushed up through resistance levels. It'll be hard to maintain the rally with the dollar acting the way it is.

"Rates fell dramatically last Friday," he continued. "High rates and strong economic data had been the prop for the dollar. From a foreign standpoint, I can see money moving out here."

On the trading floor, National Semiconductor was the most active issue, up 1/4 to 7 1/8. Chase Manhattan followed, off 1/8 to 24 3/8. Hibernia was third, up 5/8 to 16 7/8.

Among the blue chips, AT&T lost 1/8 to 40 3/8, IBM was unchanged at 110 3/8, Woolworth gained 1/2 to 61 5/8, and Coca-Cola rose 1/2 to 78 3/4.

USX fell 1/2 to 33 1/2. Financier Carl Icahn, who wants to split the company into separate energy and steel operations, told stockholders

Monday his plan would bring them higher value and benefit the Marathon Oil Co. subsidiary.

Icahn spoke with reporters before addressing the company's annual shareholders' meeting. The success of Icahn's proposal will not be known for several days while ballots are counted.

Elsewhere, Greyhound lost 1 3/4 to 28 3/4. Standard & Poor's lowered the rating on Greyhound's senior notes and suggested that a Chapter 11 filing for protection from creditors should be considered to improve its chances of reorganizing.

Motorola gained 1 7/8 to 72 1/2, a new 52-week high. Many analysts are said to have made favorable remarks on the stock based on April order data.

And Imo Industries surged 2 1/2 to 18. Late Friday, Imo said a federal court had cut damages claimed against it by Long Island Lighting. The claim had been about $271 million.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 160,891,840 shares, compared with 168,162,660 shares traded in the previous session.

Prices closed higher in moderate trading on the American Stock Exchange. The Amex Market Value index rose 1.60 to close at 347.33. Advances led declines 310-258 among the 825 issues traded. The price of an average share rose six cents. Composite volume totaled 13,342,900 shares, compared with 14,282,920 shares traded Friday. B.A.T. Industries led the Amex issues, up 3/16 to 11 9/16.

The National Association of Securities Dealers composite index rose 2.60 to 431.21.

BONN, WEST GERMANY (MAY 7) UPI - West German Foreign Minister Hans-Dietrich Genscher said Monday the western part of Germany will remain in NATO after the country is unified, even if Soviet troops remain in the eastern section.

In a radio interview with the government-run Deutschlandfunk, Genscher said the six-power conference in Bonn last Saturday on German unity had produced a ''historic change'' by placing in German hands the decision on when unification will take place.

He did not answer directly the interviewer's remark that the conference had produced no practical solution to the problem posed by Soviet opposition to NATO membership for unified Germany.

But he said the series of six-power meetings to be held on the security issues and other talks on East-West relations will not block the reunification process.

Participating in the so-called two-plus-four talks were East and West Germany and the four World War II Allies - the United States, Soviet Union

Britain and France.

He conceded Soviet Foreign Minister Eduard Shevardnadze had not spelled out in detail his views on the security aspects of German unification.

The interviewer asked if Shevardnadze's reference Saturday to the continuation of security measures for a number of years after unification meant that the Eastern part of Germany would continue to belong to the Warsaw Pact.

Genscher replied that Shevardnadze had not outlined in detail his concept, but it appeared from a talk he had with Shevardnadze that the Soviet Union wanted to wait the situation in Europe to improve before tackling the complicated NATO issue.

''Let me remind you that the federal government in the last few weeks said again and again that it can imagine for a certain stage the presence of Soviet armed forces in the territory of what is now the German Democratic Republic,'' Genscher said.

''In any case, it is not disputed that when we are unified the Federal Republic of Germany, the part of Germany that is in NATO, also will remain in NATO.''

He added that this would require a lot of discussion.

Genscher called disarmament the key to both German and European unity.

He indicated his belief that unity and Soviet security interests would be served by East-West disarmament as well as expansion of the functions of the 35-nation Conference on Security and Cooperation in Europe.

''We do not want the Soviet Union to be pushed to the edge of Europe, but rather that it remain a part of the whole of Europe, the political Europe, too.''

West German Chancellor Helmut Kohl said the conference removed all obstacles to uniting the divided country, including an apparent easing of Soviet opposition to a unified Germany belonging to NATO.

''No more obstacles are in the path of realization of the right of self-determination of all Germans,'' Kohl said Sunday of the meeting of foreign ministers.

At Saturday's talks, Shevardnadze repeated Soviet opposition to NATO membership of a unified Germany. He called it ''a most negative idea'' that would threaten the security balance in Europe.

#90127u2286 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - The downward trend the dollar set last week continued Monday in New York trading as players aggressively sold the U.S. currency while keeping an eye on Group of Seven officials gathered in Washington.

Currency traders said the market is bearish on the dollar, an outlook that is not likely to change until U.S. economic data make a more convincing case for the Federal Reserve to push up short-term interest rates.

U.S. data last week showed poor employment growth in April and the jobless rate rose to 5.4 percent from 5.2 percent. Predictions the Fed would move to hike interest rates to dampen inflation were discredited.

With an immediate rise in U.S. interest rates virtually precluded, capital is seeking higher returns in European investments.

"They're selling dollars against everything against yen," John Fulton, chief dealer for the Bayerische Hypotheken-und Wechsel Bank, said, adding that there is little expectation Japan's currency will strengthen.

In late New York trading, the dollar was changing hands at 1.6560 West German marks, off a pfennig from 1.6660 marks Friday. Against the Japanese unit, the dollar fetched 158.20 yen, off only slightly from 158.25.

Chief dealer John Manno of Midland Bank said a new dollar-mark trading range could be established if the U.S. unit fell below 1.65 marks.

Participants were mindful of central bank and other officials of the Group of Seven industrial democracies in Washington after weekend policy talks but did not appear to be trading on their statements.

A G-7 communique issued after Sunday's formal meeting in effect said "nothing at all" about the yen, Fulton said, leading currency players to conclude central banks won't intervene strongly to boost it.

The G-7 statement, similar to the one issued following an April 7 meeting in Paris, alluded to possible "undesirable consequences for the global adjustment process" from yen weakness but did not suggest action.

Manno offered a caveat. "Nothing has changed - but I'm looking for some talk out of these officials over the next 24 hours," he said.

Other dollar rates: 1.4310 Swiss francs, down from 1.4430; 5.5620 French francs, off from 5.5930; and 1,214.50 Italian lire, down from 1,221.50. The British pound climbed to $1.6675 from $1.6640.

In European trading, the dollar declined on concern that rising unemployment in the United States will prevent an interest rate increase. London markets closed for a one-day bank holiday.

The dollar slipped in Frankfurt against a stronger West German mark, falling to 1.6550 against Friday's close of 1.6720.

The U.S. unit also fell in Zurich, to 1.4320 Swiss francs from 1.4540, and in Paris, to 5.5770 French francs from 5.6400. The dollar dropped in Brussels to 34.20 Belgian francs and fell in Milan to 1,218 lire against 1,231.20 - the latter the lowest dollar-lira rate since January 1988.

In Tokyo, the dollar declined to 157.80 yen from 158.55, the closing price of the last session Wednesday, mainly on the U.S. jobs data. Analysts said there was little reaction to the G-7 communique.

Republic National Bank in New York closed cash gold at $372.25 an ounce, up from $371 Friday. The New York Commodity Exchange settled spot gold at $371.90 an ounce, up from $370.90. In Zurich, gold rose to $372.50 an ounce from last week's $371.50. London gold stood at $371.25.

Republic closed cash silver at $5.05 an ounce, vs. $5.025. Comex spot silver ended at $5.016 an ounce, up from $5.00. Zurich closed silver at $5.07 an ounce, up from $5.05. London silver was at $5.06.

#90127u2292 05/07/1990 ~United Press International

MOSCOW (MAY 7) UPI - Latvia's new prime minister said Monday he is still hopeful Moscow will agree to talks on independence for the Baltic republic but a spokeswoman said the government is making plans to deal with a Soviet blockade.

Ivars Godmanis, leader of the nationalist Popular Front bloc in the republic's Parliament, said after his election Monday the republic is still waiting for an official response from Soviet President Mikhail Gorbachev to Friday's declaration of independence.

''What we have so far is totally unofficial,'' Godmanis said of a weekend statement by Latvian Communist Party leader Alfreds Rubiks that Gorbachev had rejected the declaration and said there was no chance of negotiations unless it was revoked.

Godmanis said in a telephone interview he hoped once Gorbachev had a chance to read the Latvian declaration of independence he would find it more moderate than that of Lithuania or Estonia and agree to negotiations.

''Just this morning we sent the official papers (declaration) to Gorbachev along with a letter,'' Godmanis said. ''I hope the official response will be different (than the rejection reported by Rubiks).''

Godmanis pointed out that a Latvian delegation had held talks with Soviet officials two weeks ago in Moscow and that more talks were scheduled May 15.

''We will see what happens,'' he said. ''If Moscow says they do not want to speak at all, then we will have something solid. Everything else is just emotions.''

Godmanis said he ''had no illusions'' that the road to independence would be easy, adding the new government had considered the possibility Gorbachev chose an economic blockade like he did against Lithuania.

''If he did the same thing (in Latvia) it would be very hard for us,'' Godmanis said.

A spokeswoman for the Latvian government, Marika Berzina, said earlier that the republic is working on a plan to deal with a possible blockade.

''The government is considering special controls on resources,'' Berzina said. ''There would be rationing (if a blockade was imposed).''

She added that, like Lithuania, Latvia was exploring direct deals with other Soviet republics for goods rather than going through the central authorities in Moscow.

The official Soviet news agency Tass said residents of the Latvian capital Riga went on a ''panic buying'' spree because of fears of a Soviet blockade, but gave no details.

Godmanis was elected Monday by a 131-45 vote with six abstentions in the Parliament that Friday passed a declaration of independence providing for a phased break from Soviet rule.

The new prime minister joins President Anatolijs Gorbunovs, a moderate independent Communist, at the top of the Latvian leadership that hopes to win a negotiated freedom from Moscow.

Despite Latvia's effort at moderation by providing for a transition period to independence, Rubiks said Gorbachev had rejected the declaration and ''reserves the right to adopt retaliatory measures.''

Rubiks said on Latvian television Saturday night Gorbachev had asked him to convey his dissatisfaction with the independence proclamation, which he said violated the Soviet constitution.

''Any negotiations, without a restoration of the state status of the Latvian Soviet Socialist Republic that existed before May 4, are out of the question,'' he quoted Gorbachev as having told him.

There has been no direct comment from Gorbachev on the Latvian declaration of independence, although in a speech to veterans Monday he criticized ''forces that would like to use the atmosphere of democracy, glasnost and freedom to implement their futile ambitious plans, including separatist plans.''

He said the separatists were pursuing an ''irresponsible policy leading to a deadlock.''

Gorbachev has refused talks with Lithuania on secession, and on April 18 he cut off all crude oil and stopped most other supplies of raw materials because of that republic's refusal to annul its March 11 declaration of independence.

The leaders of Latvia's new nationalist-controlled Parliament had hoped to avoid such a negative reaction from Moscow by drafting a proclamation of independence that excluded some of the more militant clauses in earlier declarations by neighboring Lithuania and Estonia.

Unlike the unilateral act passed in Lithuania, Latvia's declaration of independence provides for a transition period toward final secession from the Soviet Union.

And the Latvian deputies did not, as their Estonian counterparts did in a March 30 proclamation, declare all Soviet laws null and void on the territory.

#90127u2306 05/07/1990 ~United Press International

(MAY 7) UPI - Analysts are down-playing the one percent fall in America's productivity rate in the first quarter, saying much of it can be attributed to harsh weather during the beginning of the year. The Labor Department released the productivity rate today. It measures the relationship between worker output and labor time involved.

The Israeli Parliament opened its summer session today as thousands gathered outside and protested for electoral reform. Many Israelis are disillusioned by nearly two months of unsuccessful haggling to form a new coalition government. One Israeli says- ''Everyone is disgusted with what's going on.''

Police say at least seven people were killed and 14 others hurt in the

latest escalation of fighting between rival Christian forces in Lebanon. Forces of Christian leader General Michel Aoun and militia chief Samir Geagea today ripped through Beirut with tanks, multi-barreled rocket launchers and cannons.

Former U-S President Jimmy Carter is the recipient of the Philadelphia Liberty Medal. Members of the selection committee say they chose Carter for his active involvement in international issues and exemplary use of his status as a former president. The honor comes with a 100-thousand-dollar prize.

Climbers from the United States, the Soviet Union and China reached the summit of Mount Everest today, the first joint expedition for the three nations. Bad weather delayed the climb, which was supposed to co-incide with Earth Day celebrations on April 22nd. One of the climbers' goals is to clean up some of the trash left by previous expeditions.

#90127u2317 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - Two House members said Monday they will try to resurrect President Bush's clean air plan to require automakers to produce millions of cars that can run on low-polluting ''alternative'' fuels.

With the House scheduled to begin floor debate on its clean air bill later this month, Reps. Henry Waxman, D-Calif., and Jerry Lewis, R-Calif., said they would offer an amendment that would restore a modified version of the mass production requirement initially proposed by Bush.

While Bush's proposal called for production to begin in the late 1990s, the Waxman-Lewis bill would delay the startup date until the year 2000.

The auto industry vowed a vigorous lobbying campaign against the Waxman-Lewis initiative and kicked it off by releasing a survey that found widespread consumer reluctance to buy alternative fuel cars.

Industry officials said the poll of 900 people in six of the nation's smoggiest cities - Baltimore, Chicago, Houston, Milwaukee, New York and Philadelphia - found about 80 percent of those surveyed expressing concerns about the cost, practicality or reliability of ''clean-fuel'' cars and endorsing a go-slow approach to their development.

''The fate of alternative fuel vehicles hinges on consumer acceptance and consumers are flashing a yellow warning light,'' said Thomas Hanna, president of the Motor Vehicle Manufacturers Association.

The Waxman-Lewis initiative could heat up a House clean air debate that was widely expected to be quick and quiet because many of the most

contentious issues - such as acid rain - already have been settled through back-room negotiations that led to binding, bipartisan agreements.

However, alternative fuels are not subject to any agreements and environmentalists have been pushing hard for stronger provisions along the lines of legislation proposed by the president last summer.

The president's clean air plan called for automakers to produce millions of cars by the late 1990s that could run on cleaner-burning fuels such as grain-based ethanol, compressed natural gas or methanol, a derivative of natural gas or coal.

Bush's plan was touted as an innovative, low-cost way to reduce car pollution in the nation's nine smoggiest cities and, ultimately, all 101 cities now violating federal health standards.

However, Bush's proposal was scrapped by the House Energy and Commerce Committee during its clean air deliberations over the last year, largely due to strenuous opposition from automakers and oil companies.

The two industries, which both wield enormous influence on Capitol Hill, contended Bush's proposal was unrealistic because alternative fuel cars still had many safety and convenience problems, such as difficul cold weather starting, limited driving ranges and increased hazards during refueling.

Automakers also argued it was unfair to require them to produce the cars when they had no guarantee that consumers would buy them.

The clean air bill approved and sent to the House floor last month by the committee generally requires only expanded use of ''reformulated'' gasoline that can be used by existing cars.

Reformulated gasolines are cleaner-burning blends that have reduced contaminant levels but are not as low-polluting as alcohol fuels or natural gas.

The clean air bill approved by the Senate last month also focuses on greater use of reformulated gasoline rather than more exotic alternative fuels.

However, environmentalists say reformulated gasoline will not reduce car emissions enough to enable the nation's dirtiest cities to come into compliance with federal health standards for ozone smog.

Waxman and Lewis agree, citing similar conclusions in a recent study by the congressional Office of Technology Assessment that found as many as 50 cities could remain in violation of the ozone standard unless new

pollution control measures - such as alternative fuels - are developed.

#90127u2323 05/07/1990 ~United Press International
LOS ANGELES (MAY 7) UPI - Atlantic Richfield Co. shareholders, swayed by management arguments that the energy giant is doing what is right in the environmental arena, rejected a resolution Monday requiring the company to prepare an environmental report card twice a year.

The proposal, however, received more than 14 percent support from the shareholders, one of the largest positive responses among shareholders of major corporations to vote on similar resolutions.

ARCO management opposed the proposal, saying the company should have the sole responsibility for such decisions. "ARCO has a demonstrated record of environmental sensitivity and social responsibility," Chairman Lodwrick Cook told shareholders at ARCO's annual meeting.

Cook cited ARCO's introduction last year of a low-pollution lead-free gasoline for pre-1975 cars as an example of the company's effort to reduce smog.

However, Allen Cohen, speaking on behalf of United Ministries in Education a shareholder, contended that ARCO has done a poor job on environmental matters.

He said ARCO or its affiliates have been named as potentially responsible parties in 22 of the 1,200 dump sites on the National Priorities List of the federal Environmental Protection Agency.

Environmental groups in September conceived a "report card" for corporations that is designed to gauge a company's compliance with ten goals known as Valdez Principles, named after the Exxon Valdez disaster in Alaska. Amoco, Texaco, Chevron, Eastman Kodak, Aetna and Consolidated Paper have agreed to publish such a report card.

"We at ARCO are concerned about the environment and we are doing real things to improve it," Cook told shareholders. However, he did not specify how soon ARCO plans to introduce cleaner gasolines for newer cars - as was recently done by Shell Oil Co. - indicating that the company will wait until after a new federal Clear Air Act is approved before announcing another move.

Robert Wycoff, ARCO's president, said the company has been working on projects to improve gasoline quality at its refineries in Los Angeles and Cherry Point, Wash. The company plans to spend $305 million at the California facility and $835 million at Cherry Point in the next five

years, he said.

Wycoff said ARCO, through a strategy of high volume and low prices, has managed to increase its market share in the West Coast from ten percent in 1981 to more than 18 percent currently, more than any other marketer. He said the company will add about 50 of its AM/PM minimart sites per year for the next five years.

"The basic thrust of our program ... is grounded in our belief that growing demand for a cleaner, reformulated gasoline offers attractive investment opportunities," Wycoff said.

ARCO also reported Monday first-quarter earnings of $547 million, or $3.28 a share, off from $704 million, or $4 a share, in the 1989 first quarter. Revenues rose to $4.2 billion from $3.9 billion in the year-ago quarter.

Despite the decline in earnings, the company said its operating profits were up ten percent compared with the year-earlier period, excluding special gains and charges for both quarters.

"This was an outstanding first quarter as the result of strengthened crude oil prices, higher refined product prices and increased natural gas sales " said Cook.

WASHINGTON (MAY 7) UPI - Sen. Mark Hatfield, R-Ore., said Monday the United States should consider imposing sanctions against Malaysia to protest the Southeast Asian nation's decision to turn away thousands of Vietnamese boat people.

Hatfield told a hearing of the foreign operations subcommittee of the Senate Appropriations Committee that his staff is exploring ways for the United States to link Malaysia's refugee policies to its ablity to trade.

Hatfield said he would prefer not to punish Malaysia. But he said the time has come for ''stronger action'' and he won agreement from State Department officials at the hearing to discuss possible sanctions with his staff.

Southeast Asian nations and countries such as the United States with large populations from Southeast Asia agreed last June in Geneva that refugees should have the right to land in a given country.

But a Hatfield spokesman said more than 6,000 Vietnamese seeking asylum in Malaysia have been turned away and that some have died as they traveled in rickety boats to other countries in search of asylum.

Hatfield made his comments during a hearing at which both he and Sen. Patrick Leahy, D-Vt., the subcommittee chairman, criticized the Bush administration for not doing enough to help the growing number of refugees in the world.

Leahy said the United States spent about $20 per refugee in 1985 when there were 10 million refugees in the world. Last year, when there were 15 million refugees, the United States only spent $12 per refugee, he said.

Bush is seeking $475 million in the 1991 fiscal year for refugee programs.

#90127u2338 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - A hair sample taken from Mayor Marion Barry shows that he used cocaine ''repeatedly'' in the six weeks before his drug arrest on Jan. 18, federal prosecutors said in court documents filed Monday.

U.S. Attorney Jay Stephens also said the government has at least a dozen witnesses who will testify at Barry's scheduled June 4 trial that they either used drugs with Barry, received drugs from him or provided drugs to him in the District of Columbia, the Virgin Islands and the Bahamas.

The witnesses also will testify that Barry was a regular cocaine user since 1984 and that he ''frequently'' smoked crack cocaine beginning in 1987, the prosecutor said.

The documents, filed in response to motions from Barry's lawyer to have certain evidence disallowed, were potentially the most damaging yet in a series of pre-trial moves before U.S. District Judge Thomas Penfield Jackson, who is scheduled to hear Barry's trial on five misdemeanor cocaine possession and three felony perjury counts.

Stephens said the hair sample and testimony of prior drug use is needed to counter Barry's contention he was ''coerced'' or ''induced'' by former model Rasheeda Moore to use crack cocaine the night of his arrest.

Barry was arrested in an FBI sting operation at the downtown Vista International Hotel and was indicted Feb. 15.

An FBI surveillance tape of Barry and Moore during the sting operation captured conversations in which they ''talked about their previous cocaine use,'' the document said.

The motion, signed by Stephens and assistant U.S. Attorneys Judith Retchin and Richard Roberts, also said Moore will testify that from 1986 to 1988

she and Barry had a ''close, personal relationship'' and used cocaine, crack and marijuana on ''dozens of occassions.''

An FBI expert witness will testify that scientific analysis of a hair sample taken from Barry the night of the arrest showed the mayor used cocaine for a ''considerable period of time immediately prior to his arrest.''

Stephens called the hair sample ''extremely persuasive evidence that he was not induced to smoke crack against his will.''

Barry's lawyer, R. Kenneth Mundy, wants Jackson to forbid prosecutors to introduce the hair sample as evidence.

Mundy said the hair sample cannot specifically show drug use from the night of Barry's arrest, and cannot date back to December 1988, when Barry is charged with possessing crack cocaine with former city worker Charles Lewis at a downtown Ramada Inn.

Stephens said the hair sample ''is hard evidence based upon the concrete results of a scientific test and it directly establishes that the defendant used cocaine in the weeks immediately preceeding his arrest.''

''In addition, the evidence is unequivocal. It is limited to proof of the defendant's cocaine use for a period of six weeks only because of the length of the hair sample available for scientific analysis.''

Barry's spokeswoman, Lurma Rackley, said Barry would have no comment.

Besides the five cocaine possession counts, Barry, 54, is charged with lying to the grand jury when he testified in January 1989 he did not use drugs with Lewis or have knowledge of drug involvement by Lewis. If convicted of all charges, he could be sentenced to 20 years in prison and fined $1.25 million.

He would be precluded from holding office only if jailed after a felony conviction. Barry has not announced if he will seek a fourth term.

In other motions filed Monday, Stephens argued against Mundy's request to have the single cocaine possession count from the Vista Hotel arrest severed from the other seven.

Jackson has set a May 25 hearing on the motions.

(MAY 7) UPI - Crude oil prices closed higher after a late rally Monday on the New York Mercantile Exchange, but trading volume remained low in the absence of any major developments.

The brief rally also helped push product prices up on the Merc.

The Merc's slow activity also reflected the closing of the London markets which were observing a banking holiday. Only about 50,000 crude oil contracts were traded on the Merc, against a normal daily volume of about 75,000 contracts.

The benchmark West Texas Intermediate crude for June delivery gained 29 cents to settle at $18.27 a barrel. WTI prices declined sharply last week in response to a less-than-expected production cutback announcement by the Organization of Petroleum Exporting Countries.

Unleaded gasoline for June delivery, which rose sharply last week on rumors of problems at refineries of some of the major U.S. companies, added another 0.74 cent to 61.86 cents a gallon.

Heating oil, which closed lower Friday, added 0.49 cent Monday to settle at 50.44 cents a gallon.

''The crude oil market was very quiet today because London was closed,'' said one trader. ''The volume was good on the opening but then became quiet. There was little by way of developments.

''Everyone is waiting for OPEC to make the next move and who knows when that will come.''

Last week, OPEC members announced that an agreement to cut the cartel's output by 1.5 million barrels a day should shore up sagging prices in the next several weeks.

But it had little effect on the markets and WTI prices fell 69 cents a gallon on Thursday. The market expectation was that the cartel would cut output by a greater amount to stem the current glut of about 2 million barrels above OPEC's self-imposed quota of 22 million barrels a day.

On the U.S. Gulf Coast cash market, WTI added 30 cents to $18.30 a barrel.

On the European spot market, Britain's widely traded North Sea Brent gained 35 cents to $16 a barrel.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - also gained 20 cents to $14.40 a barrel.

Separately, petroleum industry leaders meeting in Houston for the Offshore Technology Conference praised the Department of Energy's initiatives to help U.S. energy companies become more competitive worldwide.

''This is a refreshing change - and very, very important because, regardless of the outcome of the offshore leasing controversy here in the States, the bulk of our future work is going to be overseas,'' said Thomas Bowersox, chairman and chief operating officer of Zapata Offshore Co.

The DOE wants U.S. companies to receive fair business opportunities in overseas oilfields, said spokesman Thad Grundy. He said his office plans to use its contacts with all energy-producing and -consuming countries to ensure U.S. companies get the same advantages in other countries as other companies do in the U.S.

JERUSALEM (MAY 7) UPI - Israel offered Monday to release Lebanese Moslem prisoners whose freedom is demanded by pro-Iranian kidnappers holding Westerners in Lebanon, but only if Israeli soldiers captured in Lebanon are also freed.

''Israel again declares its readiness to release Lebanese detainees it holds in exchange for the return of all its prisoners and those missing in action,'' said acting Prime Minister Yitzhak Shamir's spokesman, Avi Pazner.

Israel wants the return of three Israeli soldiers who disappeared in Lebanon and are believed to be held by pro-Iranian Shiite militias. Past offers to swap the soldiers for about 400 Lebanese Shiite Moslems held in southern Lebanon by Israeli-controlled militias have been ignored.

Iran and its allies in Lebanon have said the release of more Western hostages, including the five U.S. citizens still held, depends on a ''goodwill gesture'' from the West that should begin with the release of Moslems held by Israel.

President Bush last week called for the release of all hostages, saying he considers the 400 Lebanese Shiite Moslems as hostages. Israel also is holding Sheikh Abdel Karim Obeid, kidnapped by Israeli commandos last July in southern Lebanon.

Pazner said the Israeli statement was in response to recent remarks made in the United States on the hostage issue, apparently referring to Bush' remarks and a blunter call by Sen. Patrick Moynihan, D-N.Y., for Israel to release its Lebanese prisoners.

In his statement, Pazner called for the release of Israeli prisoners and all hostages ''kidnapped by the Hezbollah organization and Lebanese organizations affiliated with it,'' and he said Israel was willing to take part in any move that would bring about their freedom.

Israel also strongly denied that the Shiite prisoners were hostages and said they could not be compared to the Westerners held in Lebanon for political or financial reasons.

''Israel emphasizes that the detainees held by it are not hostages but terrorists belonging to terrorist organizations or those who assisted these organizations in their activities,'' Pazner said.

''Therefore there is no room for any comparison between them and the hostages who are innocent citizens kidnapped by the Hizbollah organization and Lebanese organizations affiliated with it under Iranian guidance.''

#90127u2419 05/07/1990 ~United Press International

MEXICO CITY, MEXICO (MAY 7) UPI - Nearly 1 million Mexican faithful hailed Pope John Paul II Monday at an impoverished town east of the

capital, receiving a message of hope and commiseration from the head of the Roman Catholic Church.

The pope, who met privately for an hour with President Carlos Salinas de Gortari early Monday, likened the million or so followers from Chalco and neighboring Nezahualcoyotl to ''sheep without a shepherd.''

John Paul arrived in Chalco, a town on the southeastern edge of Mexico City, by helicopter at 9:45 a.m. and was welcomed by about 100 Mexican mariachi musicians.

The pope was taken to the site of the open-air mass in his converted pick-up popemobile, where he was greeted by a subdued crowd, clapping quietly and waving the yellow scarves supplied with their seat tickets.

''In many of you I discover ... the faces of children victims of poverty, abandoned children with no school, with no healthy family atmosphere,'' John Paul said.

He cited problems of unemployment, underemployment, lack of opportunity and ''badly paid workers who have difficulties organizing and defending their rights.''

The pope said the church ''wants to be the voice for those who have no voice,'' and stressed evangelization as ''the best service for a brother.''

''What sensibility, and humanity than of Jesus, whose preaching of the Kingdom of God does not make him forget the need for the daily sustenance of those who follow him,'' John Paul said. ''Also today in Chalco, Jesus is the good shepherd.''

Margarita Hinojosa of the Federal District said she and her neighbors arrived at the site at 7 p.m. Sunday.

''It rained all night while we were lined up with everybody falling in the mud, but we kept singing throughout,'' Hinojosa said, adding she expected ''just a smile'' from the pope.

Maria del Socorro, of Nezahuacoyotl, said she had trudged 3 miles through the mud after her bus left her in the rain. ''This is a thing that we poor people never get to see,'' she said.

Salinas received John Paul at his official residence, Los Pinos, in the morning and presented him with a rare book titled ''Mexico - Territorio de Solidaridad,'' or ''Mexico - A Territory of Solidarity.''

The hand-written, leather-bound volume is the only such copy of the work available and includes texts from Aztec poets as well as the works of

contemporary writers like Octavio Paz and other Mexican intellectuals.

During the meeting, the two discussed changes in both Mexico and Eastern Europe, the indigenous cultures of Mexico and problems of too much consumerism, according to a presidential statement.

''They spoke of the risks represented by consumerism and individualism in this age, and the need to ... strengthen the concept and application of solidarity,'' the statement said.

John Paul, on his 47th trip abroad since being elected pope and his second visit to Mexico, will travel to 11 cities during his week-long pilgrimmage.

Salinas officially received John Paul on his arrival Sunday, calling the pontiff ''a friend of Mexico and pilgrim of peace.''

Mexico does not have diplomatic relations with the Holy See but more than 90 percent of its approximately 85 million people are Roman Catholic.

In February, Salinas named Agustin Tellez Cruces as his ''personal representative'' to the Vatican, leading to speculation in Mexico about a possible reestablishment of full diplomatic relations.

Government officials have said they will not alter Article 130 of the constitution, which maintains the separation of church and state established in 1857 after Mexico's independence from Spain.

Later articles ban public religious ceremonies and prohibit priests from voting or wearing religious robes in public.

#90127u2435 05/07/1990 ~United Press International

MOSCOW (MAY 7) UPI - President Mikhail Gorbachev criticized nationalists in the Soviet Union Monday for using ''the atmosphere of democracy, glasnost and freedom'' to push for independence from Moscow.

Gorbachev, speaking to a gathering of veterans in the Kremlin during celebrations marking the end of World War II, said those intent on seceding from the Soviet Union are pursuing an ''irresponsible policy leading to a deadlock.''

The account of Gorbachev's speech by the official news agency Tass did not mention any particular separatist group. There are strong independence sentiments in several areas of the Soviet Union, most notably the Baltic republics of Lithuania, Estonia and Latvia, which have each declared independence in the last several months.

Gorbachev said the nationalist groups should work with him on a plan for a ''new union of republics'' rather than pursuing independence.

''A unique society, in which hundreds of peoples live, has been created in the country by the efforts of generations,'' he said. ''(But) there are forces that would like to use the atmosphere of democracy, glasnost and freedom to implement their futile ambitious plans, including separatist plans.''

Gorbachev also criticized protesters in last week's May Day parade who booed him and other leaders and carried placards bearing what he called ''extremist slogans.''

He said his policy of perestroika, or economic and political restructuring had reached a critical point and that its success would allow the country to ''solve the difficult problems facing it,'' according to the Tass account.

At a separate meeting at a watch factory in Moscow, Gorbachev told workers they should not be afraid of planned economic reforms.

''We should go toward the market, do not be afraid of the market,'' Gorbachev said. ''The market is a normal thing. If there is production, there should be exchange of products. That can be done through the market.''

The Soviet leader repeated the assurances he gave workers in the Urals last month, telling employees of the watch factory the transition to a market economy would be gradual and there would be safeguards against inflation and unemployment.

''We shall have to think through and through a dependable system of social protection for the period of transition to the market economy,'' Gorbachev said. ''This process, naturally, will not be painless, but I believe we shall be able to traverse this path with minimum losses.''

Gorbachev's top economic adviser, Leonid Abalkin, said Monday that plans for implementing the economic reforms were not yet in place.

''We are absolutely clear about which economic model we want to build, how we want it to function and what shock-absorbers we need,'' Abalkin said. ''What we lack so far is a plan for the transition process itself.''

#90127u2467 05/07/1990 ~United Press International

WASHINGTON (MAY 7) UPI - The United States wants to significantly increase the number of military trainers assisting Bolivia in its war

against drug cartels, senior administration officials said Monday.

On the eve of Bolivian President Jamie Paz Zamora's meeting Tuesday with President Bush, officials said the current number of 20 to 50 trainers, who enter and leave Bolivia on a rotating basis, may double or even triple.

One official said training would range from how to maintain and fly a helicopter or a fixed-wing plane, to how to conduct a river patrol.

The United States has provided Bolivia with such assistance since the Reagan administration, but Bush wants to expand it as part of his overall Andean drug strategy.

Speaking with reporters on the condition they not be identified by name, U.S. officials acknowledged that Bolivia, like other Latin American nations, is sensitive to any appearance of U.S. military operations within its borders.

Consequently, they said, U.S. military personnel would be limited to providing training and technical assistance. They would not serve as advisers or participants.

Afterward, other officials stressed that the planned increase in the number of military trainers would be done in consultation with the Bolivians and that the exact number has not yet been decided.

''This will reflect the crackdown in the drug war,'' said one official, predicting that more U.S. personnel would be provided within a matter of months.

U.S. efforts to escalate the militarization of the drug war is causing some concern. Aides to Paz Zamora have been quoted as saying he may tell Bush that the more important thing to do is to promote social and economic development.

The Bolivian president wants to accelerate a successful crop substitution program that has seen peasant farmers stop growing coca - the raw material for cocaine - in favor of other products.

Farmers are paid $2,000 per hectare, about 2.5 acres, to tear up coca and plant other crops like flowers and oranges. With the price of coca falling farmers are eager to sign up. Yet, thousands still grow coca for the cartels.

Amid reports Paz Zamora will appeal to Bush to increase financial help, officials noted that U.S. aid to Bolivia is already scheduled to nearly double in fiscal 1991 to $150 million.

''We're certainly looking for additional ways to be supportive,'' said one official, adding that rescheduling payments on Bolivia's debt ''is one way.''

During the next five years, Bush has committed about $2.2 billion in the drug war in Bolivia, Colombia and Peru, the Andean nations that produce virtually all of the world's cocaine. The United States is the biggest consumer.

On Feb. 15, the presidents of the four nations held a drug summit in Cartagena, Colombia, where they signed an agreement to escalate their joint anti-narcotic efforts.

Paz Zamora, during his meeting with Bush, was expected to sign accords on additional drug-fighting programs and discuss foreign investment and bilateral trade, officials said.

#90127u2471 05/07/1990 ~United Press International
(MAY 8) UPI - DIGEST:

Baseball

Oakland's Rickey Henderson and the Chicago Cubs' Ryne Sandberg were named American and National League Players of the Week. Henderson went 12-for-24 and hit four homer runs, including two leadoff homers to extend his record to 43. Sandberg also batted .500 for the week and extended his errorless streak to 113 games.

Basketball

The University of Missouri released a letter from the NCAA - with names blacked out - that outlined 15 allegations against the basketball program. The school promises to respond in time for an NCAA meeting in August. ... Bo Kimble of Loyola Marymount, Travis Mays of Texas, Bimbo Coles of Virginia Tech and Sean Higgins of Michigan are the latest players to join the ''One on One Collegiate Challenge'' on June 25 in Atlantic City, N.J. The winner gets $100,000 and the runner-up $50,000.

Cycling

Pascal Poisson of France edged amateur Paul McCormack by two feet to win the sixth stage of the Tour de Trump, a Virginia leg from Charlottesville to Winchester. Todd Gogulski of Sante Fe, N.M., was with the lead group for almost 50 miles before tiring and falling back to third.

Gymnastics

Svetlana Boginskaya, 17 of the Soviet Union swept the European Women's Gymnastics Championships in Athens. Compatriot Natalia Kalinina was second and Henrietta Onodi of Hungary third.

Hockey

Coach Terry Crisp, who guided the Calgary Flames to the 1989 Stanley Cup, was fired for failing to take his team past the first round of this season's playoffs. Crisp coached the Flames for three years and compiled a 144-63-30 record. The Flames were twice regular-season champions and finished second this past year. Crisp's downfall was his playoff coaching record - 15 wins in 37 games.

Horse Racing

The Jockey Club, citing a study it commissioned by the University of Pennsylvania, says New York racing is correct in banning Lasix. The drug is administered to many horses to prevent lung bleeding. Horses may use Lasix at the Kentucky Derby and Preakness, but may not do so 48 hours before racing in New York.

Law

Los Angeles Rams offensive lineman Doug France was involved in a weekend accident that killed another motorist. The California Highway Patrol said it will seek a felony drunken driving charge. France suffered a concussion and fractured pelvis during the accident in Mission Viejo, Calif.

Soccer

The president of European soccer's governing body says he had been ''naive'' in believing hooliganism was under control in England. About 5,000 Leeds United fans caused riots at Saturday's Second Division game against Bournemouth.

... Mike Berticelli, the coach at Old Dominion, was named soccer coach at Notre Dame.

Track and Field

Pittsburgh Marathon officials called the death of two runners in Sunday's race an ''unfortunate incident,'' but said they followed proper medical procedure in allowing the runners to enter.

#90127u2487 05/07/1990 ~United Press International

DETROIT (MAY 7) UPI - The Federal Trade Commission announced Monday plans to investigate certain business practices by foreign automakers operating in the United States, including possible anticompetitive links with Japanese auto parts suppliers.

In particular, the FTC will look at ownership interests, supply contracts and any evidence of discriminatory pricing to see if such practices exclude or limit the ability of U.S. companies to compete effectively.

FTC Chairman Janet D. Steiger, in testimony delivered late last week at the request of House Judiciary Chairman Jack Brooks, said the commission will examine allegations Japan's ''keiretsu'' system of cross-ownership of Japanese auto parts suppliers may now be occurring in the United States.

Keiretsu is defined as an intermixing of companies through equity exchanges, intra-group financial commitments, joint research efforts and memberships in exclusive councils or clubs.

In the auto industry, these relationships are usually between manufacturers and suppliers.

Top Japanese carmakers Toyota, Nissan, Honda and Mazda, as well as several smaller companies, have developed manufacturing operations both in the United States and Canada in recent years.

Several of those companies had no immediate comment on the probe.

Steiger said the investigation, requested by the House Judiciary and Senate Commerce committees, would be pursued by the FTC's Bureau of Competition and Economics ''in a complementary fashion.''

The FTC will focus on the economic implications of the keiretsu system or a variation for automobile manufacturing and question whether such practices constitute violations of U.S. law.

Stieger declined to say when the investigation would be completed but noted that ''an inquiry of this scope will require a considerable amount of time and resources.''

-30- 2071

#90127u2584 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - The nation's black-owned businesses posted revenues of $6.81 billion in 1989, up just 0.3 percent over 1988, according to a report released Monday by Black Enterprise magazine.

The magazine's editor and publisher blamed the economic climate and governmental policies for the flat performance by black-owned businesses.

''A sluggish economy has wreaked havoc on major industrial sectors - from auto manufacturing to finance,'' Earl G. Graves said in a statement.

''And the Reagan administration's legacy of exclusion has been realized with the subsequent retrenchment of affirmative-action plans and minority business set-aside programs.''

In 1988, black-owned buinsses showed revenues of $6.79 billion, according to the magazine's ''Annual Report on Black Business.''

''Black entrepreneurs will have to rethink their strategic focus and restructure their organizations if they are to keep their competitve edge and reap profits from the ensuing chaos,'' Graves said. ''In other words, black business is going to have to get leaner, stronger, better.''

Heading the magazine's list of the nation's top 100 black-owned industrial-service companies was TLC Beatrice International Holdings Co., a New York-based foods processor and distributor, which had revenues of $1.5 billion.

Ranked second was Johnson Publishing Co., Chicago, with $241.3 million in revenues.

Average sales among the industrial-service companies was $34.1 million, the report said.

Thirty-seven companies were new to the magazine's top 100 list, including New York-based Granite Broadcasting Corp., which posted $38.6 million in sales last year to rank 18th.

Shack-Woods & Associates, of Long Beach, Calif., ranked No. 1 on the magazine's list of the nation's top 100 black-owned automobile dealerships.

Seaway National Bank of Chicago ranked first among black commercial banks, with total assets of $163.8 million.

The report will be included in the magazine's June issue, which goes on sale May 24.

#90127u2627 05/07/1990 ~United Press International

FORT LAUDERDALE, FL (MAY 7) UPI - American Telephone & Telegraph Co. said Monday it plans to open a telemarketing center in south Florida within the next 60 days, in a move that will create 1,000 new jobs in the region.

The telecommunications giant, which currently employs about 2,500 in south

Florida, said the center will operate as part of its subsidiary, AT&T American Transtech of Jacksonville.

AT&T American Transtech is a direct marketing and financial services company. The company, which employs 3,200 in Jacksonville, recently announced it will add 450 jobs in that city.

AT&T said it chose to locate the facility in Fort Lauderdale because an existing company facility in the city can accommodate the operations.

The center, which will operate two daily shifts of 500 workers each, is expected to become operational by July 1, the company said.

#90127u2641 05/07/1990 ~United Press International

NEW YORK (MAY 7) UPI - A Bear Stearns executive and three others have been indicted in a $1.6 million embezzlement and money laundering scheme.

Named in a May 1 indictment filed Friday were: Joseph Stella, 46, of Staten Island, vice president and manager of the stock loan department of Bear Stearns & Co.; his attorney and brother Fred Stella, 50; and his client, Roger Capozzi Sr.

Charged with conspiracy to obstruct justice, perjury and obstruction of justice, they were to be arraigned Tuesday in U.S. District Court in Manhattan.

A fourth defendant allegedly involved in the scheme, Joseph Pontarelli, 47 of Manhattan, was charged with filing a false tax return and income tax evasion in connection with fees received for cashing checks through Manhattan-based BEA Trading Co., according to the indictment.

The four laundered more than $1.6 million in checks resulting from an alleged embezzlement of securities from Bankers Trust Co. and fees from stock loan transactions, according to the indictment.

Capozzi allegedly cashed checks for Fred Stella through Pyramid Trading Co., Inc., a Brooklyn clothing embroidery business.

Joseph Stella faces up to five years in prison and a $250,000 fine, while Fred Stella faces 30 years and a $1.5 million fine. Capozzi faces 35 years and $1.75 million in fines and Pontarelli eight years and $500,000, said Jess Fardella, the U.S. Attorney prosecuting the case.

Three of those charged in the actual embezzlement pleaded guilty and were placed on probation.

#90127u2660 05/07/1990 ~United Press International
(MAY 7) UPI - President Bush still says ''NO deals for hostages''... communists finish last in East German local elections... Latvia has a new prime minister... and heavy damage from Arkansas River floods. Those stories and more, next from U-P-I.

The White House is standing firmly by its decision NOT to negotiate the release of the remaining American hostages being held in Lebanon.

Spokesman Marlin Fitzwater today expressed sympathy for what he called Frank Reed's ''torturous and brutal ordeal.'' But Fitzwater added that Reed's tale of beatings and suffering only re-confirmed the administration's position.

In Fitzwater's words- ''Terrorists canNOT be rewarded for blows they strike at Frank Reed's body.''

He once again called for the ''unconditional release'' of all remaining hostages. Fitzwater also warned Iran and Syria that relations with the United States will NOT improve until the captives are freed.

Fitzwater said President Bush is ready to meet with Reed ''when he's ready '' but noted that a meeting has NOT yet been set up.

In Lebanon, a pro-Iranian Shiite leader told U-P-I he's calling on the Moslem captors of 16 Westerners NOT to release any more hostages until the United States responds to the release of Robert Polhill and Frank Reed.

-30- 1449
#90127u2680 05/07/1990 ~United Press International
(MAY 7) UPI - Final results from yesterday's municipal elections in East Germany show the conservative Christian Democrats winning with slightly more than 34 percent of the vote.

The conservatives won by a smaller margin than many expected, suggesting voter concern about economics and job security for East Germans in a unified Germany. The elections were seen as a test of Prime Minister Lothar de Maiziere's policies.

He favors swift social, economic and political re-unification with West Germany.

When asked about the election results, De Maiziere said- ''We shall have to consider why we received a lower share of the vote today.''

The Social Democrats, the second-largest party in De Maiziere's coaltion government, came away with more than 21 percent of the ballots cast. The communists suffered a stunning defeat, with only 14-point-six percent of the vote.

The communists lost power in the March 18th elections, East Germany's first free vote.

#90127u2724 05/07/1990 ~United Press International
(MAY 7) UPI - Latvia's Parliament elected Ivars Godmanis today as the country's new prime minister. Godmanis is the deputy chairman of the nationalist Popular Front, which favors a gradual secession from the Soviet Union.

The Parliament voted 131-45 with six abstentions in favor of Godmanis. The vote came three days after the Baltic republic joined Lithuania and Estonia in declaring independence from Moscow.

The new prime minister joins President Anatolijs Gorbunovs , a moderate independent Communist, at the top of Latvia's leadership.

Latvia tried to soften its stance by calling for a transitional period and talks with Moscow. But President Gorbachev responded by saying he ''reserves the right to adopt retaliatory measures''.

Gorbachev's statement implies Latvia may suffer the same kind of limited economic blockade as Lithuania.

Authorities in Arkansas are warning residents on the Arkansas River to prepare for what may be the worst flooding in 63 years.

Already, at least 200 people have been evacuated from river-side homes, while National Guard and U-S Marine reserve troops continue to stack sand bags and build dikes.

Flood waters so far have caused Millions of dollars in damage to homes, roads, bridges and buildings.

Emergency Services spokesman Gary Talley says he's NEVER seen so much water in his life.

And one resident near Little Rock says water moccasins are now swimming in what used to be his back yard.

Police report NO flood-related injuries or deaths, but say the river is NOT even expected to peak until Wednesday.

#90127u2776 05/07/1990 ~United Press International
WASHINGTON (MAY 7) UPI - Grappling with a number of thorny issues, industrialized and developing nations reached a definitive agreement

Monday night on increasing the International Monetary Fund's $120 billion of capital by 50 percent, said Antonio Herman Gonzalez, Argentina's economic minister.

Gonzalez also confirmed that the next time an increase in IMF capital would be considered would be 1993, rather than the 1995 date sought by U.S. Treasury Secretary Nicholas Brady.

Earlier, before the IMF's Interim Committee, Brady also made a proposal, endorsed by other industrial democracies, calling for increasing IMF resources by 50 percent, or $60 billion. Developing nations were looking for a doubling of the fund's capital.

Gonzalez said agreement was also reached on including in the IMF's statutes a provision for suspending the voting rights of countries in arrears to the fund that do not accept IMF-backed economic programs aimed at addressing the arrears.

A communique on these points was being drawn up by negotiators late Monday.

#90127u2780 05/07/1990 ~United Press International

(MAY 7) UPI - NATO Secretary-General Manfred Woerner is ruling out the idea of a nuclear-free Germany. He says it's highly unlikely that the alliance will unilaterally withdraw short-range nuclear weapons.

Woerner met today with President Bush and Secretary of State Baker, and tomorrow will accompany Defense Secretary Cheney to a NATO Nuclear Planning Group meeting in Canada.

Defense ministers from the 16-nation alliance are expected to re-think NATO policy in the context of a dramatically different Europe.

It's the first ministerial-level meeting since Bush last week announced the cancellation of U-S plans to modernize ''Lance'' short-range missiles and nuclear-tipped artillery in Europe.

Woerner told reporters that while changes are expected, NATO will continue to maintain a combination of conventional and nuclear weapons.''

Mountain climbers from the Soviet Union, China and the United States have reached the summit of the world's highest peak.

Six climbers from the joint expedition reached the top of Mount Everest in Nepal earlier today. It's the first joint expedition by the three world powers... and was co-ordinated to underscore peace and environmental concerns.

The team originally planned to reach the top of Mount Everest on Earth Day because members wanted to collect the trash left by previous groups. But bad weather and high winds delayed their climb.

Expedition leader Jim Whittaker said by satellite phone that it took the climbers four hours to climb the final 600 feet.

Whittaker also confirms that there are ''tons of garbage'' on Everest.

The tri-national team will either burn it, bury it or haul it down.

NEW HAVEN, CT (MAY 8) UPI - Yale University received its largest gift in more than two decades Monday, a $20 million donation from the heirs of a Texas oil baron to establish a school to study, research and preserve the environment.

The gift to establish the Yale Institute for Biospheric Studies was the first in a series to be made by the Bass family of Fort Worth, Texas, said Yale President Benno C. Schmidt Jr.

''This gift powerfully enhances Yale's capacity to meet its responsibilities for academic leadership in an area of the utmost importance to the future of humanity and of the earth that is our home,'' Schmidt said at a news conference.

The gift to establish the biospheric studies institute was presented to Schmidt by Edward P. Bass, a great-nephew of legendary oil baron Sid Richardson, who helped start the Texas oil fields in the 1930s.

''I am convinced the future of life on this planet urgently requires the most sophisticated research and teaching to increase our understanding of the biosphere in all its complexity and diversity,'' said Bass.

Bass is chairman of Space Biospheres Ventures, the developer of Biosphere II, a major research and development project in closed system ecology located near Tucson, Ariz.

The Bass Foundation was set up in 1945 in Texas to support the arts and cultural foundations along with conservation projects.

#90127u2914 05/07/1990 ~United Press International

NEW YORK (MAY 8) UPI - ''Grand Hotel, The Musical'' and ''City of

Angels'' got 1989-90 Tony Award nominations Monday for Best Musical, and ''The Grapes of Wrath'' and ''The Piano Lesson'' were nominated for the Best Play award.

Nominations in 19 categories for the American Theatre Wing and the League of American Theaters and Producers's 44th annual Antoinette Perry awards were announced at Sardi's restaurant by this year's hostess, Kathleen Turner, who had the pleasure of reading her own nomination.

''Grand Hotel,'' directed and choreographed by Tommy Tune and set in an Berlin hotel in the 1920s, collected 12 nominations, the most for any production, while ''City of Angels,'' the musical comedy spoofing private-eye films of the 1940s, scored 10 nominations.

''Aspects of Love,'' the latest Andrew Lloyd Webber offering directed by Trevor Nunn, received six nominations.

All three musicals were nominated for Best Musical, Best Book, Best Original Score and Best Direction.

Ballots go out this week to 661 journalists and members of the theatrical profession. Winners will be announced June 3, at the Lunt-Fontanne Theatre in a ceremony to be broadcast live on CBS.

Theater offerings that opened in one of 38 eligible Broadway theaters between May 4, 1989, and May 2, 1989, were eligible for nominations.

''Gypsy,'' which received five awards, ''Sweeney Todd,'' ''The Circle,'' and ''The Merchant of Venice'' were named in the Best Revival of a Play or Musical category.

''The Grapes of Wrath,'' the ambitious stage presentation of the John Steinbeck novel, was nominated in eight categories, the most for a dramatic production, including Best Play, two Featured Actor and one Featured Actress nominations.

Other Best Play nominations included ''Lettice & Lovage,'' ''Prelude to a Kiss,'' and ''The Piano Lesson,'' which is enjoying a fine run after winning this year's Pulitzer Prize for author August Wilson.

Two film stars who made big splashes on Broadway translated their appeal on the screen into recognition on stage.

Dustin Hoffman, portraying Shylock in Shakespeare's ''The Merchant of Venice,'' and Turner as Maggie in a revival of Tennessee William's ''Cat on a Hot Tin Roof'' received respective nominations for Best Actor and Actress in a Play.

Charles Dutton in ''The Piano Lesson,'' Tom Hulce in ''A Few Good Men'' and Robert Morse in ''Tru'' were nomination for Best Leading Actor in a Play.

Maggie Smith for ''Lettice & Lovage,'' Mary-Louise Parker in ''Prelude to a Kiss,'' and Geraldine James in ''The Merchant of Venice'' were named for the Best Leading Actress in a Play.

Competing for the Best Actor in a Musical are James Naughton and Gregg Edelman in ''City of Angels,'' David Carroll in ''Grand Hotel'' and Bob Gunton in ''Sweeney Todd.''

Tyne Daly, the lead in ''Gypsy,'' is the early favorite to capture the Best Actress in a Musical. Also nominated for the award were Liliane Montevecchi in ''Grand Hotel,'' Beth Fowler in ''Sweeney Todd'' and Georgia Brown in ''Three Penny Opera.''

#90127u2934 05/07/1990 ~United Press International

NEW YORK (MAY 8) UPI - Roy Lichtenstein's 1962 painting ''Kiss II'' was sold to a Japanese gallery Monday for $6.05 million, a record for the artist, during the first major auction in the spring season at Christie's.

Records were set for work by 10 artists in the sale, which took place in the auction house's Park Avenue offices, and was dominated by abstract expressionists.

A 1962 oil painting by Jean Dubuffet titled ''Pese Cheveu'' sold for $5.17 million, double the expected sale price and a record for the artist, Christie's said.

Lichtenstein's ''Kiss II,'' a 57- by 67-inch cartoon image of lovers embracing, was bought by the Fujii Gallery of Tokyo for a collector identified only as Mr. Wanibuchi, Christie's officials said.

The painting, which was originally sold to a Swiss gallery for $1,000 in 1962 and was owned by a Swiss family, was expected to net between $5 million and $7 million.

The sale price surpassed the record $5.5 million paid for the 1963 ''Torpedo ... Los,'' which was sold at Christie's in November 1989.

A total of 51 lots were sold for $40.2 million in the first major auction of the spring season. An auction of impressionist works was scheduled for next week.

Records for individual artists were set by a 1955 painting titled

''1955-D'' by Clyfford Still, which sold for $1.1 million, and a painting called ''Round the World'' by Sam Francis, which sold for $1.87 million.

Mark Rothko's ''Brown, Black & Blue,'' a 1958 oil painting, sold for $3.08 million, not a record for the artist.

#90127u3475 05/07/1990 ~United Press International

(MAY 7) UPI - The White House is expressing sympathy for ex-hostage Frank Reed's 44-month ordeal in Lebanon , but says there will be NO negotiating for the release of the remaining American captives. Spokesman Marlin Fitzwater today repeated the administration's call for all hostages to be ''UNconditionally'' freed. He also said there's a good chance President Bush will meet with Reed when the former hostage is ''ready.''

President Bush may be on the verge of bending, if NOT breaking, his ''NO new taxes'' promise. Bush has agreed to consider that option and all others while he and congressional leaders try to figure out how to reduce the federal deficit. White House spokesman Marlin Fitzwater says that Bush hasN'T given in, but just wants a NO-holds-barred discussion to help resolve the budget dilemma.

Latvia's new prime minister expressed hope today that Moscow will hold talks on independence with the Baltic republic. But Prime Minister Ivars Godmanis added he has ''NO illusions'' about the road to independence being smooth. A government spokeswoman says Latvia is working on a plan to deal with an economic blockade in case President Gorbachev decides to retaliate.

NASA says the Hubble Space Telescope may snap its first picture of deep

space as early as Friday. Engineers at Goddard Space Flight Center in Maryland are already involved in a 36-hour process to prepare the Hubble for its first photo session, which is only a test. The super telescope's target will be a three-BILLION-year-old star cluster, 15-hundred light years away in the constellation Carina.

#90127u3519 05/07/1990 ~United Press International

(MAY 7) UPI - The National Guard and the Marine reserves are helping to sandbag dikes and evacuate residents near the raging Arkansas River. Near record flood waters have already forced more than 300 people to flee their homes and has caused Millions of dollars in damage to low-lying properties near Little Rock. Authorities say the floodwaters woN'T even reach their peak until tomorrow.

A leading group in the fight against AIDS says it's boycotting an upcoming international AIDS conference in San Francisco. The executive director of Gay Men's Health Crisis, Jeffrey Braff, says the action is a last-ditch effort to force the United States to change a regulation barring those with the virus from entering the country. Braff called the 1987 law ''absurd'' and ''stupid.''

Congress has launched an investigation into the 33-MILLION-dollar weight-loss industry. Executives from nationwide diet centers today told a House hearing that their programs are generally safe and effective, although they admitted some advertising claims are exaggerated. Subcomittee chairman, Democrat Ron Wyden of Oregon, says the federally-unregulated industry is out of control.

If you love George Burns, you may like Dr. Henry Merritt Stenhouse. At 100 years old, he wants to be the next congressman from North Carolina's Third District. The centenarian takes his first step toward that goal tomorrow in a Republican primary battle. Stenhouse says he has a mission to fulfill in this election. Quoting now- ''Otherwise why would God have kept me here this long?''

-30- 1723

#90127u3739 05/07/1990 ~United Press International

(MAY 7) UPI - F-B-I officials say two Colombians arrested in Florida Saturday had tried to buy 120 ''Stinger'' anti-aircraft missiles and automatic weapons from undercover agents. The weapons allegedly were part of a plot to shoot down Colombian government helicopters. But authorities are NOT confirming reports the weapons were to be used to kill Colombian President Barco and his cabinet. The two suspects appear to be linked to the Medellin cocaine cartel.

Prosecutors say in documents filed today in federal court in Washington, D-C, that a hair sample taken from Mayor Marion Barry shows he repeatedly used cocaine in the six weeks before his drug arrest on January 18th. U-S Attorney Jay Stephens say he'll present the hair sample and at least one dozen witnesses at Barry's scheduled June 4th trial. Defense lawyers wants to bar prosecutors from using the hair because, they say, it canNOT specifically show drug use from the night of the arrest.

Israel says it is willing to release Lebanese Moslem prisoners whose freedom is demanded by pro-Iranian kidnappers holding Westerners in Lebanon. But Israeli officials say the offer is good only if Israeli soldiers captured in Lebanon also are freed. Iran and its allies in Lebanon have said the release of more Western hostages depends on a ''good-will gesture'' from the West... starting with the release of Moslems held by Israel.

West German Foreign Minister Hans-Dietrich Genscher says the western half of Germany will remain allied with NATO, even if Soviet troops occupy the eastern half. Genscher made the comments today during a radio interview with the government-run station. He also says Saturday's ''two-plus-four'' talks in Bonn produced ''historic change'' and placed a timetable for German unity squarely in the hands of Germans.

-30- 1991

#90127u3775 05/07/1990 ~United Press International

(MAY 7) UPI - The president of the union representing striking Greyhound drivers is labeling ''ridiculous and false'' claims by the bus line's chairman that the walkout is in effect over. Earlier, Greyhound Chairman Fred Currey said the strike was ''irrelevant'' and that Greyhound operations would be back to almost 100 percent by mid-June. Union chief Jim La Sala likens Currey's statement to- quote- ''Napoleon claiming victory at Waterloo.''

Two House members are considering a measure that would require automakers to produce Millions of cars that can run on low-polluting alternative fuels. The congressmen want to resurrect the plan... originally President Bush's... as an amendment to the clean air bill scheduled to be debated by the House later this month. The auto industry has vowed to fight the initiative, which could hamper the otherwise UNcontroversial bill.

The river of lava from Hawaii's Kilauea Volcano was only about 20 feet from the ocean today and officials on the big island expect the flow to push over the sand dunes and reach the sea. The volcano continues to demolish what little is left of the rural community of Kalapana. Lava today claimed the 139th home since the volcano began erupting in 1983.

Only two major structures remain standing in the town.

First lady Barbara Bush says she flirted with the idea of going into nursing before she married George Bush and had a family. Mrs. Bush made the admission today while hosting a delegation of nurses at the White House for National Nursing Day. She told the assembled nurses they were- quote- ''The most important guests who have ever been invited to the White House.''

-30- 1836

#90127u3929 05/07/1990 ~United Press International

(MAY 7) UPI - President Bush sets NO conditions on budget talks... F-B-I foils weapons sale to Colombian drug lords... Super-power summit preparations. The top stories and more, next, from U-P-I:

The White House says President Bush is willing to discuss raising taxes with congressional leaders during budget compromise talks. But spokesman Marlin Fitzwater adds the president remains opposed to a tax hike.

One day after Bush met with congressional leaders, Fitzwater says the president wants to hold deficit-reducing talks without any pre-conditions.

Quoting now- ''The only thing the president has decided is something needs to be done about the deficit.''

Last year's budget summit did NOT leave Democratic congressional leaders satisfied and they have been reluctant to enter into new negotiations. Today they met to discuss procedures for reaching a budget compromise.

Senate Democratic Leader George Mitchell of Maine emerged from the meeting and said there was NO general agreement among top Senate Democrats on whether or NOT to accept the president's invitation.

The F-B-I has arrested two Colombians in Florida who tried to buy Stinger anti-aircraft missiles as part of a plot to shoot down Colombian government helicopters.

Agents say the two men tried to buy 120 Stinger missiles, 15-hundred automatic weapons, plastic explosives and bullet proof vests from an undercover agent in Miami. Investigators think both suspects worked as middlemen for Medellin druglord Pablo Escobar .

One report says the men may be involved with a Medellin cocaine cartel scheme to kill Colombian President Virgilio Barco and his cabinet.

The notorious Medellin cartel declared war on the Colombian government after Barco resumed extradition of drug dealers to the United States last

August.

The cartel has been linked to hundreds of bombings since, including the murder of three presidential candidates.

-30- 2109

#90127u3948 05/07/1990 ~United Press International

(MAY 7) UPI - Soviet President Gorbachev today criticized nationalists in the Soviet Union, saying they are taking advantage of ''glasnost and freedom'' in their push for independence from Moscow.

The official news agency Tass recounted Gorbachev's remarks to a group of veterans during Kremlin celebrations marking the end of World War Two. Gorbachev said those who pursue independence from the Soviet Union are ''leading to a deadlock.''

He did NOT specifically mention any particular separatist groups. There are strong independence movements in Lithuania, Latvia, and Estonia, each of which have declared independence from Moscow.

The Soviet president urged nationalist groups to work with him on a plan for ''a new union of republics.''

He said his policy of perestroika- restructuring- has reached a critical point and that its success would allow the country to ''solve the difficult problems facing it.''

U-S and Soviet teams are meeting in Washington this week to pave the way for this month's four-day summit between President Bush and Soviet President Gorbachev.

White House news secretary Marlin Fitzwater says a 12-member Soviet team joined U-S security forces in checking out White House grounds, as well as Andrews Air Force Base, where the Soviet president is due to arrive May 30th.

Aides also say Bush is likely to invite Gorbachev for an overnight stay in the relaxed setting of Camp David.

It's expected, despite lingering differences over Lithuania, that Bush and Gorbachev will sign some accords whose importance range from mere window dressing to a possible framework agreement on reducing strategic nuclear missiles.

-30- 1838

#90127u4021 05/07/1990 ~United Press International

(MAY 7) UPI - NASA officials at Goddard Space Flight Center in Greenbelt, Maryland, say the first pictures from the Hubble Space Telescope could come as early as Friday.

Operators are set to begin a 36-hour process tomorrow which will set the stage for the innovative telescope to snap its first picture of the heavens. The set-up involves beaming computer commands to the telescope to practive positioning the observatory.

The telescope's first photo will be of a three-BILLION-year-old star cluster about 15-hundred light years away from Earth.

At Cape Canaveral, NASA engineers are preparing for a mock shuttle disaster tomorrow. The first drill of its kind will test communications and contingency planning in the event of a shuttle malfunction.

Engineers will go through an imaginary countdown and launch. At some point during the climb toward space, the computer shuttle will experience a major failure.

The nature of the mock malfunction is being kept secret.

Defense attorneys for the only defendant remaining in California's notorious McMartin Pre-School molestation case say social workers coerced and manipulated children to make up testimony.

During opening statements in a Los Angeles courtroom, lawyers for Raymond Buckey vowed to prove their allegation.

Also today, the mother of a former McMartin student testified her daughter admitted having ''yucky secrets'' after allegations of molestations at the nursery surfaced.

The woman said the little girl seemed to enjoy attending the pre-school until the spring of 1983, when she complained of an irritated anus, began having trouble sleeping at nights.

Prosectors say children who attended the Virginia McMartin Pre-School began exhibting signs of molestation after Buckey began working there in 1979.

Buckey, who is 31, is being re-tried charges he molested three students at the nursery from 1979 to 1983. In all, he faces eight outstanding molestation charges over which jurors at his first trial deadlocked.

Buckey and his mother, Peggy McMartin Buckey, were aquitted of 52 other counts of molestation during their first trial on January 18th.

That case latest nearly three years and cost taxpayers 13-MILLION dollars to become the longest, costliest criminal trial in U-S history.

-30- 2476

#90127u4140 05/07/1990 ~United Press International

(MAY 7) UPI - Leading congressional Democrats huddled for an hour late today to discuss a possible budget summit with President Bush. NO consensus was reached. Leaders say they'll meet with rank-and-file House and Senate Democrats tomorrow.

Argentina's economics minister says negotiators for the International Monetary Fund meeting in Washington, D-C, have reached agreement tonight on adding 60-BILLION dollars to the I-M-F's 12-BILLION dollars in capital. Developing nations had been looking for a doubling of the fund's capital.

The White House today expressed sympathy for the ordeal suffered by former hostage Frank Reed during 44 months of captivity in Lebanon. But a spokeman repeated the U-S policy of NO deals to free more hostages.

Possibly in response to U-S developments, Israel today again offered to swap its Lebanese Moslem prisoners for Israeli soldiers captured in Lebanon. The release of the Moslem prisoners has been demanded by pro-Iranian kidnappers holding Westerners in Lebanon.

The chief prosecutor in Romania says investigators have found evidence supporting reports that the regime of deposed dictator Nicolae Ceausescu sold advanced Soviet military technology to the United States.

The Arkansas River is still rising, creating what officials say may be the worst flooding in the state in 63 years. Some 327 homes along the river have been evacuated. The river is to crest tomorrow in Little Rock, and Wednesday in Pine Bluff, Jefferson County... about 40 miles downstream.

-30- 1683

#90127u4161 05/07/1990 ~United Press International

(MAY 7) UPI - The big guns are silent tonight in Beirut. Security sources say mediators arranged a cease-fire between rival Christian forces after eight hours of shelling today that killed at least 19 people and wounded another 37.

The chairman of Greyhound says the strike against the bus line is effectively over and the company will be back to almost full service by mid-June. The head of the union representing striking workers says that's ''ridiculous and false.''

A spokeswoman for Marion Barry says the Washington, D-C, mayor would have

NO comment on the latest revelation in his drug case. Federal prosecutors say a hair sample taken from Barry shows he used cocaine repeatedly in the six weeks before his January 18th arrest.

In New York City, jury deliberations have ended for the night in the trial of the accused triggerman in the Bensonhurst racial slaying. Earlier, the judge denied a defense petition that said the prosecution's star witness wanted to recant his testimony that Joseph Fama shot a black teen-ager last August.

Authorities in Clifton Park, New Jersey, say a despondent high school football captain brandishing a loaded shotgun stalked the school halls today before being subdued by police. NO shots were fired and NO students or school staff were hurt.

12 actors who played Munchkins in the ''The Wizard of Oz'' will be in Grand Rapids, Minnesota, for the Judy Garland Festival next month. Organizers bill the event as the largest gathering of Munchkins since the movie was produced in 1939. Garland was born in Grand Rapids.

-30- 1742

#90127u4251 05/07/1990 ~United Press International

(MAY 7) UPI - Key Democrats met today to consider bi-partisan budget negotiations. House Speaker Thomas Foley says congressional leaders have NOT yet reached a general agreement concerning the possibility of a budget summit. President Bush has called for the talks in an effort to reach a budget compromise. The White House says the president is willing to discuss raising taxes, but remains firmly opposed to a tax hike to lower the deficit.

The White House today reaffirmed the administration's policy against bargaining for the release of American hostages in Lebanon. Former hostage Frank Reed yesterday called on President Bush to take a ''more active role'' to free the remaining captives. Today, spokesman Marlin Fitzwater expressed sympathy for Reed's ''torturous and brutal'' ordeal. But he added the captors canNOT be led to believe that ''taking more hostages will yield negotiations and political benefit.''

Romania's chief prosecutor says his office is ''well aware'' of a plot by the former communist regime to sell Soviet military secrets to the United States. George Robu says initial findings point to a ''very subtle conspiracy engineered by the Ceausescu regime.'' Yesterday, a report said the U-S government paid communist officials 40-Million dollars during 10 years for advanced Soviet military technology.

The Latvian Parliament today elected Ivars Godmanis as prime minister. Godmanis expressed hope Moscow would enter into negotiations concerning

independence for the republic... but he says he harbors ''NO illusions'' about the tough road ahead for Latvia. Soviet President Gorbachev reportedly has rejected the declaration. A Latvian government spokeswoman says the republic is preparing for an economic blockade.

-30- 1925

#90127u4259 05/07/1990 ~United Press International

(MAY 7) UPI - The United States today banned the importation of some Peruvian relics in an effort to protect a valued archaelogical site. In 1987, explorers discovered pyramid tombs near the northern coast of Peru that've have yielded thousands of gold relics from a mysterious, ancient civilization. Grave robbers repeatedly have raided the sites for relics to sell to U-S collectors for as much as 100-thousand dollars.

Pope John Paul says the Catholic church- quote- ''wants to be the voice for those who have NO voice.'' The pontiff today made the comment to a crowd of about one-MILLION Catholics gathered in a town on the southeastern edge of Mexico City. The pope likened his audience to ''sheep without a shepard'' and stressed the need for evangelization... which he called ''the best service for a brother.''

A medical technician today testified that Christian scientists David and Ginger Twitchell waited at least 40 minutes after their son died before calling an ambulance. The Boston paramedic told the court the two-and-a-half-year-old boy was ''cold'' and ''rigid'' when help arrived. The Twitchells are on trial on manslaughter charges for refusing medical treatment for their son, who died of a bowel obstruction four years ago.

New York Governor Mario Cuomo wants Mohawk tribal leaders to set up their own police force to prevent more violence on the St. Regis Indian Reservation, which stradles the U-S and Canadian border. Two people died last Tuesday in fighting between opposing forces on gambling issues. As Cuomo spoke, a funeral was held for one the victims of last week's violence.

#90128b0018 05/08/1990 ~Business Wire

TOKYO (MAY 8) BUSINESS WIRE - Toshiba Corp. has developed the world's first RISC-based laptop-type engineering workstation (EWS), the SPARC LT, AS1000/L10.

The new computer runs on a reduced instruction set computer microprocessor based on the SPARC architecture designed by Sun Microsystems Inc. This is the first-ever RISC chip to be used as the (CPU) central processing unit of a laptop computer. Japanese marketing has already begun and shipping will start in mid-July. Details on the overseas marketing has not been

decided yet.

The new computer is the result of a May 1989 agreement between Toshiba and Sun Microsystems, under which Toshiba obtained comprehensive rights to develop and manufacture computers based on the SPARC architecture and the SunOS UNIX operating system.

The AS1000/L10 is compatible with all SPARC-based workstations, and can run approximately 1,700 third-party application software packages developed for SPARC-based workstations, as well as Japanese-language applications for Toshiba's AS-series (Sun-based EWS).

This high-performance laptop EWS will further promote the ''age of work group computing'' and enhance engineering efficiency by cutting development times. The small footprint of the AS1000/L10 will cut overhead costs by saving space. Toshiba expects the computer will be used in CAD/CAM (computer-aided design/manufacturing) and desktop publishing systems and in the software engineering field.

Computers and workstations are constantly becoming faster, more compact and more functional. A major factor in this trend is utilization of new types of 32-bit microprocessors based on RISC architecture. RISC chips reduce the number of operating instructions the CPU needs to process information, making them faster than conventional CISC (complex instruction set computer) microprocessors.

Today, Toshiba Corp. has joined SPARC International as an associate member. The new SPARC-based laptop EWS will be verified compliant with SPARC International's SPARC Compliance Definition (SCD) 1.0.

Since 1985, when Toshiba introduced the world's first laptop computer to the European market, the company has been a leading manufacturer of laptops. Total worldwide sales of 1 million laptops was achieved in September 1989.

#90128b0020 05/08/1990 ~Business Wire

PORTLAND, OR (MAY 8) BUSINESS WIRE - John J. Waugh, chairman and chief executive officer of Americold, the nation's largest public refrigerated warehousing company, has announced his retirement, effective July 1, 1990.

Waugh has been chairman of Americold since 1986, when the company was purchased from Beatrice in a management-supported buyout led by Kelso and Co. Inc.

A committee of non-management Americold directors appointed by Waugh has selected Ronald H. Dykehouse to succeed him as chief executive officer.

Dykehouse was most recently executive vice president of Amfac, where he was also chairman of the Food and Distribution Groups. Prior to that he was chairman and chief executive officer of Amfac Foods, which included Lamb-Weston, Fisher Cheese and Monterey Mushroom, and president of Lamb-Weston. He is past chairman of the American Frozen Food Institute.

Waugh has seen many changes in that industry himself. His association with Americold began 38 years ago when he joined Quincy Market Cold Storage in Boston. That firm was acquired by Beatrice Foods and ultimately blended into Americold with a number of other independent refrigerated warehouse companies.

Waugh was vice president of Quincy Market from 1973 to 1978; president of Tampa Cold Storage in Tampa, Fla., until 1981; and returned to Quincy Market as president from 1981 to 1986.

Waugh served three years as vice president of Americold under Beatrice ownership, and led the company through the buyout in 1986.

He has been active in a variety of industry organizations including the International Association of Refrigerated Warehouses, where he has served on the board of directors and as chairman. He is currently on the board of the National Frozen Food Association.

Under Waugh's leadership, Americold has expanded its refrigerated storage and distribution capabilities coast to coast, through construction and acquisition. Earlier this year, the company acquired Dreisbach Enterprises, nearly doubling Americold's operations in northern California.

Americold now has 50 warehouses representing over 240 million cubic feet of freezer, Supercold, cooler and dry storage space. Headquartered in Portland, the company provides a myriad of related storage and distribution services to the country's major food processors as well as serving smaller, individual accounts.

CHICAGO (MAY 8) BUSINESS WIRE - Delivering a sharp ''one-two'' punch to Nintendo, video game challenger Sega of America Inc. of South San Francisco, Calif., has signed the first-ever licensing deal with boxing heavyweight champion James ''Buster'' Douglas to create a new state of the art boxing video game.

This multi-million dollar agreement follows Sega's recently announced licensing agreements with football's living legend Joe Montana and mega-star Michael Jackson.

''Sega has taken the lead in creating the most challenging and exciting video games today,'' said Douglas. ''Genesis is my son's favorite system. I'm excited about having my own boxing game and feel Sega is most qualified to do it. I am proud to have Sega fighting in my corner. Together, I know we're going to knock Nintendo out of the video game market!''

The agreement gives Sega exclusive worldwide rights to Douglas for all home video game systems, arcade games, portable games and computer software.

''We are proud to be associatied with America's newest hero. James ''Buster'' Douglas knocked Tyson out of the ring, and now he's going to help Sega knock Nintendo out with a great boxing game that he's helping to design,'' said Michael Katz, president of Sega's Consumer Products Division.

Sega will launch the game with a major television and print advertising campaign featuring Douglas, being produced by Bozell (Los Angeles). Milgrom and Associates, Douglas' promotion and marketing firm, of Northbrook, Ill., coordinated the agreement.

Sega's aggressive licensing effort has already landed an all-star team of celebrities for Genesis games including Michael Jackson, Joe Montana, Tommy Lasorda and Arnold Palmer. Sega has also licensed from Walt Disney, Dick Tracy, Mickey Mouse and Fantasia.

''This is all part of Sega's ambitious, competative strategy to create and promote great games supported by leading sports and entertainment personalities -- games you can't play on Nintendo,'' added Katz.

For more information, contact Sega of America Inc., 573 Forbes Blvd., P.O. Box 2167, South San Francisco, Calif. 94080.

KANSAS CITY, MO (MAY 8) BUSINESS WIRE - US Sprint announced Tuesday that it has successfully completed a series of access services tests linking its Signalling System 7 (SS7) network with those of Southern Bell and South Central Bell.

All tests were conducted over the live US Sprint all digital fiber-optic network using circuits specifically installed for the trial. US Sprint was the first interexchange carrier to deploy SS7 throughout its network in 1988.

Key features tested during the trial include: gateway screening of incoming SS7 messages, which prevents unauthorized access to network databases and features. In addition, it checks the integrity and validity of incoming signaling messages.

Moreover, the trial tested basic call setup, a process that routes and connects calls across the network; maintenance messages, a procedure that automatically reroutes signaling messages and calls when outages occur in various network elements; and near-end tones and announcements, which reduces the amount of network traffic involved in processing uncompleted calls.

Installation and testing of the interconnecting circuits began in December followed by testing of the SS7 signaling messages from January through March. During March and April, actual calls were placed over the interconnecting circuits.

US Sprint's trial involved interconnection to its Digital Switch Corporation signal transfer points (STPs) in New York and its Northern Telecom DMS-250 switches in New York and Orlando.

Involved in the trial was a Northern Telecom DMS-200 switch at Southern Bell's Golden Glades access tandem central office in Miami, a DMS-100 switch at the company's Biscayne central office, also in Miami, and a

DMS-100 switch in the Franklin central office of South Central Bell in Nashville.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City, Mo.

SAN JOSE, CA (MAY 8) BUSINESS WIRE - Atmel Corp. has signed Time Electronics as the newest member of its distributor sales network.

The agreement is effective immediately.

Time Electronics, a division of Avnet Inc., a Fortune 100 service company listed on the New York Stock Exchange with annual sales in excess of $1.9 billion, will offer the Atmel product line through all of its 31 locations in the United States and Canada.

''The addition of Time Electronics to our distributor team brings depth, not only in sales support, but in the technical direction needed to meet our aggressive growth plans. Time brings a complement of product offerings, as well as a commitment to a long term partnership,'' stated Atmel's distributor sales manager Dave Walton.

With approximately 35 percent of the company's domestic sales through distributors, Atmel is a privately held broad-line U.S. manufacturer of standard, custom and application specific integrated circuits (ASICs), as well as non-volatile programmable memory and logic circuits. In its December-ending year, the company's sales reached $90 million.

''By providing product lines that represent the latest technological advancements, such as Atmel products, as well as a range of value-added services for programmable products, Time Electronics is well-positioned to continue to provide the highest levels of quality and service to computer and communications customers in both military and commercial markets,'' stated Jim Jefferies, vice president, marketing, semiconductor and passive components, Time Electronics.

LOUISVILLE, CO (MAY 8) BUSINESS WIRE - Storage Technology Corp. (NYSE:STK) Tuesday announced software which will make the StorageTek 4400 Automated Cartridge System (ACS) available to those data centers with large Fujitsu mainframe processors which run under the MSP AE 20 operating system.

The 4400 ACS automates 18-track cartridge handling, previously a manual function. Each library module holds approximately 6,000 cartridges. Sixteen modules containing up to 96,000 cartridges can be connected using pass-through ports. The 4400 ACS integrates robotics, software, hardware and microcode into a system that stores and retrieves data cost effectively.

The Fujitsu Host Software Component was developed jointly by StorageTek and the Australian Bureau of Statistics (ABS), Australia's official statistics collection agency. ABS, with one 4400 ACS connected to its two Fujitsu processors, provided StorageTek with technical support and access to Fujitsu equipment.

Jack Scott, StorageTek vice president of OEM and new markets, said, ''This entry into the Fujitsu marketplace demonstrates again StorageTek's commitment to increase the connectivity of its products, especially the 4400 ACS which has set the standard for the industry. Our 4400 ACS technology now is available to address Fujitsu mainframe users' requirements for improved storage economy and full automation of their data processing facilities.

''This connectivity means Fujitsu users now have increased storage flexibility and in multiprocessor installations, users of IBM and Fujitsu mainframes now can share the same 4400 ACS.''

Fujitsu joins the Bull HN, Control Data Corp., Cray Research, IBM, ICL, Unisys and UNIX operating environments in which the 4400 ACS is available. Fujitsu's strong presence in Europe and the Pacific Rim assures exposure for the 4400 ACS in markets unavailable to StorageTek until this time.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

SAN JOSE, CA (MAY 8) BUSINESS WIRE - The highest-performance family of 5.25'' optical disk jukeboxes on the market has now been expanded to include a fully integrated subsystem, the new Model 5250i, announced Tuesday by Cygnet.

''The 5250i is Cygnet's response to the growing market need for jukeboxes that are plug-and-play,'' according to Dennis Janes, product marketing manager.

The Model 5250i includes the jukebox with integration of two customer-owned drives, plus SCSI cabling and external terminator, all housed in an attractive cabinet suitable for the office environment. Priced at $19,260 (OEM qty 1), the Model 5250i offers a convenient, drop-shippable solution to OEMs and system integrators who prefer not to design their own housing for single jukebox/powertray units.

With the complete testing of the installed disk drives, the 5250i enhances end-product reliability at installation while reducing initial customer support costs for the system integrator. Cygnet's 5250 and 5250i products significantly lower the cost of entry into the rapidly developing document imaging market, which depends heavily on jukebox technology.

The Model 5250i is the newest member of Cygnet's Series 5000 family of optical disk jukeboxes for 5.25'' dries. Known for high performance, the Series 5000 jukeboxes support two internal disk drives, either WORM or rewriteable, from several major manufacturers. Over 200 have been shipped to date making the 5250 one of the largest selling optical disk jukeboxes on the market.

Cygnet Systems Inc., headquartered in San Jose, is a peripheral products company that designs and manufactures robotic mass storage devices for OEMs and system integrators worldwide. Current products consist of optical disk jukeboxes targeted at the high-performance market. Cygnet Systems Inc. is located at 2560 Junction Ave., San Jose, Calif. 95134-1902 telephone 408/954-1800.

LOS ANGELES (MAY 8) BUSINESS WIRE - Mine Reclamation Corp. (MRC), Southern Pacific Transportation Co. and Western Waste Industries (NASDAQ:WWIN) Tuesday announced plans for a joint venture that will accelerate completion of the Eagle Mountain Project -- a waste-by-rail system that emphasizes recycling and can provide 100 years of disposal capacity for

non-hazardous solid waste.

The proposed venture will combine the resources of MRC, Southern Pacific and Western Waste to ensure that the project's recycling facilities, transfer stations, rail haul system and disposal site are in place before key landfills close in the Los Angeles area.

MRC, which has been actively developing the waste-by-rail project since 1987, currently is permitting the landfill that will be the end point for the system and controls the 52-mile private rail line that runs from the Southern Pacific mainline directly to the site. The landfill site is a dormant iron ore mine located 200 miles east of Los Angeles in the Riverside County desert.

Southern Pacific provides rail transportation services throughout Southern California, including containerized freight operations similar to those to be used in the waste-by-rail project. The company also controls or has access to land along its rail line that can be used for recycling and transfer facilities.

Western Waste is one of the largest waste management firms in the nation and provides comprehensive waste management services to households and businesses in seven states. In Southern California, Western Waste provides collection, recycling and disposal services to communities throughout the region and owns and operates two recycling centers, a transfer station and a disposal site.

Mine Reclamation Corp. (MRC) is a privately held company formed in 1982 solely for the Eagle Mountain Project, a waste-by-rail project for non-hazardous solid waste. It was formed by a group of waste management professionals who forsaw the depletion of landfill capacity in Southern California and envisioned a waste-by-rail and recycling system as part of the long-term solution to the problem.

Southern Pacific Transportation Co. (SP) operates the nation's fifth-largest railroad, running on 15,000 miles of routes across 15 states from the Pacific Coast to the Mississippi River and Chicago.

The Eagle Mountain Project is a waste-by-rail system designed to meet California's new recycling goals, reduce truck traffic to urban-area landfills and provide 100 years of disposal capacity for non-hazardous solid waste.

DALLAS (MAY 8) BUSINESS WIRE - Southwest Airlines announced May 8, 1990, that it had signed a five-year contract with its pilots.

The agreement reached between the company and the Southwest Airlines Pilots' Association (SWAPA) provides for increased basic compensation and benefits during the term of the agreement, with additional compensation tied directly to the profitability of the corporation, while maintaining Southwest's unique and productive trip pay system.

Southwest Airlines Chairman of the Board, President and Chief Executive Officer Herbert D. Kelleher, said, ''We are especially pleased to be able to announce this agreement of five years duration which ensures that our pilots will continue to be fairly compensated and the most productive pilots in the industry.

''The length of the contract is indicative of the excellent relationship that exists among Southwest Airlines, our pilots, and their Association.''

Pilots' Association President John Schnobrich, said, ''This contract will provide the pilots of Southwest Airlines with the security which we find essential in the highly competitive airline industry.

''We are particularly pleased that the agreement continues to provide improved compensation, a solid foundation for our pilots' future retirement and the necessary work rules for our present and future pilots at our growing airline.''

Kelleher added that the current contract runs through Aug. 31, 1994, and that one of the cornerstones of the new agreement is the continued productivity of the Southwest Airlines pilot group.

HOUSTON (MAY 8) BUSINESS WIRE - The Enron Corp. board of directors Tuesday declared a second-quarter dividend of 62 cents per share on the corporation's common stock, payable June 20 to stockholders of record as of June 1.

The dividend rate remains unchanged from its previous level, with an indicated annual rate of $2.48.

The board also declared a dividend on the $10.50 cumulative second preferred convertible stock payable July 2, to stockholders of record as

of June 15. The quarterly dividend rate is $2.625 per share.

Enron Corp., America's leading natural gas company with approximately $10 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

#90128b0085 05/08/1990 ~Business Wire

SAN FRANCISCO (MAY 8) BUSINESS WIRE - American Shared Hospital Services (ASE, PSE:AMS, ASE:AMS.A for notes) Tuesday announced financial results for the three months ended March 31.

Unaudited net income for the three months ended March 31 was $16,000, or 1 cent per share, compared with net income of $25,000, or 1 cent per share in the like period last year.

There were 2,778,000 shares of common stock outstanding in the 1990 first quarter, compared with 2,828,000 shares outstanding in the 1989 first quarter.

Unaudited revenue for the three months ended March 31 was $15,176,000, compared with revenue of $10,556,000 in the like period last year, an increase of $4,620,000, or 43.8 percent.

Commenting on the first quarter 1990 financial results, Ernest A. Bates M.D., president and chairman of American Shared, said, ''Our strong revenue growth in the 1990 first quarter primarily reflects the acquisition during 1989 of our former partner's interest in our growing MRI operations. Improved utilization and an increase in the size of our MRI fleet also contributed to 1990's higher first quarter revenue.

''The results also reflect higher revenues, due to acquisitions during 1989 in ultrasound, nuclear imaging and respiratory therapy.

''While net income was about the same as last year's first quarter, the contribution from operations improved by $573,000 compared with last year, offsetting a decrease in interest and other non-operating income.

''The first quarter 1990 results also mark a significant improvement over our fourth quarter 1989 net loss of $354,000, or 13 cents per share. These improvements illustrate the results we are achieving from our administrative reorganization and expense controls in 1989 and our improved management.

''We are continuing to explore ways to reduce interest expense through additional repurchase or restructuring of our debt. During the 1990 first quarter our operating cash flow was positive.''

American Shared Hospital Services provides Magnetic Resonance Imaging (MRI), Computed Tomography (CT), and other diagnostic imaging services as well as respiratory therapy services to hospitals and other medical providers on a shared deliver and/or contract management basis.

SALT LAKE CITY (MAY 8) BUSINESS WIRE - Celsius Energy Co., a wholly owned affiliate of Questar Corp. (NYSE:STR), Tuesday announced that it has taken over operation of the recently completed Island Butte No. 2 well in northwestern Colorado.

The well was drilled by Ampolex Texas Inc. under a joint venture farmout agreement with Celsius.

Under the agreement, Celsius became the operator when the well was completed and will drill and operate subsequent wells in the area.

The Island Butte No. 2 well is in the SW1/4 NW1/4 of Section 7, Township 38 North, Range 19 West, in Dolores County, Colo., approximately 12 miles south of Dove Creek. The Desert Creek zone was perforated from 6,165 to 6,203 feet. During a 46-hour flow test, the well averaged 300 barrels of oil and 418,000 cubic feet of gas per day with an average pressure of 1,815 psig on a 12/64-inch choke.

Celsius and Ampolex each has a 50 percent working interest in the well, additional acreage and future drilling projects in the area.

#90128b0106 05/08/1990 ~Business Wire
LOS ANGELES (MAY 7) BUSINESS WIRE - Richard H. Deihl, chairman and chief executive officer of H.F. Ahmanson & Co. (NYSE:AHM) told shareholders attending the company's annual meeting of stockholders Tuesday that core earnings -- which accounted for 95 percent of the company's first quarter 1990 net profits -- are continuing to rise.

''Last year, core earnings were up 11 percent to a record $166 million.

We plan to improve on that in 1990,'' he said.

In his remarks, Deihl added, ''We are off to a strong start. First quarter earnings were up by 58 percent to nearly $62 million. Core earnings continued to rise, by 61 percent over last year. Net interest income increased by 21 percent to a first quarter record, while general and administrative expenses remained unchanged from a year ago.

''Loan volume was 12 percent higher than the first quarter record set last year. Deposits grew by another $660 million during the first quarter alone.''

Deihl noted that the company's core earnings have increased dramatically over the past two years. ''We've reduced our emphasis on non-core activities -- profits from loan sales and real estate operations -- in order to build a stable, growing and repeatable earnings stream of net interest income and loan servicing income,'' he said.

Deihl also noted that despite the strong performance of the company and the fact that many security analysts are forecasting a substantial increase in Ahmanson's earnings this year, the market price of Ahmanson stock is trading near its 52-week low.

''We are not alone in our conviction that the stock price is woefully undervalued,'' he said.

''In recent weeks, several respected S&L securities analysts have issued opinions advising their clients that Ahmanson's stock is selling at as much as 45 percent to 50 percent below its fair value, based on a normalized multiple of core earnings. But over time, we believe the market price of the stock will more accurately reflect the quality of our earnings, and the inherent values of the company's business.''

In his report to stockholders, Deihl also noted that the company's capital position is already well above the standards required under the stringent new regulations that took effect late last year.

''We have programs underway that will enable us to not only meet, but exceed, the fully phased-in requirements that will take effect at the end of 1992 and in early 1995,'' he added. ''Our goal is to exceed by a comfortable margin the 1995 requirement by as early as next year.

''Our strategy remains focused on our primary business and function -- providing safety and security for savers, and investing depositors funds in low-risk loans on single family homes,'' Deihl said. ''As the thrift industry continues to consolidate, we are in an excellent position to increase our market share for deposits and residential lending, both through internal growth and selected acquisitions.''

The company reported that shareholders re-elected its 14 directors: Richard H. Deihl, Robert M. De Kruif, Robert H. Ahmanson, William H. Ahmanson, Byron Allumbaugh, Richard M. Bressler, Lodwrick M. Cook, Bill Daniels, George G. Gregory, David S. Hannah, Charles R. Rinehart, Elizabeth Sanders, William French Smith and Dr. Pauline Tompkins. No other proposals were submitted for shareholder approval.

H.F. Ahmanson & Company, with assets of $46 billion, is the parent company of Home Savings of America, the nation's largest savings and loan institution.

BELLEVUE, WA (MAY 8) BUSINESS WIRE - Puget Sound Power & Light Co. is pursuing a variety of options for serving the additional customer growth expected in the 1990s.

The company is ready to meet that challenge, John Ellis, chairman of the board of directors and chief executive officer for Washington state's largest investor-owned utility, told shareholders at the company's annual meeting Tuesday.

During the 1980s, Puget Power added more than 195,000 customers. The outlook for the 1990s is for more of the same. Current forecasts estimate the utility will add more than 200,000 customers in the next 10 years as the Puget Sound economy continues to expand and diversify.

In addition, Puget Power is the first utility in the state to request bids for resources under the Washington Utilities and Transportation Commission's competitive bidding rules. The company is negotiationg contracts with eight providers of both conservation and generation resources for a total of 137 average megawatts.

#90128b0113 05/08/1990 ~Business Wire

LAS VEGAS (MAY 8) BUSINESS WIRE - Southwest Gas Corp. (NYSE:SWX) announced earnings of $1.08 per share for the first quarter of 1990, down 9 cents from the same quarter a year ago, according to George C. Biehl, senior vice president and chief financial officer.

The company's first quarter 1990 net income applicable to common stock was $20,923,000, compared to $22,019,000 in the first quarter of 1989.

Consolidated net income for the quarter was $21,331,000, down from $22,470,000 for the same period in 1989. The gas segment's contribution to consolidated net income was $20,006,000 during the current quarter, down slightly from the $20,663,000 recorded in the first quarter of 1989. Biehl attributed the slight drop in earnings from gas operations to increased depreciation and general taxes relating to natural gas pipe replacement programs in Arizona and expansion of company facilities to accommodate continued customer growth throughout its system.

Net earnings from the company's financial services subsidiary, PriMerit Bank, also decreased from $2,831,000 in the first quarter of 1989 (contributing $1,807,000 to consolidated net income after deducting tax-effected carrying costs associated with its acquisition by Southwest) to $2,259,000 in the first quarter of 1990 (contributing $1,325,000 to consolidated net income after deducting tax-effected carrying costs). According to Biehl, the bank's 1990 contribution to consolidated net income was lower than the previous year due principally to a decrease in real estate development income and increased general and administrative expenses due to the expansion of PriMerit's branch network in Nevada and Arizona, offset by an improved net interest margin.

Consolidated operating revenues for the first quarter of 1990 were $273,569,000, compared to $258,348,000 for the same quarter a year ago. Average outstanding common shares increased to 19,378,000 during 1990 from 18,801,000 in 1989.

For the 12 months ended March 31, 1990, consolidated net income was $41,546,000, compared to $42,921,000 during the 12 months ended March 31, 1989. Net income applicable to common stock was $39,814,000, revenues were $859,791,000, and earnings per share were $2.08 (based on 19,156,000 average outstanding common shares) for the 12 months ended March 31, 1990, compared to $41,071,000, $814,016,000 and $2.21 (based on 18,606,000 average outstanding common shares), respectively, for the 12 months ended March 31, 1989.

Southwest Gas is a diversified natural gas and financial services organization. It provides natural gas to approximately 800,000 customers in Nevada, Arizona and California. In addition, it provides gas for resale to almost 100,000 customers of Sierra Pacific Power Co. and CP National Corp.

PriMerit Bank markets a wide variety of consumer financial products and services through branches in Nevada and metropolitan Phoenix, Ariz. A federally chartered savings bank, PriMerit also engages in residential real estate development in Nevada and California as well as single-family

home lending in Nevada, Arizona and California.

HOUSTON (MAY 8) BUSINESS WIRE - Frontier Airlines and its equity holder, Continental Airlines, Tuesday announced all allowed claims in the Frontier bankruptcy have been paid, at 100 cents on the dollar, with interest.

The last payments were made on April 27, 1990, in accordance with the Reorganization Plan developed by Continental and Frontier with the support of the Frontier creditors committee.

The principal claims paid totaled approximately $79 million in cash and notes, and $8 million in interest.

Frontier has set aside cash reserves to pay remaining disputed claims once they have been resolved.

Frontier ceased operating in August 1986. Continental purchased the stock and assets of Frontier shortly after Frontier filed for bankruptcy. Continental subsequently provided employment for 1,600 former Frontier employees, paid $6 million in severance pay and agreed to issue more than 55,000 airline passes to former Frontier employees. In November 1986, Continental reactivated 42 former Frontier aircraft, idled since Frontier had ceased operations, and began service to several former Frontier cities.

HOUSTON (MAY 8) BUSINESS WIRE - Wyoming-California Pipeline Co. said Tuesday it has placed an order for 500 miles of large diameter pipe for the construction of its 670-mile natural gas pipeline system from Wyoming to California.

WyCal, a subsidiary of The Coastal Corp., said it has purchased the 30-inch pipe from Napa Pipe Corp., a subsidiary of Oregon Steel Mills Inc. The purchase contract calls for the Napa, Calif.-based pipe manufacturer to make initial deliveries to WyCal beginning early in 1991.

Construction on the $570-million WyCal project is scheduled to start later this year using 170 miles of pipe that WyCal already has in inventory.

The planned initial capacity for the WyCal System is 600-million cubic feet a day.

Coastal subsidiaries, including ANR Pipeline Co. and Colorado Interstate Gas Co., operate 19,000 miles of interstate pipeline and are engaged in gathering, storage, transmission and marketing of natural gas.

The Coastal Corp. is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

COLUMBUS, OH (MAY 8) BUSINESS WIRE - CF Motor Freight, one of the nation's largest trucking companies, Tuesday opened its new Columbus ''super terminal,'' a 118,000-square-foot consolidation center that will enhance the company's nationwide distribution network and enable CF to meet the growing freight transportation needs of local businesses.

The new $17 million facility is one of the largest and most modern freight processing facilities in the country. It will employ 450 people and serve a wide variety of businesses -- from consumer product manufacturers to the makers of equipment for heavy industry -- throughout Ohio, Kentucky, West Virginia and Pennsylvania.

Consolidation centers are central redistribution facilities for filling trucks with freight shipments on the way to their final destinations. The new Columbus facility incorporates the latest freight-management technologies in the transportation business, according to Robert H. Lawrence, president of CF Motor Freight.

Columbus Mayor Dana Rinchart and other local officials were among those participating in the grand opening ceremony. Guests toured the new center and viewed an exhibit highlighting technology used by the company at its freight processing facilities.

Located on a 102-acre lot at 2885 Alum Creek Dr. in Columbus, the consolidation center has 213 loading doors. The facility has a dock that stretches 1,300 feet in length -- the equivalent of one-quarter mile -- and 12,500 square feet of office space. In anticipation of future demand, the center is designed to accommodate an expansion to 400 doors.

CF Motor Freight has operated a freight processing facility in Columbus since 1961 when it opened a 26-door terminal on Fifth Avenue. Over the years, growing business volumes prompted CF to expand to larger facilities most recently a 91-door complex at 2101 Hardy Parkway in Grove City.

In 1988, inbound and outbound operations were split between the Grove City consolidation center and a terminal at 1733 McKinley Ave. in Columbus. With the opening of the new Alum Creek Drive facility, consolidation center operations will, again, be under one roof.

CF Motor Freight is the largest subsidiary of Consolidated Freightways Inc. of Menlo Park, Calif., a $4 billion transportation services company, which, in addition to long-haul trucking, has businesses in regional next-day trucking, worldwide air freight, intermodal truckload, customs brokerage and ocean freight services.

SAN CARLOS, CA (MAY 8) BUSINESS WIRE - ESCAgenetics Corp. (ASE:ESN), a San Carlos-based company which applies plant biotechnology to develop improved food crops, planting materials, natural ingredients and technical service for the food industry, announced Tuesday its financial results for the fourth fiscal quarter and fiscal year which ended March 31, 1990.

Revenues increased to $1,221,000 and $4,446,000, respectively, for the fourth quarter and full year ended March 31, 1990, from $834,000 and $3,622,000, respectively, in the comparable periods of the prior fiscal year.

Product sales increased from $390,755 in fiscal 1989 to $1,785,135 in fiscal 1990, while contract revenues decreased form $3,230,834 to $2,661,203 for the comparable period. As a percent of total revenues research and development increased from 39 percent for fiscal 1989 to 45 percent for fiscal 1990.

Selling, general and administrative expenses as a percent of total revenue decreased from 44 percent for fiscal 1989 to 40 percent for fiscal 1990.

The net loss for fiscal year 1990 was $(2,736,000), (74 cents) per share, compared to ($2,017,000), (55 cents) per share, for fiscal year 1989.

True potato seed (TPS) research, which is financed through the company's joint venture with Pioneer Hi-Breed International, is accounted for on the equity method and, accordingly, the company has recorded it 50 percent interest in the joint venture's loss beginning with the second quarter of fiscal 1989.

SAN JOSE, CA (MAY 8) BUSINESS WIRE - The board of directors of Aspen Semiconductor Tuesday announced the appointment of Tom North as president of the Cypress Semiconductor subsidiary.

North, formerly Cypress's manager of Product Marketing, will manage all aspects of Aspen's operations. Aspen, founded in 1987, designs, develops and manufactures high-performance BiCMOS and bipolar logic and memories, with particular emphasis on ECL (emitter-coupled logic) circuitry.

According to T.J. Rodgers, president and chief executive officer of Cypress and chairman of the board of Aspen, ''Our Aspen subsidiary has grown to the point where many of the R & D hurdles are behind us. With the appointment of Cypress veteran Tom North to the position of president of Aspen, we now put the spotlight on broadening the market and developing the company's high-speed product line even further.

Aspen Semiconductor produces the world's fastest ECL circuitry, the technology behind the industry's supercomputers and other high-performance computers. Aspen's 0.8-micron BiCMOS and bipolar process technology is used to produce the fastest available ECL static RAMs and programmable logic devices (PLDs).

The company's BiCMOS process is also used to produce the fastest available 64K TTL static RAMs and will also be used for high-performance PLDs.

North takes over as president for Robert Lutz, who has been named director of Design Engineering for Aspen. Lutz has responsibility for all technical aspects of product development.

Prior to his appointment at Aspen, North spent over five years managing product marketing for Cypress, where he had responsibility for marketing Cypress's core product lines -- static RAM and PROM memories, logic, and programmable logic devices. During that period, Cypress's annualized revenues grew from $20 million to over $200 million.

Prior to his position with Cypress, North spent four years with start-up Xicor Semiconductor, where he served as National Sales Manager and director of Business Development. Before that he served in a variety of positions with several electronics companies, including Intel Corp. North holds MBA and BSEE degrees from Stanford University.

Cypress Semiconductor Corp. is a leader in the design, development and manufacture of a broad line of high-performance digital integrated circuits, fabricated using its proprietary 0.8 and 1.2 micron CMOS and BiCMOS technologies.

Cypress offers a range of products, including RISC microprocessors and peripherals, CMOS PLDs (programmable logic devices), static RAMs (random-access memories), PROMs (programmable read-only memories), logic devices, high-speed bipolar and BiCMOS ECL (emitter-coupled logic) devices and high-speed static RAM modules.

BLUE BELL, PA (MAY 8) BUSINESS WIRE - U.S. Bioscience Inc. (ASE:UBS), a pharmaceutical company specializing in the development and commercialization of anticancer compounds, announced that an agreement in principle was reached with Teva Pharmaceutical Industries Ltd., Israel's largest pharmaceutical company, under which Teva is granted marketing rights to Hexalen, an oral anticancer agent for advanced ovarian cancer, in Israel, Eastern Europe, and parts of Africa.

Clinical trials indicate that Hexalen, when added to certain chemotherapies, significantly increases survival of women with ovarian cancer. The company submitted a New Drug Application (NDA) for Hexalen in 1988, which is pending. The agreement in principle is subject to the negotiation of a definitive license agreement.

In addition to Hexalen, Teva will have the option to acquire marketing rights in the same territory for five other anticancer drugs currently under development by U.S. Bioscience.

Among those is Ethyol, a chemo-radiation protective agent which, in clinical trials, has indicated the ability to reduce or prevent the toxicity normally associated with cancer treatment. U.S. Bioscience expects to submit applications for regulatory approval for Ethyol later this year in the United States and Europe.

Dr. Philip Schein, president and chief executive officer of U.S. Bioscience, stated that the company is pleased to be associated with Teva which is noted for its high standards of manufacturing and marketing prowess.

Schein further stated that U.S. Bioscience hopes to establish a strong and productive relationship with Teva in these territories in which U.S. Bioscience does not intend to market directly.

#90128b0178 05/08/1990 ~Business Wire

DENVER (MAY 8) BUSINESS WIRE - Bond International Gold Inc. (NYSE:BIG, TSE:BG), Tuesday reported record gold production and revenues for the quarter ended March 31, 1990, reflecting the additional production from the Bullfrog Mine in Nevada which began operations in September 1989.

Total gold production for the quarter was 162,456 ounces of which the company's share was 152,182 ounces. This compares to total production of 108,672 ounces of which its share was 98,886 ounces for the same period in 1989.

The company also reported a net loss of $4.3 million, or 8 cents per share on revenues of $70.2 million, compared to a net income of $3.4 million, or 6 cents per share, on revenues of $52.6 million a year earlier.

Results during the first quarter of 1990 were affected by a pre-tax unrealized foreign exchange loss of $3.1 million in contrast to a $5.9 million gain for the same period last year. These are primarily related to the company's Swiss franc denominated bonds. The reported loss for the quarter is also attributable to lower copper prices and lower copper production at the El Indio mine in Chile.

Working capital provided from operations nearly doubled during the first quarter of 1990 to $23.3 million from $12.7 million for the same period last year.

The average cash cost of production for the quarter was $229 per ounce of gold, including by-product credits, compared to $167 per ounce for the same period last year.

Bond International Gold Inc. operates five gold mines in the United States Canada and Chile, and has an active exploration program in North and South America.

#90128b0261 05/08/1990 ~Business Wire

HOUSTON (MAY 8) BUSINESS WIRE - After four weeks of testimony in state court in Houston a jury affirmed Tuesday a series of transactions through which The Dallas Morning News is publishing Universal Press Syndicate (UPS) features previously appearing in the Dallas Times Herald, and A.H. Belo Corp., parent company of The News, is developing television programming in a joint venture with UPS.

The jury refused to accept the Dallas Times Herald's allegations that these transactions were anti-competitive and undertaken to drive one of the New's competitors out of business.

Commenting on the jury's decision, Belo Chairman and Chief Executive Officer Robert W. Decherd said: ''Since the beginning of this lengthy legal process, we have said that the Times Herald's claims were totally without merit and were undertaken solely for competitive reasons. We are delighted that the jury has heard the facts and vindicated our position.''

Decherd continued: ''We wish to commend the jury for its conscientious deliberation and Judge David West for his hard work and fairness. I also want to recognize the legal talent representing Belo and The Morning News in this case, including our own general counsel Mike McCarthy; Bill Sims of Jenkens & Gilchrist; Harry Reasoner of Vinson & Elkins; Judge John Hill of Liddell, Sapp, Zively, Hill, and LaBoon; and Jim Kronzer of The Law Offices of James Kronzer.''

On Aug. 7, 1989, Times Herald Printing Co., owner of the Dallas Times Herald, filed suit in the District Court of Harris County, Texas, against Belo, The Dallas Morning News, and Universal Press Syndicate Inc., a

syndicator of newspaper features. The subject of the suit was a joint venture entered into between Belo and UPS to develop and distribute electronic media programming based on UPS features, and the movement of features by UPS from the Dallas Times Herald to The Dallas Morning News.

On Feb. 2, 1990, the Times Herald voluntarily dismissed its claims against UPS. The suit alleged tortious interference by Belo and The Morning News with the Times Herald's contractual relationship with UPS, and anti-competitive activity in violation of state law. The Times Herald sought damages, attorney's fees and costs.

By the time testimony ended April 27, more than 700 exhibits were introduced, and testimony from more than 30 witnesses filled in excess of 4,000 pages of transcript.

A.H. Belo Corp. owns The Dallas Morning News and Dallas-Fort Worth Suburban Newspapers Inc., publisher of seven community newspapers. In addition, Belo owns and operates network-affiliated television stations WFAA-TV (ABC) in Dallas-Fort Worth; KHOU-TV (CBS) in Houston; KXTV (CBS) in Sacramento, Calif.; WVEC-TV (ABC) in Hampton-Norfolk, Va.,; and KOTV (CBS) in Tulsa, Okla.

Shares of Belo Series A common stock are traded on the New York Stock Exchange, symbol BLC.

WASHINGTON (MAY 8) BUSINESS WIRE - Capitol Disc Interactive and Philips Mexicana, S.A. de C.V., Tuesday announced the development of a Compact Disc-Interactive (CD-I) system for multimedia point-of-information displays in the Museo Amparo Puebla, a museum dedicated to indigenous Mexican history being constructed in Puebla, Mexico.

Museo Amparo, the first museum in the world to incorporate Compact Disc-Interactive technology in its design, will utilize twenty-eight CD-I kiosks throughout the building. Each disc will contain language tracks in Spanish, English, French and Japanese.

As Amparo visitors move from room to room, they will plug headsets into the kiosks and, through Philips 20'' touch screen television monitors, they can learn at their own pace about the historic context of the display room's treasures. A moving ''time-line'' will provide the foundation for understanding the age and context of the displayed objects through comparisons with developments in other ancient civilizations.

Through CD-I, games and tasks of ancient civilizations will involve the viewers in the ancient cultures.

Capitol Disc Interactive, a Washington, D.C.-based provider of CD-I solutions, is operated as a joint venture between Philips interactive Media Corp., an affiliate of Philips Consumer Electronics Co., and Capitol Video Communications Inc.

Phillips Consumer Electronis, a division of North American Philips Corp., manufacturers and markets audio, video and computer products under the Philips, Magnovox, Philco and Sylvania brand names. Philips Mexicana, a sister company, is marketing the same consumer electronics products in Mexico.

Capitol Video Communications, based in Washington D.C., has been producing CD-I discs since November 1988. Capitol Video will support the Amparo project by providing technical assistance as required. It's primary business is as a video post-production facility.

#90128b0332 05/08/1990 ~Business Wire
MENLO PARK, CA (MAY 8) BUSINESS WIRE - Raynet Corp. announced Tuesday it

has signed a $14 million contract with the West German Ministry for Post and Telecommunications (Deutsche Bundespost).

This contract calls for Raynet to provide and help install a turnkey fiber optic system which will provide cable television (CATV) service to approximately 4,500 subscribers in the area of Lippetal in northern West Germany.

This system will provide 36 broadband AM video channels as well as 30 FM audio channels and 16 digital audio channels. Installation will begin in the third quarter of 1991.

This contract follows a previous successful technology trial between Raynet and the Deutsche Bundespost that demonstrated the technology of a combined cable television and telephone fiber optic system in Cologne, West Germany. The trial system has been installed and is now entering service.

In April 1989, Minister Dr. Christian Schwarz-Schilling, head of the Deutsche Bundespost, asked Raynet to explore the application of its fiber communication technology for CATV service to sparsely settled rural areas in West Germany. Raynet's fiber optic system offers technical and economic advantages over traditional copper coaxial cable systems.

The Raynet fiber optic technology provides a much better quality and more reliable system for supporting the high frequency transmissions of the West German broadband cable (BK) television network over the long distances involved in rural areas.

In addition, Raynet's resource sharing architecture, which shares the cost of the expensive electronic components over a large number of subscribers, promises better economics than the long distance coaxial systems that require many repeaters and signal boosters.

A team of engineers from Raynet GmbH in Bonn, Germany and Raynet Corp. in Menlo Park, USA, has been assembled to implement this system in cooperation with the local telephone district administration.

In addition to this installation and the technology trial in Cologne, Raynet is also undertaking other trials in Europe and the United States. Raynet recently announced an agreement with Telefonica, the Spanish telephone company, for a 100-home trial of Raynet's Loop Optical Carrier (LOC) fiber optic telephone system in Madrid, Spain.

Raynet Corp. develops, manufactures, and sells high-performance, cost-effective resource-sharing fiber optic telephone and video distribution systems for local loop applications throughout the world. Founded in 1987, Raynet is a subsidiary of Raychem Corp. (NYSE:RYC).

Raynet International's European headquarters are in Brussels at Excelsiorlaan 55, Zaventem, Belgium (Telephone: 32-2-720-0906).

SAN JOSE, CA (MAY 9) BUSINESS WIRE - Alps Electric (USA) Inc. Tuesday announced a new business unit solely dedicated to developing new products and identifying business ventures and alliances for the supplier of consumer, automotive, communication and computing products.

The Alps Development Group (ADG) will have direct access to the Central Laboratories of parent company Alps Electric Co. Ltd. in Japan, bringing together resources from all of the Alps groups in both the United States and Japan. The group will be funded by both the parent company and the U.S. subsidiary.

The new group, based in San Jose, will be headed by vice president and general manager Jerry Garrett. Garrett was formerly vice president and general manager of the Alps OEM Division. In his previous position, Garrett was instrumental in bringing new technologies to Alps and establishing the company's first strategic partnership with Prairie Tek, the leading company in the development of 2.5-inch rigid disk drives.

Through its two primary functions of applied engineering and business development, ADG will define new products, and identify appropriate technologies and markets for joint ventures and alliances with independent businesses. The group also will develop relationships with major university research centers.

Along with the formation of ADG and appointment of Jerry Garrett, Alps Electric (USA) Inc. announced additional personnel changes within its Alps America and Alps OEM divisions.

Lalita Tademy, formerly vice president and general manager of Alps America now has overall management responsibility over both Alps America and Alps OEM. Tademy has been promoted to senior vice president and general manager, and will provide a single focal point to better enable the two divisions to serve the personal computing industry.

Alps America markets printers and other peripherals for the IBM PC and Macintosh environments. Alps OEM markets computer graphic and data input devices, keyboards and switches, laptop computers, components and circuit

devices, and flexible and hard disk drives for companies to sell under their own labels.

Founded in 1976, Alps Electric (USA) Inc. serves a broad range of markets, including office automation, communications, automotive and consumer white goods. The company is a subsidiary of Alps Electric Co. Ltd. in Japan -- one of the world's largest independent manufacturers of electronic and electromechanical components, and a member of the International Fortune 500.

SUNNYVALE, CA (MAY 8) BUSINESS WIRE - DAVID Systems Tuesday took another step in providing a full range of products for Ethernet 10BASE-T unshielded twisted-pair wire LAN systems by announcing two DAVID Ether-T adapters for IBM personal computers and compatibles.

The Ether-T PC Adapter is designed for use in an IBM PC, XT, AT, PS/2 Model 30, or AT compatible. It can be used in the file server or in a workstation. With 40kb RAM memory, the adapter provides sufficient buffers to handle network traffic when utilized as a file server adapter. When used as a workstation adapter data transfer speeds are superior. The Ether-T PC is aggressively priced at $350.

The Ether-T AT Adapter is designed for use in an IBM AT, PS/2 Model 30-286 or AT compatibles. In addition, ISA standard 16 bit bus computers using the 80286 or 80386 processors are also compatible with this adapter. Superior performance is achieved through efficient driver performance and the utilization of 64kb RAM memory on board the adapter.

The adapter is suitable for either file server use or workstation operation. This adapter is priced at $445.

The popular network operating systems are supported by the DAVID Ether-T Adapters. High performance drivers are included with each Ether-T Adapter. Novell NetWare 286 versions 2.0a, 2.11, 2.12, and 2.15c drivers are included. NetWare 386 drivers are included. Also included are drivers for Microsoft OS/2 LAN Manager. Drivers for TCP/IP are optionally available.

The Ether-T adapters are available in single adapter packages as well as

in a number of VolksNet/DAVID ExpressNet Kits. The Network Kit contains a VolksNet Hub, twelve Ether-T PC adapters, a connector for twelve RJ45 jacks on the Hub and twelve 25' modular cables. This kit brings the cost of 10BASE-T connections to $399 with the VolksNet Hubs.

With Ether-T adapters comes the industry's most knowledgeable telephony support services group. For years DAVID technicians have supported the installation of complex LAN/data/voice networks through both call-in support and field service support and installation.

The Ether-T Adapters also operate with the full range of DAVID 10BASE-T featured products such as DAVID ExpressNet Hub, DAVID ExpressNet Intelligent Concentrators, and the DAVID Information Manager for voice/data/LAN.

The Ether-T adapters, kits and other DAVID products are available through DAVID Systems' four major U.S. distributors: ALLTEL Supply based in Atlanta (1-800/DATA-330), C.W. Electronics Enterprises Inc. in Illinois (1-800/323-0894), GBC Distributors Inc. in Washington, D.C. (609/767-2500) and Gemini Associates Inc. in Southern California (1-800/255-7708).

DAVID Systems' products are also available in 10 countries and through major VARs and system integrators in the United States.

DAVID Systems is a leader in integrating digital and voice communications. Ethernet LAN products were first supplied in 1985. As a technical leader in its field, DAVID Systems holds six communications patents and is an active participant in the IEEE 802.3 10BASE-T Ethernet standards committee.

Ether-T, VolksNet and DAVID Information Manager are trademarks of DAVID Systems Inc. DAVID ExpressNet is a registered trademark of DAVID Systems Inc.

ENGLEWOOD, CO (MAY 8) BUSINESS WIRE - RE/MAX International Relocation Services Inc. has announced a move to expand its facilities, as well as the opening of affiliate offices in the United States and Canada, and the signing of new contracts with several major corporations.

Mark Roussy, vice president and chief operations officer, said the company will occupy most of the 15,000 square feet of space on the second floor of the Quadrant Building in the Denver Tech Center, and anticipates during its headquarters staff before the end of 1990.

In addition, the firm has opened branch offices in Atlanta and Chicago, as well as a Canadian division in Toronto. It will soon open offices in Washington, D.C., Philadelphia and Calgary.

''We have added a great many names to our list of well-satisfied customers '' said Roussy, ''including Great West Life, Ameritech, Schlumberger, Club Corporation of America, SGS Thompson, Worthington Industries, Sangamo Western and Sealright Corporation.''

The firm, according to Roussy, is seeking to become one of the leading providers of relocation services.

''American corporations currently spend some $20 billion a year to relocate their employees, and they are understandably concerned about the impact on their bottom line,'' he said. ''We can be of help. RE/MAX has access to more than 27,000 sales associates in more than 1,700 real estate offices across North America. Our fees are very competitive, and we are focusing our marketing on our proven ability to provide customized service no matter how extensive the need. Great West Life, for instance, has more than 12,000 employees in the U.S. and Canada who need to be relocated quickly and efficiently.''

The relocation firm is an affiliate of RE/MAX International Inc., the nation's second largest residential real estate company. Headquartered in Englewood, the parent company provides a variety of services, including insurance, referral and asset management, as well as relocation. The company was founded by Dave and Gail Liniger in 1973.

ALHAMBRA, CA (MAY 8) BUSINESS WIRE - Ortel Corp. has signed an equity agreement with Sumitomo Cement Co., Ltd., it was announced by Wim H.J. Selders, Ortel president.

The agreement includes an $11 million cash investment by Sumitomo Cement for a 21.6 percent equity stake in Ortel and a provision for the company to distribute Ortel's products in Japan and certain other countries in the Far East.

This investment will be used by Ortel to expand its production capacity in the United States. The expansion is needed to meet the increasing demand for Ortel's CATV semiconductor laser-based products. The development of these breakthrough products was recently announced.

Sumitomo Cement is one of the four top cement companies in Japan with sales exceeding $1 billion. Sumitomo Cement has embarked on a diversification program in ceramics, new materials, electronics and optoelectronics.

Ortel is a leading manufacturer and design pioneer of optoelectronics products primarily for the CATV and microwave markets.

''The agreement with Sumitomo Cement fits in superbly with Ortel's strategy for participating in global markets,'' said Selders. ''The partnership provides Ortel with an excellent opportunity to increase its export revenues through access to the Japanese markets and other countries in the Pacific Rim.''

For further information, contact Ortel Corp., 2015 West Chestnut St., Alhambra, Calif. 91803. The telephone number is 818/281-3636.

SAN FRANCISCO (MAY 8) BUSINESS WIRE - Radar/Digital Systems of Auburn, Calif., announced on Friday, May 4 the successful completion of a live operational test of their new Vessel Traffic Surveillance and Data Management System at the US Coast Guard Vessel Traffic Center in San Francisco.

Tests verified the ability of the VTMS-87 system to automatically acquire, track and plot vessel movements and to automatically create alarms should any vessel head toward a known hazzard or move into predesignated warning or danger areas. Specific safety features have been built in to this new computerized system to provide an increased warning for all possible occurances such as the Exxon Valdez collision.

Richard Fay, president and chief executive officer of Radar/Digital Systems commented that ''These live tests at the Vessel Traffic Center clearly demonstrated that this new technology equipment can provide significant improvement in the automatic monitoring and tracking of vessel movements throughout a port."

Earlier versions of this equipment are in operational use by the US Coast Guard, the Canadian Coast Guard, US Navy and US Customs Service. New software developed and improvements to the hardware design this year made

a major improvement in the functions and capabilities of the VTMS-87.

More moving and stationary vessels can be monitored, more alarm functions were added, and greater graphic and map overlay capability were added to help operators more clearly and quickly see the traffic situation.

This system has been selected by two of the busiest Ports in China and Korea to improve their vessel traffic monitoring and control and is being considered for purchase by ports in Canada, Indonesia, France and Pakistan.

Radar/Digital Systems develops and manufactures radar processing, vessel tracking, plotting and data management systems for vessel traffic surveillance systems in ports, harbors and coastal areas.

The VTMS-87 Vessel Traffic Data Management System uses the latest digital signal processing and color graphic display technology to increase the capability of surveillance radar and vessel traffic control operator to see moving vessels. R/DS facilities are located at the Auburn Municipal Airport in the Sierra Foothills east of Sacramento in Northern California.

NEW YORK (MAY 8) BUSINESS WIRE - ''Bodacious,'' ''outrageous'' and ''awesome,'' ''Teenage Mutant Ninja Turtles'' keeps soaring higher, as the hit film passed the $100 million mark this weekend.

In its sixth weekend of release, ''Teenage Mutant Ninja Turtles'' has grossed $104,768,039 to date, ranking as the highest grossing independent feature film of all time. It first broke this record when it surpassed ''Dirty Dancing'' which previously held the record at $63,446,382. This past weekend, the film grossed $5,320,211 on 2,330 screens.

''Turtles'' held the No.1 position for four consecutive weeks, having opened on March 30 to a record breaking $25.4 million in its

first three days, setting the record for the second highest number of admissions for a three-day weekend in motion picture history (second only to ''Batman'').

In its 17th day of release, ''Turtles'' raced past the competition, out-grossing ''Pretty Woman'' by over 5 million and the No.3 film ''Earnest Goes to Jail'' by over 11 million. The film also set the record for the largest non-holiday, non-summer opening ever.

Moviegoers continue to hip hop to ''House Party.'' Now in its ninth week of release, the film grossed $430,216 this past weekend on 389 screens, bringing the total box office gross to $22,535,799.

IRVINE, CA (MAY 8) BUSINESS WIRE - Corollary Inc. announced Tuesday that its Corollary 8x4 Serial I/O Subsystem will be used in Digital Equipment Corp.'s new multi-user 80386 UNIX-based computer system.

This is the first agreement between the two companies. A second agreement will be announced at a later date.

The DECsystem 316+, 325 and 333, which run SCO UNIX System V/386, are being marketed to small businesses by Digital's General Systems Business group. Corollary's 8x4 multiport products allow the machines to support up to 64 users. The DECsystem 316+ can handle four to eight users, the 325 supports up to 32 users and the 333 supports up to 64 users. A single Corollary 8x4 card and four 8/tcfm+ terminal concentrators support up to 32 users.

The Corollary 8x4 was the first PC-based multiport product to use multiple processors for high speed and the first to support 32 terminals from one slot. It supports 286, 386 and 486 ISA, EISA and Micro Channel-based computers, and is sold with systems marketed by several OEMs.

Up to four 8x4 cards can be installed in a system to support as many as 128 users, with each card connecting four 8/tc+ or 8/tcfm+ terminal concentrators. The terminal concentrators can be placed up to 1,000 feet from the host computer using standard twisted-pair cable.

Corollary develops, manufactures and markets proprietary high-performance hardware and software products that extend the power of 386- and 486-based PCs running the UNIX operating system by providing support for multiple users and by increasing processing capacity via multiprocessor technology.

#90128b0656 05/08/1990 ~Business Wire

FREMONT, CA (MAY 8) BUSINESS WIRE - Interlink Computer Sciences Inc. Monday announced DATAstore 1000, a new product which allows users of Digital Equipment Corp (DEC) VAX systems running VMS on DECnet networks to store files, directories, or entire disks on IBM tape drives attached to an IBM processor.

The product operates with IBM's Multiple Virtual Storage (MVS) and Virtual Machine (VM) operating systems.

DATAstore 1000 allows users to take advantage of IBM's superior reliability, security, tape management functions, and automation capabilities (freeing personnel from manually performing the task). It uses standard Digital Command Language syntax so DEC users do not need extensive training to take advantage of the product.

It also allows concurrent jobs from multiple DECnet nodes, and supports dual copy (duplexing). The product can be used with either an IBM 3490, 3480, or 3420 tape device.

Interlink's DATAstore 1000 is priced at $30,000 in the United States, and will be available in June.

With this new product, data is written to, or read from, what appears to be a locally attached tape device from the DEC user's perspective. Instead of accessing a DEC tape drive, a 3490, 3480, or 3420 tape device is allocated on the IBM processor which is attached to DECnet via an Interlink Network Controller.

Interlink Computer Sciences creates customer solutions, based on industry standards, that integrate computer networks, applications, data and peripherals. With headquarters in Fremont, Interlink has branch offices and distributors located throughout the United States, Europe, Latin America, and Asia Pacific.

For more information, write or call Interlink Computer Sciences Inc., at 47370 Fremont Blvd., Fremont, CA 94538; 800/422-3711, or 415/657-9800 (in California).

#90128b0659 05/08/1990 ~Business Wire

SANTA CLARA, CA (MAY 8) BUSINESS WIRE - S3 Inc. Tuesday announced support of its new Silicon SubSystems Solution by leading semiconductor manufacturers AMD, Cirrus Logic, Integrated Device Technology and National Semiconductor.

At the heart of the S3 Silicon SubSystems design approach is its Advanced Chip Interconnect bus, an open, high-speed local system bus. Decoupled from the I/O, ACI provides a consistent interface to the CPU subsystem, memory subsystem, graphics subsystem and peripheral subsystem.

S3's ACI supports proprietary as well as third-party design peripherals offering manufacturers a variety of products to choose from.

''We are pleased to have the support of companies such as AMD, Cirrus Logic, IDT and National Semiconductor for our Silicon SubSystems design approach,'' said Dado Banatao, president and chief executive officer of S3.

''In addition, working with these semiconductor companies to open up the ACI will provide OEMs with maximum flexibility and availability of a wide variety of peripheral controller choices.''

S3 will be publishing the specifications of its open, high-speed ACI based on the Intel 386/486 local bus, allowing ''plug and play'' of currently available 32-bit peripherals such as Ethernet and SCSI controllers and advanced LAN controllers. ACI's 486-based architecture will also allow OEMs to incorporate advanced 32-bit peripherals such as FDDI and other high-performance controllers.

Cirrus Logic has agreed to develop products that are compatible with the ACI. The IDT 71589 CacheRAM connects to S3's Advanced Cache Controller, which in turn interfaces to the ACI. AMD and National supports personal computer systems that are open to enhancements by systems manufacturers.

S3 Inc. was founded in January 1989 by former Chips & Technologies co-founders, Dado Banatao and Ron Yara. S3 originated the Silicon SubSystems approach to systems design, including an open, high-speed Advanced Chip Interconnect bus and is the only company to deliver a flexible workstation architecture with PC compatibility and cost over a range of system performance.

CHICAGO (MAY 8) BUSINESS WIRE - NCR Corp., a leader in the retail automation marketplace, today announced a new high-speed version of its 2127 Retail System, a point of sale (POS) and transaction processing system for food, drug and general retail establishments.

At the Food Marketing Institute (FMI) trade show, NCR exhibited new hardware and software for the 2127 Retail System to provide retailers with increased speed and performance.

Specifically, the new version of the 2127 Retail System provides retailers with several major benefits:

-- 25 percent increase in processing speed.

-- Faster communications speed among the POS workstations, for faster price look-up and higher productivity.

-- High density disk drives providing faster disk access while doubling capacity from 20 Mbytes to 40 Mbytes.

-- Enhanced software features.

The NCR 2127 Retail System is comprised of two optional components: the NCR TOWER or PC platform and NCR's ULTRA software package.

The new NCR 2127 system is designed to provide users with greater control over their businesses by offering automated transaction and management

reporting functions. The NCR 2127 also offers price lookup (PLU), high order communications, data capture, in-store processor interface capabilities and electronic funds transfer.

The new version of the NCR 2127 Retail System is available immediately through the NCR direct sales force, VARs and resellers.

Hardware and software service and maintenance support will be provided by NCR's 16,000 field and software engineers, located at 1,300 locations worldwide in 120 countries.

NCR Corp., based in Dayton, Ohio, develops, manufactures, markets, installs and services business information processing systems for worldwide markets.

#90128b0686 05/08/1990 ~Business Wire

CHICAGO, IL (APRIL 8) BUSINESS WIRE - Aon Corp. Tuesday announced financial results for the first quarter of 1990.

Patrick G. Ryan, president and chief executive officer, said, ''First quarter net income was 89 cents per share, an increase of 8.5 percent from last year's 82 cents. Income excluding realized investment gains was 88 cents per share in the quarter compared with 79 cents per share in last year's first quarter.''

	First Quarter 1990	
(Thousands except per share)	Amount	Pct. change from 1989
Premiums and policy fees	$360,794	2.9 Pct.
Net investment income	153,037	8.6
Realized investment gains	1,272	(51.4)
Brokerage commissions, fees, and other	105,637	31.6
Total revenue earned	620,740	8.1
Income before tax	80,130	9.6
Net income	58,930	9.7
Per share	.89	8.5
Income excluding realized investment gains - net of tax	57,958	11.9
Per share	.88	11.4

Ryan continued, ''First quarter revenue was $620.7 million, an increase of 8.1 percent from the prior year. Premiums and policy fees rose 2.9

percent to $360.8 million reflecting the increase in accident and health revenue. Net investment income was up 8.6 percent to $153 million.

Pretax realized investment gains totaled $1.3 million. Brokerage commissions, fees, and other were $105.6 million, a strong gain of 31.6 percent over the 1989 level reflecting in part the third quarter 1989 acquisition of most of the businesses of Bayly, Martin & Fay. Benefits and expenses increased 7.8 percent to $540.6 million.

''The combination of higher total revenue and benefits and expenses produced a 9.6 percent increase in income before income tax to $80.1 million compared with $73.1 million in the prior year. Our tax rate this year is 26.5 percent compared to 26 percent for the full year 1989.

#90128b0688 05/08/1990 ~Business Wire

VANCOUVER, B.C. (MAY 8) BUSINESS WIRE - Naxos Resources Ltd. announced in its news release 90-6 on Tuesday that it had retained the services of an independent engineer and independent geologist to collect and analyze samples from the Franklin Lake Property and that the engineer and geologist had supervised the drilling of two additional holes close to the discovery hole.

The company has now received back a report from M.H. Sanguinetti, P.Eng.

Sanguinetti's report discloses assays received back from Bondar- Clegg, Loring, Quanta Trace and Min-En Laboratories. Six samples were tested by each laboratory. Bondar-Clegg assayed the samples both by fire assay and atomic absorption.

Of the six samples tested by fire assay all reported less than .002 oz/T of gold. By atomic absorption Bondar-Clegg reported .018 in one sample and .004 oz/T of gold in a second sample. Quanta Trace showed .005 oz/T by both fire assay and atomic absorption aqua regia leach. All other samples showed less than .002 oz/T of gold.

Assays by Quanta Trace showed .04 oz/T of silver by atomic absorption. While Min-En reported .12 oz/T of silver in one sample and .16 oz/T in a second sample by way of brass fusion of I.A.T. and routine analysis as for copper bullion. All other assays of silver were less than .02, .01 and .001 oz/T for Bondar-Clegg, Quanta Trace and Min-En Laboratories respectively. Loring Laboratories reported traces of gold and silver in all samples.

In addition, the company has also received two reports of Dr. Groves. Dr. Groves, in reviewing Sanguinetti's report, has advised the company, due to the presence of chlorides, and/or highly insoluble complex sulfates, lead firing or dilute aqua regia are inefficient methods of reporting precious metal values.

It is for this reason, that the company has been experimenting with Zinc powder to break precious metal salts by metal replacement as described in the company's New Release 90-3. However, this work is experimental and more work is needed to prove this. In accordance with Dr. Groves' recommendations the Company plans to begin cyanide tests and continue with the zinc copper plating tests.

BURLINGTON, MA (MAY 8) BUSINESS WIRE - M/A-COM Inc. (NYSE:MAI) has announced an agreement with AT&T Microelectronics of Berkeley Heights, N.J. to offer products and foundry services of Gallium Arsenide Monolithic Microwave Integrated Circuits (GaAs MMICs) used in radio frequency and microwave applications for both commercial and defense systems.

Under the terms of the agreement, M/A-COM will provide customer interface, training, standard and custom product design, test, assembly and product sales services while AT&T Microelectronics will provide, through M/A-COM, molecular beam epitaxy (MBE) GaAs MMIC processing services from its facility in Reading, PA. M/A-COM will also offer its own ion-implanted processes.

M/A-COM will thus offer to the industry through the alliance a broad mix of GaAs FET-based MMIC foundry services and products including 1 and 0.5 micron processes, while developing higher performance Heterostructure processes.

GaAs MMICs are used in a variety of commercial systems - such as cellular telephones, pagers, high-definition television (HDTV), satellite earth stations and global positioning satellite receivers; and defense systems - such as phased array radar, secure communications, smart munitions and electronic warfare.

The market for GaAs MMICs is forecast to grow from $80M in 1990 to $300M by 1994 as GaAs MMICs provide superior frequency and speed performance over silicon-based devices. Also, GaAs MMICs allow for significant reductions in cost, size, and repeatability over hybrid devices.

AT&T Microelectronics manufactures a host of leading-edge components, including graphics and speech processors, optical data links, ASICs, communications devices, interconnect products, a family of ISDN chips, lightwave communications components and electronic power supplies such as dc-to-dc converters and board- mounted power modules, for computer and communications applications.

M/A-COM is a leading producer of radio frequency, microwave and millimeter wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation, missile guidance, electronic warfare, surveillance and command-control- communications-intelligence (C3I) systems. M/A-COM also supplies surveillance products used in intelligence collection applications.

The company's products are used primarily in defense electronics systems, but also have numerous commercial applications.

ST. LOUIS (MAY 8) BUSINESS WIRE - McDonnell Douglas Corp. (NYSE: MD) Tuesday announced that it has donated research and engineering equipment valued at more than $302,000 to Alabama Agricultural and Mechanical University in Normal, Ala.

The company is giving more than 86 pieces of equipment, including such items as digital oscilloscopes, power supplies, a flow rate calibrator and mechanical vacuum pump to the university's Physics and Engineering and Technology departments.

The equipment will be used for teaching and for the research the university does for various federal agencies. Alabama Agricultural and Mechanical University, which is celebrating its 115th anniversary this week, does extensive research into semiconductor and optical crystals for NASA, the National Science Foundation, and the departments of Energy and Defense.

"The equipment McDonnell Douglas has given us will add substantially to our experimental capabilities," said Dr. Lawrence Holland, a physics professor. "Because the equipment is not restricted to specific research contracts, it allows us to introduce our undergraduate students to many hands-on experiments."

Under McDonnell Douglas' 15-year-old excess equipment donation program, universities may choose equipment from a list of items that are no longer needed by the company. The equipment is donated free of charge. For the past two years, McDonnell Douglas has targeted the program toward historically black colleges as part of its efforts to encourage minority university-level education.

#90128b0733 05/08/1990 ~Business Wire

PALO ALTO, CA (MAY 8) BUSINESS WIRE - Hewlett-Packard Co. Tuesday announced it has expanded the entry-level segment of its HP 9000 product family, the industry's broadest family of UNIX system-based minicomputers.

HP introduced the Model 822S, a new, low-priced minicomputer aimed at distributed client-server office and lab environments. It has a U.S. list price of $27,900, and is scheduled to be available in June.

A server is a computer residing on a network that offers services to many clients (PCs and workstations), freeing them for other tasks and improving their performance.

HP said its commitment to reduced-instruction-set computing (RISC) architecture allows it to increase performance for its entry-level systems. The Model 822S, like all HP 9000 minicomputers, uses RISC to provide increased reliability and performance at a lower cost of ownership than competing systems.

HP entry-level minicomputers are members of a scalable, standards-based family that provides a convenient growth path and flexibility, as well as software and and machine-language compatibility to customers in commercial markets.

The HP 9000 Model 822S integrates a processor, up to four disk drives and a digital-audio-tape (DAT) cassette drive in a compact, deskside unit.

HP was the first company to use the high-capacity DAT, which it introduced in January with its midrange Model 832S, and the Model 822S is HP's first entry-level minicomputer to use DAT technoloy. The DAT, which measures approximately 3 in. by 2 in. by 1/2 in., can store up to 1.3 Gbytes of data on a single DAT cassette. That's 10 times what a standard magnetic tape can hold, and about 70 times what a magnetic tape can hold if the information is compressed electronically. The DAT is a convenient and compact way to store information.

With today's announcement, HP now has 13 HP 9000 minicomputers running HP-UX, a standards-based operating system, which is based on and fully complies with AT&T's UNIX system. HP also offers 25 minicomputers using Precision Architecture-RISC (PA-RISC), HP's version of RISC.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

HOUSTON (MAY 8) BUSINESS WIRE - A. Earl Swift, chairman and president of Swift Energy Co. (ASE, PSE:SFY), will report a 67 percent increase in earnings for the first quarter of 1990 at the company's ninth annual stockholder's meeting Tuesday.

Consolidated net income of $2.5 million, or 52 cents per share for the quarter ended March 31, increased from $1.5 million, or 36 cents per share reported for the same period last year.

Revenues for the quarter increased 41 percent to $5.5 million compared to $3.9 million in the first quarter of 1989.

Commenting on the results, Swift said, ''Approximately 60 percent of the increase in revenues for the quarter came from earned interest and fees associated with producing property acquisitions made in conjunction with a third party investor.

''A $300,000 increase in oil and gas sales also contributed to increased revenues. When compared to the first quarter of 1989, revenues from earned interest and fees increased 38 percent, while oil and gas sales increased 39 percent.

''At the end of the first quarter the company entered into a definitive agreement under which it will manage a joint investment of approximately $12.5 million in properties that the company had previously purchased from Amoco Production company.

''Of that sum, approximately $2.5 million was invested by the company and approximately $10 million by the third party investor. The company will

receive a significant after payout percentage in the properties purchased by the investor after payout, in addition to a cash fee of 5 percent of the purchase price paid by the investor. Additional property interests are scheduled for purchase under this arrangement upon resolution of certain title issues with Amoco.

Swift Energy is an independent oil and gas company primarily engaged in the acquisition, exploration, development and operation of oil and gas properties through partnerships and joint ventures. The company also offers geological consultation and prospect generation services.

#90128b0741 05/08/1990 ~Business Wire

KANATA, Ontario (MAY 8) BUSINESS WIRE - Mitel announced Tuesday that it has provided the world's first transatlantic Digital Private Network Signalling System (DPNSS) capability by utilizing its SX-2000 Integrated Communication System (ICS) to join the PABX networks of British Telecom operations in the United States and the United Kingdom.

This fully integrated network has the capacity to provide on an international scale services such as: Group 4 FAX, route optimization, video-conferencing, centralized attendant service, and desk-top efficiency features such as: -- Fast Call Set-up -- Dial by Name -- Calling Line Identification (with name) -- Camp-on/Callback (ring back when line is free) -- Transfer/Conference -- Call Forwarding

British Telecom, on April 24, 1990, announced that its new Park Avenue, New York office has been linked to its offices in London, England via DPNSS and fibre optic technology to create a single ''Virtual PABX'' environment.

Calls in British Telecom's offices can be transferred across the Atlantic as easily as to the office across the hall and that will assist in integrating the efforts of its international service and sales operations. ''This unifying step is the latest manifestation of our commitment to be as customer responsive as possible,'' said Michael L. Ford, president of British Telecom Inc. in the U.S.

Mitel is the only PABX manufacturer to provide this ISDN-like network protocol standard in North America and will soon integrate its own North American and United Kingdom operations with a similar transatlantic

''Virtual PABX'' Network

Mitel is an international manufacturer of sophisticated, reliable business telecommunications systems, public switching systems and semiconductor products with annual revenues of more than $400 million.

More than 140,000 Mitel telecommunications systems have been sold in over 100 countries. Mitel's common shares are traded on the Toronto, Montreal, New York and London stock exchanges under the symbol MLT. Since 1986, British Telecommunications plc, a $20 billion telecommunications company based in the United Kingdom, has owned 51 percent of the company.

#90128b0748 05/08/1990 ~Business Wire

HOUSTON (MAY 8) BUSINESS WIRE - American Exploration Co. (AMEX:AX) Tuesday reported a net loss of $714,000, or 4 cents per share, for the first quarter of 1990, as compared to a net loss of $506,000, or 4 cents per share, for the comparable 1989 period.

Revenues generated during the first quarter of 1990 totaled $14.9 million, or 45 percent higher than experienced in the 1989 period. Mark Andrews, chairman and CEO, said ''the 67 percent increase in oil and gas revenues, from $8.2 million to $13.6 million, was responsible for the revenue growth. The principal reasons for the signifacant improvement in oil and gas revenues was higher crude oil and natural gas production and higher crude oil prices in the 1990 period.''

For the first quarter of 1990 crude oil production was 3,710 barrels per day, compared to 2,920 barrels per day for the same period last year, or an increase of 27 percent. Natural gas production in the first quarter of this year was 37,280 Mcf per day, an increase of 57 percent from the first quarter of 1989 production of 23,800 Mcf per day.

Production from properties acquired during 1989, primarily the property interests acquired from Oryx Energy Co. in November 1989, contributed significantly to the increase in production. This year's first quarter average crude oil price was $20.61 per barrel vs. $14.98 per barrel for last year's first quarter, or an increase of 38 percent.

Average natural gas prices this year were relatively flat with last year's first quarter, at $2.01 per Mcf and $1.98 per Mcf, respectively.

Production and operating costs for the first quarter of 1990 totaled $4.8 million, or 53 percent above the 1989 period. Higher operating costs reflect the 44 percent increase in production levels, as well as additional workover projects which occurred during the 1990 period.

Similarly, increased production was the principal reason that Depreciation Depletion and Amortization (DD&A) increased to $4.8 million from $3.5 million. On an equivalent barrel basis DD&A was $4.91 in the first quarter of 1990 compared to $5.17 in the first quarter of 1989. The lower depletion rate is the result of American Exploration's success at reserve replacement through development drilling and reserve revisions and lower acquisition costs per BOE paid during 1989.

Although the company experienced significant improvement in oil and gas operating results, a marginal net loss was incurred during the period due to higher general corporate expenses associated with staffing and business expansion.

Cash flow from operations was $2.7 million in the first quarter of 1990 and $1.2 million in the first quarter of 1989, an increase of 121 percent.

American Exploration Co. produces and sells oil and gas, principally in Texas, New Mexico and the Mid-Continent region. The company also acquires oil and gas properties with funding from institutional investors and seeks to add reserves to its properties through efficient operation and development drilling.

MONTREAL (MAY 8) BUSINESS EDITORS - Audrey Resources Inc. (ME,TSE:AUY) announced an unusual loss in operations for the first quarter.

For the three month period ended March 31, 1990, net loss was $1,445,000 or 9 cents per share compared to a net loss of $106,600 or 1 cent per share in 1989.

Audrey recorded revenue of $4,128,000 and expenses of $5,590,000 compared to revenue of $37,600 and expenses of $175,000 in 1989. The Mobrun mine was not in operation during the first quarter of 1989.

Mining operations were profitable in March and the Company still expects to generate operating profits in the order of $6,000,000 for the year, at current metal prices.

In other respects, the surface drilling campaign which began in February 1990 in order to assess a strong geophysical anomaly, located 2,400 feet at depth and 300 feet south-east of the 1100 lens, has confirmed the presence of massive sulfide in this area. The first drill hole intersected 50 feet of stringers and 3 feet of massive sulfide at a depth of 2,180 feet. However, the second hole, drilled 300 feet below and 200 feet to the east of the first drill hole, did not intersect massive sulfide. Drilling was suspended in order to conduct new PEM geophysical surveys and reevaluate the data in all previous drill holes in this area. Drilling should resume in July 1990.

Furthermore, 75 percent of the underground definition drilling on the 1100 lens is completed. This definition work is being done by three drills located on the sixth level of the Mobrun mine. Results up to date indicate an increase in tonnage and confirm the reserve grades of the 1100 lens. Reserves had been evaluated by surface drilling at 15,500,000 geological metric tons grading 0.83 percent copper, 4.64 percent zinc, 35.9 g/t silver and 1.26 g/t gold or 10,400,000 mineable metric tons grading 0.76 percent copper, 5.43 percent zinc, 37.40 g/t silver and 1.35 g/t gold.

NEW YORK (MAY 8) BUSINESS WIRE - J. Richard Munro, co-chairman and co-chief executive officer of Time Warner Inc., Tuesday announced at the first annual meeting of Time Warner's stockholders that effective tomorrow

he will step down from his current positions as he had originally planned.

Time Warner President N.J. Nicholas Jr., age 50, will become co-CEO along with Steven J. Ross, who will remain chairman of the company. Munro, who is 59 years old, will remain a director of Time Warner and become chairman of its executive committee.

A graduate of Colgate University, Munro joined Time magazine in the circulation department in 1957, rose to publisher of Sports Illustrated and was named Time Inc.'s first group vice president of video in 1975. Under his direction, Home Box Office became the first pay-television network offering 24-hour-a-day programming via satellite to its cable affiliates.

Named president and CEO of Time Inc. 1980 and then chairman and CEO in 1986, Munro oversaw the company's $1 billion spinoff of its forest products subsidiary -- up until then, the largest non- government mandated spinoff of a business in corporate history.

On January 10, 1990, Time Inc. completed its $14 billion acquisition of Warner Communications Inc., culminating more than two years of talks between the companies and creating Time Warner Inc., the world's leading media and entertainment company.

DFW AIRPORT, TX (MAY 8) BUSINESS WIRE - Passenger traffic at American Airlines increased 5.9 percent in April on the strength of continued expansion and Easter holiday travel, American reported Tuesday.

The airline flew 6.17 billion revenue passenger miles last month compared to 5.82 billion RPMs flown in April 1989.

Cargo traffic jumped more than 13 percent in April, recording its 35th consecutive month of double-digit increases.

April's performance was fueled primarily by continued growth in capacity, ''and solid results in the international market,'' said Michael W. Gunn, the airline's senior vice president-marketing.

American's available seat miles increased 6.3 percent in April, to 9.93 billion from 9.35 billion a year earlier.

Gunn said American's international traffic ''continues to perform

extremely well, which is a particularly encouraging sign as we prepare to expand to Central and South America this summer from our new hub at Miami.''

Gunn added that American's new service to Sydney, Australia and Auckland, New Zealand is exceeding expectations. Throughout its system, American boarded 6,049,000 passengers in April, up 4.4 percent from the 5,792,697 boarded last April. The system load factor decreased to 62.1 percent from 62.3 percent.

During the January-April period, revenue passenger miles jumped 7.4 percent to 23.6 billion from 22.0 billion in the same months of 1989; available seat miles grew 7.6 percent to 39.1 billion from 36.4 billion; the load factor declined to 60.4 percent from 60.5 percent, and passenger boardings increased 6.0 percent to 23,176,790 from 21,865,224.

Freight ton miles increased 13.1 percent in April to 60.5 million from 53.5 million, while mail ton miles rose 20.4 percent to 22.3 million from 18.6 million.

For the first four months of 1990, freight ton miles increased 23.3 percent to 235.5 million from 191.0 million. Mail ton miles rose 29.9 percent to 90.0 million from 69.3 million.

''Last month's double-digit growth for American is especially impressive considering that the overall cargo market was essentially flat,'' said William R. Boesch, American's vice president-cargo. ''We are convinced that by providing our customers with the quality service they demand and expect, our results will continue to improve.''

HANOVER, WEST GERMANY (MAY 8) BUSINESS WIRE - At their joint meeting on May 7, the supervisory and executive boards of Continental Aktiengesellschaft approved the financial statements for fiscal 1989.

The consolidated statement (worldwide) shows sales to have increased by six percent over the previous year, to DM 8.382bn.

Consolidated net income rose 16.8 percent from DM 194.8m to DM 227.8m.

The parent company's net income amounted to DM 81.2m (1988: DM 80.9m). After transfer of DM 12.0m to retained earnings, DM 71.0m (1988: DM 70.4m) of this net income is available for distribution.

The Administration will propose to the shareholders at their annual meeting on June 27, that the net income available for distribution be used to pay a dividend of DM 8.00 per share.

Domestic shareholders would receive DM 12.50 per share, including the tax credit. With a capital stock of DM 435.0m, the payout would amount to DM 69.6m.

#90128b0787 05/08/1990 ~Business Wire

WESTBOROUGH, MA (MAY 8) BUSINESS WIRE - Proteon Inc. Tuesday announced that its ProNet-4/16 network interface cards have been approved by AT&T

for use with their new SYSTIMAX 2061 unshielded twisted pair (UTP) cable.

The SYSTIMAX Premises Distribution System (PDS) is a universal wiring system which allows users to plug virtually any voice or data terminal into a standard information Outlet and connects to various vendors' host equipment. UTP is a cost-effective wiring solution for high speed local area networking (LAN) applications.

AT&T extensively tested ProNET-4/16 token ring adapters using the new SYSTIMAX PDS UTP cable. Test results proved that 16 Mbps UTP networks using ProNET-4/16 adapters and the new SYSTIMAX 2061 cable easily support as many as 104 workstations over distances of up to 100 meters (328 feet).

For 16 Mbps UTP networks using existing AWG-24 UTP cable, Proteon's own test results show that 100 workstations can easily be supported over distances of at least 85 meters (279 feet).

According to Forrester Research, a Cambridge, Mass.-based research organization, two thirds of new Fortune 1000 networks installed this year will use unshielded twisted pair cabling. The growing popularity of UTP networks mirrors growth of token ring as the networking topology of choice.

Sales of token ring LANs are expected to double in 1990. Proteon introduced the industry's first support for 16 Mbps over UTP in July, 1989.

Proteon's ProNET-4/16 family is a system solution that includes high performance IBM compatible network interface cards with on-board UTP and STP support, Series 70 Intelligent Wire Centers, and TokenVIEW Network Management Software that troubleshoots problems in minutes even if the network is down. ProNET-4, Proteon's 4 Mbps

IBM-compatible/IEEE 802.5 solution, also supports UTP and STP.

Headquartered in Westborough, Mass., Proteon is a leading supplier of token ring networking and internetworking products.

AKRON, OH (MAY 8) BUSINESS WIRE - A survey of Goodyear's plant managers has found that many high school graduates lack basic skills required for today's workforce.

Results covering 27 company locations in the United States show that inadequate reading, writing, and math skills are a significant problem among new hires. Deficiencies in the sciences and the ability to communicate also were cited.

"Many graduates are unable to accurately complete employment applications " said Edward B. Steffy, manager of the Danville, Va., tire plant, "and they frequently are unable to pass even the basics of the Virginia Employment Commission pre-employment test. Some have difficulty reading and interpreting specifications on the job."

Stan Patzel of the Lincoln, Neb., industrial products plant agreed job applicants lack skill in reading. Our personnel department has seen a deficiency in reading comprehension and the ability to follow directions," he said. "In addition, our training department has to give some employees additional training in mathematics before they can conduct such programs as statistical process control."

John Loulan has found the "product" the Lawton, Okla., tire plant is receiving from the schools is ill prepared for the rapidly changing technology of today's industrial environment.

"It's no longer a matter of putting in eight hours stamping out products at a mechanical-type machine," he said. "We now expect employees to be a part of the problem solving process, to understand their impact on the economics of the job and even to develop and follow a personal-growth business plan. Workers must be prepared with strong basic math and reading skills, along with computer literacy, so they can use the tools of modern technology."

At Goodyear's Asheboro, N.C., steel wire plant, manager Wayne A. Prazak expected the the skills shortage to worsen. "As our production process becomes more sophisticated, higher level math skills will be required -

making it increasingly difficult to find qualified job applicants," he said.

"To perform operator job skills at our plant, the ability to read and understand training manuals is a must - and many applicants have a problem in that area."

Many of the managers cited a lack of ability in communication, both written and oral. "There is a general deficiency in high school graduates' ability to express themselves clearly and succinctly in written form," said Larry B. Hurst, manager of the San Angelo, Texas, proving grounds. "This weakness is demonstrated most often in brief technical reports."

#90128b0802 05/08/1990 ~Business Wire

MONROE, LA (MAY 8) BUSINESS WIRE - Century Telephone Enterprises Inc. (NYSE:CTL) Tuesday announced that revenues, net income and earnings per share for the first quarter of 1990 increased over the like period last year.

Revenues from telephone, cellular and paging operations increased 27.3 percent to $60,428,000 from $47,463,000 in the first quarter of 1989. Net income was $6,752,000, 33.6 percent above first quarter net income of $5,055,000 a year ago. Earnings per share were up 22.2 percent to 22 cents compared with 18 cents a year ago on 12.3 percent additional shares outstanding.

Century's local exchange telephone service was the major contributor to increased revenues. Universal Telephone Co. Inc., acquired in July 1989, added approximately $6,500,000 to first quarter 1990 revenues. Other factors contributing to the increase in revenues were the phase-in of the FCC mandated ''universal service fund'' and increased network usage.

The first quarter income included a gain of $354,000 (1 cent per share) on the sale of a portion of Century's investment in Telecom USA common stock. On May 1, 1990, Century sold its remaining interest in Telecom USA which will result in a second quarter gain of approximately $2,200,000 (7 cents per share).

#90128b0806 05/08/1990 ~Business Wire

NEW YORK (MAY 8) BUSINESS WIRE - SCOR U.S. Corp. (NYSE:SUR) Tuesday reported its earnings for the quarter ended Mar. 31, 1990.

Operating income for the first quarter of 1990 increased 2.8 percent to $4,057,000, or 33 cents per share, compared with $3,947,000, or 32 cents per share for the 1989 first quarter.

Operating income for the first quarter of 1990 and 1989 includes net realized investment gains, net of tax of $290,000, or 2 cents per share and $4,000, or less than 1 cent per share, respectively. ''Fresh Start'' benefits were less than 1 cent per share in the first quarter of 1990 and 1989.

Net income for the 1990 first quarter was $4,057,000, or 33 cents per share compared with $3,947,000, or 32 cents per share for the 1989 first quarter.

Net written premiums for the 1990 first quarter were $22,201,000, vs. $25,428,000 for the 1989 first quarter, reflecting, in part, the impact of lower 1989 underwriting year premiums as well as adherence to the company's underwriting strategies.

The 1990 first quarter statutory combined ratio of the reinsurance subsidiary, Scor Reinsurance Co. was 103.2 percent compared with 98.1 percent for the 1989 first quarter and 104.9 percent for the 1989 year.

Pretax net investment income for the first quarter of 1990 was $5,621,000, an increase of 28.7 percent over $4,368,000 in the 1989 first quarter.

Cash flow from operations for the first quarter of 1990 was $8,416,000, a decrease of 5.5 percent from the 1989 first quarter.

Total assets at Mar. 31, 1990 were $386,366,000, compared with $384,401,000 at Dec. 31, 1989.

Statutory surplus of Scor Reinsurance Co. was $115,823,000 at Mar. 31, 1990.

Stockholders equity at Mar. 31, 1990 was $142,476,000 compared with $139,140,000 at Dec. 31, 1989. Book value per share was $11.42 at Mar. 31 1990. A quarterly dividend of 5 cents per share was paid in the first quarter of 1990.

SCOR U.S. Corp. is the holding company of Scor Reinsurance Co., a leading provider of property and casualty reinsurance to primary insurers throughout the United States.

Scor Re specializes in underwriting treaties covering commercial and technical risks and is a recognized leader in the provision of facultative property, casualty and special risks covers. Headquartered in New York, Scor Re operates branch offices in Chicago, Dallas, Hartford, Conn. and New York City.

SCOR S.A., the ultimate majority shareholder of SCOR U.S., is among the top five professional reinsurers worldwide and is represented and does business through branches and subsidiaries throughout the world.

HOUSTON (MAY 8) BUSINESS WIRE - International Paper Tuesday announced the results of votes taken by shareholders at the company's annual meeting in Houston.

Items dealt with at the meeting included the election of directors; approval of the selection of an independent auditor for 1990; proposed divestment of investments in South Africa and proposed adoption of a confidential voting procedure.

Approximately 99 percent of the shares represented at the meeting supported the election of management's nominees as Class II directors to serve three year terms expiring in 1993. Elected were:

-- Willard C. Butcher, chairman and CEO, Chase Manhattan Corp.

-- John A. Georges, chairman and CEO, International Paper

-- Thomas C. Graham, president, USS (a division of USX Corp.)

-- Donald F. McHenry, profesor, Georgetown University

-- Edmund T. Pratt, chairman and CEO, Pfizer Inc.

Roger B. Smith, chairman and CEO, General Motors Corp. was elected under the same vote as a Class III director whose term expires in 1991. Smith was previously elected a director in 1989.

Approximately 86 percent of the shares represented at the meeting rejected a proposal by the New York State Common Retirement Fund, cosponsored by five other groups, to withdraw from and liquidate all interests in South Africa.

The measure refers to the company's holdings through its Masonite Corp. subsidiary. Masonite was one of the 12 original signatories to the Sullivan principles; practices equal treatment and non-segregation; and has a workforce in South Africa that is approximately 93 percent nonwhite.

A proposal by the United Paperworker International Union calling for

secret ballot voting at all shareholder meetings was rejected by 73 percent of the shares represented at the meeting.

International Paper, headquartered in Purchase, N.Y. is a worldwide producer of paper and forest products. The company is a major producer of wood pulp, printing and writing papers, paperboard and packaging products, and wood products. The company also operates specialty products businesses and distributes paper and wood products.

International Paper has manufacturing operations in 22 countries and exports its products from the United States to more than 70 nations.

NEW YORK (MAY 8) BUSINESS WIRE - Philip Morris Companies Inc. Tuesday said it has outgrown its office space in Manhattan and will relocate about 500 of its 1,700 employees in New York City to Rye Brook in Westchester County, N.Y.

The company explained that it has grown substantially over the past few years both in its operations and in the number of people it employs. Philip Morris offices at 120 Park Ave. have become overcrowded, and the lease on additional rented office space at 100 Park Ave. expires in September, l991.

The building in Rye Brook is owned by Philip Morris. It was the corporate headquarters for General Foods, which Philip Morris purchased in l985. In l988 Philip Morris bought Kraft. Soon after, the two companies were merged to form Kraft General Foods headquarters located in Glenview, Ill. Many of the operations of Kraft and General Foods were combined and currently the Rye Brook building has considerable vacant space available in it.

The move to Westchester will consist of the headquarters operations of Philip Morris International, which is an international tobacco company, Philip Morris Capital Corp., which is a financial services company, as well as some employees of the company's financial and legal services.

The relocation process will begin later this year and is expected to take one year. It is important to note that no jobs will be eliminated as a result of this move.

The Rye Brook building will continue to be owned and operated by Philip Morris. Kraft General Foods International headquarters operations are already located in the Rye Brook building.

Philip Morris Companies Inc. employs 150,000 people worldwide. It has five principal operating companies: Kraft General Foods, Inc., Miller Brewing Company, Philip Morris Incorporated (Philip Morris U.S.A.), Philip Morris International Inc., and Philip Morris Capital Corporation.

Kraft General Foods, Inc. has seven operating units: General Foods USA, Kraft USA, Kraft General Foods International, Kraft General Foods Canada, Oscar Mayer Foods, Kraft General Foods Frozen Products, and Kraft General Foods Commercial Products.

Philip Morris Capital Corporation is engaged in financial service activities. Its subsidiary, Mission Viejo Company, is engaged principally in land planning, development, and sales in southern California and Colorado.

SARASOTA, FL (MAY 8) BUSINESS WIRE - In action taken at the annual meeting of FPL Group Inc. (NYSE:FPL) held Tuesday, shareholders re-elected the board of directors, approved the appointment of Deloitte & Touche as independent certified public accountants of the corporation for 1990, and defeated a shareholder proposal relating to the creation of a nominating committee of the board.

Following the annual meeting, the board of directors elected James L. Broadhead, president and chief executive officer, to the additional post of chairman. He replaces former chairman Marshall McDonald who retired.

FPL Group is a holding company whose principal subsidiary is Florida Power & Light Co., one of the largest investor-owned electric utilities in the nation. FPL Group's non-utility operations include insurance, non-utility energy production, agriculture, technical services, and cable TV.

FPL Group's common stock is traded on the New York, Tokyo and London Stock Exchange.

SARASOTA, FL (MAY 8) BUSINESS WIRE - The board of directors of FPL Group Inc. (NYSE:FPL) has declared a quarterly dividend of 59 cents per share on its common stock.

The dividend is payable June 15, to shareholders of record on May 31, and is an increase over the 57 cents per share paid in the first quarter. This is the 178th consecutive quarterly dividend paid to holders of common stock of FPL Group and its predecessor, Florida Power & Light Co.

Of 4,300 publicly-held companies, only three have icnreased the dividend more years consecutively than FPL Group, according to Moody's Investors Service.

FPL Group is a diversified holding company whose principal subsidiary is Florida Power & Light Co., one of the largest investor-owned electric utilities in the nation. FPL Group's non-utility operations include insurance, non-utility energy production, agriculture, technical services, and cable TV.

FPL Group's common stock is traded on the New York, Tokyo and London stock exchanges.

#90128b0838 05/08/1990 ~Business Wire
WEST COLUMBIA, SC (MAY 8) BUSINESS WIRE - NewCo Technology Inc. Tuesday announced it has begun marketing an all new CPU enhancement device for the Apple Macintosh.

Know as the MegaMac CPU Performance Extender, the device increases the CPU clock speed of any Macintosh II or SE/SE 30 to which it is connected to 50MHz.

The MagaMac is a totally self-contained device with its own memory, processor and system power supply. The unit also features an internal NuBus/Processor Direct expansion slot and a compartment for up to two optional disk drives.

Ken King, president of NewCo Technology, says the MegaMac is an outgrowth of his firm's first hand frustration with the lack of availability of a truly high-powered Macintosh to accomplish sophisticated personal computer processing jobs such as image manipulation, financial modeling and new product circuit design.

NewCo says the MegaMac is perhaps the most useful and powerful accessory ever to be offered for the Macintosh. The company claims that not only can it outperform all of the 'accelerator' options currently being marketed, it also delivers performance markedly better than Apple's latest Macintosh - the IIfx.

The secret to MegaMac's peak performance is its proprietary design. A 68030 50 MHz processor coupled with 64K of 12 nanosecond write-through caching memory and on-board, high speed dynamic RAM (up to 64 megabytes) provides blistering fast program execution.

Plus, NewCo has designed it own SCSI bus accelerator that the firm says should deliver a significant performance advantage over the SCSI interface used in current Apple Macintosh hardware.

The MegaMac connects to any Macintosh II (including the II, IIx, IIcx, IIci and IIfx) via a unique single slot adapter card that plugs into any of the NuBus expansion slots featured in all Macintosh II models. A separate 'processor direct' interface cable is used to connect the device to a Mac SE/SE 30.

The MegaMac is the company's first product entry into the Macintosh marketplace. Company management says several other Mac related products are presently planned including ongoing enhancements for the MegaMac system.

#90128b0847 05/08/1990 ~Business Wire
SANTA CLARA, CA (MAY 8) BUSINESS WIRE - Hitachi Data Systems (HDS) Tuesday announced a new system/370 compatible Integrated Vector Facility (IVF) for its AS/EX Series mainframes, models 50 through 100.

The IVF can boost processing performance in a wide range of numerically intensive computing environments. More than 150 applications have been optimized for this industry standard architecture.

Applications areas, which are supported by the new IVF, include: structural analysis; seismic and reservoir modeling; mathematical and quantitative analysis; computational fluid dynamics; computational chemistry; and molecular modeling; as well as other engineering areas.

The new IVF implements 171 instructions in a register-to-register architecture with 16 vector registers. Each vector register contains 256

32-bit elements. The IVF consists of three packages which are installed inside existing AS/EX Series processors cabinetry thereby maintaining HDS' historical advantage in processor power per square foot.

Additional power and cooling requirements are negligible. The IVF can be installed on AS/EX models 50 through 100. The models 50 and 60 can have a single vector facility, the models 65, 70, 75 and 80 are capable of supporting two IVFs, the model 90 supports up to three and the models 95 and 100 can have up to four.

Performance of the IVF will be similar to other industry standard vector facilities. The performance of any vector facility will vary depending on the characteristics of the workload being run. Industry standard benchmarks are indicative of the performance that can be achieved in certain environments.

Hitachi Data Systems introduced the first integrated vector processor to the system/370 market in 1984. The product was enhanced and integrated into newer generation processors. Subsequently, a standard for system 370 vector processing emerged in the mid 80s.

The installed base for this architecture has grown to more than 300 customers and more than 500 vector units with more than 150 third party applications ported to that architecture.

Hitachi Data Systems is a joint venture company owned by Hitachi Ltd. and Electronic Data Systems Corp. (EDS). HDS markets a broad range of mainframes, peripherals products and services. With products installed in more than 30 countries, HDS has more than 2500 employees worldwide.

NEW YORK (MAY 8) BUSINESS WIRE - At the company's first annual meeting, held Tuesday in the Ziegfeld Theatre in New York, Time Warner Inc. shareholders approved amendments to the company's Restated Certificate of Incorporation.

Among other things, the amendments increase the number of shares of common and preferred stock that Time Warner has the authority to issue. Stockholders also approved the issuance of Time Warner common stock upon the conversion of the Series C 8 3/4 percent Convertible Exchangeable Preferred Stock and Series D 11 percent Convertible Exchangeable Preferred Stock, so that the preferred is now convertible into common stock.

In addition, the amendments reclassified the Series C and Series D Preferred Stock, so as to eliminate the depositary Shares.

As a result of these changes the depositary system, under which depositary shares representing interests in Series C and Series D Preferred Stock were issued, is no longer necessary and will be terminated on July 23, 1990, after the required notice period has elapsed. Effective May 9 at 5:00 p.m., New York time, each Depositary share will be equivalent to one underlying reclassified share of Series C or Series D Preferred Stock, as applicable. The changes will have no effect on an investor's financial interest in Time Warner.

The reclassified Series C and Series D Preferred Stock will trade on the New York and Pacific Stock Exchanges, and trades may be settled by delivery of depositary receipts. There will be no forced exchange of depositary receipts for reclassified Preferred Stock, Time Warner officials said.

MORRISTOWN, NJ (MAY 8) BUSINESS WIRE -

ADVISORY: AT&T Network Systems and Micom Communications have jointly announced a new personal computer card which will make ISDN affordable for small and medium size business and home office users.

BACKGROUND: PC Cards on the market average $1,495 in cost. Additionally, they require the purchase of operational software and network termination equipment which can add up to another $500.00.

AT&T has partnered with Micom Communications of Simi Valley, Calif. to develop a new PC card - the Personal Computer Terminal Adapter Card, Model 1000. Micom Communications will manufacture the card and AT&T will distribute through its sales channels.

SIGNIFICANCE: The PCTA Model 1000 is priced at $499.95 and eliminates the need for costly software and additional equipment. Users are charged only for analog telephone line service instead of duel analog/digital charges related to other PC cards. The PCTA, Model 1000 makes the PC into an ISDN terminal, allowing both voice and data services over the same telephone line.

#90128b0888 05/08/1990 ~Business Wire
NORTH SPRINGFIELD, VT (MAY 8) BUSINESS WIRE - Vermont Research Corp. Tuesday announced that net product sales for the second fiscal quarter of 1990 ended March 31, 1990, were substantially down from the second quarter of 1989.

Net product sales were $972,000, down $318,000 from $1,290,000 one year ago. There was a net loss for the quarter amounting to $56,000, or 3 cents per share, as compared to net income for the second quarter of 1989 of $136,000, or 4 cents per share.

Operations have improved from the first quarter of 1990 in that net sales

increased by $297,000 and the quarterly net loss decreased by $69,000 in the quarter just ended.

Working capital increased from the first quarter this year by $385,000 to $2,211,000 and there is no long term debt.

Further progress has been made with sales campaigns for the company's solid-state memory product. As we reported to you last quarter, efforts are directed at replacing older mechanical disk drives and we can now report that several prospective customers are in the process of evaluating products. The company is hopeful that its products will be chosen by most of these prospects to replace the older mehanical disk drives.

Product development has been enhanced during the quarter as the company devoted more resources towards several new versions of solid-state memory products. As plans for these new products mature, we will keep you informed.

#90128b0904 05/08/1990 ~Business Wire

NEW YORK (MAY 8) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by Robert H. Malott, chairman and CEO of FMC Corp.

When I last addressed this group in 1988, we had cleared the first hurdles of the public leveraged recapitalization that FMC undertook in 1986.

Today I can report that the constraints of recapitalization are largely behind us. While we are still cognizant of the magnitude of our debt, we have repaid by 45 percent of the debt we borrowed in 1986. Our interest coverage now resembles more closely the coverage levels of the S&P 400 than it resembles the interest coverage of highly levered companies; and, we have very limited covenant restrictions remaining on our bank debt.

The past four years have demonstrated that our diversified portfolio of high cash-generating businesses enables us to sustain much higher levels of debt than we previously recognized.

Our strong cash flows and accelerated debt repayment have allowed us to consider a more aggressive investment program if and when we find investment opportunities promising returns superior to debt repayment. Our 1989 capital expenditures -- which were 70 percent greater than the expenditures we projected in our recapitalization proxy -- reflects both the flexibility we have and our confidence in our internal opportunities.

The capital investments we make are in areas where we have established expertise, where we believe we can sustain a competitive advantage and, above all, where we expect to generate returns in excess of our 15 percent objectives.

Profits and returns on these investments will become visible beginning in 1991.

In addition to capital spending, we are undertaking a number of initiatives to strengthen our technical base and introduce new products.

HAMILTON, Bermuda (MAY 8) BUSINESS WIRE - Norex America Inc. (ASE: NXA) Tuesday reported that it had closed the previously announced purchase from the Maritime Administration, U.S. Department of Transportation, of an interest in approximately $100 million face amount of secured rig notes of subsidiaries of Global Marine Inc. which operate seven jack-up offshore drilling rigs.

The aggregate purchase price of the company's beneficial interest in the notes was $26 million, and followed its successful public bid, with others for this secured rig debt which had been offered for sale by that agency of the U.S. government.

Norex America acquired $7 million face amount of debt directly for its account for approximately $3 million. The remaining investment was in secured rig notes and was structured through participation in a partnership with a group of unaffiliated Norwegian and other foreign investors.

The company also announced that it and others, through its interest in another partnership with unaffiliated Norwegian and other investors, had entered into a binding agreement to purchase a further amount of approximately $65 million face amount of secured rig notes of Global Marine Inc. subsidiaries at a discount which was not disclosed.

The notes will be acquired from the Export Development Corporation of Canada, with closing scheduled for late May 1990.

At this date, the company has a total beneficial investment in secured rig notes of subsidiaries of Global Marine Inc. of approximately $65 million, held through direct and partnership ownership, the majority of which has been financed by a major Norwegian bank.

Norex America Inc. is currently engaged in vessel ownership, tanker chartering, ship technical services and the management of cruise ship casino operations, and is pursuing investment and development in shipping and offshore marine activities.

#90128c0181 05/08/1990 ~Comtex

WASHINGTON (MAY 8) COMTEX - The head of the nation's largest bank said today sweeping revisions of domestic financial laws and regulations are needed to restore the U.S. financial system to world-class status.

John S. Reed, chairman of Citicorp, told a House Banking subcommittee investigating the international competitiveness of U.S. financial institutions, that there are just a handful of American banks competing outside the U.S. and their share of the global market is shrinking.

"This is not a healthy situation for the American economy," Reed told the congressional task force. "We have perhaps two or three serious players in the international market. Ten years ago it would be ten times as much."

Citicorp, the largest U.S. bank, ranks 24th worldwide in total assets.

Reed cited several factors such as the low U.S. savings rate, high cost of

capital and trade barriers which hinder American financial services firms vis-a-vis their foreign counterparts. However, he stressed the most important issue for the task force to address is the present U.S. regulatory structure.

"Our most important competitiveness problem comes not from barriers to market access abroad, but from an outmoded and inefficient regulatory structure," Reed said. "That structure has hampered the ability of American financial institutions to build and maintain businesses that can serve their customers well both at home and abroad."

Reed says a restructuring of the U.S. financial system should include the elimination of geographic barriers to branching within the U.S.; permit financial services firms to offer both commercial banking and securities services to their customers; allow the integration of insurance and banking with appropriate industry safeguards; and permit full integration of traditional banking and savings and loan industries.

"For the United States to be globally competitive in financial services, U.S. financial institutions must have the ability to provide customers with the financial services they want, where they want and in the form they want," Reed said. "American institutions cannot be expected to be strong in world markets if their hands are tied at home."

"European banks draw from a much stronger domestic base," Reed added. "If we allow more normal consolidation such as Morgan Bank and Morgan Stanley, the combined institutions would give us an immensely stronger position and base to operate internationally."

#90128d0130 05/08/1990 ~French/German News Agency

WASHINGTON (MAY 8) - The United States expressed concern but held off on an official reaction Tuesday to Iraq's announcement that it has manufactured nuclear bomb capacitors indentical to those seized in London in March.

Iraqi President Saddam Hussein announced that Iran had manufactured the capacitors, which the United States and other allies fear will be used to manufacture nuclear weapons.

The London seizure was of a shipment of the capacitors as it was being illegally shipped to Iraq.

"Obviously, we hope they don't have these things, but we have not yet seen his speech and so don't have enough information to react to," said a State Department official who spoke on the condition of anonymity.

"We oppose the spread of nuclear weapons and components and support fully the nuclear non-proliferation treaty and hope all states in that region will adhere to it," the official said.

LONDON (MAY 8) - Cardinal Tomas O'Fiaich, the Roman Catholic Primate of Ireland, died Tuesday in hospital in Toulouse, southwestern France, after being taken ill in Lourdes where he was on a pilgrimage, a church spokesman said here. He was aged 66.

The cause of death was not immediately known, but according to unconfirmed reports, he suffered a heart attack.

Cardinal O'Fiaich had headed the church of Ireland since 1979, and was also archbishop of Armagh. The cardinal lived in Armagh, in Northern Ireland, and was born near there on November 3, 1923.

#90128d5090 05/08/1990 ~French/German News Agency

MANILA (MAY 8) - The Philippines' overall balance of payments deficit rose to 417 million dollars in February, four times the level a year before, because of a debt buy-back scheme, the Central Bank (CB) said here Tuesday.

A CB statement attributed the increase in the deficit to the repurchase of foreign-debt papers at a 50 percent discount. Manila paid out 670 million dollars in January for the buy-back.

The overall deficit, which stood at 105 million dollar in February 1989, would have been larger were it not for rescheduling of other debts, it said.

The country has a foreign debt of more than 27 billion dollars, one of the highest per-capita in the developing world.

#90128d5210 05/08/1990 ~French/German News Agency

SINGAPORE (MAY 8) - The Singapore economy expanded strongly in the first quarter of this year, posting a broad-based 10 percent growth, according to figures released late Monday by the Ministry of Trade and Industry.

All major sectors except construction registered strong growth between January and March compared to the same period last year and the previous quarter.

In line with the good showing by the economy, a survey of business expectations of 1,106 firms conducted in March showed that more firms in the manufacturing sector were optimistic about conditions for the six-month period from April to September, the ministry said.

The ministry's figures showed that the financial and business services had the highest growth rate of 16.7 percent compared with 14.8 percent and 14.6 percent in the last and first quarters of 1989 respectively.

The commerce sector's 13.7 percent growth was the second highest among the sectors against the previous quarter's 5.6 percent and 8.2 percent in the first quarter of 1989.

Manufacturing, the lynchpin of the economy, grew at 12 percent compared to 9.3 percent in 1989's fourth quarter and 11.5 percent in the first quarter.

The transport and communications sector was one of two which grew at a single-digit rate, registering a growth of 9.9 percent against 9.2 percent and 9.6 percent in the last and first quarters of 1989.

Construction, which grew at seven percent during the last quarter and stagnated in the first quarter of 1989, slowed down to 4.4 percent in the year.

A net balance of 27 percent of firms in the manufacturing sector expected improvement in business conditions for the next six months. This was higher than the 15 percent in the fourth quarter of 1989 but lower than in the same period last year.

The printing and publishing industry were the most optimistic of firms in this sector with 65 percent saying they expected better business conditions.

Less optimistic was the financial services sector with 16 percent of firms expecting better conditions compared with 24 percent in the last quarter.

#90128d5250 05/08/1990 ~French/German News Agency

SINGAPORE (MAY 8) - Singapore and Indonesia Tuesday signed a double taxation agreement which would help to facilitate greater economic cooperation between the two countries, an Inland Revenue Department statement said.

The Agreement for Avoidance of Double Taxation and Prevention of Fiscal Evasion with respect to Taxes on Income was signed by Hsu Tse-Kwang, Commissioner of Inland Revenue for Singapore and by Tuk Setyohadi,

Indonesia's ambassador to Singapore.

The agreement should be useful to investors who wish to take part in the recently announced plans by the two governments to cooperate closely in developing Indonesia's Batam and Riau Islands.

The agreement seeks to eliminate instances of double taxation and to promote greater cross-flow of trade, investment, technical know-how and expertise between the two countries.

The statement said that the agreement would be brought into force after the exchange of instruments of ratification between the two governments.

SEOUL (MAY 8) - South Korean conglomerates must dispose of unproductive real estate within six months or face a cutoff in loans and punitive taxes the government said Tuesday, announcing tough measures against speculation.

Financial institutions will be barred from accepting as collateral for loans any unproductive real estate or leisure facilities such as condominiums and golf courses owned by business firms.

These measures were essentials of a package aimed at curbing speculative investment in real estate announced by five cabinet ministers at a press conference that was telecast live nationwide.

"Because of a recent spate of labor disputes and speculative investment in real estate, public trust in government policies has weakened and the stock market is shaking," Economic Planning Minister Lee Seung-Yun said.

"Therefore the government has worked out comprehensive measures to ease public anxiety over the economy and to curb land speculation and inflation " Mr. Lee, who is also deputy premier, said at the press conference.

Under the measures, 49 of the country's conglomerates will also be barred for a year from obtaining properties which are not directly related with their business activities.

The country's 30 largest business firms must get rid of unproductive properties they own under the names of staff members and proxies.

Conglomerates were urged to sell unproductive real estate voluntarily before government officials begin investigating this month.

JAKARTA (MAY 8) - Oil prices could firm to between 17 and 18 dollars a barrel in the next few weeks if all OPEC members stick to their assigned output quota, Indonesian Mines and Energy Minister Ginanjar Kartasasmita said Tuesday.

Oil ministers from the Organisation of Petroleum Exporting Countries (OPEC) agreed last week at a meeting in Geneva to cut combined output by 1.44 million barrels per day (BPD) in a bid to prop up prices from 15.8 dollars this week.

"If everyone abides by the agreement, prices will improve within three to five weeks to a range of 17 and 18 dollars," Mr. Ginanjar said after meeting President Suharto.

Mr. Suharto also appealed to OPEC colleagues not to undermine the agreement because selling crude oil cheaply would not only hurt OPEC members' revenues but also would be wasteful of valuable energy resources, he added.

Oil prices which hovered around 20 dollars a barrel at the start of the year tumbled in recent weeks mainly because all but five of OPEC's 13 members were pumping oil beyond their assigned quotas, bringing combined output to 23.5 million BPD against the group's agreed ceiling of 22 million..

Indonesia, among the five which did not exceed their quotas, agreed to a 40,000 BPD cut from its assigned quota of 1.374 million for the next three months, the duration of the latest agreement.

"This is an extraordinary agreement and should not be reflected in our future quotas," Mr.Ginanjar said, referring to the next OPEC meeting in July to negotiate new quotas.

The minister also said that the government had instructed all foreign oil contractors operating Indonesia's oil fields to reduce their production by an average of 3.11 percent to comply with the OPEC agreement.

TAIPEI (MAY 8) - Taiwan's foreign exchange reserves have plunged to some 69 billion U.S. dollars, the lowest since October 1988, a Central Bank official said Tuesday.

The reserves, which posted a record 76.7 billion dollars at end 1987, stood at 72 billion dollars in late March and 69.4 billion dollars in late April the official said.

The fall was caused by consistent heavy intervention by the Central Bank in the local exchange market to curb the greenback's advance agaist the Taiwan currency over the past several months, the official said.

The Central Bank sold massive amounts of U.S. dollars in March and April in the currency market to prevent the local unit from drastically depreciating amidst strong demand for the greenback, the official said.

It further injected one billion U.S. dollars and 50 million deutsche marks (30.19 million U.S.) into the interbank market here on May 1, leading to a sharp drop in Taiwan's foreign exchange reserves, one of the world's highest.

Outflowing capital for overseas investment projects also contributed to the fall, he added.

KUALA LUMPUR (MAY 8) - The government's Economic Planning Unit (EPU) said Tuesday that it has identified prospects for building a second methanol plant in the east Malaysian states of Sabah and Sarawak.

EPU director-general Sheriff Kassim told reporters that a study conducted by the unit found there was room for a second methanol plant that could also produce formaldehyde.

Other prospective gas-based industries for the two states included the plastic and polyethylene terephthalate (a resin used in photographic films, magnetic tapes and soft drinks bottles) glass industries, Mr. Sheriff said.

Sabah state already has an integrated gas project that produces hot briquetted iron and methanol which it sells mainly to India, Italy, Turkey, Japan, Korea and Taiwan.

Sarawak has a liquefied natural gas plant, a middle distillate synthesis plant that produces kerosene, high quality diesel and other products and a urea plant.

KUALA LUMPUR (MAY 8) - A Singapore company, Sembawang Projects Engineering Co. Pte. Ltd., (Sempec) has teamed up with a government agency to explore investment opportunities in east Malaysia, Bernama news agency said Tuesday.

Sempec said in a statement Tuesday that it would sign an agreement with the Bintulu Development Authority on Saturday to set up a joint-venture company called Bintulu Sembawang Sdn. Bhd.

Bintulu Sembawang, which is to have an initial authorised capital of one million dollar (370,000 U.S.), will be 40 per cent owned by Sempec with the government agency holding the remaining equity in trust for indigenous people.

The company will initially look for engineering and construction projects and project management in both Sabah and Sarawak states.

Sempec is a subsidiary of Sembawang Engineering Pte. Ltd., a member of the Sembawang group which has interest in marine, oil and gas, industrial and construction activities.

Dortmund (MAY 8) - The West German steel and industrial firm Hoesch Ag said here Tuesday it achieved earnings of 558 million marks (336 million dollars) in 1989, nearly double the 292 million marks profit a year before.

The company said it would propose raising the per-share dividend to 10 marks, from last year's eight mark payout.

Hoesch said its world group turnover in 1989 reached 15.7 billion marks, up nine per cent from the year before.

Moscow (MAY 8) - Production at all four of Lithuania's sugar processing plants was shut down Tuesday as a result of the Moscow-imposed blockade.

The Lithuanian government's anti-blockade commission said sugar cane supplies from Cuba had now run out as a result of the blockade.

The commission also said the number of unemployed in Lithuania had now risen to 17,000, and about 40 concerns had been forced to shut down.

It added that the Vilnius government had not so far been successful in circumventingh the blockade by doing direct deals with other Soviet republics.

HONG KONG (MAY 8) - The head of Hong Kong's top bank Tuesday threw support behind a mammoth airport-and-port project here which has been frowned upon as being too expensive by China, the territory's future ruler.

"I have no doubt that Hong Kong needs the planned new airport," said William Purves, chairman of the HongKong and Shanghai Banking Corp.

"And I trust that current questioning about it will soon be laid to rest," Mr. Purves told the HongKong Bank's annual general meeting.

China, which is to resume sovereignty over this British colony in 1997, has voiced deep suspicion over the 16.3 billion U.S. dollar development whose financing would stretch way beyond 1997.

Beijing has yet to give its blessing to the project, political or financial, which would be essential to attract foreign investors to take part in the scheme to be laid out, starting in 1992, off Lantau island to the west of Hong Kong island.

On economic prospects for Hong Kong, Mr. Purves said a slowdown would persist although he reiterated the bank's confidence in the territory's future amid general jitters here prompted by the 1997 deadline.

The HongKong Bank chief added that slow growth coupled with high interest rates should help bring down Hong Kong's soaring inflation, currently running at 10 percent.

#90128d6480 05/08/1990 ~French/German News Agency

SEOUL (MAY 8) - Hundreds of South Korean student radicals clashed with riot police at a university here on Tuesday, the eve of the ruling party's inaugural convention.

Similar clashes involving thousands were reported elsewhere in Seoul and in other cities including the southwestern provincial city of Kwangju, where about 500 students battled with riot police for an hour at Chunnam

University.

An estimated 500 students armed with lead pipes and bricks fought with riot police at Seoul National University here in protest at the creation of the Democratic Liberal Party (DLP).

They threw firebombs and bricks at police, who repeatedly bombarded them with tear gas bombs at the entrance of the campus.

The clash followed a rally by some 3,000 students at the campus. The students burned a coffin with the name of the ruling party written on it, saying Wednesday would be "funeral of the DLP."

No immediate word on arrests or injuries was available.

The DLP is planning an extravaganza for its convention Wednesday, but dissidents have asked citizens to attend protest rallies and honk their car horns when the evening gala is to get under way.

The DLP came into existence when President Roh Tae-Woo merged his ruling Democratic Justice Party with two conservative opposition parties in February, ending the opposition's domination in the National Assembly.

Violent clashes are expected here and in provincial cities on Wednesday as dissidents and student radicals plan to defy a government ban and hold rallies and street marches at the same time to denounce the convention.

Students have also vowed to stage a sit-in outside the Olympic Park, the venue of the party convention, and the city center of Seoul.

#90128d6490 05/08/1990 ~French/German News Agency

WIESBADEN, WEST GERMANY (MAY 8) - West Germany's trade surplus rose 4.7 percent in March over the same month last year to 13.4 billion Deutsche marks (7.8 billion dollars), the federal statistics office said Tuesday.

The surplus in March last year totalled 12.8 billion Deutsche marks (7.5 billion dollars), and 10.6 billion Deutsche marks in February.

The increased surplus was largely due to a record monthly export total of 60.95 billion Deutsche marks (35.8 billion dollars), up from the previous record of 60.8 billion Deutsche marks in June last year.

But imports were also up sharply, to 47.57 billion Deutsche marks (27.9 billion dollars), the second highest ever after the record of 48.1 billion Deutsche marks set in October.

Provisional figures released by the central bank, the Bundesbank, on Tuesday, showed that the current account surplus shrank in March to 10.1 billion Deutsche marks, against 10.5 billion in March last year and 8.1 billion in February.

For the first quarter of this year, the trade surplus was up 2.5 percent over the same period of 1989 to 36.9 billion Deutsche marks from 36.0 billion, but the current account surplus shrank 8.3 percent from 31.1 billion Deutsche marks to 28.5 billion.

#90128d6560 05/08/1990 ~French/German News Agency

NEW DELHI (MAY 8) - Three people were killed and rains pounded several towns Tuesday as the core of a powerful cyclone crept towards southern India, packing wind speeds of up to 250 kilometres (150 miles) an hour.

Authorities sounded the crisis signal along India's southern coastline as the cyclone hovered 150 kilometres (90 miles) east off Tamil Nadu state, the Press Trust of India (PTI) said.

Three people were electrocuted by falling power lines in the Tamil Nadu capital of Madras, where torrential rains overnight flooded several areas ahead of the cyclone which is expected to hit the state later Tuesday, PTI said.

Sixteen others were injured in Tamil Nadu, where some 20,000 fishermen stayed ashore Tuesday as authorities sounded a highest priority danger alert in the state and in neighbouring Andhra Pradesh.

The cyclone was also expected to cross Sriharikota, India's main space launch station off Andhra Pradesh, PTI said, without specifying whether the complex faced any threat.

Quoting officials, the news agency said authorities had ordered a large-scale evacuation from the coastal belts of both Tamil Nadu and Andhra Pradesh to minimise damage from the storm and anticipated tidal waves.

National television has broadcast continual warnings since Monday, asking people in the two states to seek safer ground. The state-run All India Radio also issued repeated warnings and broadcast special weather reports.

Federal meteorological experts were meeting in New Delhi to plan emergency measures, officials here said.

#90128d6580 05/08/1990 ~French/German News Agency

BRUSSELS MAY 8 - The European Commission on Tuesday announced an inquiry into 14 South Korean firms accused of dumping car radios on the EEC market allegedly inflicting financial loss and redundancies on European firms.

It was the European Economic Community's second anti-dumping action against South Korea inside two weeks.

On April 26, the EEC imposed permanent anti-dumping duties of up to 19.6 per- cent against small South Korean television sets.

In its complaint to the EEC's executive, a West German-based lobby grouping three manufacturers that produce more than 70 percent of EEC car radios, said South Korean competitors uniformly underpitched their prices in the Community market.

Total purchases of car radios soared from 11.9 million sets in 1985 to 18.3 million in 1988, and 8.6 million in the first half of 1989, the association said.

South Korea's market share more than doubled from 14 percent in 1985 to 30 percent in 1989, while the share of European manufacturers plummeted from 49 percent to 34 percent.

"Downward pressure caused by the prices of South Korean products caused European firms to sustain major losses in 1988" that led to plant closures and job losses, according to the complaint, which cited alleged cases of "major dumping."

The Commission gave the South Koreans 30 days in which to respond to the accusation.

If the EEC executive finds in favour of the plaintiffs, it can impose temporary anti-dumping duties that are equal to the "dumping margin" between the product's price in South Korea and the price in the Community.

#90128d6590 05/08/1990 ~French/German News Agency

Hong Kong (MAY 8) - The Hongkong and Shanghai Banking Corp. has been forced to pump a further 200 million U.S. dollars into its ailing fully-owned subsidiary, the New York-based Marine Midland Bank, chairmain William Purves said here Tuesday.

At the Hongkong bank's annual general meeting, Purves said Marine Midland was suffering from the weakness of the real estate market in the eastern United States.

Earlier this year the Hongkong bank injected 100 million U.S. dollars into

the New York institute. The second transfusion is equally made up of new equity and loans, Purves said.

The Hongkong bank completed its purchase of Marine Midland in 1987, paying 770 million U.S. dollars for the remaining 48 per cent share which it did not already own.

In 1979-80 it paid 314 million U.S. dollars for its initial stake. At the time of the purchase, Marine Midland became the largest foreign-owned bank in the United States.

Marine Midland's profits last year plummeted 91 percent to 13.9 million U.S. dollars after making special provision for domestic loans.

The Hongkong bank also disclosed more troubles at James Capel, its British-based stockbroking subsidiary, which suffered a net loss of 7 million pounds following major losses in the convertible bond market.

Purves reported brighter prospects for the Honkong bank's Asian and Middle East operations which constitute the largest part of its portfolio.

#90128d6620 05/08/1990 ~French/German News Agency

CAIRO (MAY 8) - Diplomacy to try and agree on a date and venue for the projected extraordinary Arab League summit shifted up a gear Tuesday but a solution still appeared elusive.

In Damascus, Syrian President Hafez Assad stressed Tuesday that Syria would not attend any Arab summit conference until there was ''a comprehensive agreement on the topics to be discussed...and on the place''.

Iraqi Foreign Minister Tariq Aziz, who said he had passed on a message to Egyptian President Hosny Mubarak from his Iraqi counterpart Saddam Hussein, said the summit would take place in Baghdad.

Aziz said there was complete agreement between Egypt and Iraq and that only the question of setting a date for the parly was left to be clarified.

Minister of State in the Kuwaiti Foreign Ministry Saud el Usaimi, who earlier handed a message to Mubarak from the Kuwaiti leadership, said Kuwait would abide by the majority decision.

Saudi Crown Prince Abdallah bin Abdel Aziz was due to have talks on the issue with Mubarak here later Tuesday.

Saudi Arabia and Egypt have been trying to patch up differences between Iraq and Syria. The latter, which supported Iran during the Gulf war, has

been opposing holding the summit in Baghdad.

Syria's Sana news agency quoted Assad as saying this late Monday as he received Arab League Secretary-General Chadli Klibi, who ended a two-day visit to Syria Tuesday and left for Amman.

Sana said: ''President Assad explained during the discussions with Mr Klibi that Syria's point of view on this subject is that the summit conference be held in a place to which nobody objects.''

BEIJING (MAY 8) - Mongolia's ruling party and opposition groups on Tuesday discussed the issues to be brought before a parliament session that will set a date for elections in Asia's oldest communist state.

Meetings of the advisory council began after the biggest opposition group, the Mongolian Democratic Association (MDA), late Sunday overcame its initial reluctance and decided to join the talks, diplomats reached by phone in Ulan Bator said.

The People's Great Hural (parliament) was to meet Thursday and Friday to set a date for Mongolia's first-ever multi-party elections and to adopt a law governing political parties.

Until they all agreed to take part in the government-proposed advisory council, Mongolia's myriad opposition groups had been pressing for a provisional Hural to prepare for the balloting.

President Punsalmaagyin Ochirbat has promised elections by the end of July, after the ruling Mongolian People's Revolutionary Party (MPRP) renounced its 66-year monopoly on power in March.

Opposition militants ended a 24-hour sit-in in Ulan Bator's main square and a hunger strike in the northern city of Moron on Sunday as the MDA decided to join the advisory council, diplomats said.

But there were unconfirmed reports that hunger strikes were still going on in two other towns, and diplomats said they were told by MDA officials that the association was urging an end to the protests.

It was also announced in Ulan Bator that Mr. Ochirbat would be traveling in mid-May to the Soviet Union, accompanied by MPRP chairman Gombogavin Ochirbat, the diplomats said.

President Ochirbat returned home Monday after a three-day official visit to China, the first by a Mongolian leader in more than a quarter of a century.

Mongolia, a vast, sparsely populated landlocked nation of two million wedged between China and Siberia, is eager to build relations with Asia and the West to counterbalance six decades of pervasive Soviet influence.

WIESBADEN, WEST GERMANY (MAY 8) - A computer programmer at a West German army installation has been arrested on charges of spying for East Germany's military intelligence services, police said Tuesday.

The East German agent has been living in West Germany since 1966 under the false identity of Juergen Kindt, a police spokesman said.

As a computer programmer at a West German military statistics facility near Bonn since 1972, he had access to information about the logistics of the Bundeswehr, the West German army, the spokesman added.

West German police also said they were searching for another East German agent known as Rainer Gruber, who lived in Coblenz and worked as a data analyst.

#90128d6920 05/08/1990 ~French/German News Agency

TIRANA (MAY 8) - Police beat up a man who seemed to be trying to seek refuge at the Greek embassy here, Western diplomatic sources in the Albanian capital disclosed Tuesday.

The incident occurred on Monday, nine days after uniformed and plainclothes police jumped over the embassy gates to catch a would-be refugee and beat him unconscious.

The Albanian authorities have denied that embassy territory was violated, and Greece has recalled its ambassador.

About 15 uniformed and plainclothes police keep watch on the embassy during the day, and the number is increased considerably at night, the sources reported. Surveillance at all other diplomatic missions has been stepped up.

Diplomatic sources also disclosed that an Albanian, Bernard Kici, 38, has been sheltering in the Greek embassy for a month, seeking asylum for political and religious reasons.

Eight more Albanians are in refuge at the Italian embassy.

FRANKFURT, WEST GERMANY (MAY 8) - The Bundesbank said Tuesday that its monetary reserve fell 100 million Deutsche marks in the week to April 23, to 100.9 billion (59.3 billion dollars).

The bank's foreign debt was up 100 million Deutsche marks at 52.7 billion.

-30- 451
#90128d6970 05/08/1990 ~French/German News Agency
LONDON (MAY 8) - Public holidays in Europe and the Far East reduced already weak activity on freights markets during the past week, causing further losses in rate levels.

The Baltic International Freight Futures Exchange's Baltic Freight Index (BFI) dropped 33 points on the week to end at 1,340 points, its lowest level for 18 months.

A year ago in this period, which is usually associated with firm rates, the index was at a record 1,687 points, underpinned by a shortage of tonnage following strong Soviet demand, traders recalled.

The difference between rates now and in May last year is at its most marked on important grain routes out of North America.

For fixings from the U.S. Gulf to Japan of 52,000-tonne vessels, the going rate stands at 21.50 dollars per tonne, down from 22.50 a week earlier and 28.25 a year ago.

Owners of similar-sized vessels plying the U.S. North Pacific to Japan route are obtaining just 12.35 dollars per tonne against 13.10 dollars two weeks ago and 16.25 dollars at this time last year.

Nevertheless, news from the U.S. Department of Agriculture (USDA) late Monday that the Soviet Union had recently bought 1.75 million tonnes of U.S. corn could provoke a rally in the coming weeks, traders said.

In the coal sector the going rate for 90,000 tonners is 6.75 dollars per tonne for U.S. East Coast to Europe movements against 7.20 two weeks ago and 8.50 dollars last year.

From the same loading zone to Japan via South Africa, a 120,000 tonner accepted 15 dollars per tonne, down from 16 two weeks earlier and 18.50 a year ago.

Ore carriers are also accepting lower rates, with a 120,000 tonner taking

7.15 dollars per tonne against 7.50 in mid-April for a Brazil to Europe voyage.

But among sugar movements rates slightly firmer than those prevailing a month ago are in evidence.

A 14,000 tonner obtained 18.25 dollars per tonne for a trip from North Eastern Australia to Japan, against 18.15 early in April. The rate nevertheless remains low in contrast with the 22 dollars per tonne price being paid in May 1989.

The timecharter sector is seeing vessels in the Panamax (50,000-70,000 tonne) size range booked for 9,000 dollars per day on return trips between Japan and Australia, against 12,200 for the last such fixing at end March.

Smaller 25,000-40,000 tonners have nevertheless increased their rates to 7,500 dollars per day for Far East to Europe voyages, from 7,200 dollars at end April.

#90128d7030 05/08/1990 ~French/German News Agency

BEIRUT (MAY 8) - A senior Lebanese Shiite leader Tuesday warned that the hostage issue would not be resolved this year because of a "negative" attitude on the part of the United States.

"The parties that have influence on the affair, namely Iran, have decided to refrain from any more efforts until there are positive signs from the West," Hussein Musawi, head of Islamic Amal, said in a statement carried by the Marxist Voice of Lebanon Radio.

"I don't think the question of the Western hostages will be solved in 1990 " he added. "The negative attitude of the United States has complicated the affair. The positive signs that appeared after the release of two Americans have disappeared."

The United States publicly thanked Iran and Syria following the release in west Beirut of Robert Polhill on April 22 and Frank Reed April 30.

But U.S. President George Bush and other officials made it clear there would be no goodwill gestures toward Iran until six Americans still held in Lebanon by pro-Iranian groups were freed.

They are among 15 Westerners currently reported to be in captivity in Lebanon.

"If the Americans pressured Israel to release the prisoners (it holds), that would contribute to settling the matter," Mr. Musawi added.

His remarks echoed earlier warnings from Iran that with the release of two Americans the burden was now on Washington to pressure Israel to secure the liberation of Moslem prisoners it holds, notably a prominent Shiite cleric abducted from Israeli troops in southern Lebanon last July.

Israel on Monday said it was prepared to help win the freedom of Western hostages, but on condition that it obtain the release of three Israeli soldiers held in Lebanon and the remains of four others.

Iran in addition wants Western influence to be brought to bear on Christian forces in Lebanon that it says are holding four Iranians, whose fate remains uncertain.

Mr. Musawi, whose group is linked to the pro-Iranian Hezbollah movement, has denied having any ties to the hostage-takers.

But in recent weeks he has issued statements repeating the demands of those factions that are holding Westerners.

BUDAPEST (MAY 8) - Britain's Prince Charles began the second day of his four-day visit here with a visit to two Hungarian firms, one of them, Ganz-Hunslet, a joint venture with Britain founded last December.

Afterwards he gave a speech at the university of economic sciences, during which he emphasised the need for a united Europe and to strengthened Hungarian links with the West.

He and his wife Princess Diana then visited the market at Dimitrov Square on the perimeter of the university.

In the afternoon, the royal couple were to do some tourism in the Hungarian capital. Prince Charles was scheduled to open a British industrial exhibition, while the princess was to visit an exhibition on British fashion at the museum of applied arts.

On Monday night, after his arrival, the prince exchanged views with outgoing Prime Minister Miklois Nemeth and his successor, Joszef Antall, leader of the Democratic Forum, which won the elections on April 8.

Mr. Nemeth asked the prince to be the patron of a foundation, which is being set up to turn the barracks currently occupied by Soviet troops stationed in Hungary into international training centres for politicians and businessmen. The Soviet troops are to be withdrawn by the end of 1991.

Prince Charles asked Mr. Nemeth for extra details on the foundation before making up his mind on whether to become its patron.

Mr. Antall briefed the prince on the progress of negotiations to form a new government, which he hopes to put before parliament in mid-May.

The royal couple ended Monday evening as guests of honour at a dinner given by interim President Arpad Goncz.

AMMAN (MAY 8) - Jordan's Prime Minister Mudar Badran Tuesday called for an Arab summit to form ''a united Arab strategy'' that would be taken into consideration by the U.S.-Soviet summit set for May 30-June 2.

Speaking to reporters after bidding farewell to Saudi Crown Prince Abdullah Bin Abdul Aziz, Badran said there was an urgent need for an Arab summit ''because it is no more a secret that there is a clear assault and a genuine threat to the Arab nation.''

He said the influx of Jewish immigrants from the Soviet Union and eastern Europe to Israel and the occupied West Bank and Gaza Strip threatened to exacerbate the situation in the occupied territories.

''Such a threat does not only affect the occupied territories and Jordan, but also the entire Arab world,'' Badran told reporters.

MONROVIA (MAY 8) - The Liberian Government on Tuesday dismissed a BBC report suggesting that President Samuel Doe asked Nigeria for arms to help contain rebel activities as "false and untrue."

Acting Information Minister Moses Washington told reporters that talks between Mr. Doe and President Ibrahim Babangida in Lagos on Monday made no mention of arms assistance from Nigeria.

The British Broadcasting Corporation reported that Mr. Doe asked Lagos for arms to help put down rebels fighting government troops in the West African country's interior since December 24.

Mr. Doe personally denied the report, but said he briefed Mr. Babangida and President Gnassingbe Eyadema of Togo on rebel activities in Liberia during his one-day visit to the two West African states.

He said he was hopeful that the present crisis would soon come to an end

"in the best interest of the state."

Mr. Doe told reporters on arrival he had gone to Nigeria to console President Babangida on last month's coup attempt against him.

He also challenged rebel leader Charles Taylor, a former top civil servant, to come to Monrovia for a fight.

Rebels are reportedly within striking distance of the capital. Hundreds of foreigners, notably U.S. and British citizens, have left the country in recent weeks.

JERUSALEM (MAY 8) - Likud ministers in the ruling Israeli government of Prime Minister Itzhak Shamir rejected Tuesday forming a new grand coalition with the Labor party.

An offer of mediation between Likud and Labor by the National Religious Party was turned down by conservative Likud members of the Knesset after a session of the parliament.

Likud member Ronnie Milo said the party may attempt early next week to form a small coalition with Israel's right-wing radical parties and at least two of the religious parties.

Shamir can at best expect the support at present of 61 of the 120 Knesset members. The ultra-orthodox Shas party, which has five members of parliament, has said it would be prepared to support a coalition of the right.

However, it was thought possible it would remain outside the cabinet, leaving Shamir with a minority government.

Labor has agreed in principle on forming with Likud a new government of national unity after the old coalition collapsed following a vote of no confidence in the Knesset on March 15.

AGARTALA, India (MAY 8) - Tribal chieftains in India's remote northeastern states bordering Burma and Bangladesh are growing increasing amounts of illegal opium to smuggle to international markets, narcotics officers here say.

The officers say the lure of high profits and inadequate surveillance by a

thinly stretched narcotics squad result in the production of tons of opium and mushrooming heroin refineries.

Indian traffickers receive regular consignments from northeastern Nagaland, Tripura, Manipur and Mizoram states, which also serve as transhipment points for drugs from the so-called Golden Cresent and Golden Triangle countries for international markets.

Narcotics officials here say that during the past two years, transhipments through India from the Goldren Crescent -- which cuts across Afghanistan, Iran and Pakistan -- have slowed considerably due to stepped-up surveillance of northwestern borders by New Delhi and Islamabad.

However, lack of prevention in Burma itself, lack of personnel and equipment on the densely jungled India-Burma border and in the tribal areas has helped the drug trade prosper.

The Golden Triangle -- encompassing areas of Thailand, Laos and Burma -- now has spilled across the border not only with increased transhipments, but rising production in India's northeast.

"If you would ask me to name the countries forming the Golden Triangle, I would include the (Indian) northeastern states because of their steady supply to the drug markets abroad," said Amitava Chatterjee of the eastern regional office of the Narcotics Control Bureau (NCB), India's drug enforcement agency. "Refining centers have mushroomed all over these states"

The increasing flow of heroin has turned almost every second youth in these states into an addict, Mr. Chatterjee said in Agartala, the capital of Tripura.

He estimated the annual average output of heroin in the region at 3,000 to 3,500 kilograms (6,600 to 7,700 pounds).

Heroin fetches about 250,000 rupees (14,700 dollars) a kilo (2.2 lb) in India, and sells for at least 30 times that amount in markets in Europe and the United States.

Official estimates put seizures in 1988-89 at 3,029 kilos (6,663 lb), including transhipped drugs.

Mr. Chatterjee also says the drug barons, many of whom grow their illegal crops alongside legal opium crops to avoid detection, use their profits to manipulate institutions in what are relatively inaccessible and underdeveloped areas, undermining the authority of the state governments.

Indian Home Minister Mufti Mohammad Sayeed, during a recent visit to

northeastern Assam state, announced that the government would start introducing more development programs, in part to divert people from poppy cultivation, but the announced measures have yet to be followed through.

The NCB's regional director (Eastern Zone), J. S. R. Khating, says the unstable political situation in neighbouring Burma has also boosted the drug trade in India's northeast.

Burmese raids on drug dealers in villages bordering India have all but stopped, he said.

"We are required to look after 11 states, but have just 10 officers and 50 subordinates, with a ration of less than one officer per state," he said in an interview.

The chief ministers of the northeastern states petitioned the central government in New Delhi early this year for an increase in NCB staff and updated laboratory equipment, but again no steps have yet been taken, NCB officers say.

Government officials also say "sizeable" amounts of drug money is diverted to tribal secessionist groups including the outlawed National Socialist Council of Nagaland (NSCN) and the People's Liberation Army (PLA) in Manipur.

#90128d7250 05/08/1990 ~French/German News Agency

WELLINGTON (MAY 8) - With the dispute over the Rainbow Warrior saboteurs now finally settled by arbitration in New York, New Zealand is looking to a new future in its relations with France.

Prime Minister Geoffrey Palmer, who last November described his French counterpart Michel Rocard as "extremely bright" and "one of the most attractive interlocuters" around, said Tuesday he wanted to see him here.

"I think it would be useful if the French prime minister Mr. Rocard came to New Zealand," he said at a press conference. "It would give us the opportunity of trying to improve the relations and set them on a new course."

His comments followed a ruling by a United Nations tribunal on New Zealand's complaint against France over the premature repatriation of two French secret agents from their agreed exile on a remote South Pacific atoll where they had been sent for their role in sinking the Greenpeace protest ship in Auckland harbour in 1985.

The panel condemned France, saying it should pay New Zealand two million

dollars towards a "friendship fund" to improve bilateral relations, but said there was no point in sending the agents, Alain Mafart and Dominique Prieur,
 back to the atoll of Hao.

The two, who were sent to Hao, a French military base, for three years under a deal between Wellington and Paris after originally being sentenced to 10 years in jail by a New Zealand court, were repatriated early by France for medical and family reasons.

Mr. Palmer said Tuesday it was not helpful to New Zealand's "vital interests" to continue the relationship that had been in place since the bombing.

"It has not been satisfactory or helpful to us," he said, stressing that the whole affair had been the product of a previous French government.

A senior diplomatic source here said that New Zealand wanted Mr. Rocard to come here, not to "rehearse the list of difficulties" but to reconstruct a "modern, formal relationship."

Not only was France a major European power, but it was also the only European power "which makes a difference in the Pacific," the source said.

He said it was clear Mr. Palmer felt a genuine relationship with Mr. Rocard, especially as a result of the French premier's role in bringing peace in the French Pacific territory of New Caledonia.

The source said that the New Zealand leader also appreciated France's culture and contribution toward European civilisation, but given Paris's responsibility for the bombing, the only practical political way to forge a new relationship would be for the French prime minister to come here.

A top level visit would not involve a study necessarily of the major issues between France and New Zealand, the source said, adding that this would not be appropriate on a fencing mending mission.

Trade figures indicate the affair has had little major impact.

In 1985 New Zealand exported 214.2 million dollars (122.8 million U.S.) worth of goods to France, while importing 159.6 million dollars (91 million U.S.)

In the year to June 1989 exports were worth 186 million dollars (106.6 million U.S.) and imports worth 194 million dollars (111 million U.S.) but trade sources said that the true figures were much higher as breakdowns for France were not always separated from statistics for the European Economic Community.

Nuclear tests - the centre of the Rainbow Warrior's protest mission - could also be debated.

"If France stopped testing in the South Pacific that would lead to a quantum leap forward in the relations between France and New Zealand," Mr. Palmer said.

As for the Rainbow Warrior, which lies in a remote and beautiful bay now where it was scuttled by Greenpeace, there is nothing left to discuss officially.

Marine life now finds it an ideal refuge.

TOKYO (MAY 8) - Capital investment by Japanese corporations will rise 6.7 percent in the current fiscal year ending in March, the Economic Planning Agency (EPA) said in a report Tuesday.

The survey, conducted by the government agency in mid-March, covered some 4,200 firms, each capitalized at 100 million yen (633,000 dollars) or more.

Manufacturing firms' combined investment in plant and equipment is expected to jump 10.7 percent, while such capital spending by non-manufacturing companies is expected to rise 4.1 percent, the agency said.

Capital investment is expected to soar 51.6 percent in the shipbuilding industry, 34.0 percent in the steel sector and 18.9 percent in the machine industry, the survey report said.

Combined capital spending by banking and insurance firms will jump 20.8 per cent in fiscal 1990, while the mining and construction industries are expected to boost such investment by 14.7 percent and 12.5 percent, the agency said.

#90128d7350 05/08/1990 ~French/German News Agency

MANILA (MAY 8) - The court-martial of two generals and 19 other officers and men accused of involvement in last December's coup attempt was delayed here Tuesday when defense lawyers walked out.

Fourteen civilian defense lawyers had questioned the competence of the court to conduct the trial and obtained a delay so they could ask the supreme court to resolve the issue.

"This is a question of quality and competence pertaining to this court. The court has an incapacity to render justice," defense attorney Alfedo Lazaro told the seven members of the military tribunal.

The 21 accused, who attended the court session in military uniform, applauded every time their lawyers made lengthy speeches challenging the authority of the court.

The December coup attempt, which claimed 119 lives and wounded 500, was the sixth and most serious threat against President Corazon Aquino since she came to power in 1986.

The defense lawyers walked out one by one after the court refused their petition to delay the hearing, which was held in a cramped room inside a suburban military camp.

The three military lawyers for the accused who did not join the walkout said the members of the court later agreed to postpone the hearings until May 15.

#90128d7360 05/08/1990 ~French/German News Agency

MILAN (MAY 8) - Italian chemical giant ENIMONT said Tuesday it was expecting to make around 750 billion lire (600 million dollars) profit this year, the same as the 1989 level, in a bid to scotch reports that it had run up heavy losses.

The semi state-owned group, currently suffering a battle for control between the state and private stakeholders, said that its net profit last year totalled 750 billion lire, and the figure would be at least this level this year with net operating profit totalling around 1,200 billion lire (960 million dollars).

ENIMONT, formed last year with the linking of the chemical activities of state-owned oil group ENI and the Ferruzzi-Montedision group, stressed that these figures "reflect the considerable costs of major capital and industrial restructuring which the company has set in operation."

The financial restructuring should bring in a net gain of at least 320 billion lire, and included the shedding of assets totalling 1,500 billion lire (1.2 billion dollars).

ENIMONT's net profit "could improve in 1990 if commodity prices rise at the same rate as in the past two months, and at least reach the 1989 level."

ENIMONT published the figures in reaction to recent press reports, criticising in particular an article that appeared in the Corriere de la

Sera newspaper on Sunday under the headline "accounts of shipwreck" and said that ENIMONT was expected to make a loss of "about 1,000 billion lire (800 million dollars) this year.

The Milan daily said it considered asset shedding as an "industrial loss" adding that things should be better next year when the effects of the restructuring would be seen, but asked "where will ENIMONT be in 1991?"

This was a reference to a five-month-old battle for control of the group between the state-owned sector and Montedison.

Each officially holds a 40 percent stake, but Ferruzzi president Raul Gardini has been seeking to effectively acquire majority control through purchases of part of the 20 percent stake in the hands of small shareholders by companies seen as his allies.

#90128d7390 05/08/1990 ~French/German News Agency

PORT MORESBY (MAY 8) - Papua New Guinea-based Air Niugini will soon withdraw one of its semi-weekly flights to the Solomon Islands to allow that country's airline to run a return service from Honiara to Port Moresby, officials said here Tuesday.

Jean Kekedo, Papua New Guinea's civil aviation secretary, and Daniel Ho'ota, her Solomon Islands counterpart, announced the arrangement when signing an air services deal here.

They said that Solomon Airlines would soon buy a Boeing 737, which carries up to 100 passengers, and operate a weekly service between the two capitals.

The airline will also fly to Kieta on troubled Bougainville island once the crisis has been resolved there, Ms. Kekedo said.

Militant secessionists have been waging a 16-month war against Port Moresby, which since a March ceasefire has implemented a blockade of the island.

#90128d7400 05/08/1990 ~French/German News Agency

BRUSSELS (MAY 8) - Bowing to pressure from EEC member states, the European Commission on Tuesday announced it would postpone for four years its plan to reform value-added tax (VAT) collection in the European Economic Community's single market.

At present, VAT is payable in the country where the product or service is

consumed or used.

It means that EEC governments deploy armies of customs officers on their borders to ensure that goods entering their country are levied at the national VAT rate.

In its blueprint for the January 1, 1993 single market, the Commission had suggested that VAT be levied in the country where the item is produced, in order to rid the Community of the frontier controls.

But a majority of member states baulked at this, especially France and Italy, which depend on VAT to fill government coffers and feared a major loss of revenue to major exporting countries such as West Germany.

The Commissioner in charge of fiscal affairs, Christiane Scrivener, on Tuesday said the EEC executive had agreed to stick to its collection plan, but suggested postponing it until January 1, 1997.

In the meantime, she suggested, the Community should have a transition period between 1993 and 1997. Ministers are likely to discuss the proposal, which will take the form of a directive, or EEC-wide law, next month.

During the transition, VAT would be applicable in the country of destination but all cross-border tax checks would be scrapped in order to realise the goal of a market without physical barriers, Mrs. Scrivener told a press conference.

Citizens would therefore be able to shop across national borders, buying personal goods in countries where there were lower tax rates, thus applying pressure on high-tax countries to scale back VAT, she said.

#90128d7430 05/08/1990 ~French/German News Agency

TOKYO (MAY 8) - A two-day international forum of space agencies will be held in Kyoto starting May 17, the Japanese Science and Technology Agency said Tuesday.

It was to be the third such conference organized in preparation for the international year of space in 1992. The previous gatherings were in Finland and Italy, and another was set for the Soviet Union in 1991.

The Kyoto forum, aimed at promoting international cooperation on terrestial observation and space development, was to bring together representatives of 30 countries and seven international organizations.

The forum was to be presided over by Hubert Curien, French minister for research and technology, who was scheduled to have three days of talks with

senior Japanese officials prior to the gathering, a French source said.

Tel Aviv (MAY 8) - Israeli troops shot and killed two guerrillas in south Lebanon at noon Tuesday in the second clash within two days, an army spokesman said.

The guerrillas were said to be heading for the Israeli border in the central sector of the self-proclaimed 10-kilometre-wide Israeli security zone just north of Kanatra.

According to the army spokesman, troops on routine patrol in the zone killed the two guerrillas in a short exchange of fire. No Israeli casualties were reported.

On Monday, soldiers of the Israeli-backed militia, the South Lebanon Army, shot one guerrilla and captured another belonging to the Syrian National Party.

PORT MORESBY (MAY 8) - Operations at the Ok Tedi gold and copper mine in Papua New Guinea's Western province have been brought to a halt by a walkout, the company said Tuesday.

A company spokesman said about 1,000 employees, mostly members of the Ok Tedi Awards Union, wanted faster promotion and more job opportunities for locals within Ok Tedi, which is owned by three foreign companies and the government.

The company said the strike was illgeal and refused to negotiate with unions.

Ok Tedi Mining Ltd. last week announced a profit of 24.2 million kina (about 24 million U.S. dollars) for the year to December 31.

#90128d7650 05/08/1990 ~French/German News Agency

PARIS (MAY 8) - The Communist Party will hold the key votes when France's Socialist government faces a censure motion in parliament on Wednesday over amnesties for allegedly corrupt politicians.

The conservative opposition filed a motion of censure against the government after it pushed a bill through the National Assembly which

granted a pardon to politicians accused of illegal election campaign financing.

The votes of the 26 French Communist Party deputies, joined with those of a united opposition, could bring down the Socialist government formed in June 1988 by Prime Minister Michel Rocard.

The Communists are to hold an extraordinary Central Committee meeting ahead of the vote on Wednesday to decide on their position.

The Communists have been playing their cards close to their chests, at first rejecting the censure motion as an "absurd right-wing operation" but later saying that voting against the government could not be ruled out.

Officials close to the prime minister said they believe the Communist Party is ready to vote against the government.

"If the right, the center and the communists vote the same, it will be a question of two or three votes," one said.

To topple the government, a censure motion will need the support of 289 of the 577 deputies.

Between them, the opposition neo-Gaullist Rally for the Republic (RPR), the center-right UDF, the centrist Union of the Center (UDC) and the Communist Party can count on the support of 286 deputes.

Nearly half of the 19 independents in parliament generally vote with the opposition.

#90128d7680 05/08/1990 ~French/German News Agency

FRANKFURT, WEST GERMANY (MAY 8) - Deutsche Bank's recent agreement with Deutsche Kreditbank of East Germany will not give it a monopoly on the East German market, the president of West Germany's largest private bank said here.

Deutsche Bank is to set up a joint subsidiary with Kreditbank, which has virtually the largest network in East Germany, giving it access to a network of some 100 branches and stealing a march on its competitors who will have to build up their own branch networks in the newly-opened East German market.

Bank president Hilmar Kopper told journalists here late Monday that the West German monopolies commission had no reason to oppose the agreement.

"We are not taking over any part of Kreditbank's market, not a single

pfennig of its debts or credits. We are starting from zero.

"The only thing which interests us in Kreditbank is its offices, because we need four walls around us to be able to start work."

The Deutsche Bank, like many West German banks, is planning to start operations in East Germany on July 2, when monetary union takes effect.

But Mr. Kopper said he was concerned at the slowness with which the East German government was introducing legislation to enable western banks to operate in East Germany.

"There is little time left between now and July 2 and there are still many, very many, things to be resolved."

Nonetheless, the opening of the East German market was a unique opportunity for Deutsche Bank to boost its market share. "Suddenly our national market has increased by 25 percent."

Deutsche Bank currently controls some five percent of the West German banking market, and sees little hope of boosting its share because of stron competition.

But if Deutsche Bank could win a five percent share of the new East German market, that would boost its share of the German market overall, Mr. Kopper said.

#90128d7850 05/08/1990 ~French/German News Agency

LONDON (MAY 8) - A nuclear reactor in Scotland has been closed since last month when a leak of non-radioactive sodium was detected in its secondary cooling system, the Atomic Energy Commission announced here Tuesday.

The leak at the Dounreay reactor in northern Scotland has caused no radioactive contamination, the commission said. It was apparently caused by a defective weld, according to initial results of an ongoing investigation.

The management of the power station denied a coverup, saying it had sent letters to all 1,800 staff on April 25, the day after the shutdown, explaining the reasons for the closure, whose duration could not be specified.

-30- 854
#90128d7870 05/08/1990 ~French/German News Agency

BAGHDAD (MAY 8) - Iraqi President Saddam Hussein Tuesday claimed his country had successfully developed electrical condensers identical to those seized by British customs and alleged to be parts for nuclear detonators.

"Iraqi engineers succeeded, only five days after the condensers were seized, to manufacture exactly the same model," Mr. Hussein said here in a speech broadcast live on television.

Customs at London's Heathrow airport seized on March 29 what British and U.S. authorities said were components for nuclear detonators illegally bound for Iraq as part of plans for Baghdad to build a nuclear bomb.

Iraq denied the charges saying the components seized were electrical condensers for research purposes.

Mr. Hussein displayed two objects he said were condensers, adding: "Here is the American model and here is the Iraqi model, and if the British or Americans want to buy some, we are ready to negotiate with them."

The president did not specify the planned use of the Iraqi condensers, but said Baghdad was determined to "pursue its scientific and technological development program."

#90128d7930 05/08/1990 ~French/German News Agency

PARIS (MAY 8) - French businessmen are awaiting the lifting of sanctions in South Africa, still considered an attractive market despite the draw of southeast Asia and the new Eastern European sector.

South African President Frederik de Klerk's visit to Paris Wednesday and Thursday will enable contacts to be established, and one French company, Alsthom, is hosting a dinner in Mr. De Klerk's honour.

Alsthom was involved in building a nuclear power plant at Koeberg, as well as conventional power plants, particularly in the Transvaal.

Pretoria is now looking at further development in this sector as the authorities are committed to improving standards in the black townships, informed sources say here.

France's attitude on economic sanctions is currently on the middle ground within the 12 European Economic Community members, between Britain, which has already unilaterally lifted sanctions, and Denmark and the Netherlands which are against any "gesture" towards Pretoria, informed sources said.

France is South Africa's sixth largest trading partner behind West Germany, Japan, the United States, Britain and Italy.

But Paris suffered a 1.22 billion franc (214 million dollars) trade deficit with South Africa last year on total trade of 8.4 billion (1.47 billion dollars).

French exports -- mostly manufactured products and luxury goods -- totalled 3.58 billion francs (628 million dollars), against imports from South Africa worth 4.8 billion francs (842 millon dollars), with uranium accounting for 700 million francs (122.8 million dollars).

The amount of uranium included in the import figures from South Africa is likely to fall in coming years, as uranium from the Rossing mine in Namibia,
which became independent in March, has hitherto been included.

France is hoping that the deficit in its trade with South Africa will be reduced with the delivery of three Airbus aircraft ordered two years ago from the European consortium Airbus Industrie.

For the moment all new French investment in South Africa is still banned as part of the EEC sanctions, and businessmen here are expressing caution on the attractiveness of Pretoria if they are lifted.

Causes for concern include the development of the domestic political situation, and fears of an increase in South Africa's debt due to a fall in the price of gold, one of the country's main resources.

#90128d7960 05/08/1990 ~French/German News Agency
BEIJING (MAY 8) - Dutch chemicals giant Akzo plans to create its first joint venture in China to make contraceptives, the China Daily said Tuesday.

Under the agreement, Azko and Nanjing No. 2 Pharmaceutical Co. in the eastern province of Jiangsu would combine to create one of China's first joint ventures to produce contraceptives.

The English-language paper said the terms of the deal were still being worked out.

Akzo's chairman Aarnout Loudon declined to give details of the project, but said it indicated his company's desire to upgrade its 50-year trade ties with China, which currently amount to around 90 million dollars in trade annually.

The paper quoted Mr. Loudon, who was here for a week of business talks, as saying that Akzo hoped the effort would act as a springboard to large-scale

production of chemical specialties, such as additives for the production of polymers.

The planned company would use Azko's know-how to produce intra-uterine devices (IUD) before moving on to the manufacture of contraceptive pills aimed as import substitutes for the local market, the paper said.

Akzo's major exports to China include chemicals, fibers and pharmaceuticals, while it buys from China mainly raw materials for chemical and pharmaceutical production.

Akzo currently has offices in Beijing, Shanghai, Dalian and Guangzhou.

#90128d8050 05/08/1990 ~French/German News Agency

PARIS (MAY 8) - It has been billed as the World Cup with everything, the greatest, most extravagent show on earth for which no expense has been spared.

Two brand new stadiums, in Turin and Bari, have been built, extensive renovation has been carried out on grounds in the other 10 host cities, and a major public works programme has modernised communications and transport, as well as given a facelift to Italy's classic monuments.

It is a rich mix: the best grounds the World Cup has ever seen, perfect access, huge investment and sponsorship, and the added ingredient of Italian style and flair, not to mention the Mediterranean sunshine.

No matter that the cost of these 236 projects has risen from an initial estimate of 3,200 billion lire (about 2,100 million dollars) to 5,500 billion lire (about 4,040 million dollars), the money has been forthcoming.

But there is still a nagging doubt about whether it will all be ready on time.

Work on Rome's Olympic Stadium, which has more than doubled in cost, is not set to be concluded until eight days before the first match there. The pitch at Milan's San Siro stadium has had to be relaid, and vital time has been lost in Turin, Genoa, Florence, Naples and Palermo.

But Luca di Montezemolo, the director general of the World Cup organising committee, says: "We will be ready for the world," even though he does add sotto voce, "I hope."

Montezemolo has cause to be worried. Although Italy were awarded the World Cup in 1984, work did not begin in earnest until 1988. "Sometimes I feel as if we have done nothing. Yet the reality is that we have been working

on the World Cup for the last three years," he said.

However, the work has taken its toll, not only in spiralling costs, but in human life, as well. No fewer than 24 workers have died on construction sites,
 and 226 have been injured, with an accident rate 15 times the average.

The speed with which the work has had to be carried out, and a consequent lack of attention to safety has been blamed by the unions, who have sporadically threatened industrial action, especially when the stadium roof collapsed in Palermo killing five men.

Romans, particularly, have suffered as their city was turned into a giant building site.

The real problem is on the roads. A city already clogged with cars has become a traveller's nightmare. Huge traffic jams build up daily as roads are dug up to lay a new underground railway line out to the Olympic Stadium.

The subway saga has exasperated Romans. Engineers miscalculated the width of the tunnel and it is too narrow to carry two-way traffic. So it will be used as a single line shuttle during the World Cup and then work will start all over again.

There is another spectre on the horizon which threatens to wreck Italy's summer party - the fans.

Organisers solved part of the problem by banishing England's notorious hordes to the island of Sardninia, much to the annoyance of the beleaguered inhabitants.

But no-one could have anticipated the draw would throw the Netherlands, whose fans have a similarly chilling reputation, into the same group.

Throughout Italy, local fans are reported to be preparing "welcoming parites" for visiting rivals. The reception is expected to be hottest in Milan and Bologna, where the West Germans are due, and Genoa and Turin, where Scotland play.

All four cities are renowned for their hooligans, and even though police contingency plans for dealing with troublemakers are well in hand, the fears have not been quelled.

More disturbingly, though, the latest word is that the Italian supporters have thrown down a challenge to the English, Dutch, Germans and whoever else might be interested.

The idea is for them all to battle it out in Rome to decide 'supremacy' before splitting up and heading off for their various destinations.

Football in Italy is organised on the scale of grand opera, and enjoys a similarly passionate and loyal following in the backstreets as in the boardrooms.

The whole nation has done its best to ensure the best World Cup ever by providing the perfect stage.

Now it only needs the right players and the right script. It doesn't need unfinished stadiums or fighting in the streets.

#90128d8100 05/08/1990 ~French/German News Agency

Jerusalem (MAY 8) - Israeli officials Tuesday accused Antigua of violating end-user certificates limiting the use of Israeli arms shipped to the Caribbean republic to Antigua's defence forces.

Antiguan representatives have been in Israel since Monday investigating how 200 Galil assault rifles which were part of a March 1989 arms shipment ended-up in the hands of Colombian drug baron Gonzalo Rodriguez Gacha, who was killed at his ranch in a shoot-out with Colombian police last December.

The Israeli deal with Antigua, valued at some 220,000 dollars, comprised 400 Galils and 100 Uzi submachine guns. Israeli officials dislayed Tuesday an end-user certificate limiting use of the arms to Antiguan security forces.

The certificate, on official Antiguan stationary, was signed by Vere Bird Jr., security adviser to his father, Antiguan premier Vere C. Bird Sr., and was one of 14 documents presented to the Antiguan delegation as proof that Israel was not involved in shipping the arms to Gacha.

''We want to know how and why a promise made to Israel on the end-user guarantee was broken and how items in an arms deal supplied to Antigua finally arrived in private hands in another country,'' said a foreign ministry spokesman.

Ya'ir Klien, an Israeli reserve army officer reportedly involved in the deal also denied knowledge of it Tuesday, despite alleged links with Colmbian drug cartels which included accusations last year that he trained hit-squads for the powerful Medellin drug cartel.

#90128d8110 05/08/1990 ~French/German News Agency

WASHINGTON (MAY 8) - Sales of existing homes in the United States fell 1.6 percent in the first quarter of the year, a real estate trade group reported Tuesday.

Sales totaled a seasonally adjusted annual rate of 3.81 million units from January to March, the National Association of Realtors said.

That was down from 3.87 million units in during the fourth quarter and 3.90 million units in the first quarter of 1989, the group added.

The median price of an existing home rose 5.2 percent to 95,900 dollars, it said.

The Federal Home Loan Mortgage Association, meanwhile, reported that mortgage rates also rose in the first quarter, ranging from 9.83 percent as the year began to 10.22 percent as the quarter ended.

#90128d8140 05/08/1990 ~French/German News Agency

MOSCOW, May 8 (AFP) - Latvia's President Anatoly Gorbunov has told Soviet President Mikhail Gorbachev that the Baltic republic's declaration of independence reflects the will of the absolute majority of Latvia's native inhabitants, Tass news agency reported here Tuesday.

This was reflected by the result of elections to the Soviet Congress of People's Deputies, to the Latvian Supreme Soviet and to local republican assemblies, according to a letter sent by Mr. Gorbunov to Mr. Gorbachev. Tass did not say when the letter was sent.

The declaration of independence, adopted Friday, represented the beginning of a transitional period aimed at establishing a new structure of authority by democratic, parliamentary means, the letter said.

The republican government would seek to conclude a series of accords ensuring Latvian independence and taking into account the vital interets of the two states (Latvia and USSR), the letter added.

During the transition period, Latvia would retain all Soviet laws, it added.

Meanwhile, a group of pro-Moscow deputies who boycotted Friday's independence vote by way of protest have called for a referendum on self-determination in the republic which has a 52 percent ethnic Latvian population, Tass said.

The group also called on Mr. Gorbachev to refrain from taking sanctions against the republic as its "people cannot bear full responsibility for the

decisions adopted by the Latvian parliament".

A local journalist reached by telephone from here said on Tuesday that thirty Soviet armoured vehicles had trundled through the streets of Riga on Monday night in another rehearsal for Wednesday's military parade,

The Soviet military staged a similar exercise late on Friday night after the Baltic republic declared its independence.

That "rehearsal" for the 45th anniversary celebrations of the victory over Nazi Germany was viewed in Riga as a piece of sabre-rattling by the Soviet military.

The journalist on the nationalist Atmoda daily said Monday's rehearsal lasted about an hour and involved Zenith mobile rocket-launchers but no tanks.

A spokesman for the press service at the Latvian Parliament told Agence France-Presse that rehearsals had been taking place "almost every evening" for the past few days, but emphasised that the situation was "completly normal".

BONN (MAY 8) - Greek Prime Minister Constantine Mitsotakis and West German Chancellor Helmut Kohl discussed plans for a unified Germany and for greater European integration Tuesday, officials said after talks described by both sides as friendly.

Mitsotakis, in Bonn for his first visit abroad since assuming the prime ministership a month ago, assured Kohl of Greece's support for a united Germany and expressed hopes for close bilateral cooperation, officials said.

Speaking at a press conference after their meeting, Kohl stressed Greece's role in the emergence of a stronger European political and economic structure.

Kohl also urged greater aid by Greece's neighbours and by the European Community for Athens' economic efforts. ''We hope for a politically and economically strong Greece,'' the chancellor said.

Mitsotakis, who travelled to Bonn with Foreign Minister Antonis Samaras, was due to fly back to Athens later Tuesday.

BERGEN, Norway (MAY 8) - An all-European regional environment conference attended by participants from 34 countries opened here Tuesday, aimed at formulating an action program and pledging a reduction in air and water pollution.

Norway's Prime Minister Jan P. Syse gave the inaugural address to hundreds of environmental activists who gathered in this west coast Norwegian city, with King Olav V in attendance.

The meeting of the 34-member United Nations Economic Commission for Europe (including Albania, the United States and Canada) is the first of four regional conferences called in response to recommendations of the Brundtland Commission on the environment and development presented to the United Nations in October 1987.

Along with environment ministers and officials, representatives from non-governmental organizations, industry and unions will also attend the week-long conference.

But organisers have expressed disappointment that the United States and Britain are not participating at the ministerial level.

The Bergen conference is the first opportunity to formulate a common environmental policy after the recent upheavals in Eastern Europe.

During the first days of the conference, work groups will meet to define action prgrams and priorities, and on May 16 the environment ministers will meet to adopt a common declaration committing participating countries to reducing air and water pollution.

The industrial countries are also expected to adopt financial measures permitting developing countries to subscribe to accords on environmental controls.

Following the four regional conferences, a world conference on the environment and development will be held in 1992 in Brazil.

MOSCOW (MAY 8) - The Soviet Union favors cooperation with a new unified German state, but needs guarantees of strategic stability in Europe, Soviet President Mikhail Gorbachev said here Tuesday.

"Among the essential questions is that of a peace treaty which must give us the assurance of peace and which will enshrine the commitments" of a new Germany, he told a meeting of war veterans and army officers during a

ceremony marking the 45th anniversary of victory in World War II.

"We do not want to discriminate against Germany, we do not want a new Versailles (Treaty), it must be an act of peace," he also said.

Speaking of the Yalta and Potsdam agreements on the future of post-war Europe, Mr. Gorbachev said that while the era of spheres of influence was now dead, the documents still held validity in defining how the war-time allies would cooperate in peace-time.

Speaking of problems within the Soviet armed forces, Mr. Gorbachev said these reflected those of society at large.

A special commission has however been set up to deal with military reform, which "should democratize life in the army, reduce armaments and the military budget", he said.

"One must also back the authority of the army", he said to loud applause.

WASHINGTON (MAY 8) - Poland has so far failed to receive any firm commitments from either its commercial bank creditors or Western governments on Warsaw's requests for a restructuring of its debts, a senior Polish official said Tuesday.

Deputy Minister of Finance Janusz Sawicki, in Washington for the spring meetings of the World Bank and International Monetary Fund (IMF), said his government was hoping to restructure its commercial debts with the banks under the Brady Plan.

The Brady Plan, named for its author, U.S. Treasury Secretary Nicholas Brady, is designed to encourage Western banks to forgive some of their foreign debts in return for equity in the debtor countries' companies and some tax relief in their own home countries.

Mr. Sawicki said Poland was hoping to negotiate a reduction in interest payments on its commercial notes by some 80 percent.

Poland, he said, currently had commercial bank debts of around eight billion dollars and "public debt" -- borrowed from Western governments -- of nearly 30 billlion dollars.

He said the negotiations with the Western governments were "complicated."

Asked if he had received any indications from the Western governments of a time scale for the debt reduction talks, or any inclination of the degree

of debt reduction they may agree to, Mr. Sawicki said: "We hope we could agree as soon as possible. But that is not up to us."

Polish Deputy Prime Minister Leszek Balcerowizc, who is also finance minister, said there were already some signs that Polish economic reforms were working, but added the country still faced an uphill battle.

There had been, he admitted, severe inflation and a sharp fall in industrial production as draconian reforms were introduced.

But figures for March indicated that industrial production had begun to turn the corner and that inflation had been cut substantially.

However, further price rises could be expected in May, he said.

"We must maintain the political support (of the Polish people)," said Mr. Balcerowicz. "So far, the Polish people have shown patience and understanding. But their patience of course is not unlimited."

He added: "That is why we have demanded substantial debt reductions."

#90128d8320 05/08/1990 ~French/German News Agency

Cairo (MAY 8) - Diplomatic efforts to set an Arab summit continued Tuesday without signs of agreement on the date or venue.

Syrian President Hafez Assad insisted Tuesday that Syria would not attend an Arab summit until there was ''a comprehensive agreement on the topics to be discussed ... and on the place''.

Syria is urging an Arab League foreign ministers' meeting in Tunis be used to decide the summit venue. Damascus is opposing plans to hold the summit in the Iraqi capital, Baghdad.

Jordanian Prime Minister Mudar Badran said ''there was no excuse for any Arab leader not to attend the summit in Baghdad''.

He was speaking in Amman after meeting Saudi Crown Prince Abdullah bin Abdul Aziz to discuss the need for a meeting of Arab leaders to form ''a united Arab strategy'' before the U.S.-Soviet summit set for May 30-June 2.

Crown Princer Abdullah later arrived here for talks with Egyptian President Hosny Mubarak.

Iraqi Foreign Minister Tariq Aziz, who met Mubarak here Monday evening, said there was complete agreement between Egypt and Iraq that the summit would take place in Baghdad and the only question that remained was the

setting of a date.

#90128d8390 05/08/1990 ~French/German News Agency
LONDON (MAY 8) - British Prime Minister Margaret Thatcher on Tuesday defended her high interest rate policy, three days ahead of the publication of new figures expected to show inflation at around 10 percent.

"The way to get down inflation is to increase the price of money," Mrs. Thatcher told the House of Commons, rejecting an accusation from opposition leader Neil Kinnock that high interest rates were the main cause of inflation in Britain.

Britain's base lending rate currently stands at 15 percent -- higher than that in any of its main western industrialized competitors.

The latest British inflation rate is to be announced Friday and analysts expect it to be around 10 percent.

Speaking Monday in Washington, British Chancellor of the Exchequer John Major warned there was little likelihood of any drop in interest rates in the major industrialized countries in the near future.

"There can be no question of relaxing our anti-inflationary efforts," Mr. Major told the annual spring meeting of the International Monetary Fund interim committee.

Kampala (MAY 8) - The deputy director of a Kuwait-based international Islamic charitable organisation was arrested by soldiers who stormed his office in Kampala friday, an official at the Uganda Moslem Supreme Council (Umsc) confirmed Tuesday.

Sudanese national Ahmed Touni was taken to Lubiri military barracks near Kampala and has not been released since. The Umsc official said he had no idea why Touni was arrested.

The Catholic daily Munno Tuesday quoted workers of the charitable organisation as saying Touni was asked by the arresting officers about his connections he had with the former minister of youth, culture and sports, Brigadier Moses Ali.

Ali was arrested April 7 and is currently being tried for plotting the overthrow of the government of President Yoweri Museveni.

Officials at the Sudanese embassy said they were still trying to establish the reasons for Touni's arrest.

BORDEAUX, FRANCE (MAY 8) - Freedom of the press is more restricted today than it was six months ago, the director of the International Press Institute said Tuesday.

The past six months have seen journalists hindered in doing their work more often than in all of the previous two-year period, Peter Galliner told the institute's annual conference in Bordeaux.

Galliner said it was no exaggeration to say that ''nearly 100'' journalists were killed in 1989 and between 200 and 300 placed under arrest.

Galliner, who was adressing newspaper publishers from 43 countries, singled out China, Iraq, Turkey, Colombia and Afghanistan as nations were journalists faced hazards in reporting the news.

#90128d8550 05/08/1990 ~French/German News Agency

WASHINGTON (MAY 8) - Calls for greater efforts to promote private investments in the developing nations were made here Tuesday by officials from Zimbabwe and the United States.

U.S. Treasury Secretary Nicholas Brady, addressing the World Bank and International Monetary Fund (IMF) Joint Development Committee, said the World Bank should "give higher priority to private sector development."

And he warned, "Failure to stimulate private sector growth and mobilize private capital could undermine sustainable growth."

More needed to be done also by the indebted developing countries, Mr. Brady argued, adding:

"Debtors need to liberalize regulations relating to investment and create efficient domestic capital markets in order to develop competitive economies and attract foreign capital."

Zimbabwe's Senior Finance Minister B.T.G. Chidzero, speaking as chairman of the development committee, said: "Increasing emphasis is now being given by many developing countries to the initiative of the private sector, whose potential in these countries has not been fully utilized in the past to sustain growth and development.

"It is essential for developing countries to create a climate of confidence that would attract private sector investment resources through the adoption of sound economic policies."

Noting that six heavily indebted countries had recently reached agreements to restructure their debts with their commercial lenders, Mr. Brady said the benefits were already being witnessed.

"Debt burdens," he said, "have been reduced, flight capital is returning and investor confidence is growing.

"However, to ensure that these benefits are lasting, reform efforts must be sustained."

Mr. Chidzero, however, insisted that there was still a major role for the public sector "in establishing an infrastructure network and providing social services, particularly in the human resource development area, which are essential for the private sector and the economy as a whole."

#90128d8570 05/08/1990 ~French/German News Agency

BRUSSELS (MAY 8) - The European Commission on Tuesday approved a draft mandate to negotiate a "single economic space" with six industrialized countries on the European Economic Community's rim, a Commission spokesman said.

The Commission will ask EEC foreign ministers, meeting in Luxembourg on June 18 and 19, to approve the mandate so that the talks with the European Free Trade Association (EFTA) can start by the end of next month, he said.

Some of the ministers on Monday criticized the Commission for its slow progress in preparing the draft mandate.

Commission President Jacques Delors first proposed the idea of an accord in

January 1989, and Commission officials and EFTA representatives spent most of last year debating how to shape it.

EFTA groups Iceland, Finland, Sweden, Norway, Austria and Switzerland.

Sources at the executive said the broad concept was to create a free trade zone (at present, there is only free trade in industrialized goods) and allow free circulation of goods, citizens, capital and services between the 18 countries.

The most controversial problems, they said, are how far the Community will give the EFTA countries a role in its decision-making, and which trade areas should be exempted from freedom of circulation.

Switzerland, Austria and Sweden are fearful of the impact of EEC food exports on their farmers, who are generally highly subsidized, while Iceland is worried that its waters could be swept clean of fish by EEC trawlermen.

A Commission official, speaking on condition that he not be identified, said the mandate ruled out, as expected, any role for EFTA in running the single EEC market.

"Decision-making in the Community will be completely preserved," although the Commission suggests setting up a "mixed committee" of EFTA-EEC officials for regular consultations, he said.

Exemptions, too, should be "as limited as possible" in the EEC's view, he said.

The mandate, which is confidential, adopts a "flexible approach" in which the Commission will be given the latitude to negotiate with EFTA, but consult regularly with the Council of Ministers during the talks, he said.

The idea of a "single economic space" is seen in Brussels as a means of keeping the EFTA countries at a friendly arm's length from EEC membership while the Community completes its 1993 single market plan.

Austria, however, applied for EEC membership last year.

#90128d8670 05/08/1990 ~French/German News Agency

MOSCOW (MAY 8) - Authorities in the city of Gorky have called for the town to revert to its former name of Nijni-Novgorod, the Soviet Izvestia newspaper reported Tuesday.

The local supreme council has asked the federal Supreme Soviet to approve the change, the paper said.

Nijni-Novgorod, founded on the banks of the Volga in 1221, was the hometown of writer Maxim Gorky (1868-1936) and it was Stalin who ordered the name changed in 1932 to honour the "proletarian writer".

According to Izvestia, Gorky had objected to the change of name.

The late dissident and Nobel Peace prize winner Andrei Sakharov spent several years in internal exile in Gorky, a closed-city 400 kilometres (250 miles) east of Moscow, under the rule of Leonid Brezhnev.

PRETORIA (MAY 8) - South Africa's gold and foreign exchange reserves plummeted by 7.2 percent in April to 5.475 billion rands (2.073 billion dollars) from 5.904 billion rands (2.27 billion dollars) in March, the Reserve Bank said here Tuesday.

The fall compared to a 0.7 depletion of reserves from February to March, despite an improvement in the gold price of 4.58 rands (1.73 dollars) per fine ounce in April over March.

Gold reserves increased 51.67 million rands (19.5 million dollars) from 3.141 billion rands (1.208 billion dollars) in March to 3.192 billion rands (1.209 billion dollars) in April, a 1.64 percent rise.

But bullion gains were overshadowed by a 480.6 million rand (182 million dollar) fall in foreign reserves from 2.763 billion rands (1.06 billion dollars) in March to 2.282 billion rands (864 million dollars) in April, a 17.3 percent fall.

#90128d8770 05/08/1990 ~French/German News Agency

MOSCOW (MAY 8) - The Estonian parliament voted Tuesday to change the country's name from the Estonian Soviet Socialist Republic to the Republic of Estonia, and has done away with the national hymn, flag and coat of arms, Radio Tallinn reported.

In voting for the changes, the Supreme Soviet also pointed to the need for the three Baltic republics to act together to gain independence.

The Estonian parliament, or Supreme Soviet, on March 30 approved a declaration of the restoration of independence to be accompanied by a "transition period" while negotiations were conducted with Moscow.

The Kremlin had asked Estonian leaders to revoke this decision but have not taken any coercive measures because the Estonians had not yet modified their constitution.

According to the law passed Tuesday, certain articles of the 1937 constitution of the independent Republic of Estonia will come into effect, Radio Tallin reported, but gave no details.

Estonia was independent between the two world wars and was annexed by Moscow in 1940.

Separately, the parliament adopted a message congratulating "the parliament and people of Latvia" on last Friday's independence declaration by the neighbouring republic's legislature.

"The road to our sovereignty is not easy, but we are convinced that here in the Baltic, all three (Estonia, Latvia and Lithuania), in acting together, will achieve the restoration of our independant States more fruitfully than if each combatted in isolation," the radio report said.

#90128d8790 05/08/1990 ~French/German News Agency

DAMASCUS (MAY 8) - Syrian President Hafez al-Assad has warned the head of the Arab League he will boycott a proposed Arab summit unless prior consultations on its agenda and venue are held, official sources said here Tuesday.

The warning came as Arab envoys continued efforts to overcome obstacles to the gathering, which has been urged by the PLO and which Iraq has agreed to host.

Saudi Arabia and Egypt have not officially signalled their willingness to attend the summit, stressing that such a meeting should be well-prepared and reflect an Arab consensus.

But consensus has so far eluded Arab diplomats since Mr. Assad objects to Baghdad as a venue. At odds ideologically, Syria and Iraq have maintained no diplomatic relations since 1980 when Damascus made clear its support for Iran in the Gulf war.

The Syrian leader late Monday told Arab League Secretary General Chedli Klibi that "he would only take part in an Arab summit after consultations to reach total agreement on an agenda and its location."

Mr. Assad, according to official sources, also stressed that the gathering should be held in a "non-controversial place."

Syrian Foreign Minister Farouk al-Shara earlier proposed that Arab foreign ministers meet first in Tunis to plan the agenda.

The Palestine Liberation Organization in late April called for an emergency summit to work out a common Arab stand on Soviet Jewish emigration to Israel and to debate an alleged anti-Iraqi campaign in the West sparked by accusations of illegal arms dealing.

Mr. Klibi meanwhile travelled on to Amman Tuesday and met Jordanian Foreign Minister Marwan Kassem to discuss the summit question, while Saudi Crown Prince Abdullah ibn Abdel-Aziz was in Cairo for talks with President Hosni Mubarak.

Mr. Mubarak earlier Tuesday received Kuwaiti Minister of State for Foreign Affairs Saud al-Osseimi, who said Kuwait like Egypt sought an Arab consensus on the summit.

#90128d8850 05/08/1990 ~French/German News Agency

BONN (MAY 8) - West German tyre maker Continental said Tuesday it had signed an agreement with Gilardini, a subsidiary of the Italian Fiat group to acquire its industrial rubber products sector for an undisclosed amount.

This sector had a turnover of some 200 million Deutsche marks (117 million dollars) last year.

Continental said it had also taken a 49 percent stake in Swedish tyremaker Nivis Tyre, a 100 percent subsidiary of the KFI group, which had a turnover of 496 million Deutsche marks (291 million dollars) last year. It did not give the value of the deal.

The deal is subject to the approval of the Swedish authorities.

Continental also announced that its consolidated net profit rose 16.9 percent last year over the 1988 level to 227.8 million Deutsche marks (134 million dollars).

The dividend was unchanged at the 1989 level of eight Deutsche marks.

#90128d8920 05/08/1990 ~French/German News Agency

GENEVA (MAY 8) - The United States will destroy all its remaining stocks of the smallpox virus now that the disease has been eradicted, U.S. Health Secretary Louis Sullivan said here Tuesday.

Speaking at the World Health Assembly, the annual assembly of the World Health Organization (WHO), Mr. Sullivan said the only known samples of the smallpox virus were stocked in the United States and Soviet Union and urged Moscow to destroy their samples.

Mr. Sullivan said the eradication of smallpox, a highly contagious and sometimes lethal disease causing fever, vomiting and pus-filled blisters on the skin, was "a great medical victory which was only possible through international cooperation."

He said the United States would destroy "all remaining virus stocks" within about three years as there was no scientific reason to keep them.

#90128d8970 05/08/1990 ~French/German News Agency

LONDON (MAY 8) - North Sea Brent crude prices firmed in London on Tuesday after Nigeria said it would cut production, market analysts said.

Brent for June delivery was quoted at 16.85 dollars a barrel Tuesday afternoon, up from 16.75 dollars at the opening and 16.48 at Friday's close.

Prices fell almost a dollar in a single day last week amid market scepticism that an Organisation of Petroleum Exporting Countries (OPEC) pledge to cuet production by 1.445 million barrels a day until the end of July would be fulfilled.

But the London market found support Tuesday when it reopened after a three-day holiday weekend from an announcement that Nigeria would cut output by 140,000 barrels a day in line with the OPEC deal, said Nick Antill, an analyst with County NatWest.

Tuesday's price rise reflected "a more realistic reaction" than that seen immediately after the OPEC meeting, said Jeremy Hudson of Shearson Lehman

Hutton.

#90128d8980 05/08/1990 ~French/German News Agency
WASHINGTON (MAY 8) - A warning to African nations that they will have to be more accountable to their major aid donors was made here Tuesday by British Chancellor of the Exchequer John Major.

Addressing the World Bank-International Monetary Fund (IMF) joint Development Committee, Mr. Major recognized that the countries of sub-Saharan Africa "face most acutely the problems of poverty and are most vulnerable to external shocks."

But there was a need for these nations to make their public investments "efficient and productive."

Mr. Major bemoaned that "wasteful spending on extravagant and unnecessary purchases and projects should have no place in public expenditure programs."

He added: "To be frank, there are still too many examples of questionable military purchases and 'White Elephant' public sector projects involving large foreign exchange costs than can ill be afforded.

"Improving the composition of public spending programs is one of the many challenges facing African countries."

Mr. Major then warned that if the African governments concerned did not mend their ways, foreign aid programs would be threatened.

"I believe," he said, "all aid recipient countries should have in place sensible public investment programs if substantial external support is to be justified.

"Such programs and economic policy more generally will, in my view, be greatly assisted if governments become more accountable to their peoples.

"Donors cannot but take notice if resources are being wasted at a time when many of the countries involved are pressing for additional external support."

#90128d9200 05/08/1990 ~French/German News Agency

CAIRO (MAY 8) - One hundred and fifty Egyptian intellectuals on Tuesday called for President Hosni Mubarak to condemn the April 25 execution of 28 Sudanese officers accused of a coup attempt in Sudan after their sentencing by "show trials".

In a communique received by AFP Tuesday, the intellectuals, from various poitical backgrounds, called on Mr. Mubarak and other leaders of Arab states "to express their solidarity with the Sudanese people and denounce the conduct and the methods of the military regime in power in Sudan."

The communique denounced the "show trials" and also questioned whether there had indeed been a coup attempt.

The intellectuals said that the executions were part of a plan "to liquidate the political opposition and eliminate all opposition to the Junta and to the Islamic National Front (INF) within the armed forces, the police, the public service and the universities."

Following the executions, General Omar Hassan el Bashir, leader of the ruling military junta, said the leaders of the April coup attempt wanted to overthrow his regime to abolish Islamic law in the Sudan and set up a secular government.

He also accused the coup plotters of collaborating with the Sudan People's Liberation Army (SPLA) (active in predominantly Christian south Sudan) and of intending to include the SPLA in a civilian government. Gen. Beshir

seized power when he overthrew the civilian government on June 30 last year.

Pointing out that the INF general secretary had recently confirmed to the press that the organization had been the instigator of last year's coup, the communique said that in going ahead with the "liquidations the junta hoped to intimidate the popular opposition aspiring to re-establish the parliamentary life and the democratic liberties of the country."

Among those signing the communique were a number of former Egyptian government ministers, journalists, writers, lawyers and renowned artists, some of whom are members of Egypt's ruling National Democratic Party.

CHICAGO, IL (MAY 8) - Residents of one impoverished neighborhood in this city, America's third-largest, feel so threatened by the drug problem that a vast majority wants the U.S. military to get involved in combating narcotics, a survey showed Tuesday.

Alderman Ed Smith, revealing results of a door-to-door survey of some 10,000 people in the past month, said ''98 percent'' of people in his run-down West Side district would not mind having U.S. troops patrol the streets to stop drug peddling and consumption.

Drug-related shootings and killings had gotten so bad that some parents refused to send their children to school and elderly people were afraid to go to church, Smith said.

''People sit in their living rooms at night with the lights out because they are afraid of gunfire,'' said Smith. ''Funerals are a weekly thing, a daily thing.''

CALGARY, ALBERTA (MAY 8) - The 47th meeting of NATO's Nuclear Planning Group (NPG), due to start Wednesday in nearby Kananaskis, was expected to signal the demise of the Lance short-range nuclear missile and the birth of the Tactical Air-To-Surface missile (TASM).

NATO Secretary-General Manfred Woerner said Tuesday in Washington that NATO was at a "decisive ... phase of its history" as it tried to adjust its military and political role to changes in Europe and in its relations with Moscow.

Before departing for Canada with U.S. Defense Secretary Dick Chaney, Mr. Woerner said NATO was "an element of cooperation in a new security structure" in which the Soviet Union and the Warsaw pact must be involved.

The Calgary meeting was just an "opening session" of a series of NATO meetings leading up to the expected summit of NATO leaders to be held in early July, "most likely" in London, Mr. Woerner said.

Following last year's crisis in the alliance, it became clear that the Lance missile's days were numbered, according to analysts, since its updated and longer-range version was not welcomed by West Germany, where most tactical nuclear weapons are deployed.

Upcoming German reunification and the democratization of Poland and Czechoslovakia spurred opposition to the Lance, which would no longer reach unfriendly Soviet satellite states even in its new, upgraded version.

U.S. President George Bush last Friday said what he had been hinting at for some time, namely that the United States would forgo updating both the Lance and its nuclear tipped artillery, which represents NATO's second-line nuclear defenses.

In this way, the NPG neatly avoids a sticky problem, but an agreement on the TASM was not expected at this stage.

#90128d9430 05/08/1990 ~French/German News Agency
BEIRUT (MAY 8) - The Lebanese economy, already battered by 15 years of civil war, has been dealt another major blow by last week's 100-point plunge in the exchange rate of its currency against the U.S. dollar.

Economic analyst Samir Makdisi of the American University of Beirut attributed the collapse of the Lebanese pound to "desastrous consquences" of the latest round of fighting in the Christian sector of the country.

One hundred days of street battles between Army troops loyal to General Michel Aoun and militiamen under Samir Geagea not only left 1,050 people dead and another 3,250 wounded, but totally destroyed Lebanon's economic infrastructure.

Once known as the Monte Carlo of the Arab world, the enclave in Central Lebanon with its population of about one million Christians was the business center and a tourists' paradise in the Middle East.

The relative peace maintained in the enclave by Geagea's strong, well-trained and organised Lebanese Forces militia attracted multi-national corporations and tourists seeking sandy Mediterranean beaches and glittering casinos and bars.

Other Lebanese areas lived under the rule of fundamentalist Moslems who banned liberalness and chased away foreigners and investors. A long-held dream of security and self-rule within the boundaries of their 800-square-kilometer enclave appeared about to come true for the Christians.

Emigrants pumped money from abroad for investements while the government, dominated by a Christian majority, built roads and secured facilities and services for comfortable living.

But this dream was dashed on January 31 by the bloody power struggle between Aoun and Geagea, the two strongmen of the Christian community. The viciouness of the battles destroyed resorts and factories and caused a massive drain both of skilled labor and of the educated elite.

Airport files report more than 400,000 people, mostly Christians, leaving the country permanently for Canada, Australia, and the Arab states of the Gulf. Many of those leaving are doctors, technicians, engineers, and businessmen whose capitals once kept the country on its feet and helped confront the war difficulties.

Now they are abroad, having left behind destroyed homes, closed schools, and a capital city without water or electricity. "For the first time since the war erupted in 1975, we are feeling the heat of the struggle," said Fadi Ouseiran of the Money and Banking Institute in Beirut.

"Banks are crammed with people buying dollars to leave," reported Hiba Saneh of the Arab Bank in Beirut. "Others are speculating and many fear to keep deposits in Lebanese pounds due to the unstable security situation."

LONDON (MAY 8) - A four-nation consortium led by the British firm GEC-Ferranti has been awarded the multi-million dollar contract for design and development of the radar system to equip the European Fighter Aircraft, Defense Secretary Tom King announced here Tuesday.

King's announcement, which had been expected, formally ended a two-year political battle between Britain and West Germany over the EFA radar project, estimated to be worth a total of around two billion pounds (3.2 billion dollars).

He said the value of the contract for design and development of the project announced Tuesday was around 300 million pounds (480 million dollars), adding that Britain's share was around 33 percent, or just over 100 million pounds (160 million dollars).

West Germany would also have a 33 percent stake while Italy would be given 21 percent and Spain 12 percent.

The announcement, however, did not clear up doubts over the future of the 22 billion-pound (35.2 billion-dollar) EFA project which could face radical cutbacks because of improving East-West relations and ensuing reductions in conventional weapons programs.

"This represents a major milestone for British airborn radar technology," King said in making the announcement before the House of Commons.

"I have been authorized by GEC to say that 95 percent of the British share of this work will be done in Edinburgh," where the Ferranti Defense Systems division of General Electric Company (GEC) is based.

GEC shares were boosted slightly by the announcement to close up 2.2 pence at 199. GEC was competing with West German electronics giant Siemens for the contract.

The other partners in the GEC-led consortium were Telefunken System Technik of West Germany, FIAR of Italy and Inisel of Spain.

The dispute between London and Bonn over the radar at one point threatened the entire EFA project, with Britain, Spain and Italy backing Ferranti's new ECR90 radar system and West Germany pushing for a system based on the APG-65 radar developed by the U.S. Hughs radar company.

The political deadlock over the radar was all but broken last January, when GEC purchased control of Ferranti Defense Systems for 310 million pounds (496 million dollars).

KINSHASA (MAY 8) - One of four French oil workers seized April 27 by members of the Cabinda Enclave Liberation Front was freed here Tuesday and turned over to Zairean authorities.

Now under observation in hospital in Kinshasa, Jean-Claude Soum was released because of extreme fatigue, but diplomatic sources in Kinshasa say that he was otherwise in good health.

Mr. Soum, an employee of the French company Elf-Congo, was prospecting for oil near the border between Congo and Cabinda, an Angolan enclave surrounded by Zaire and Congo, when he and 12 French prospectors and 10 Congolese workers were taken prisoner by the CELF.

Shortly after the attack, all but four Frenchmen and three Congolese were released. Mr. Soum reported the hostages still being held are in good health and good spirits, French diplomatic sources here said.

AGUASCALIENTES, MEXICO (MAY 8) - Pope John Paul II Tuesday signaled a warming between Mexico and the Vatican, which have no diplomatic ties, as he started the busiest day of his one-week visit to this mostly Roman Catholic nation.

Speaking to a crowd estimated in the hundreds of thousands, the pontiff said school teachers and the local church had a key role to play in what he described as a "new phase of better understanding and dialogue" between the two states.

"The prospect of contacts between the church and the political community of this country is taking shape," the pope said in Spanish, a day after meeting with President Carlos Salinas de Gortari at the presidential palace in Mexico City.

Bright sunshine and a huge banner proclaiming "Aguascalientes (is) all yours" greeted the pope as he arrived at the airport here, while people from around the state streamed in on foot and in jam-packed buses to see him.

Some in the crowd had been waiting for 15 hours in this state capital, whose name translates to "hot waters," located 450 kilometers (about 300 miles) northwest of the capital.

Ninety percent of Mexico's population of around 80 million are Catholics.

In his speech, which came after a ride through the city and back to the airport in the bullet-proof "pope-mobile," the pontiff urged educators to teach students pride in native Mexican culture.

NIAMEY (MAY 8) - Thirty-one people were killed, including a soldier and two prison guards, when Niger rebels attacked Tchintabaraden in northern Niger on Monday, the Niger News Agency (ANP) said here Tuesday.

A common prisoner, two unidentified civilians and 25 rebels were also killed as security forces put down the attack, the agency said, updating earlier reports that six rebels had died in the fighting.

Among the rebels killed was one of the alleged ringleaders, named as Mohamed Abdoulmounin, a teacher. He was killed when he tried to snatch a rifle from one of the guards.

Authorities also arrested two other alleged rebel leaders, naming them as Mohamed Ahmoundou, a former presidential adviser already implicated in an attempted coup in Mar. 15, 1976, and Mohamed Abdullahi, a former minister for parastatal companies.

The authorities did not say how many rebels were involved in the attack but said the group included several Niger nationals who recently reentered the West African country from Libya.

The government has not implicated Tripoli in the attack.

Leaders of Monday's attack accused the government of going back on promises made to the nomads returning from Libya where they took refuge during a drought in 1984.

Niger's head of state General Ali Saibou on Tuesday denied making any special promises to them. "We only told them during our visit in Libya last March that they could return to Niger when they wanted, since they are from Niger," he said.

Gen. Saibou said the three ringleaders were from the same family. He added that some of the rebels had escaped.

Tchintabaraden, situated some 300 kilometers (190 miles) from the border with Algeria, was also attacked in May 1985 by 14 exiles who tried to rob the post office and a local bank.

MOSCOW (MAY 8) - German reunification must be ratified by a peace treaty to define the military status of Germany and guarantee Europe's security, President Mikhail Gorbachev said Tuesday.

A peace treaty with Germany would "give us the assurance of peace and ... enshrine the commitments" of a new Germany, he said in a lengthy speech to war veterans and army officers during a ceremony at the Bolshoi Theatre marking the 45th anniversary of victory in World War II.

Mr. Gorbachev's comments come three days after Saturday's Two-plus-Four ministerial talks between the two Germanies and the four wartime allied powers.

Moscow then said that reunification could take place before Germany's military and political status were settled, a view rejected categorically on Tuesday by West German Chancellor Helmut Kohl, who said that both aspects should be settled at the same time.

Moscow has rejected a Western demand that a united Germany be a member of the North Atlantic Treaty Organisation (NATO).

The Soviet Union favours cooperation with a new unified Germany, but needs guarantees of strategic stability in Europe, Mr. Gorbachev repeated.

"We do not want to discriminate against Germany, we do not want a new Versailles (Treaty), it must be an act of peace," he said.

Referring to the Yalta and Potsdam agreements that carved up post-war Europe into eastern and western blocs, Mr. Gorbachev said that the era of spheres of influence was now dead.

But the accords were still valid in defining how the four wartime allies -- the Soviet Union, the United States, Britain and France -- cooperated in peace-time.

A new peace treaty "must define the military status of Germany and its place in the European security structure, while fixing its commitments as far as respect for post-war borders" are concerned, Mr. Gorbachev said.

#90128d9720 05/08/1990 ~French/German News Agency
JOHANNESBURG (MAY 8) - Nelson Mandela tried from his prison cell to get 14-year-old activist Stompie Moeketsi Seipei away from his wife Winnie and into the protection of his lawyer before the youth was murdered, a court

heard Tuesday.

Forty-one-year-old Jerry Richardson, a member of the so-called "Mandela United Football Club" which acted as bodyguards to Mrs. Mandela, is on trial for kidnapping four youths and stabbing Stompie to death around Christmas 1988.

Barend Thabiso Mono, 20, allegedly kidnapped along with Stompie in Johannesburg's black township Soweto in December 1988, told the court Tuesday Mr. Mandela's lawyer Ismail Ayob had arrived at the Mandela home in Soweto's Diepkloof district with orders from the jailed ANC leader to remove the boys.

But Mr. Richardson, who along with Mrs. Mandela had allegedly assaulted the boys, barred the door, and later refused to leave the four boys when Mrs. Mandela ordered him to take them to Mr. Ayob's house, Mr. Mono said.

Mr. Mono also said he had overheard Mr. Richardson vow that Stompie would die for supposedly betraying four African National Congress (ANC) members shot dead by police.

Mr. Mandela, the deputy president of the anti-apartheid ANC, was released from 27 years in jail in February.

BANGKOK (MAY 8) - Burma's military junta has accused the Western media of attempting to instigate unrest in Burma, state-run Rangoon Radio reported Tuesday in a broadcast monitored here.

Major General Aung Ye Gyaw, an official of the ruling State Law and Order Restoration Council (SLORC), said foreign radio broadcasts of negative news were likely to fuel anti-government sentiment among the Burmese people.

Maj. Gen. Aung, speaking Monday at a meeting of provincial SLORC officials at Nyaung Oo, 560 kilometers (350 miles) north of Rangoon, said the "worst accusation" made by the foreign media was that the Burmese army had attacked rural ethnic minorities.

He insisted that Rangoon's military forces have only attacked "insurgents" and "rebels" who were illegally exporting the country's natural resources such as teak, tin, and cattle.

Maj. Gen. Aung did not identify the offending Western networks, but the SLORC last week criticized the British Broadcasting Corp. for reporting accusations by the London-based human rights group Amnesty International that political prisoners in Burma were subject to torture.

He reiterated Rangoon's denial of the charge. Burmese officials maintain that there are no political prisoners in Burmese jails, and that those detained are "common criminals and saboteurs."

The SLORC headed by General Saw Maung seized power in September 1988 after cracking down on a nationwide student-led pro-democracy uprising that ended 26 years of rigid socialist rule by former strongman General Ne Win.

The regime is preparing to hold general elections on May 27. Rangoon official have said that "the elections are for the Burmese" and have banned visits by foreign journalists during the vote.

LAGOS (MAY 8) - Nigeria has instructed oil companies in the country to adhere strictly to its Opec production quota, Minister of Petroleum Resources Jibril Aminu said here Tuesday.

He told a press conference that following the directive "some approved nominations have to be withdrawn."

Aminu said both measures were in line with last week's decision by the Organisation of Petroleum Exporting Countries' (Opec) ministerial monitoring committee meeting to mop up 1.445 million barrels daily (mbd) from the market.

"Nigeria has all along been going on with Opec. We have been a faithful and moderating influence in Opec and we would like to maintain this", the minister said.

Aminu said as a result of the directive, the country would cut back some 140,000 barrels per day, thus adhering strictly to its quota of 1.611 mbd.

#90128e0001 05/08/1990 ~Latin America New Agency

MANAGUA (MAY 8) EFE - Nicaraguan state employees are to receive a 60 percent pay raise to bolster their real income in the face of rampant inflation and a recent total 80 percent devaluation of the cordoba, Labor Minister Francisco Rosales said Monday.

Rosales told a press conference the increase was intended to cushion workers from the effects of rocketing inflation, which hit 1,689 percent last year.

But independent economists said the workers' buying power was seriously

undermined by the government's decision to devalue the cordoba several times since President Violeta Chamorro took power less than two weeks ago.

The value of the cordoba on the official exchange rate has fallen to 90,000 to the dollar and 175,100 to the dollar on the legal parallel market.

Rosales recommended private firms negotiate "wage rises of no less than 60 percent" with their employees.

#90128e0004 05/08/1990 ~Latin America New Agency

SAN JOSE (MAY 8) EFE - Rafael Angel Calderon Fournier was set to be sworn in Tuesday as Costa Rica's 32nd president, with one of his first official acts to be an informal summit with other Central American leaders attending the inauguration.

Barbara Bush, the wife of the U.S. president, will be among the delegates from 72 countries and international organizations witnessing the ceremony at which Calderon's predecessor, Nobel Peace Prize-winning Oscar Arias, hands over the presidency.

Venezuelan President Carlos Andres Perez and his colleagues from Nicaragua Guatemala, El Salvador, Honduras and Panama will be the heads of government in attendance at the National Stadium where the hand-over of power is to take place.

On Monday they joined Calderon and Arias for a dinner at which Cuba was the main topic of discussion.

The presidents agreed that Cuba's communist regime appeared more determined than ever to be the last regional holdout while democracy continued to gain ground elsewhere in Latin America.

Referring to Cuban leader Fidel Castro, Arias said, "He listens, but he doesn't pay any heed" to calls for the political reform of the regime he has headed for three decades.

President Guillermo Endara of Panama said, "I hope the winds of democracy which are blowing across the planet reach Cuba soon."

Honduran President Rafael Callejas said he was hopeful that "some internal changes will take place in Cuba that will allow us to establish closer relations."

Leading the Social Christian Party, the 41-year-old Calderon won his third consecutive bid for the nation's top office, taking 53.4 percent of the

votes in last February's elections.

Arias, awarded the 1987 Nobel Peace Prize as the architect of the Esquipulas II regional peace accord, was barred by the constitution from seeking a second term in office.

The son of a former president exiled for his alleged involvement in an attempted coup, Calderon starts his four-year term with his party enjoying an absolute majority in the legislature and controlling 80 percent of the country's municipal governments.

Although Costa Rica is considered by far the most prosperous as well as the most politically stable of Central American nations, Calderon swept to victory with promises to implement urgent social reforms to aid the country's poor.

SAN JOSE (MAY 8) EFE - A medium-sized earthquake rocked rural areas of Panama and Costa Rica but caused no damage or injuries, officials in both countries said Tuesday.

The quake, registering over five degrees on the open-ended Richter scale, struck at 0005 GMT Tuesday and lasted for several seconds.

The epicenter was located on Costa Rica's southern border with Panama.

Four sizeable tremors have rocked Costa Rica over the past two months, while in Panama an oil pipeline fractured during an earth movement a few weeks ago, resulting in a spill that harmed offshore marine life.

#90128e0007 05/08/1990 ~Latin America New Agency

PANAMA CITY (MAY 8) EFE - Panama's foreign ministry is studying the possibility of making a compensation claim to Washington for damages incurred in the December invasion that ousted former military strongman Manuel Antonio Noriega.

Speaking to reporters Monday, Foreign Minister Julio Linares said "there exist arguments that the United States ought to compensate Panama" but he warned that any claim would have to be analyzed in detail to avoid making any errors.

At least 250 people were believed killed and hundreds of business premises were destroyed in fighting and looting which followed the U.S. invasion December 20.

Linares said that Washington, in imposing economic sanctions in 1988 to try to oust Noriega, "had aided greatly in consolidating the Noriega regime" and in "deepening the crisis experienced by Panama today."

But he also added, "how can we ask the U.S. government for compensation if on one hand, the Panamanian people greeted the North American military action not as an invasion but rather as a liberation?"

Linares' comments came while the U.S. government has yet to fully approve a dlrs 420 million aid package proposed by President George Bush.

Analysts say many Panamanians have begun seeking legal advice on making individual compensation claims before U.S. courts for losses suffered during the invasion.

#90128e0008 05/08/1990 ~Latin America New Agency

LIMA (MAY 8) EFE - A month before run-off elections decide Peru's next president, front-runner candidate Alberto Fujimori has been accused of tax fraud by a controversial congressman on a one-man anti-corruption crusade.

Speaking on a weekend television chat show, Deputy Fernando Olivera said he had recorded testimony from a couple claiming they paid dlrs 55,000 to buy their home from Fujimori, although the sale price that appeared on the deed was only dlrs 18,000.

Olivera, who was elected to congress representing the Independent Moralist Front (FMI), whose symbol is a broom "to sweep out corruption," accused Fujimori of deliberately misrepresenting the price to evade property transfer taxes.

The deputy said he was investigating some 60 real estate deals over the past 15 years involving a construction company owned by Fujimori and his wife Susana Higushi, a civil engineer.

An agricultural engineer of Japanese descent, Fujimori came from the political nowhere to deprive the favorite candidate, novelist Mario Vargas Llosa, of an absolute majority in last month's elections and prompting a second-round ballot set for June.

Recent polls show Fujimori's lead slipping -- down from 51 to 44 percent -- but still ahead of the 36 percent who say they will vote for Vargas Llosa.

MADRID (MAY 8) EFE - The Spanish congress will admit debate on a small regional party's resolution calling for Deputy Premier Alfonso Guerra to be reprimanded and sacked for allegedly lying about his involvement in an influence-peddling scandal, legislators said Tuesday

The procedural committee turned down a related bid from the regionalist Andalusian Party, which has two deputies in the 350-member congress, to subpoena dossiers by state prosecutors investigating Alfonso Guerra's brother, Juan.

A furor erupted earlier this year when news media reported that Juan Guerra, who was on the dole when Prime Minsiter Felipe Gonzalez' ruling Socialists came to power in 1982, has become a millionaire through a series of questionable business deals.

Operating out of a government office building in the southern city of Seville as his brother's personal representative, Juan Guerra allegedly raked in kickbacks and commissions in return for his services as a "fixer".

In a heated February 4 session of parliament, Alfonso Guerra, characterized by his opponents as the Machiavellian manipulator of the ruling Socialist party, denied all knowledge of his brother's business activities.

Sources in Congress, where the Socialists have a de facto absolute majority due to the absense of radical Basque deputies, said debate on the non-binding resolution condemning Alfonso Guerra could begin next week.

#90128e0013 05/08/1990 ~Latin America New Agency
RIO DE JANEIRO (MAY 8) EFE - The family of a leading Brazilian businessman kidnapped six days ago paid the gang which seized him dlrs 3 million for his release, local news media reported Tuesday.

Businessman Odilon Pereira Texeira, the 52-year-old owner of a major transport company, was freed late Monday after the family reportedly handed over the ransom.

Pereira's lawyer and relatives refused police help in trying to free the businessman, who was abducted by the gang last Thursay as he left his home in a northern Rio neighborhood.

His release came a day after empresario Williams Georges Khoury, 51, was freed after nine days of captivity by his kidnappers, who received dlrs one million in ransom.

Police believe that recent kidnappings are being carried out by a new gang which formed after the breakup and arrest of an international group responsible for seizing a string of leading businessman.

#90128e0014 05/08/1990 ~Latin America New Agency

RIO DE JANEIRO (MAY 8) EFE - Colombia's notorious Medellin cocaine smuggling cartel has controlled Brazil's drug processing and trafficking market for the last six years, according to a report published Tuesday in a Rio daily.

The daily O Globo, citing police, said the Medellin cartel had been in control of narcotics operations in Brazil since 1984, when it began setting up cocaine processing laboratories in the country's Amazonian jungle regions.

O Globo said the Colombian traffickers had been attracted to Brazil by the easy availability of ether and acetone used in processing cocaine.

The Colombians have also cut costs by hiring cheap labor among Amazonian jungle indians and by using rivers to transport cocaine from laboratories to Brazilian ports from where the drugs are shipped to the United States and Europe.

Given the remoteness of much of Brazil's jungle, their cocaine operations go undisturbed and they can also build airstrips to transport products in and out of the country, said O Globo.

The arrest in January of the Medellin cartel's alleged operations chief for Rio de Janeiro, Brazilian Isaias da Costa Rodrigues, provided evidence of the Colombians' grip on the country's narcotics network, added the paper.

O Globo said Medellin representatives also used several Brazilian cities to hold meetings with leaders of the Italian Mafia, allegedly to discuss narcotics deals.

Since the Colombian government launched a massive crackdown on the drug cartels last year, the Medellin cartel's fugitive leader, Pablo Escobar, has become that country's most wanted man.

Press reports have claimed over the last few months that Escobar could have escaped from Colombia and be in hiding in Brazil, Peru or Ecuador.

#90128e0016 05/08/1990 ~Latin America New Agency

LA PAZ (MAY 8) EFE - The Bolivian government announced Tuesday that it has suspended the export of llamas and alpacas, Andean animals highly prized in the United States as exotic pets, as part of an ambitious scheme to protect the country's wildlife.

Deputy Enviromental Secretary Gerardo Aguirre said the decision had been taken to establish the current numbers of each species in the country.

Both llamas and alpacas, which live mainly in Andean regions of Bolivia, Peru, Chile and Ecuador, have become fashionable pets in the United States over the last few years, reaching anything up to dlrs 150,000 at auction.

Aguirre said once the survey of the species had been completed, the exports would resume but under stricter regulations than before.

Several llamas shipped recently to the United States died en route because of poor transport conditions.

The suspension of llama and alpaca exports is part of a five-year government-sponsored program titled "Historical Ecological Pause."

Under the enviromental plan, the country's forests, plant and animal life, among the richest in the world, are to be given greater protection from would-be developers and hunters.

#90128e0018 05/08/1990 ~Latin America New Agency

Buenos Aires (MAY 8) EFE - Cash-strapped Argentina is to offer to renew payments on its massive foreign debt in return for international creditor banks agreeing to reduce interest and principal, government officials said Tuesday.

The proposal will be made during a meeting later in the day in Washington between Argentine Finance Minister Antonio Erman Gonzalez and the president of the committe of Argentina's creditor banks, William Rhodes.

At the meeting, Gonzalez and Rhodes will fix a date in May for the reopening of negotiations between the lending banks and Argentina, which broke off in 1988 after Buenos Aires halted interest payments on its debt.

Argentina has a foreign debt of dlrs 64 billion, dlrs 38 billion of which it owes to private, mainly U.S., banks.

Since 1988, it has accumulated interest payment debts of dlrs 6 billion.

The government officials said that until a final debt agreement is reached Argentina will pay a +symbolic+ monthly dlrs 80 to 100 million in debt

payments.

Under the proposal to be made Tuesday, Argentina will ask its creditor banks to fix a lower interest rate than that which is currently applied to the country's debt.

It is also to propose reducing principal by buying back debt titles on the so-called secondary market.

The Washington talks come a day after the International Monetary Fund approved a letter of intent presented by Argentina asking for the unblocking of part of a dlrs 1.4 billion stand-by loan.

The loan was obtained last September, two months after Argentine President Carlos Menem came to power, but all but dlrs 240 million of the funds were frozen because the country failed to comply to meet agreed economic goals.

Gonzalez announced Monday that IMF Director Michel Camdessus had approved the letter of intent and would urge the organization's Executive Committee to unblock the loan by May 25.

It is expected that another dlrs 240 million of the credit will be released under the agreement.

Menem has introduced and stood by harsh controversial austerity measures in a bid to halt inflation and slash public spending.

CIUDAD DEL CARMEN, MEXICO (MAY 8) EFE - Six members of the same family were murdered and then decapitated with machetes at their ranch, Mexican police reported Tuesday.

The police chief in Ciudad del Carmen, on Mexico's Caribbean coast, described the unknown murderers as maniacs for the way in which they killed the Jimenez Damian family.

He said the killers had broken into the El Milagro ranch to rape four women members of the family and then decapitated them and two other people.

It was not disclosed when the killings occurred.

Police are searching for the driver of a car who reported what had happened at the ranch and then disappeared.

They said they believe the massacre may have been a settling of accounts by a gang of drug-traffickers.

#90128e0022 05/08/1990 ~Latin America New Agency

BOGOTA, MAY 8 (EFE).- Colombian police revealed Tuesday they foiled a plan by the powerful Medellin cocaine cartel to kill President Virgilio Barco during a drug summit in February attended by the heads of state from four countries, including President George Bush.

The Security Administrative Department (DAS) released details of the cartel's plan to use sophisticated weapons in an attack on Barco while he met with the presidents of Bolivia, Peru and the United States at an anti-drug summit February 15 in the Caribbean resort city of Cartagena.

DAS said it did not release news of the planned attempt before the summit because it did not want to upset the meeting.

Also on Tuesday, the head of the secret police division F-2, Col. Oscar Eduardo Pelaez Carmona, said agents were searching for "house bombs" near police quarters in several Colombian cities.

He said authorities had learned the Medellin cartel was buying up houses near police stations and rigging them with explosives.

The Medellin cartel has been engaged in a retaliatory war against the government since Barco ordered a crackdown on drug trafficking in August.

More than 200 people have been killed in attacks blamed on the drug barons

since then.

#90128e0032 05/08/1990 ~Latin America New Agency

BUENOS AIRES (MAY 9) EFE - Some 80,000 Argentine state bank workers are to Wednesday begin a three-day strike following the announced restructuring of the National Development Bank (BANADE), under which 900 workers are to lose their jobs.

Argentine Banking Association (ABA) union leader Juan Zanola Tuesday said workers in "all the national official banks" would strike for five hours every day until Friday, effectively closing the banks to the public.

Zanola's call followed a government announcement that some 31 branches of BANADE would be shut down, putting 30 percent of the bank's 3,000 employees out of work.

BANADE auditor Noberto Schor received a hostile reception Tuesday when he told workers the bank "will cease in its operations as retail banker for small and medium-sized companies."

The ABA soon after said it "categorically rejected" the move, claiming it was aimed at "sterilizing an institution which has been and should continue to be an essential part of national development."

Regional union leaders are to meet Wednesday to set out a plan of action against the government's restructuring scheme.

President Carlos Menem's attempts to cut back the size of the state sector as part of his anti-inflationary strategy has met with a wave of strikes by railway workers, teachers, state telephone company employees and bank workers.

#90128e0033 05/08/1990 ~Latin America New Agency

PANAMA CITY (MAY 9) EFE -Panamanian officials are having trouble tracking down money ousted military strongman Manuel Antonio Noriega allegedly earned through illegal activities and looted from state coffers, officials said Tuesday.

The judge in charge of the search, Eusebio Marchowsky, complained Tuesday that it was "very difficult" to unravel the complicated web of Noriega's illegal dealings which included drug trafficking, money laundering and illegal arms sales.

Marchowsky sparked controversy two weeks ago by accusing certain sections

of the police of hindering the work of his investigators in tracing the source of the ex-dictator's illegal gains.

The government of President Guillermo Endara has denied that former security officers under Noriega, who now work in Panama's new security force, had been obstructing the investigation.

Marchowsky has asked help from the U.S. government which holds documents on Noriega's activities seized by U.S. troops during last December's invasion in which ousted the ex-dicator was ousted.

Noriega is being held in a Florida jail while awaiting trial on drug-trafficking charges.

CARACAS (MAY 9) EFE - At least seven people have died and another has disappeared in the past twenty-four hours as heavy rains in Venezuela caused widespread flooding, officials said Tuesday.

Six people drowned and another went missing Tuesday near the southern tip of Lake Maracaibo when the Zulia River, which flows into the lake, broke its banks.

Torrential rains provoked a landslide in Caracas Monday burying one woman alive and leaving many families homeless.

Authorities fear that more people may have died in floods brought on by heavy seasonal rains.

BOGOTA (MAY 9) EFE - Seventeen self-defense groups set up to combat leftist rebels Tuesday offered to disarm in favor of national reconciliation, a government spokesman said.

The offer was made at a meeting between Interior Minister Horacio Serpa Uribe and a representative of the groups, the spokesman said.

Self-defense groups emerged in the 1950s in northern Colombia to combat leftist guerrillas operating in the area.

In the mid-1980s increasingly powerful drug barons began to finance many of the groups and some evolved into paramilitary death squads, which are blamed for the deaths of more than 1,000 leftist politicians.

Ivan Roberto Duque, secretary of the Magdalena Medio Farmers' Association, said the 17 groups he represented had armed themselves solely to combat guerrillas.

Leftist rebels of the Colombian Revolutionary Armed Forces, the National Liberation Army and the People's Liberation Army operate in the Magdalena Medio region, which stretches from the central department of Tolima to the Caribbean coast.

Another leftist guerrilla group, the April 19 Movement (M-19), disarmed in March after reaching an agreement with the government to become a civilian political force.

Its leader and presidential candidate, Carlos Pizarro, was murdered on April 26 in an attack his successor Antonio Navarro Wolff blamed on extreme rightists.

WELLINGTON (MAY 8) XINHUA -- IN ITS ANNUAL REPORT FOR 1989, THE ASIAN DEVELOPMENT BANK LISTED COOK ISLANDS, FIJI, SOLOMON ISLANDS, TONGA, VANUATU AND WESTERN SAMOA AMONG PACIFIC ISLAND COUNTRIES AS RECORDING ECONOMIC GROWTH.

THE REPORT, QUOTED BY THE LATEST ISSUE OF THE SOUTH SEA DIGEST, SAID FIJI'S GROSS DOMESTIC PRODUCT EXPANDED FROM A ZERO-GROWTH RATE BY 12.1 PERCENT IN THE LAST TWO YEARS THROUGH STRONG GROWTH IN THE SUGAR AND MINING INDUSTRIES.

BOTH SOLOMON ISLANDS AND VANUATU REPORTED AN OVERALL GROWTH DESPITE CYCLONE DAMAGE, VANUATU BENEFITING FROM A GROWTH IN THE TOURISM INDUSTRY AND SOLOMON ISLANDS EXPERIENCING RAPID GROWTH IN ITS FISHERIES SECTOR.

THE BANK PREDICTED A FURTHER DECLINE IN PAPUA NEW GUINEA'S PER CAPITA INCOME THROUGH THE CONTINUED CLOSURE OF THE COPPER MINE ON THE SECESSIONIST-OCCUPIED BOUGAINVILLE ISLAND -- A MAJOR REVENUE EARNER FOR THE COUNTRY. ENDITEM ;05080650 08/05/90 0653GMT

CHANGSHA (MAY 8) XINHUA - A SINO-JAPANESE PACKAGE PROJECT FOR FAMILY PLANNING, MATERNITY AND CHILD HYGIENE, AND CONTROL OF PARASITOSIS HAS BEEN EXPANDED TO HUNAN AND YUNNAN PROVINCES THIS YEAR, ACCORDING TO HEALTH OFFICIALS HERE.

THE PACKAGE PROJECT HAS ALREADY BEEN IMPLEMENTED IN LIAONING, SHANDONG AND JIANGSU PROVINCES AND THE INNER MONGOLIA AUTONOMOUS REGION.

THE ACHIEVEMENTS OF THE PROJECT, CREATED BY THE JAPANESE ORGANIZATION FOR INTERNATIONAL CO-OPERATION IN FAMILY PLANNING ASSOCIATION, HAS ATTRACTED THE ATTENTION OF DEVELOPING COUNTRIES AS WELL AS THE INTERNATIONAL PLANNED PARENTHOOD FEDERATION.

SINCE 1973 THE PROJECT HAS BEEN IMPLEMENTED IN 23 DEVELOPING COUNTRIES AND REGIONS IN ASIA, AFRICA, LATIN AMERICA AND THE PACIFIC.

CHINA INTRODUCED THE PROJECT IN 1984. THROUGH CO-OPERATION WITH THE INTERNATIONAL PLANNED PARENTHOOD FEDERATION AND THE JAPANESE ORGANIZATION, THE CHINA FAMILY PLANNING SOCIETY HAS IMPLEMENTED THE PROJECT IN SIX COUNTIES. IN THE SUBURBS OF TAI'AN CITY, SHANDONG PROVINCE, THE NUMBER OF RURAL HOUSEHOLDS WITH CLEAN DRINKING WATER HAS INCREASED FROM 10 PERCENT TO 97 PERCENT AFTER THREE YEARS OF EFFORT, AND THE INFECTION RATE OF ROUNDWORM HAS DIVED FROM 77.15 PERCENT TO 22 PERCENT.

FOR IMPLEMENTING THE PROJECT IN CHINA, CHINESE AND JAPANESE EXPERTS HELD A WORKSHOP TO TRAIN 90 STUDENTS FROM DIFFERENT PARTS OF CHINA FROM APRIL 29 TO MAY 5 IN HENGSHAN COUNTY, HUNAN.

#90128h0094 05/08/1990 ~Chinese News Agency
BEIJING (MAY 8) XINHUA - THE UNITED ARAB EMIRATES (U.A.E.) PRESIDENT SAID HERE THIS EVENING THAT HIS CURRENT VISIT TO CHINA SHOWS THAT THE U.A.E. GOVERNMENT AND PEOPLE ATTACH GREAT IMPORTANCE TO THEIR RELATIONS WITH CHINA.

SHEIKH ZAYED BIN SULTAN AL-NAHAYAN MADE THE REMARK AT A BANQUET CHINESE PRESIDENT YANG SHANGKUN GAVE FOR HIM AT THE GREAT HALL OF THE PEOPLE.

ZAYED SAID THAT HIS COUNTRY AND CHINA WOULD CONTINUE THEIR COMMON EFFORTS TO PROMOTE MUTUAL UNDERSTANDING AND FRIENDSHIP BY PURSUING THE PRINCIPLES OF PEACEFUL COEXISTENCE.

AFTER BRIEFING HIS CHINESE HOST ABOUT THE ACHIEVEMENTS THE U.A.E. PEOPLE HAVE MADE IN THE CONSTRUCTION OF THEIR MOTHERLAND, ZAYED SAID THAT THIS IS THE RESULT OF THE U.A.E. PEOPLE IMPLEMENTING THEIR OWN POLICY. THE CONSISTENT PRINCIPLES EMBODIED IN THE POLICY INCLUDE THE DEEP BELIEF OF THE U.A.E. PEOPLE THAT THEY, AS AN INSEPARABLE PART OF THE ARAB NATION, HAVE THEIR OWN NATIONAL INTERESTS; THAT THEY MUST ESTABLISH THE MOST SOLID AND CLOSEST RELATIONSHIPS WITH OTHER MEMBER STATES OF THE GULF CO-OPERATION COUNCIL; THAT THE ARAB NATION HAS ITS INTERESTS AS A WHOLE AND ITS JUST CAUSE MUST BE SUPPORTED; THAT THEY MUST STRENGTHEN THEIR RELATIONS WITH THIRD WORLD COUNTRIES, PARTICULARLY THOSE IN ASIA AND AFRICA; AND THAT THEY MUST PROMOTE THEIR FRIENDLY RELATIONS OF CO-OPERATION WITH ALL COUNTRIES AND PEOPLES ON THE BASIS OF MUTUAL RESPECT IN ORDER TO MAINTAIN WORLD PEACE.

NOTING CHINA'S ROLE IN INTERNATIONAL POLITICAL AFFAIRS, HE SAID THE U.A.E. THANKED CHINA FOR ITS RESOLUTE SUPPORT FOR THE ARAB PEOPLE'S JUST CAUSE, ESPECIALLY FOR THE STRUGGLE OF THE PALESTINIAN PEOPLE UNDER THE LEADERSHIP

OF THE PALESTINE LIBERATION ORGANIZATION.

ON THE SITUATION IN THE GULF REGION, ZAYED SAID, THE PRESENT DEADLOCK IN THE PEACE TALKS AND THE STALEMATE OF "NO WAR-NO PEACE" BETWEEN IRAQ AND IRAN BENEFIT NOBODY, POSING A THREAT TO THE SECURITY AND STABILITY OF THE REGION.

AS THE GULF REGION BEARS VITAL SIGNIFICANCE FOR WORLD SECURITY AND PEACE, HE SAID, THE RESTORATION OF PEACE TO THIS REGION IS AN URGENT TASK AND IN THE INTEREST OF ALL COUNTRIES, ESPECIALLY IRAQ AND IRAN.

THE U.A.E. WELCOMES CHINA'S CO-OPERATIVE TIES AND RELATIONS OF MUTUAL UNDERSTANDING WITH ITS NEIGHBORING COUNTRIES, INDIA AND PAKISTAN IN PARTICULAR, AND SUPPORTS THEIR CLOSER RELATIONS.

ZAYED SAID HIS COUNTRY DENOUNCES THE POLICY OF RACIAL DISCRIMINATION, SUPPORTS THE LIBERATION MOVEMENT AGAINST COLONIALISM, AND STANDS FOR THE ESTABLISHING OF BALANCED AND FAIR RELATIONS BETWEEN INDUSTRIALIZED AND DEVELOPING COUNTRIES.

WHILE HAILING THE RELAXATION BETWEEN THE TWO SUPERPOWERS, ZAYED POINTED OUT THAT INTERNATIONAL PEACE AND UNDERSTANDING SHOULD NOT BE WON AT THE COST OF COMMON SENSE AND INTERNATIONAL NORMS.

THE FOREMOST OF THESE NORMS IS THE RIGHT TO SELF-DETERMINATION, HE SAID. SOME PEOPLES HAVE NOT YET WON COMPLETE POLITICAL INDEPENDENCE OR BUILT UP THEIR OWN ECONOMIC SYSTEMS, AND SOME STILL SUFFER FROM RACIAL OPPRESSION AND FOREIGN OCCUPATION, HE POINTED OUT. THEY SHOULD NOT BE DEPRIVED OF THEIR BASIC RIGHTS, HE STRESSED.

INTERNATIONAL UNDERSTANDING AND PEACE WILL NOT BE ESTABLISHED, NOR WILL THEY LAST, IF THE INTERESTS OF SOME PEOPLE ARE HURT FOR THE INTERESTS OF OTHER PEOPLE, HE SAID.

BEIJING (MAY 8) XINHUA - THE SIX EXPLORERS WHO RECENTLY CONCLUDED A TRANS-ANTARCTIC EXPEDITION ARRIVED IN BEIJING THIS EVENING TO START A FOUR-DAY VISIT.

SOON AFTER THEY STEPPED DOWN FROM THEIR PLANE YOUNG PIONEERS PRESENTED THEM WITH BUNCHES OF FLOWERS AND WELCOMED THEM IN ENGLISH. OFFICIALS FROM THE NATIONAL ANTARCTIC RESEARCH COMMITTEE AND THE BEIJING MUNICIPALITY, AND THE SCIENCE ATTACHE OF THE U.S. EMBASSY IN CHINA ALSO WENT TO THE AIRPORT TO GREET THE TEAM.

THE SIX EXPLORERS, WHO ARE TOURING THEIR HOME COUNTRIES, ARE GIN DAHE OF

CHINA, JEAN LOUIS ETIENNE OF FRANCE, WILL STEGER OF THE UNITED STATES, VICTOR BOYARSKY OF THE SOVIET UNION, GEOFF SOMERS OF GREAT BRITAIN AND KEIZO FUNATSU OF JAPAN.

WU HENG, DIRECTOR OF THE CHINA NATIONAL ANTARCTIC RESEARCH COMMITTEE, SAID AT THE AIRPORT RECEPTION THAT THE SIX EXPLORERS HAD MADE A GREAT CONTRIBUTION TO THE PEACEFUL UTILIZATION OF THE ANTARCTIC. HE TOLD THEM: "YOU HAVE WON ADMIRATION FROM PEOPLE ALL OVER THE WORLD."

THE FIVE FOREIGN EXPLORERS SAID THEY APPRECIATED THE SUPPORT AND ENCOURAGEMENT OF THE CHINESE PEOPLE AND THE WARM RECEPTION ACCORDED THEM BY BEIJING RESIDENTS. VICTOR BOYARSKY SAID, "IT SEEMS AS IF IT IS VERY HOT IN BEIJING TODAY, BUT THE RECEPTION IS WARMER THAN THE WEATHER."

WITH THE TEAM WERE ALSO THE BACKUP MEMBERS WHO MADE OUTSTANDING CONTRIBUTIONS TO THE EXPEDITION IN TELECOMMUNICATION AND OTHER WORK, AND THE EXPLORERS' FAMILY MEMBERS.

THE TEAM WILL LEAVE BEIJING FOR LANZHOU SATURDAY. THEN THEY WILL LEAVE FOR THE SOVIET UNION TO CONTINUE THEIR TOUR.

MANILA (MAY 8) XINHUA - PHILIPPINE PRESIDENT CORAZON AQUINO SAID HERE TODAY THE GOVERNMENT IS READY TO IMPLEMENT THE PLAN OF COMPREHENSIVE USE OF THE TWO U.S. MILITARY BASES IN THE PHILIPPINES IN THE EVENT THE U.S. FACILITIES ARE WITHDRAWN AFTER SEPTEMBER 1991, ACCORDING TO EXECUTIVE SECRETARY CATALINO MACARAEG.

THE BASES LEASE EXPIRES ON SEPTEMBER 16, 1991. MRS. AQUINO AND OFFICIALS OF THE EXECUTIVE DEPARTMENT WERE BRIEFED THIS AFTERNOON ON THE PLANS DRAWN UP BY THE LEGISLATIVE-EXECUTIVE BASES COUNCIL (LEBC) TO CONVERT THE U.S. CLARK AIR BASE AND SUBIC NAVAL BASE INTO INDUSTRIAL AND AGRICULTURAL COMPLEXES.

THE BRIEFING ON THE CONVERSION PLAN WAS GIVEN BY JOSE ABUEVA, CHAIRMAN OF THE LEBC, A WEEK BEFORE THE U.S. AND THE PHILIPPINES START EXPLORATORY TALKS ON THE FUTURE OF U.S. MILITARY BASES IN THE COUNTRY.

ACCORDING TO MACARAEG, THE BRIEFING IS ONE OF THE "FINAL STEPS" THE EXECUTIVE IS TAKING IN DRAFTING A UNIFIED AND COMPREHENSIVE INITIATIVE ON THE BASES PRIOR TO THE EXPLORATORY TALKS.

"THE PRESIDENT EXPRESSED HER SATISFACTION THAT THE COUNCIL'S WORK IS PROCEEDING STEADILY ON SCHEDULE," MACARAEG TOLD REPORTERS.

#90128h0098 05/08/1990 ~Chinese News Agency
OTTAWA (MAY 8) XINHUA - THE CANADIAN GOVERNMENT HAS ANNOUNCED A MULTI-MILLION-DOLLAR ECONOMIC AID PACKAGE FOR CANADA'S EAST COAST FISHING INDUSTRY WHICH HAS BEEN SUFFERING FROM DECLINING FISH STOCKS AND CATCHING QUOTA RESTRICTIONS.

THE PACKAGE, WORTH 584 MILLION CANADIAN DOLLARS (496 MILLION U.S. DOLLARS) IS DESIGND TO ASSIST THOUSANDS OF LAID-OFF WORKERS, PROTECT FISH STOCKS AND HELP COMMUNITIES LESSEN RELIANCE ON LOCAL FISH PLANTS OVER THE NEXT FIVE YEARS.

FISHING IS THE BIGGEST INDUSTRY IN CANADA'S EAST COAST ON THE ATLANTIC OCEAN, WHICH CONSISTS OF THE PROVINCES OF NEWFOUNDLAND, NEW BRUNSWICK, PRINCE EDWARD ISLAND AND NOVA SCOTIA AND PART OF QUEBEC PROVINCE.

THE ATLANTIC PROVINCES HAVE 66,000 COMMERCIAL FISHERMEN AND 900 PROCESSING PLANTS EMPLOYING 33,000 WORKERS. AS A RESULT OF OVER-CATCHING, FISH STOCKS IN THE SEAS OFF THE COAST HAVE REDUCED SHARPLY OVER THE PAST TWO DECADES.

THEREFORE, THE FEDERAL GOVERNMENT HAS ANNOUNCED REDUCED CATCHING QUOTAS. SINCE 1988, THE CATCHES OF NORTHERN COD, WHICH IS THE BACKBONE OF ATLANTIC CANADA'S FISHERY, HAVE BEEN CUT BY 69,000 TONS, OR 25 PERCENT, TO 197,000 TONS ANNUALLY.

AS A RESULT, A LARGE NUMBER OF PLANTS HAVE BEEN CLOSED, WITH ABOUT 3,000 WORKERS SCHEDULED TO LOSE THEIR JOBS.

THE AID PACKAGE, ANNOUNCED MONDAY BY CANADIAN FISHERIES MINISTER BERNARD VALCOURT, COVERS FEDERAL SPENDINGS IN REBUILDING FISH STOCKS, ASSISTING LAID-OFF WORKERS AND HELPING TOWNS DEVASTATED BY PLANT CLOSURES.

HOWEVER, THE FEDERAL AID PACKAGE IS BEING GREETED WITH "ANGER AND DISAPPOINTMENT" IN ALL THE PROVINCES INVOLVED.

REPRESENTATIVES OF PLANT WORKERS AND SOME OF THE TOWNS MOST AFFECTED BY THE FISHERIES CRISIS ARE CONDEMNING THE FEDERAL AID AS "TOO LITTLE," ACCORDING TO THE LOCAL PRESS.

#90128h0099 05/08/1990 ~Chinese News Agency
MANILA (MAY 8) XINHUA - PHILIPPINE PRO-ADMINISTRATION SENATORS TODAY BLOCKED A MOVE BY THE LONE OPPOSITION SENATOR PONCE ENRILE WHICH SOUGHT TO PLACE UNDER PUBLIC SCRUTINY PRESIDENT CORAZON AQUINO'S EXERCISE OF HER EMERGENCY POWERS.

ENRILE FILED A VERBAL MOTION TO HAVE THE RESULTS OF THE PRESIDENT'S

EMERGENCY POWERS SUBJECTED TO A SERIES OF PUBLIC HEARINGS.

ENRILE MADE THE MOVE AFTER RECEIVING A COPY OF EXECUTIVE SECRETARY CATALINO MACARAIG'S LETTER CONTAINING WHAT WERE SUPPOSED TO BE MALACANANG'S (PRESIDENTIAL OFFICE'S) REPORTS ON THE USE OF THE EMERGENCY POWERS.

SENATOR NEPTALI, GONZALES, PRESIDENT OF THE PRO-ADMINISTRATION LABAN NG DEMOKRATIKONG PILIPINO (LDP OR STRUGGLE OF DEMOCRATIC FILIPINOS), AND SENATE MAJORITY FLOORLEADER TEOFISTO GUINGONA, ROSE ONE AFTER ANOTHER AND BLOCKED ENRILE'S PROPOSAL.

GUINGONA SAID THE LAW GIVING THE PRESIDENT BROAD EMERGENCY POWERS UNTIL JUNE 8 THIS YEAR DOES NOT REQUIRE THE PRESIDENT NOR MALACANANG TO REPORT ON THE RESULTS OF THE EMERGENCY POWERS GRANTED TO THE PRESIDENT FOLLOWING THE DECEMBER 1989 COUP ATTEMPT.

GONZALES SAID ENRILE'S MOTION WAS MADE VERBALLY AND COULD NOT BE TAKEN ON THE FLOOR AHEAD OF OTHER PENDING MEASURES.

-30- 1392

#90128h0101 05/08/1990 ~Chinese News Agency

MANILA (MAY 8) XINHUA - PHILIPPINE PRESIDENT CORAZON AQUINO TODAY ACCEPTED THE RESIGNATION OF ROBERTO VILLANUEVA, COORDINATING COUNCIL CHAIRMAN OF THE PHILIPPINE AID PLAN (PAP).

IN HIS RESIGNATION LETTER TO MRS. AQUINO, VILLANUEVA CITED HIS HEALTH CONDITION ARISING FROM A HEART PROBLEM. HE IS SOON TO UNDERGO A HEART BYPASS OPERATION.

VILLANUEVA WAS APPOINTED BY PRESIDENT AQUINO IN 1988 TO FACILITATE THE PHILIPPINE AID PLAN, ALSO KNOWN AS THE MULTILATERAL AID INITIATIVE (MAI).

THE AID PLAN, INITIATED BY THE UNITED STATES, WAS DESIGNED TO GENERATE 10 BILLION U.S. DOLLARS FROM SOME 20 WESTERN COUNTRIES TO HELP THE PHILIPPINES REBUILD ITS ECONOMY.

#90128h0102 05/08/1990 ~Chinese News Agency

GABORONE (MAY 8) XINHUA - BOTSWANAN PRESIDENT DR. QUETT MASIRE TODAY DESCRIBED THE RECENT TALKS BETWEEN THE AFRICAN NATIONAL CONGRESS (ANC) AND THE SOUTH AFRICAN GOVERNMENT AS A "MAJOR BREAKTHROUGH."

OPENING THE 21ST AFRICAN REGIONAL CONFERENCE OF THE COMMONWEALTH PARLIAMENTARY ASSOCIATION (CPA) HERE TODAY, PRESIDENT MASIRE SAID THAT BOTSWANA WAS PLEASED WITH THE WAY THE TALKS WENT, NOTING THAT THE

SITUATION IN SOUTH AFRICA IS NO LONGER AS BLEAK AS IT USED TO BE.

"WE STRONGLY ENCOURAGE THE TWO PARTIES TO ADHERE TO THE AGREEMENT THEY HAVE CANDIDLY MADE," SAID THE PRESIDENT.

HE, HOWEVER, REGRETTED THE PARTIAL LIFTING OF THE STATE OF EMERGENCY IMPOSED IN 1986 AND CALLED FOR IT TO BE COMPLETELY LIFTED.

FOLLOWING THE INDEPENDENCE OF NAMIBIA, SOUTH AFRICA REMAINED THE ONLY COUNTRY WHERE THE MAJORITY OF CITIZENS ARE STILL DENIED CIVIL AND POLITICAL RIGHTS BECAUSE OF THE ABHORENT POLICY OF APARTHEID.

DR. MASIRE SAID THAT THE APARTHEID POLITICAL SYSTEM HAS TO BE DISMANTLED AND REPLACED BY PARLIAMENTARY DEMOCRACY IN WHICH ALL SOUTH AFRICAN CITIZENS WOULD BE FREE TO PARTICIPATE.

IF FULL DEMOCRACY IS ALLOWED TO TAKE ROOT IN SOUTH AFRICA, THE PRESIDENT SAID, PEACE AND PROSPERITY WILL COME TO THE REGION.

WINDHEOK (MAY 8) XINHUA - NAMIBIA HAS DECIDED TO ESTABLISH A DEVELOPMENT BRIGADE AS A MEANS TO SOLVE THE UNEMPLOYMENT PROBLEM.

MINISTER OF INFORMATION AND BROADCASTING HIDIPO HAMUTENYA TOLD THE LOCAL RADIO TODAY THAT THE DEFENCE MINISTRY HAS BEEN INSTRUCTED TO REGISTER ALL FORMER MEMBERS OF THE NAMIBIAN PEOPLE'S LIBERATION ARMY (PLAN), THE DISSOLVED SOUTHWEST AFRICAN TERRITORIAL FORCE (SWATF) AND ANTI-RIOT POLICE UNIT (KOEVOET), THE TWO SOUTH AFRICAN CREATED MILITARY UNITS, AND PROVIDE THEM WITH A CRASHING PROGRAM OF TRAINING FOR EMPLOYMENT.

NO OFFICIAL FIGURES OF THESE PEOPLE ARE AVAILABLE, BUT EARLIER PRESS REPORTS INDICATED THAT ABOUT 8,000 PLAN MEMBERS RETURNED AS CIVILIANS LAST YEAR TO PARTICIPATE IN THE INDEPENDENCE PROCESS.

SWATF WITH 26,000 MEN AND KOEVOET WITH 6,000 WERE DISSOLVED IN THE PROCESS AS STIPULATED IN THE U.N. RESOLUTION 435. SINCE THEN, THEY HAVE BEEN UNEMPLOYED.

ANKARA (MAY 8) XINHUA - TURKEY WILL EXTEND CREDITS OF 400 MILLION U.S. DOLLARS TO ROMANIA AND THE SOVIET UNION THIS MONTH, THE SEMI-OFFICIAL ANATOLIA NEWS AGENCY REPORTED TODAY.

A ROMANIAN DELEGATION WILL ARRIVE HERE TOMORROW TO SIGN AN AGREEMENT WITH

THE TURKISH EXIMBANK FOR AN EXPORT CREDIT OF 50 MILLION DOLLARS.

AT THE END OF MAY, SOVIET OFFICIALS WILL ALSO CME ERE TO SIGN AN AGREEMENT WITH THE EXIMBANK FOR A CREDIT OF 350 MILLION DOLLARS.

EXIMBANK DIRECTOR GENERAL TURGAY OZKAN SAID THE CREDIT TO ROMANIA WILL COVER ALL EXPORT PRODUCTS EXCEPT UNPROCESSED AGRICULTURAL PRODUCTS, AND THE TERM OF THE CREDIT WILL REMAIN VALID FOR TWO OR THREE YEARS.

OZKAN SAID THE CREDIT TO THE SOVIET UNION WILL BE USED IN FINANCING ABOUT 15 TO 20 PROJECTS TO BE CARRIED OUT BY TURKISH CONTRACTORS IN THE SOVIET UNION IN THE FIELDS OF HEALTH, LIGHT INDUSTRY AND FOODSTUFF.

HE SAID THE TERM OF THE CREDIT TO THE SOVIET UNION WILL BE VALID FOR SEVEN TO NINE YEARS WITH FREE INTEREST GRANTED TO THE FIRST TWO TO FOUR YEARS.

INDICATING THAT THE EXIMBANK WAS CONSIDERING TO OPEN A CONSUMER CREDIT TO THE SOVIET UNION WITH AN AMOUNT OF 200-300 MILLION DOLLARS, OZKAN SAID NEGOTIATIONS ON THE DETAILS CONCERNING THE CREDIT WERE IN PROGRESS.

OZKAN ADDED THAT THE EXIMBANK WAS ALSO PLANNING TO OPEN A CREDIT OF 15-30 MILLION DOLLARS TO SYRIA.

BEIJING (MAY 8) XINHUA - THE CHINESE GOVERNMENT HAS TAKEN SOME IMPORTANT MEASURES IN THE PAST DECADE TO PROMOTE THE CONTRIBUTIONS OF SCIENCE AND TECHNOLOGY TO THE ECONOMY AND SPUR THE DEVELOPMENT OF NEW TECHNOLOGICAL INNOVATIONS.

HU PING, DIRECTOR OF THE CHINA NATIONAL RESEARCH CENTER FOR SCIENCE AND TECHNOLOGY FOR DEVELOPMENT, SAID THIS HERE TODAY AT THE OPENING CEREMONY OF THE THIRD BEIJING INTERNATIONAL CONFERENCE ON TECHNOLOGICAL INNOVATION AND BUSINESS DEVELOPMENT.

HE SAID THE GOVERNMENT'S MAIN ROLE IN PROMOTING TECHNOLOGICAL INNOVATION IS TO CREATE A FAVORABLE ENVIRONMENT IN POLICY AND PROVIDE NECESSARY CONDITIONS AND FUNDS.

TO THIS END, HE SAID, CHINA'S GOVERNMENT HAS READJUSTED ITS POLICIES CONCERNING THE DEVELOPMENT OF SCIENCE AND TECHNOLOGY, SUCH AS PROMOTING THE POLICY OF "SCIENCE AND TECHNOLOGY MUST BE ORIENTED TO ECONOMIC CONSTRUCTION AND ECONOMIC CONSTRUCTION MUST RELY ON SCIENCE AND TECHNOLOGY".

TO PROMOTE THE CONTRIBUTIONS OF SCIENCE AND TECHNOLOGY TO THE ECONOMY, HE ADDED, CHINA'S GOVERNMENT HAS ADOPTED SOME EFFECTIVE MEASURES TO REFORM ITS ECONOMIC SETUP.

APART FROM SETTING NATIONAL TECHNOLOGICAL AND INNOVATION TARGETS, THE GOVERNMENT HAS IN RECENT YEARS PUT FORWARD A NUMBER OF PROGRAMS DEVOTED TO THE DIRECT PROMOTION OF THE COMBINATION OF SCIENCE AND TECHNOLOGY WITH THE ECONOMY, HU EXPLAINED.

THROUGH THE REFORM OF THE SCIENTIFIC AND TECHNOLOGICAL SETUP, HE SAID, CHINA HAS DEVELOPED BATCHES OF ENTIRELY NEW SCIENCE AND TECHNOLOGY ENTERPRISES WHICH BLEND TECHNOLOGY, MANUFACTURING AND TRADE.

IN ADDITION, HE SAID, CHINESE GOVERNMENT HAS TAKEN MEASURES TO PROVIDE MORE MONEY FOR THE DEVELOPMENT OF SCIENCE AND TECHNOLOGY AND GEARED UP LEGISLATION WITH REGARD TO SCIENCE AND TECHNOLOGY, SUCH AS DRAWING UP THE PATENT LAW AND THE TECHNOLOGICAL CONTRACT LAW.

NEVERTHELESS, HE POINTED OUT, CHINA'S TECHNOLOGICAL INNOVATION STILL CONFRONTS SOME SERIOUS OBSTACLES. MORE EFFORTS SHOULD BE MADE TO OVERCOME THEM, HE STRESSED.

MANILA (MAY 8) XINHUA - INITIAL SUCCESS HAS BEEN MADE IN IMPROVING THE TRAFFIC SITUATION IN METRO MANILA.

ACCORDING TO THE NEWLY-APPOINTED TRANSPORTATION SECRETARY OSCAR ORBOS TODAY, THE IMPROVEMENT IN THE VEHICULAR TRAFFIC FLOW IN THE PHILIPPINE CAPITAL WAS ATTRIBUTED TO THE IMPLEMENTATION OF THE "GRAND TRAFFIC EXPERIMENT" PROGRAM.

UNDER THE PROGRAM AIMED AT EASING TRAFFIC CONGESTION IN MANY AREAS, MANDATORY NIGHT TIME CARGO HANDLING AND DELIVERY WAS IMPLEMENTED STARTING MAY 7.

THE STRICT TRUCK BAN DURING DAYTIME HAS INITIALLY SUCCEEDED IN GETTING SOME 15 PERCENT OR 2,220 TRUCKS OFF THE MAIN ROADS AT PEAK DAYTIME HOURS IN METRO MANILA.

JEEPNEYS (POPULAR MINI-BUSES TRANSFORMED FROM JEEPS) AND BUSES WERE RE-ROUTED IN SOME DISTRICTS TO IMPROVE TRAFFIC.

HUNDREDS OF STALLS WERE REMOVED AROUND A MARKET CENTER TO OPEN UP THE AREA. THIS MOVE HAS HELPED IN DECLOGGING TRAFFIC TO AND FROM THE DOMESTIC AND INTERNATIONAL AIRPORTS AND ALSO IN IMPROVING TRAFFIC FLOW ON THE EDSA THOROUGHFARE IN METRO MANILA.

ADDIS ABABA (MAY 8) XINHUA - THE PILOT AND THREE PASSENGERS ABOARD THE LIGHT PLANE HIJACKED OVER SOMALIA LAST FRIDAY HAVEH OVER TO THEIR RESPECTIVE EMBASSIES IN ADDIS ABABA TODAY BY THE ETHIOPIAN GOVERNMENT.

THE ETHIOPIAN NEWS AGENCY SAID THAT THE NAMES OF THE FOUR HIJACKED ARE CAPTAIN BESTINI EROS, THE ITALIAN PILOT, MR. ROSSEWN LUCINE, A BELGIAN EMPLOYEE OF THE ITALIAN CONSTRUCTION FIRM MORRI WHICH OWNS THE PLANE, HUSSAN HUSSIN AHMED, A SOMALI STUDENT AND YARE MOHAMMED OMAR, A SOMALI NATIONAL.

THE LIGHT AIRCRAFT WAS HIJACKED BY A SOMALI NATIONAL NAMED ABDULKADIR MUSTAFFA, WHO FORCED THE PILOT TO LAND THE PLANE IN ETHIOPIA LAST FRIDAY.

CAPTAIN EROS SAID THAT THE HIJACKER HAD FIRST ASKED HIM FOR A LIFT FROM THE SOUTHERN SOMALI TOWN OF BARDERA TO MOGADISHU AND THEN FORCED HIM TO FLY TO ETHIOPIA AT THE POINT OF A GUN.

THE ETHIOPIAN FOREIGN MINISTRY SAID THAT THE CASE OF THE HIJACKER IS UNDER INVESTIGATION.

#90128h0125 05/08/1990 ~Chinese News Agency

LONDON (MAY 8) XINHUA - LITHUANIAN PRIME MINISTER KAZIMEIRA PRUNSKIENE, ARRIVED HERE TODAY FOR TALKS WITH BRITISH PRIME MINISTER MARGARET THATCHER.

SHE SAID SHE HOPED THATCHER WOULD BE WILLING TO INTERCEDE WITH SOVIET PRESIDENT MIKHAIL GORBACHEV ON BEHALF OF LITHUANIA. PRUNSKIENE AND THATCHER WILL HAVE TALKS WEDNESDAY.

PRUNSKIENE SAID AT A PRESS CONFERENCE UPON HER ARRIVAL FROM WASHINGTON, "INDEPENDENCE IS THE MOST IMPORTANT THING AND I WILL BE ASKING FOR RECOGNITION OF LITHUANIA ON AN INTERNATIONAL LEVEL."

SHE SAID WHAT SHE WANTS IS "A CLEAR STATEMENT" FROM THE WEST TO SUPPORT LITHUANIA'S DECLARATION OF INDEPENDENCE.

THE WEST HAS SO FAR REACTED CAUTIOUSLY AND REFUSED TO RECOGNIZE THE BALTIC REPUBLIC'S UNILATERAL DECLARATION OF INDEPENDECE.

THATCHER, WHO DOES NOT WANT TO UPSET GOOD RELATIONS WITH THE SOVIET UNION, HAS SAID SHE HOPED THE ISSUE OF LITHUANIA WOULD BE SOLVED BY PEACEFUL DIALOGUE. THATCHER IS DUE TO VISIT THE SOVIET UNION NEXT MONTH FOR TALKS WITH PRESIDENT GORBACHEV.

"IN LITHUANIA I AM KNOWN AS THE LITHUANIAN MRS THATCHER," SAID PRUNSKIENE WITH THE HOPE THAT THATCHER WOULD BE MORE "LENIENT" TOWARD LITHUANIA

BECAUSE SHE IS A WOMAN.

A SPOKESWOMAN FOR THE PRIME MINISTER OFFICE SAID LAST WEEK THAT THATCHER WAS TO MEET PRUNSKIENE IN HER CAPACITY AS AN ELECTED REPRESENTATIVE OF THE LITHUANIAN PEOPLE AND NOT AS PRIME MINISTER.

-30- 1564

#90128h0129 05/08/1990 ~Chinese News Agency

UNITED NATIONS (MAY 8) XINHUA - CHINESE AMBASSADOR HOU ZHITONG REITERATED TODAY THAT THE SUPERPOWERS, WHICH POSSESS THE LARGEST ARSENALS, HAVE A SPECIAL RESPONSIBILITY FOR HALTING THE ARMS RACE AND REALIZING DISARMAMENT.

SPEAKING THIS MORNING AT THE 1990 SESSION OF THE U.N. DISARMAMENT COMMISSION, WHICH OPENED YESTERDAY, THE AMBASSADOR SAID THE SUPERPOWERS SHOULD NOT ONLY SUBSTANTIALLY REDUCE THEIR ARMAMENTS, BUT ALSO STOP THEIR QUALITATIVE ARMS RACE.

"WHAT MUST BE NOTED," HE POINTED OUT, "IS THAT BOTH PARTIES HAVE ADMITTED RECENTLY THAT THE TARGET FOR THEIR STRATEGIC NUCLEAR WEAPONS REDUCTION HAS BEEN CURTAILED FROM THE ORIGINAL 50 PERCENT TO THE PRESENT 30 PERCENT."

"EVEN IF THEY HAVE INDEED CUT SUCH WEAPONS BY HALF, THEY STILL OWN MORE THAN 90 PERCENT OF THE TOTAL NUCLEAR WEAPONS IN THE WORLD, ENOUGH TO DESTROY MANKIND MANY TIMES," HE ADDED.

HE SAID THE SUPERPOWERS, IN THEIR NEGOTIATIONS UP TO NOW, HAVE KEPT EVADING THE ISSUE OF A QUALITATIVE ARMS RACE.

"WHILE CONSTANTLY UPGRADING THEIR CONVENTIONAL ARMAMENTS, THEY ARE NOW REPLENISHING THEIR ALREADY HUGE NUCLEAR ARSENALS WITH A NEW GENERATION OF NUCLEAR WEAPONS OF IMPROVED ACCURACY, PENETRATION AND MOBILITY," WHICH "POSES A SERIOUS THREAT TO WORLD PEACE AND SECURITY."

ON THE ISSUES OF PREVENTING NUCLEAR PROLIFERATION AND THE PROHIBITION OF NUCLEAR TEST, HE REITERATED THAT "CHINA DOES NOT ADVOCATE, ENCOURAGE OR ENGAGE IN NUCLEAR PROLIFERATION. "

HE TOLD THE COMMISSION THAT THE CHINESE GOVERNMENT HAS DECIDED TO GIVE FAVORABLE CONSIDERATION TO ATTENDING, AS AN OBSERVER, THE FOURTH REVIEW CONFERENCE OF THE PARTIES TO THE TREATY OF NON-PROLIFERATION OF NUCLEAR WEAPONS.

HE REAFFIRMED THAT CHINA IS OPPOSED TO THE PRACTICE OF GOING ALL OUT FOR THE NUCLEAR ARMS RACE WHILE REFUSING TO UNCONDITIONALLY PROVIDE SECURITY ASSURANCE TO NON-NUCLEAR-WEAPON STATES ON THE ONE HAND, AND IMPOSING UNREASONABLE RESTRICTIONS ON INTERNATIONAL COOPERATION FOR PEACEFUL USES OF NUCLEAR ENERGY IN THE NAME OF PREVENTING NUCLEAR PROLIFERATION ON THE

OTHER.

AS TO NAVAL ARMAMENTS AND DISARMAMENT, HE POINTED OUT THAT WHILE NEGOTIATING TO REDUCE NUCLEAR AND CONVENTIONAL ARMAMENTS, THE WORLD'S LEADING NAVAL POWERS HAVE CONTINUED THEIR NAVAL ARMS RACE AND THEIR RIVALRY IN THE OCEANS. THE "GUNBOAT POLICY" REMAINS A THREAT TO MANY COUNTRIES.

"NAVAL DISARMAMENT FORMS AN IMPORTANT INTEGRAL PART OF THE NUCLEAR AND CONVENTIONAL DISARMAMENT AND SHOULD BE ADDRESSED WITHOUT DELAY," THE AMBASSADOR EMPHASIZED.

HE SAID THAT "SINCE DISARMAMENT AND SECURITY ARE ISSUES HAVING A DIRECT BEARING ON THE VITAL INTEREST OF ALL COUNTRIES, ALL OF THEM, BIG OR SMALL, STRONG OR WEAK, HAVE AN EQUAL RIGHT AND ARE INVARIABLY ENTITLED TO PARTICIPATE IN THE DISCUSSION AND SETTLEMENT OF THESE ISSUES."

HE SAID IN CONCLUSION THAT BILATERAL DISARMAMENT EFFORTS AND THOSE INVOLVING A SMALL NUMBER OF COUNTRIES ARE WELCOME, BUT THEY SHOULD NOT BE USED TO BELITTLE, REJECT OR REPLACE THE GLOBAL MULTILATERAL EFFORTS.

#90128h0131 05/08/1990 ~Chinese News Agency

CAIRO (MAY 8) XINHUA - A VISITING ANGOLAN MINISTER TODAY BLAMED THE SOUTH AFRICAN REGIME FOR SUPPORTING REBELS OF THE NATIONAL UNION FOR THE TOTAL INDEPENDENCE OF ANGOLA (UNITA) AGAINST THE GOVERNMENT.

ANGOLAN MINISTER OF YOUTH AND SPORTS MARCO LINO JOSE SAID HIS COUNTRY IS MOVING TOWARD PEACE, BUT A GROUP OF ANGOLANS SUPPORTED BY SOUTH AFRICA ARE FIGHTING AGAINST THE ANGOLAN GOVERNMENT, REPORTED THE STATE-RUN MIDDLE EAST NEWS AGENCY.

UNITA, WHOSE BASES ARE IN SOUTH AND SOUTHEAST ANGOLA, HAS TOKEN UP ARMS TO FIGHT FOR SHARING POWER WITH THE GOVERNMENT SINCE 1975.

FOLLOWING A MEETING WITH EGYPTIAN PRESIDENT HOSNI MUBARAK HERE, THE ANGOLAN MINISTER SAID THE GREATER PART OF HIS TALKS WITH PRESIDENT MUBARAK NOW CHAIRMAN OF THE ORGANIZATION OF AFRICAN UNITY, WERE DEVOTED TO THIS MATTER, AND THAT THE EGYPTIAN PRESIDENT HAS EXERTED STRENUOUS EFFORTS TO END THIS PROBLEM.

MEETING WITH THE ANGOLAN MINISTER HERE MONDAY, MINISTER OF STATE FOR FOREIGN AFFAIRS BOUTROS GHALI EMPHASIZED EGYPT'S SUPPORT FOR ANGOLA'S EFFORTS TO ACHIEVE NATIONAL RECONCILIATION.

HE ALSO UNDERLINED EGYPT'S READINESS TO EXTEND ITS TECHNICAL KNOW-HOW AND COOPERATION TO PROMOTE THE PROCESS OF COORDINATION IN ANGOLA.

JOSE ARRIVED HERE SATURDAY ON A WEEK-LONG VISIT TO EGYPT.

KUWAIT (MAY 8) XINHUA - THE MOROCCAN GOVERNMENT TODAY PROCLAIMED THE ABOLITION OF ENTRY VISAS FOR KUWAITI NATIONALS VISITING MOROCCO.

AN ANNOUNCEMENT TO THIS EFFECT WAS MADE BY THE MOROCCAN EMBASSY IN KUWAIT AT THE END OF A FOUR-DAY VISIT TO KUWAIT BY MOROCCAN CROWN PRINCE SIDI MOHAMMED BIN AL-HASSAN.

MOROCCAN AMBASSADOR TO KUWAIT ABDUL WAHID BIN MASSOUD TOLD THE KUWAITI NEWS AGENCY THAT THE MOVE WILL CERTAINLY STRENGTHEN THE EXISTING BONDS OF BROTHERHOOD BETWEEN THE TWO COUNTRIES AND FURTHER FACILITATE THE LINES OF COMMUNICATION BETWEEN THEM.

THE MOROCCAN CROWN PRINCE CONVEYED DURING HIS VISIT A MESSAGE TO THE AMIR OF KUWAIT SHEIKH JABER AL AHMED AL SABAH FROM THE MOROCCAN KING HASSAN II. HE ALSO HELD TALKS WITH THE KUWAITI CROWN PRINCE AND PRIME MINISTER SHEIKH SAAD AL-ABDULLAH AL-SABAH ON BILATERAL RELATIONS AND OTHER MATTERS OF MUTUAL INTEREST.

THE CROWN PRINCE IS ON A 10-DAY GULF TOUR WHICH ALSO INCLUDE THE UNITED ARAB EMIRATES AND IRAQ.

WASHINGTON (MAY 8) XINHUA - PRESIDENT GEORGE BUSH SAID TODAY THAT SMALL BUSINESS IS THE "BACKBONE" OF THE U.S. ECONOMY, CREATING TWO OUT OF EVERY THREE NEW JOBS AND EMPLOYING HALF OF THE PRIVATE WORKFORCE.

SMALL BUSINESS ALSO ACCOUNTS FOR 40 PERCENT OF AMERICA'S TOTAL GROSS NATIONAL PRODUCT, THE VALUE OF GOODS AND SERVICES PRODUCED, BUSH TOLD A WHITE HOUSE CEREMONY HONORING SMALL BUSINESSPERSONS OF THE YEAR.

HE SAID, "THE MAGIC OF SMALL BUSINESS IS NOT IN THE POWER OF ITS NUMBERS BUT IN THE POWER OF DREAMS, OF ITS ASPIRATIONS."

"EACH OF YOUR BUSINESSES BEGAN AS THE DREAM OF ONE MAN OR ONE WOMAN AND SOON BECAME A DREAM OF MANY OTHERS."

HE NOTED THAT ONE OF HIS PRIORITIES AFTER ASSUMING OFFICE WAS TO DEVELOP FEDERAL POLICIES THAT PROMOTE AND SUPPORT SMALL BUSINESSES, A VITAL SECTOR OF THE U.S. ECONOMY.

"WE'RE WORKING TO ENSURE THE INTERESTS AND CONCERNS OF SMALL BUSINESS ARE MADE PART AND PARCEL OF EFFORTS SUCH AS FEDERAL CONTRACT PROCUREMENT," HE SAID.

HE ADDED THAT HIS ADMINISTRATION NEEDS THE SUPPORT OF SMALL BUSINESS OWNERS ON A TAX CUT ON CAPITAL GAINS, ESPECIALLY FOR SMALL BUSINESSES AND ENTREPRENEURS.

ACCORDING TO BUSH, SUCH A CUT WILL PROVIDE MORE LONG-TERM INVESTMENT, CREATE NEW JOBS, AND HELP LEVEL THE PAYING FIELD WITH U.S. TRADING PARTNERS OVERSEAS.

"THE STRENGTH OF AMERICA LIES WITH THOSE WHO ARE WILLING TO TAKE A CHANCE IN SMALL BUSINESS AND BUILD FOR THE FUTURE," HE SAID.

NATIONS AROUND THE WORLD ARE USING SMALL BUSINESS IN THE UNITED STATES AS A "MODEL" FOR ECONOMIC GROWTH.

"SO SMALL BUSINESS IS AMERICA AT ITS BEST, AND IT'S A PLEASURE FOR ME TO RECOGNIZE THOSE WHO HAVE EXCELLED IN THIS VITAL FIELD OF ENDEAVOR," HE SAID IN CONCLUSION.

#90128h0140 05/08/1990 ~Chinese News Agency
UNITED NATIONS (MAY 8) XINHUA - ABOUT 106 MILLION DOLLARS HAS BEEN PLEDGED FOR THE 1990-91 EMERGENCY ASSISTANCE TO MOZAMBIQUE, AN AFRICAN COUNTRY WHOSE 15.1 MILLION PEOPLE HAVE BEEN SUFFERING FROM YEARS OF CIVIL WAR AND SEVERE DROUGHT, A U.N. SPOKESWOMAN SAID HERE TODAY.

THE SPOKESWOMEN, NADIA YOUNES, SAID THE GOVERNMENT OF MOZAMBIQUE AND THE U.N. COORDINATOR HAVE ANNOUNCED THAT THE 106 MILLION DOLLARS HAS BEEN PLEDGED AS A RESULT OF THE UNITED NATIONS' SPECIAL INTERNATIONAL DONORS CONFERENCE IN NEW YORK LATE LAST MONTH.

SHE ADDED THAT 17 COUNTRIES AND ORGANIZATIONS HAVE MADE THEIR PLEDGES, INCLUDING JAPAN, NORWAY, THE SOVIET UNION, CANADA, FRANCE, BRITAIN, DENMARK, SWITZERLAND, SPAIN, WEST GERMANY, THE UNITED STATES, SWEDEN, ITALY, THE NETHERLANDS, AUSTRALIA, SOUTH KOREA AND THE EUROPEAN ECONOMIC COMMUNITY.

HOWEVER, SHE DID NOT ELABORATE ON THE SPECIFIC AMOUNT EACH COUNTRY HAS PLEDGED.

A BLOODY CIVIL WAR HAS BEEN GOING ON IN MOZAMBIQUE OVER THE PAST FIVE YEARS. THE COUNTRY'S PEASANTS, WHO MAKE UP MOST OF THE POPULATION, HAVE ALSO BEEN SUFFERING FROM THE CONSEQUENCES OF YEARS OF DROUGHT.

THE PLEDGING CONFERENCE WAS HELD AT THE REQUEST OF MOZAMBICAN PRESIDENT JOAQUIM CHISSANO, WHO TOLD THE UNITED NATIONS THAT THE COUNTRY'S RECURRING CIVIL STRIFE CONTINUED TO "OVERTAX THE GOVERNMENT'S ABILITY TO PROVIDE ADEQUATE ASSISTANCE TO ITS DISPLACED AND AFFECTED CITIZENS."

U.N. OFFICIALS HAVE ESTIMATED THAT THE EMERGENCY ASSISTANCE, INCLUDING FOOD RELIEF, EMERGENCY HEALTH CARE, DISTRIBUTION OF SEEDS AND TOOLS, IMPROVEMENT OF BASIC WATER SUPPLY, IMPROVEMENT OF EDUCATION AND REHABILITATION ACTIVITIES, WOULD REQUIRE 133.1 MILLION DOLLARS.

#90128k0070 05/08/1990 ~Japanese News Agency

TOKYO (MAY 8) KYODO - THE BANK OF JAPAN HAS NOTIFIED PARTICIPANTS IN THE SHORT-TERM MONEY MARKET THAT IT WILL SELL 1.5 TRILLION YEN IN DEBT-FINANCING BILLS (FBS) WEDNESDAY UNDER A REPURCHASE AGREEMENT, MONEY BROKERS SAID TUESDAY.

THE SHORT-TERM GOVERNMENT SECURITIES WILL BE REPURCHASED ON JUNE 4, WITH THEIR YIELD STANDING AT 7.2488 PERCENT.

DURING THE DAY, THE CENTRAL BANK BOUGHT BACK 700 BILLION YEN WORTH OF FBS IT HAD SOLD EARLIER. IT APPARENTLY HAS DELAYED THE SELLING OF 1.5 TRILLION YEN WORTH OF FBS UNTIL WEDNESDAY TO AVOID AFFECTING THE AUCTION OF 800 BILLION YEN WORTH OF SIX-MONTH TREASURY BILLS HELD TUESDAY, THE BROKERS SAID.

-30- 813

#90128k0071 05/08/1990 ~Japanese News Agency

TOKYO (MAY 8) KYODO - THE AVERAGE SHORT-TERM LENDING RATE FOR LOANS BY A TOTAL OF 155 JAPANESE PRIVATE BANKS CLIMBED 0.321 PERCENTAGE POINT IN MARCH TO 6.249 PERCENT, THE HIGHEST IN MORE THAN SIX YEARS, THE BANK OF JAPAN SAID TUESDAY.

THE 0.321-POINT HIKE ALSO MARKS THE LARGEST MONTHLY GAIN IN NEARLY 10 YEARS SINCE MAY 1980, WHEN IT SCORED A 0.577-POINT RISE, THE BANK SAID.

CENTRAL BANK OFFICIALS SAID THE MARKED RISE IN THE LENDING RATE REFLECTS THE HIKE LATE IN MARCH IN THE NEW PRIME LENDING RATE BY COMMERCIAL BANKS.

THE PRIME RATE, CHARGED ON LOANS TO THE MOST CREDITWORTHY CUSTOMERS, IS CURRENTLY LINKED TO FLOATING SHORT-TERM MONEY MARKET RATES UNDER A NEW RATE CALCULATING FORMULA.

COMMERCIAL BANKS RUSHED TO INCREASE RATES ON CORPORATE LOANS AFTER THE CENTRAL BANK RAISED ITS OFFICIAL DISCOUNT RATE ON MARCH 20 BY A FULL PERCENTAGE POINT TO 5.25 PERCENT PER ANNUM.

THE AVERAGE LONG-TERM RATE CHARGED BY SUCH BANKS ALSO ROSE 0.172 POINT AT THE END OF MARCH TO 6.525 PERCENT DUE TO THE IMPACT OF THE LONG-TERM PRIME RATE HIKE IN FEBRUARY.

AS A RESULT, THE COMBINED AVERAGE LENDING RATE REFLECTING BOTH SHORT- AND LONG-TERM RATES INCREASED 0.219 POINT TO 6.431 PERCENT, STANDING AT NEARLY THE SAME LEVEL AS FEBRUARY 1986, THE OFFICIALS SAID.

#90128k0100 05/08/1990 ~Japanese News Agency

WASHINGTON (MAY 8) KYODO - VIETNAM, CAMBODIA AND NINE OTHER DEVELOPING COUNTRIES FACE SUSPENSION OF THEIR INTERNATIONAL MONETARY FUND (IMF) VOTING RIGHTS IF THEY CONTINUE TO RESIST ECONOMIC REFORM PROPOSALS MADE BY THE ORGANIZATION.

DESPITE OPPOSITION FROM SOME DEVELOPING COUNTRIES, THE IMF'S DECISION-MAKING INTERIM COMMITTEE DECIDED TO AMEND THE FUND'S ARTICLES TO GET TOUGH WITH THE 11 COUNTRIES WHICH OWE A TOTAL OF SOME 4 BILLION DOLLARS TO THE IMF.

THE OTHER NINE ARE GUYANA, HONDURAS, PANAMA, PERU, ZAMBIA, LIBERIA, SIERRA LEONE, SUDAN, AND SOMALIA.

''THE PROVISION FOR SUSPENSION WOULD BE ACTIVATED BY A 70 PERCENT MAJORITY OF THE TOTAL VOTING POWERS IN THE EXECUTIVE BOARD,'' THE INTERIM COMMITTEE SAID IN A COMMUNIQUE.

COMMITTEE CHAIRMAN MICHAEL WILSON, CANADA'S FINANCE MINISTER, SAID AT A NEWS CONFERENCE THAT THERE IS A ''CLEAR LINKAGE'' BETWEEN THE AMENDMENT AND A 50 PERCENT INCREASE IN IMF QUOTAS OR SUBSCRIPTIONS.

THE COMMITTEE CAME TO A CONSENSUS THAT AS PART OF THE OVERALL QUOTA INCREASE PACKAGE, ''NO INCREASE IN QUOTA SHALL BECOME EFFECTIVE BEFORE THE EFFECTIVE DATE OF SUCH AN AMENDMENT, AND THAT EVERY EFFORT SHOULD BE MADE BY MEMBERS TO ENSURE THAT BOTH THE QUOTA INCREASE AND THE AMENDMENT SHALL BE EFFECTIVE BEFORE THE END OF 1991.''

#90128p1775 05/08/1990 ~PR Newswire

DENVER (MAY 8) PR NEWSWIRE - Western Gas Resources Inc. (NYSE: WGR) today announced that net income for the first quarter ended March 31, 1990, was $2,186,000, or 20 cents per common share, compared to pro forma net income of $1,591,000, or 21 cents per common share, for the same period in 1989. The weighted average number of common shares outstanding were 10,908,117 and 7,380,617 for the quarters ended March 31, 1990, and 1989, respectively.

Working capital provided by operations was $8,085,000 compared to $7,685,000 for the same period in 1989. Total revenues for the first quarter were $63,524,000 compared to $42,901,000 for the same period in 1989. Income before minority interest and funds from operations for the first quarter of 1989 included a net $2,900,000 related to certain commitment fees and interest received and a related settlement paid by the company.

Additionally, the company, through its ownership in Western Gas Processors Ltd., has filed with the Michigan Public Service Commission for authority to construct, own and operate the Oceana County Gathering System and Shelby Township Residue Gas Transmission Pipeline. The gathering system will service a sour gas processing facility capable of processing approximately 29 MMCF/D and recovering 20 long tons per day of sulfur. The estimated cost of the gathering, processing and transmission facilities is $15,000,000 with operations expected to commence in the second quarter of 1992.

In connection with its Midkiff gas gathering and processing facility in West Texas, the company executed a purchase and sales agreement to acquire from Pinnacle Natural Gas Co., Pinnacle's interest in the St. Lawrence gas gathering system in Reagan and Glasscock counties along with certain other assets. The system is approximately 20 miles in length, is connected to 36 wells and is currently handling 1.8 to 2.0 MMCF/D of natural gas.

The company is actively seeking to expand its operations and believes that it is well positioned to take advantage of an improvement in both gas and liquids prices.

CONTACT: William P. Stelt of Western Gas Resources Ltd., 303-452-5603.

PALO ALTO, CA (MAY 8) PR NEWSWIRE - Hewlett-Packard Co. (NYSE: HWP) today announced that Penstock Inc. has become a distributor of HP RF and

Microwave components, and integrated products in the United States and Canada.

Under the terms of the agreement, Penstock will focus on selling devices targeted for applications above 1 GHz and will stock a broad line of silicon and gallium arsenide (GaAs) beam-lead and chip devices, as well as packaged versions of these products.

In addition, Penstock will have inventory of selected HP mechanical switches, programmable step attenuators and fixed coaxial attenuators. Previously, these products could be obtained only from HP.

"The agreement is a further demonstration of HP's commitment to the needs of its customers," said Steven Schlosser, worldwide distribution manager for HP's Components Group.

"With more than $600,000 in inventory of HP components, Penstock is able to service short-term needs for HP's microwave products quickly. In addition, Penstock's ability to handle and select devices that match customer requirements will make it easier for our customers to get the exact products they need for each application," said Schlosser.

Founded in 1975, Penstock is a technical, value-added RF/Microwave components distributor, based in Sunnyvale, Calif., with offices located in California, Washington, Arizona, Illinois, Colorado, Indiana, Kansas, New Jersey, New York, Pennsylvania and Western Canada. Penstock stocks 19 product lines with more than 1 million components.

Hewlett-Packard Company is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

W. MONROE, LA (MAY 8) PR NEWSWIRE - Manville Forest Products Corp. (MFP) today named Gary W. Pichon, 41, executive vice president of the packaging division, and Octavio "Tony" Orta, 45, vice president of the international division, effective immediately.

Pichon joins Manville from Mead Corp. in Atlanta (Ga.) where he was president of the containerboard division. He also had been president of

Gilbert Paper. He has 15 years experience in the packaging business. Pichon has his degree in economics from Vanderbilt.

Pichon will report directly to Tom Johnson and will be responsible for MFP's domestic packaging operations which includes 9 converting plants, a coated/laminated products plant and the machinery packaging group.

Orta has 20 years of experience in paperboard packaging with experience in international marketing and acquisitions. He joins Manville from Mead Corp. in Atlanta (Ga.) where he was vice president for Asia-Pacific coated board operations. His background includes experience in Brazilian packaging operations and licensing and packaging systems for Mead. He has a degree in economics from the University of Georgia and a masters in international economics from the University of Basel in Switzerland.

Orta will report directly to Johnson and will be responsible for MFP's International Division, which includes the recently acquired DRG Cartons Ltd., in Bristol, England and the international sales group. MFP currently has sales offices in Hong Kong and Paris with licensing representation in 15 major locations worldwide.

"These two highly capable, new employees will greatly strengthen our capabilities in the core beverage multiple-packaging businesses, both in the U.S. and internationally," Tom Johnson, president of Manville Forest Products Corp. said. MFP recently announced its acquisition of DRG Cartons in Bristol, England, and has extensive exports from its Brazilian operations into European and Asian markets.

Johnson said that the new international division will be headquartered in Manville's current regional soft drink packaging sales offices in Atlanta.

Manville Forest Products is a wholly-owned subsidiary of Manville Corp. (NYSE: MVL) and is headquartered in W. Monroe, La. MFP is a diversified manufacturing company with major business segments in paperboard, packaging and wood products. MFP currently operates a paper mill in W. Monroe; nine domestic converting plants throughout the U.S.; two paper mills and three container plants in Brazil and a newly acquired carton plant in Bristol, England. Current employment is 7,100 worldwide with 1989 consolidated sales of $777 million. Operating earnings in 1989 of $180 million represented approximately 49 percent of Manville Corp.'s consolidated 1989 operating earnings.

Manville Corp. is an international manufacturing and natural resources company, headquartered in Denver, Colo. In addition to paper and wood products and packaging, the company's primary businesses include fiber glass and roofing products, engineered products and filtration and minerals. Founded in 1858, Manville has more than 17,000 people at more than 50 plants and four mines worldwide.

DAYTON, OH (MAY 8) PR NEWSWIRE - Mead Corporation (NYSE: MEA) today announced that it is initiating a feasibility study of several potential sites for expansion of its coated papermaking capacity.

"We are in the early stages of considering possible construction of a new pulp and paper mill to fulfill customer demand in the latter half of the 1990s and beyond," said Dudley P. Kircher, vice president of communications.

Mead is a major producer of papers for publishing and commercial printing, as well as other paper and paperboard products. The mill under consideration would manufacture 45-70 pound, coated freesheet grades, such as those used in textbooks, catalogs and premium periodicals.

According to Kircher, Mead is looking at several different locations in the eastern half of the United States. "Our site selection will depend on a variety of factors," he said, "including availability of labor and natural resources, environmental considerations, transportation and other criteria."

"Any mill we ultimately build will utilize the latest, state-of-the- art technology," Kircher added. "It will be designed to meet all applicable state and federal environmental standards."

Mead, headquartered in Dayton, Ohio, is a leader in forest products, electronic publishing and color imaging.

#90128p1825 05/08/1990 ~PR Newswire

BOSTON (MAY 8) PR NEWSWIRE - The Ares-Serono Group today reported worldwide sales of US$140 million for the first quarter ending March 31, 1990 compared to $117.8 million for the same period last year, an increase of 18.8 percent. Taking into account favorable currency fluctuations, actual sales growth for the first quarter was 13.5 percent.

Net income decreased by 10.6 percent to $13 million or $23.97 per share compared to $14.6 million or $26.80 per share in 1989. This decrease is partially due to realized foreign exchange differences of $2.2 million primarily in Latin America and increased financial expenses. Net income was also affected by continuing investments in the diagnotic division, including the transfer of instrument manufacturing to the division's own facilities in the U.S.

Operating income increased by 10.2 percent in the first quarter of 1990 to

$27.8 million compared to $25.2 million in 1989. The operating margin, however, was affected by a slight decrease of the gross profit margin attributable to a change in the product mix of pharmaceutical sales and to higher R & D expenses.

Year-to-date pharmaceutical sales worldwide increased 25.3 percent to $117.6 million from $93.9 million during the same period last year. Sales growth in pharmaceutical products was 20.3 percent, after adjusting for currency effects. Sales of the Group's diagnostic products was $21.2 million, up 8.4 percent from $19.6 million a year earlier.

Sales of over-the-counter products decreased from $4.3 million in 1989 to $1.2 million in 1990. This decrease is due to a change from an external distribution network to Ares-Serono's own sales force which resulted in a one-time repurchase of inventories. Actual sales to the trade increased, however, by 13.3 percent in 1990.

The Ares-Serono Group is a leading international developer and marketer of pharmaceutical and diagnostic products with executive headquarters in Geneva, Switzerland, and operating headquarters in Boston. The Group operates subsidiaries and manufacturing facilities in more than 20 countries. Shares of Ares-Serono S.A., the parent company of the Group, are listed on the major Swiss stock exchanges.

The following is a summary of unaudited comparative results prepared in accordance with International Accounting Standards (I.A.S.):

WOBURN, MA (MAY 8) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) today reported revenues of $718,000 for the first quarter of 1990, compared with $500,000 for the same period in 1989. Net loss for the quarter was $1,000, compared with a net income of $96,000 for the same period in 1989.

Victor L. Poirier, president of Thermo Cardiosystems, said, "We are on schedule with our revenue and income expectations as well as our technical accomplishments. We have recently submitted an application to the U.S. Food & Drug Administration for use of our battery-operated system."

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems is a public subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO).

THERMO CARDIOSYSTEMS INC. ANNOUNCES FIRST QUARTER RESULTS

	Three Months Ended	
	3/31/90	4/1/89

LOWELL, MA (MAY 8) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today expanded its disaster recovery services with the introduction of Remote Disaster Recovery. Wang's new Remote Disaster Recovery program provides customers with the equipment, services, and expertise required to quickly restart computer operations following accidental damage to Wang equipment.

With Remote Disaster Recovery, customers can easily connect to Wang's Recovery Center located in Lowell, Mass., and immediately resume critical processing. In addition, a temporary Remote Recovery site can be established at virtually any site selected by a customer.

Wang provides three Remote Disaster Recovery configurations that provide on-site equipment, communications, and Recovery Center host-system support. The configurations are designed to provide support for six, 12 or 20 simultaneous users. Prices for Remote Disaster Recovery services begin as low as $400 a month.

Wang offers customers a wide range of disaster recovery programs that include Disaster Recovery Services, Hot Site Services, and Wang Disaster Planning and Testing.

The Disaster Recovery Services program provides customers with replacement

equipment within 24 hours and is available in the United States as an option to Wang's hardware maintanence service contract. Disaster Recovery Services offers customers emergency assistance 24 hours a day, seven days a week. The annual cost of Disaster Recovery Services is one percent of the total cost of the Wang equipment included in the plan.

The Wang Hot Site Services program provides customers with premium recovery services to protect their most critical processing requirements. The program provides access to the equipment in Wang's Disaster Recovery Center and enables customers to resume their computer operations immediately. Prices for the Wang Hot Site Services program begin at $14,000 per year.

Wang Disaster Planning and Testing provides customers with the ability to simulate the operation of disaster recovery plans and allows customers to evaluate their actual ability to recover on an alternate computer system. The price for this program varies with each customer installation.

WOBURN, MA (MAY 8) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) announced today that it has asked its shareholders to approve a recapitalization of the company at the annual meeting on May 22, 1990. The recapitalization would, in effect, separate the redemption feature of the company's outstanding common stock into separately traded redemption rights. The terms of the redemption rights would be substantially the same as the current redemption provisions of the company's common stock. Like the current redemption provisions, the redemption rights would be guaranteed on a subordinated basis by Thermo Electron Corporation.

The company's Articles of Organization require that the recapitalization be approved by holders of the majority of the outstanding common stock other than Thermo Electron Corporation and Thermedics Inc. Thermedics and Thermo Electron own approximately 54 percent and 4 percent, respectively, of the company's outstanding common stock.

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems Inc. is a subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO).

ATLANTA (MAY 8) PR NEWSWIRE - J&T Investors Inc. of Atlanta, announced today that the Federal District Court in Minnesota agreed last week to reconsider and vacate a portion of its previous order dismissing some of J&T's counterclaims against Tom Scallen, president of IBC and certain members of the IBC board of directors.

The court reversed its previous dismissal of J&T's claims that the golden parachute provisions of Scallen's June 1989 Employment Agreement were wrongfully adopted as part of IBC's takeover defenses.

In addition to the claims regarding the golden parachute provisions of Scallen's Employment Agreement, J&T is now moving forward to trial on claims that Scallen wrongfully seized voting control of 1/3 of IBC's outstanding shares which were issued as part of the May 1989 Great Escape amusement park acquisition, that the IBC board did not adquately consider J&T's June 1989 $16 a share offer, and that the poison pill rights plan was wrongfully implemented in April 1989.

Terrill A. Turner, president of J&T, said: "The judge recognized that the golden parachute provisions in the Employment Agreement were just another takeover defense." Robert E. Johnson Jr. of J&T, said, "Our claims are that all these defenses were intended to benefit Scallen to the detriment of IBC and the rest of the IBC shareholders. We believe that any jury will easily recognize that this was the case."

#90128p1852 05/08/1990 ~PR Newswire

HARTFORD, CT (MAY 8) PR NEWSWIRE - ITT Hartford Insurance Group's net income for the first quarter of 1990 increased 4 percent to $68 million from $66 million in the same period a year ago. The increase was due to ongoing improvement in the company's life operations.

Net income grew despite the adverse effects of the soft North American property-casualty marketplace where price competition generally was intense.

Written premiums for The Hartford's worldwide insurance operations declined 1 percent to $1.8 billion. The Hartford's combined ratio -- claims and other expenses as a percentage of property-casualty premiums -- was 107.5 percent in the first quarter compared with 107.1 percent in the same period a year ago.

The Hartford's net investment income (after tax) for worldwide property-casualty operations increased to $161 million, a 4 percent increase from a year ago. The Hartford's total assets were in excess of $28 billion at the end of the first quarter.

The difficult business climate in the commercial insurance market continues to have a significant effect on North American property-casualty operations as intense price competition remained prevalent in the first quarter. The Hartford continued to exercise disciplined underwriting, although it meant sacrificing some new business.

ITT Hartford Insurance Group, a subsidiary of ITT Corp., is one of the nation's oldest and largest international insurance and financial services operations. Member companies offer commercial property and casualty insurance, automobile and homeowners coverages, and a variety of life insurance, employee benefit and asset management plans.

#90128p1857 05/08/1990 ~PR Newswire

GREENWICH, CT (MAY 8) PR NEWSWIRE - Rolls-Royce today announced that United Parcel Service -- the world's largest package delivery company -- has become the launch customer for a re-engining program which sets new

standards of aircraft noise for the Boeing 727.

The program is to re-engine UPS' entire fleet of 727-100s with Rolls Royce Tay 650 engines. Including options, the program covers as many as 80 aircraft. This represents up to 280 engines, the value of which could exceed $600 million to Rolls-Royce.

Significant advantages on the rejuvenated aircraft include up to 12 percent improvement on fuel economy, lower pollution levels, greater payload, extended range and reduced maintenance costs.

Conversion of the 727s involves replacing all three existing engines with Rolls-Royce Tays, turning the aircraft into a friendly, environment-conscious good neighbor.

Current industry estimates suggest that more than 3,000 aircraft fail to meet Stage Three noise regulations. Rolls-Royce believes that a significant number of 727s, British Aerospace BAC 1-11s and other similar size aircraft are candidates for re-engining with the Tay 650. This program offers greater noise reduction benefits than alternative partial re-engining and hushkit proposals and opens a totally new market for the Tay.

The first re-engined UPS 727 is expected to fly in 1991 with entry into service in 1992.

UPS, based in Greenwich, serves all 50 states and more than 180 countries and territories. It had a volume of 2.8 billion packages and documents in 1989 and revenue of more than $12 billion.

The Tay engine, which entered service on the Gulfstream IV in June 1987, also powers the Fokker 100 twinjet. Since entering service, the Tay has accumulated 235,000 hours of service with an outstanding reliability record.

Last month in Britain, Rolls-Royce received a 1990 Queen's Award to Industry for its success in reducing aircraft noise. The Tay is one of the engines which contributed to this achievement.

Rolls-Royce is a world leader in the design, development and manufacture of civil and military aviation, marine and industrial gas turbine engines.

#90128p1859 05/08/1990 ~PR Newswire

WEST CHESTER, PA (MAY 8) PR NEWSWIRE - QVC Network Inc. (NASDAQ: QVCN) announced today that it has sold its COMB mail-order business unit to a subsidiary of Fingerhut Companies Inc. for $3.5 million in cash.

QVC had acquired COMB as part of its acquisition of CVN Companies Inc. on Oct. 31, 1989, and, at that time, disclosed its intention to divest the COMB operations. An earlier planned sale of COMB to Damark International Inc. had been terminated on April 5 because conditions of closing were not satisfied.

The assets sold to Fingerhut consist primarily of inventories associated with the COMB business, tradename rights and customer lists, records and files. The transaction did not include the COMB retail stores or mail-order customers of the former CVN TV-shopping service.

The COMB business has been carried on QVC's books as a "discontinued operation." This transaction will have no material effect on QVC's financial results.

WALTHAM, MA (MAY 8) PR NEWSWIRE - Tecogen Inc. (NASDAQ: TCGN) today reported that its revenues for the quarter ended March 31, 1990, were $3,796,000, compared with $3,867,000 in 1989. Net income was $43,000, compared with $104,000 for the same quarter in 1989.

"We are seeing an increase in contract sales, specifically those related to our work in 'clean' coal combustion and natural gas-fueled vehicle technologies," said Dr. Ravinder K. Sakhuja, president and chief executive officer of Tecogen Inc. "In addition, our recent agreement with Carrier Corporation to market our Tecochill(tm) natural gas-fueled cooling systems through their national distribution network is contributing to the rapid accceptance of these products by utilities and industry."

Tecogen develops, manufactures, and services a complete line of packaged cogeneration systems, as well as gas-fueled air conditioners, for sale to a wide range of commercial, institutional, industrial, and multi-unit residential users. Tecogen is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

#90128p1872 05/08/1990 ~PR Newswire

MORRISTOWN, NJ (MAY 8) PR NEWSWIRE - AT&T Computer Systems today announced that five computer vendors have signed agreements to become source licensees of the AT&T LAN Manager/X Server. The AT&T LAN Manager/X Server is AT&T's UNIX(R) System implementation of Microsoft's LAN Manager technology for OEMs.

The companies licensing the software are U.S.-based Data General Corp. and Unisys, and European-based Dansk Data Elektronik, ICL and Olivetti.

"Today's announcement confirms that AT&T Computer Systems has developed one of the most versatile network operating systems available today," said Bill O'Shea, AT&T Computer Systems vice president of product management and development. "The AT&T LAN Manager/X Server provides customers unmatched communications functionality, easy integration with other systems and services and media independence. It offers the industry an open, industry-standard network operating system."

"Today's announcement represents the furthering of LAN Manager as the connectivity solution for integrating diverse computing systems such as MS(asterisk)-DOS, MS(asterisk)-OS/2 and the UNIX system," said Mike Murray general manager of Microsoft Corp.'s (NASDAQ: MSFT) Network Business Unit. "We are very pleased to work with AT&T in welcoming Data General, Dansk Data Elektronik, ICL, Olivetti and Unisys to the list of now 11 major systems corporations supporting LMX. We feel this growing number of major corporations supporting LM technology is indicative of the

industry's desire to support one standard network operating system for heterogeneous computer integration."

The AT&T LAN Manager/X Server OEM package, which was developed by AT&T Bell Laboratories, provides Microsoft's LAN Manager technology in a UNIX system operating environment. The OEM package includes source code for the AT&T LAN Manager/X Server and object code for MS-DOS and MS-OS/2 client workstations.

The AT&T LAN Manager/X Server supports virtually all of the LAN Manager application programming interfaces (APIs), including "Named Pipes" and "Mailslots." All of the systems management, security and printing functionality offered by LAN Manager on an OS/2 platform is supported. The AT&T LAN Manager/X Server also is the only LAN Manager implementation that offers full-screen administration from networked DOS workstations, as well as from OS/2 workstations using Microsoft's NET interface, O'Shea said. In addition, a single AT&T LAN Manager/X Server can manage an unlimited number of printers that are attached to the server or to client workstations.

#90128p1878 05/08/1990 ~PR Newswire

SIMSBURY, CT (MAY 8) PR NEWSWIRE - Kollmorgen Corporation (NYSE: KOL) today reported pre-tax income of $2 million and net income of $1.6 million or 15 cents per share (20 cents on a fully diluted basis), on sales of $60.7 million from continuing operations for the first quarter of 1990. Comparable figures for the first quarter of 1989 were pre-tax income of $1 million, net income of $.7 million, or 6 cents per share, on sales of $58.6 million from continuing operations.

Total net income for the first quarter of 1990 amounted to $18.7 million, or $1.74 per share ($1.59 on a fully diluted basis), compared with total net income for the first quarter of 1989 of $1.5 million, or 14 cents per share.

John L. Youngblood, president, chief executive officer and chairman of the board, said, "The first-quarter results from the company's continuing operations are consistent with our goal that results for our continuing operations in 1990 will at least meet the record levels of financial performance achieved by those operations in 1988."

Youngblood stated, "The increases in sales and operating profits in the company's motors and controls operations over the prior year's first quarter were primarily the result of the continued improvement at its French subsidiary, Artus S.A. These improvements, together with the results of our efforts to reduce costs and consolidate functional operations during the past several months, and the sale of a substantial portion of our electronic interconnections business, have enabled Kollmorgen to rebound from the events of 1989, and in particular, the failed merger with Vernitron Corporation."

As a result of the company's previously announced restructuring plan, the company has reported its electronic interconnection business segment as discontinued operations. In the first quarter of 1990, discontinued operations had pre-tax income of $21.6 million, which included a gain of $23.7 million from the sale in February 1990 of the company's interest in Additive Products Company and certain assets of its PCK Technology division. The net gain from this transaction amounted to $18.8 million, or $1.75 per share. Income from discontinued operations after tax amounted to $17.1 million, or $1.59 per share ($1.39 on a fully diluted basis), for the first three months of 1990, compared with $.8 million, or 8 cents per share, in the corresponding 1989 period.

Kollmorgen has continuing operations focused in two business segments: special purpose servo motors and controls and electro-optical instruments.

#90128p1880 05/08/1990 ~PR Newswire

JACKSONVILLE, FL (MAY 8) PR NEWSWIRE - AT&T has announced an innovative consumer program that will enable North Florida customers to purchase AT&T products at considerable discounts.

Called "AT&T Quality Connections," the program enables AT&T Long Distance customers to buy AT&T products and pay for them in 12 monthly installments on their long distance bills. There is no finance charge. In addition, the products may be discounted up to 25 percent based on customers' monthly AT&T Long Distance charges. New and current subscribers to the AT&T Reach (R) Out America Long Distance calling plan may earn discounts of up to 50 percent.

"This plan makes AT&T an even better value for our customers," according to Jim Shannon, manager of the AT&T Quality Connections Program. "The beauty of this plan is that it gives consumers one-stop shopping convenience, an installment plan and price savings."

The two products offered through the Quality Connections program are the AT&T 5320 Cordless Phone, priced at $199.92 and the AT&T 1521 Answering System, priced at $159.96. Monthly payments of the answering system, for example, which are $13.33 (plus shipping and handling), will be reduced by 10 percent of each month's AT&T's Long Distance charges, with a maximum of 25 percent, or $3.33 per month. The maximum discount is 50 percent for customers who subscribe to Reach Out America, a plan that offers opportunities to save on AT&T Long Distance.

All AT&T Long Distance customers who are billed by Southern Bell are eligible for the Quality Connections program.

To participate, customers can call 800-242-1003 between 9 a.m. and 9:30 p.m. (Eastern time) and weekends, between 9 a.m. and 5:30 p.m., or write: AT&T Quality Connections Program, P.O. Box 189, Totowa, N.J. 07511-9978. AT&T will deliver the product directly to customers' homes at a charge of $7.90 per product, where it can be trialed for free for 30 days.

#90128p1887 05/08/1990 ~PR Newswire

OAKBROOK TERRACE, IL (MAY 8) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a national long-distance telephone company and leader in interactive 900 services, today announced a new 900 telephone service that can help marketers identify and understand their customers.

The new service, called Directory 900, is a data base marketing tool that captures the telephone number of each caller, then matches the caller's number with a name and residential address. Based on the residence location, the caller is then assigned to a "target group" associated with a particular set of characteristics, such as television viewing and reading habits, and purchasing patterns. Telesphere designed the target group system based on the special needs of the 900 industry.

"By providing the lifestyle and consumer behavior information in addition to the caller's name and address, we're taking the basic 'reverse directory' service one step further," stated Dennis Houlihan, Telesphere's senior vice president, information services/900.

"Using this information, plus the frequent caller analysis, the marketer can build a data base of highly qualified customers and prospects who have already shown an interest in the company's product or service. We believe these enhancements make the service extremely valuable as a target marketing tool for a business of almost any size, from the entrepreneur to the corporate brand manager," Houlihan said.

The demographic component of Directory 900 is derived from Telesphere's PRIZM 900 service, based on Claritas Corp.'s PRIZM market segmentation system.

Infobase Services, of Conway, Ark., performs the caller identification service through its PhoneLink data base, the most complete file on consumer phone numbers available in the United States today.

"We looked at several firms that identify consumers on the basis of phone numbers, and found that Infobase delivers the best results," Houlihan said.

Telesphere Communications Inc. operates a nationwide state-of-the- art, digital fiber optic network and provides long distance network services, operator services, interactive 900 services and other enhanced communications services.

#90128p1889 05/08/1990 ~PR Newswire

ATLANTA (MAY 8) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has announced plans to lease two MD-11 international-range aircraft, while also purchasing two additional MD-11s.

Ronald W. Allen, Delta's Chairman and Chief Executive Officer announced the lease at a hearing before the Department of Transportation in a case in which Delta is seeking routes to Japan, including a route from Los Angeles to Tokyo. He said Delta had reached an agreement in principle to lease two McDonnell Douglas MD-11s from Aircraft Leasing and Management LTD, of London for a period of approximately two and one-half years. The manufacturer's planned delivery date for the two leased airplanes is November 1990. Mr. Allen noted that "These will be among the first MD-11s to go into service and will allow Delta to continue growing in the Pacific." Specifically he said, "With these leased aircraft we can initiate MD-11 service in the Los Angeles-Tokyo route early in 1991 while we await the delivery of the MD-11s previously ordered, the first of which will not be delivered until later in the year."

Delta also announced the purchase from McDonnell Douglas of two additional MD-11s for delivery in the first and third quarters of 1994. This increases to 11 the number of MD-11s ordered by Delta. The airline had previously announced (September 1988) orders for nine of the new Douglas aircraft with deliveries to begin after mid-1991, and options for another 31. The airline's options remain at 31.

ARLINGTON, VA (MAY 8) PR NEWSWIRE - Bernie Block, senior vice president/finance of The Courier-Journal, Louisville, Ky., has been selected the outstanding Gannett Newspaper Division financial executive for 1989.

Block was one of 10 Gannett newspaper executives honored during Gannett's President's Ring awards at the annual Newspaper Controllers' meeting in Lincolnshire, Ill.

Ted Bergh, finance director of Tucson Newspapers, Inc., finished second in the President's Ring competition. Jim Schwartz, vice president/finance of the Cincinnati Enquirer, finished third. Both Bergh and Schwartz are three-time President's Ring winners.

Block has been with the Courier-Journal since October 1970, becoming senior vice president/finance in February 1981. He previously worked for General Electric. Block holds a master's degree in business administration from Indiana University and a bachelor's degree in business from Bellarmine College in Louisville.

The other seven financial executives cited for outstanding performance during 1989 are:

-- Dave Licko, controller, the Reno Gazette-Journal, a three-time winner; -- Bruce Klink, controller, the Press & Sun-Bulletin, Binghamton, N.Y., a two-time winner; -- Rulon Hemingway, controller, the Rockford Register Star, a three-time winner; -- Jim Williamson, controller, Florida Today at Brevard, a three-time winner; -- Susan Smith, controller, the Des Moines Register, a two-time winner; -- Richard Beas, controller, the El Paso Times; -- Mary Devish, controller, the Argus Leader, Sioux Falls, S.D.

Gannett Co. Inc. (NYSE: GCI), is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, and Gannett News Services and Gannett Outdoor, the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

EAST HARTFORD, CT (MAY 8) PR NEWSWIRE - Barry Baskind, president of Motts Holdings, Inc. (AMEX: MSM), today reported the results of the company's operations for the first quarter ended March 31, 1990. In announcing results, Baskind stated that the losses sustained from operations of the three remaining supermarkets have been included as part of discontinued operations.

Baskind noted that income from continuing operations before discontinued operations amounted to $97,597, or $.04 per share, for the 1990 quarter, vs. $110,112, or $.04 per share, for the prior-year period. After losses from discontinued operations net of tax provision, of $503,036 ($.19 per share) and $309,521 ($.12 per share) in fiscal 1990 and fiscal 1989, respectively, the net loss amounted to $405,439, or $.16 per share, for the latest quarter vs. a net loss of $199,409, or $.08 per share, sustained in the same year-earlier period.

The foregoing per-share calculations are based on 2,610,454 shares outstanding at March 31, 1990, and April 1, 1989.

BRIDGEPORT, CT (MAY 8) PR NEWSWIRE - First Connecticut Small Business Investment Company (AMEX: FCO), a federally-licensed SBIC, said today it expects to report lower earnings for both accounting and tax purposes for the fiscal year ended March 31, 1990.

A regulated investment company, First Connecticut reports its earnings using generally accepted accounting principles but pays dividends according to federal income tax regulations. The company said it earned a profit for the just-completed year under both methods. It said the major contributor to the lower earnings was the decline in the general business climate, especially the decline in the real estate market in its area.

DETROIT (MAY 8) PR NEWSWIRE - William D. Bender, director of sales and marketing for Delco Products Division, GMC, announced today that Delco will begin export of suspension struts produced in Kettering, Ohio, to Toyota for use in Toyota vehicles built in Japan.

Bender stated: "I am certainly proud to announce that we have been awarded this business. Toyota's selection of Delco Products to supply

these struts acknowledges the worldwide competitiveness of Delco Products Kettering as a supplier based on quality and delivery. This represents an important step in the growth of our fine supplier partnership with Toyota, a relationship which began in 1981. I credit our Delco Products/Toyota team -- IUE Local 755, our production employees, our engineers and our sales force, Dick Jarmon, Allan Su, and Bob Miller -- for winning this business for Delco and thank them all for their fine efforts."

Delco Products suspension struts will be used on Toyota's Corolla vehicles built at Toyota's Takaoka plant. These vehicles will be sold in Europe and the United States. Shipments, which are expected to reach 500,000 units annually, are scheduled to start later this year. The 1989 Toyota Corolla was the world's best-selling passenger car.

Delco Products Kettering currently supplies suspension struts to New United Motor Manufacturing, Inc. (NUMMI), the GM-Toyota joint venture manufacturing operation located in Fremont, Calif., to Toyota at its Georgetown, Ky., manufacturing operation, and to its Canadian manufacturing operation.

Delco Products, Rochester, a sister plant located in Rochester, N.Y., supplies wiper systems and bottle-mounted washer systems to NUMMI, to Toyota's Georgetown and Canadian manufacturing facilities. Delco Rochester also exports bottle-mounted washer systems to Toyota Japan.

Delco Products Division of General Motors, headquartered in Dayton, Ohio, is a member of the Automotive Components Group (ACG). Delco Products is General Motors' lead division for the design and manufacture of suspension systems and windshield cleaning systems.

PORTLAND, OR (MAY 8) PR NEWSWIRE - NERCO Inc. (NYSE: NER) reported today that its NERCO Oil & Gas Inc. subsidiary, headquartered in Vancouver, Wash., with district offices in Lafayette, La. and at the Black Lake field near Natchitoches, La., has installed a production platform at Eugene Island Block 217, approximately 60 miles south of Morgan City, La.

NERCO Oil & Gas owns a 65 percent working interest in the block, which is located close to other NERCO operations at Eugene Island 108 and Ship Shoal 201/202.

According to NERCO President Lawrence E. Heiner, "Two wells are now in production and a third well is scheduled to be completed in early May."

The current production rate is 4 million cubic feet of natural gas per day and 700 barrels of oil per day.

The four-pile manned structure was installed in late March by Offshore Pipelines Inc. of Houston, according to Roger A. Markle, president of NERCO Oil & Gas. NERCO plans additional development drilling on the block later in the year.

Since 1986, NERCO has invested more than $500 million to acquire oil and gas assets, the majority of which are located in the Gulf Coast. NERCO Inc. is a major U.S. producer of coal, gold, silver, natural gas and oil.

SIMI VALLEY, CA (MAY 8) PR NEWSWIRE - AT&T and MICOM Communications Corp. of Simi Valley have jointly announced a new personal computer card which will make ISDN communications affordable for small and medium sized businesses and home office users.

With the AT&T Personal Computer Terminal Adaptor (PCTA) Model 1000, manufactured by MICOM and sold by AT&T, standard personal computers become ISDN terminals, handling both voice and data transmissions from a standard computer keyboard.

ISDN (Integrated Services Digital Network) is a telecommunications industry term given to new service capabilities offered by telephone companies whereby voice, data and image can be transmitted and received simultaneously over the same telephone line.

"The AT&T PCTA Model 1000 sets a new price point in the industry for an ISDN Basic Rate Interface PC card at $499.95. It makes ISDN more affordable for small businesses, education, and home office users," said Harry King, manager, data products and services for AT&T's Network Systems Switching Division. "It is also applicable for work-at-home programs and universities. For instance, a student in a dorm working on a term paper on-line would not miss that important call from Mom."

"Making the ISDN plan a reality means putting the burden of integrating all the various communications technologies on the vendor and not the customer," said Subhash Bal, vice president of marketing for MICOM Communications. "MICOM has always been a company known for easily installed and dependable products and this product continues that tradition."

With the PCTA card, users can originate or terminate calls on an analog touch-tone phone while simultaneously executing Prodigy(r) or related services over the date channel. The associated software allows incoming call numbers to be displayed on the PC screen. An external power supply for the card allows calls to be received even when the PC is turned off.

MICOM Communications Corp. has been supplying communications equipment worldwide for more than 15 years. "They are a quality vendor and were able to respond quickly to AT&T's challenge of robust features, low price and high quality, in a very limited time," said AT&T's Harry King.

The PCTA Model 1000 will be distributed through telephone companies, major system integrators, and by AT&T through its sales force. It will be available in July.

MICOM Communications Corp. is an international supplier of data and voice communications products for original equipment manufacturers (OEMs), end users, and systems integrators. The vast MICOM product line includes local-area network products, wide-area network servers and network management products for X.25 protocol communications.

PITTSBURGH (MAY 8) PR NEWSWIRE - National Intergroup Inc. (NII) (NYSE: NII), achieved solid fourth quarter and record fiscal year earnings, it was announced today.

For the fiscal year ended March 31, 1990, NII reported net income of $55.7 million, or $2.31 per share on sales of $2.8 billion, compared to a net loss of $(15.7) million, or $(.98) per share on sales of $2.3 billion in the previous year. Operating income was $10.1 million for the 1990 fiscal year compared with an operating loss of $(44.7) million last year.

Operating income for the 1990 fourth quarter increased to $6.1 million, compared to an operating loss of $(3.4) million in the fourth quarter last year. Net income for the period was $3.4 million, or $.09 per share. Sales in the quarter totaled $752.8 million. In the fourth quarter last year, NII reported net income of $2.7 million, or $.06 per share on sales of $663.8 million.

"NII made meaningful progress in positioning itself for strong future growth," said Howard M. Love, chairman and chief executive officer. "Operations at our core business, FoxMeyer Drug, improved significantly

and Ben Franklin Stores successfully completed its restructuring and also reported gains. We divested our aluminum businesses at a profit, and just two weeks ago, we agreed to sell most of our interest in National Steel on favorable terms. Equally important, we enhanced our financial condition, reducing our long-term debt by 60 percent, or $265 million, from a year ago. As a result of these actions, we are confident that NII will deliver value for our stockholders," Love said.

Fourth quarter results included a $2.1 million extraordinary gain on the repurchase of subordinated notes, $7.1 million related to discontinued National Aluminum operations and disposition of remaining aluminum assets, and $2.8 million of extraordinary gains from NII's utilization of net operating loss carryforwards. These gains were partially offset by $5.5 million of equity losses at National Steel and Permian and $1.9 million of costs associated with a recent consent solicitation contest. Fiscal 1990 benefitted from $39.5 million of income from discontinued operations and gains on the disposition of NII's aluminum business, a $13.0 million extraordinary gain from the repurchase of subordinated notes, and $19.2 million of extraordinary gains from the utilization of net operating loss carryforwards by NII and National Steel. Fiscal 1989 results included $57.8 million of restructuring charges related to FoxMeyer Corp.

#90128p1928 05/08/1990 ~PR Newswire

WASHINGTON (MAY 8) PR NEWSWIRE - Management initiatives, highlighted by better use of automated equipment, helped the U.S. Postal Service achieve better-than-expected financial and productivity results for the first half of fiscal year 1990, but estimates still call for a sizeable deficit over the full year, the board of governors was told today.

Through the first two quarters, the Postal Service recorded a net income of $370 million, which was $289 million better than plan. A second quarter net loss of $34 million was $167 million smaller than anticipated for the Dec. 16, 1989, through March 9, 1990, period.

In his opening remarks, Postmaster General Anthony M. Frank informed the governors that the Postal Service had achieved a dramatic 3.2 percent increase in productivity in the second quarter, handling additional mail volume and deliveries this year with no increase in the amount of resources used.

It marked the third consecutive quarter in which Postal Service productivity rose, following a plus 0.8 percent in the last quarter of fiscal year 1989 and a 2.1 percent jump in the first quarter of FY 1990. Automation is replacing work hours normally required, and the governors

learned that the number of career Postal Service employees is now down more than 19,000 from the mid-1989 high point.

However, Comer S. Coppie, senior assistant postmaster general for finance, cautioned that these favorable financial results will be affected by external factors such as the upcoming May Cost of Living Allowance (COLA), which will cost the Postal Service $70 million more than planned. Overall it now appears the FY 1990 net loss will be in the range of $1.3 billion to $1.5 billion.

Coppie said the cutback in the second quarter loss was due to greater than planned revenue, lower transportation costs, and the use of fewer workhours.

Preliminary second quarter figures indicate first-class mail volume is 4.7 percent higher, and third class is 0.1 percent above the comparable period a year ago, Coppie said. Total volume was up 2.7 percent then.

However, Coppie added, deficits are expected from now until the end of the fiscal year because of the seasonal decline in volume and revenue.

NEW YORK (MAY 8) PR NEWSWIRE - At the Annual Meeting of Handy & Harman (NYSE: HNH) Shareholders held today, Richard N. Daniel, chairman and chief executive officer, announced results for the first quarter of 1990.

Earnings for the quarter ended March 31, 1990 were $2,489,000, or $.18 per share. In the same 1989 period, earnings were $2,924,000, or $.21 per share.

Sales for the 1990 first quarter were $153,722,000 versus $176,099,000 in the comparable months of 1989.

Commenting to the shareholders, Richard N. Daniel, chairman and chief executive officer, said, "Our first quarter sales and profits were affected by the automotive industry's weakness encountered by the company's automotive original equipment (OEM) sector and the decline of silver prices." He also indicated that, "The difficulties in our Platinum Group Metals division, despite the steps we have taken, represent the one area which tempers my enthusiasm for our 1990 precious metal performance."

Daniel continued, "We believe that the market trends which we have identified for strategic involvement remain valid and confirmed. We have specific targets for both improved earnings and new market growth."

In closing Daniel stated, "Barring unforeseen circumstances, we have every reason to believe that second quarter results will be better than those of the first quarter, and the full year 1990 may reflect the best operating results since 1984."

Handy & Harman a leading fabricator, processor and refiner of precious metals, also produces a variety of specialty metal products for industrial uses through over thirty subsidiaries here and abroad. Founded in 1867, Handy & Harman is headquartered in New York.

WELLESLEY, MA (MAY 8) PR NEWSWIRE - Polaroid Corporation (NYSE: PRD), at its 53rd Annual Stockholder's Meeting in Wellesley, today, outlined new business opportunites for the company in the expanding field of visual communication, and presented its strategy for growth.

I. MacAllister Booth, Polaroid president and chief executive officer, said "We are entering an exciting new era of visual communication, an era in which the marketplace will value and demand instant hard copy records of all types, sizes and composition."

Booth said that the company is organized to capitalize on exisiting and new opportunities in four distinct areas of visual communication -- family business, technical/industrial and electronic imaging. He said customer needs in each of these areas will determine which products are developed and each is responsible for expanding its segment of Polaroid's overall business.

Earlier in the day, Sheldon A. Buckler, executive vice president, office of the CEO, told security analysts and media representatives that "Polaroid's strategy for growth is first and foremost a media strategy." He said that as part of its media-based strategy, Polariod is developing a number of major new products. Among them are:

-- The Helios Project, and electronic imaging system for initial use in medical diagnostics. Beta-site testing is planned for the second half of 1990, with shipping in 1991.

-- "Joshua," a 90s-generation, compact instant camera system with contemporary styling. The system will appear on a limited basis in the fourth quarter of 1991, with a formal introduction to follow in 1992.

-- Hybrid IV, a new consumer color film in a variety of formats, to begin phasing into Polaroid's existing product lines during the last quarter of 1990, with a formal introduction in 1991.

-- Polahybrid, a peel-apart film which has been introduced in several regions of the world such as Mexico, Venezuela and the Middle East. Although this product is somewhat behind schedule, Polariod will begin shipping regionally in the U.S. in the first quarter of 1991. Polahybrid will have a worldwide presence by mid-1991.

As previously reported, in the first quarter of 1990 Polaroid had net earnings of $31.8 million, or 43 cents per share, on sales of $436.2 million, compared with net earnings of $25.9 million, or 29 cents per share, on sales of $442.3 million for the first quarter of 1989. For the year ended Dec. 31, 1989, Polaroid reported net earnings of $145 million, or $1.96 per share, on sales of $1.9 billion, compared to a net loss of $22.6 million on sales of $1.86 billion in 1988.

Polaroid Corporation, with sales of almost $2 billion, is the worldwide leader in high-quality, hard copy instant imaging.

MIAMI (MAY 8) PR NEWSWIRE - A pair of Sterling 827Si sedans will later this month begin pursuing the record for the fastest automotive circumnavigation of the globe.

Piloted by men and women from the British Army, the two Sterlings will have to travel more than 25,000 miles across six continents in less than 45 days to set the record.

According to Sterling Motor Cars President Graham Morris the record-setting event will further attest to the Sterling's abilities.

"The Royal Ordnance Corps of the British Army selected Sterlings because

they were confident in the vehicle's ability to withstand the rigors of the journey," he said.

The route will include two segments in the United States. Driven by teams of three men and three women, the cars will enter the country at Los Angeles May 31. From there they will drive to Phoenix then up to Sacramento, Portland and into Canada.

On June 5 the record chasers will head south from Montreal towards New York. Chicago, Des Moines, Kansas City, Dallas, Atlanta, Savannah and Miami follow.

The record, being monitored by Guinness, requires at least 1,000 miles through each of the continents of Africa, Asia, Australia, Europe, North America and South America.

Headquartered here, Sterling Motor Cars markets the line of Sterling luxury sedans. The Sterling 827S, 827Si, 827SL, 827SLi and Oxford Edition are produced by Rover Cars, Great Britain's largest automotive manufacturer and Sterling's parent.

#90128p1947 05/08/1990 ~PR Newswire

ST. PAUL (MAY 8) PR NEWSWIRE - Despite slow U.S. economic growth, 3M expects another year of higher sales and earnings, Allen F. Jacobson, chairman and chief executive officer, told the company's annual meeting today.

In the first quarter ended March 31, 3M's net income increased 5.3 percent to $335 million, or $1.51 a share. Sales rose 4.9 percent to $3.16 billion. In 1989, 3M earned $1.24 billion on sales of $11.99 billion.

Jacobson said that 1990 results will benefit from continued strong international volume growth, productivity-improvement efforts, smaller currency effects and a lower tax rate versus 1989.

This would mark the company's fifth consecutive year of higher earnings. During the past four years, the company has increased earnings 87 percent.

To sustain solid growth over the long term, 3M is emphasizing several areas, including technology, quality, productivity, and increased penetration of international markets.

Jacobson told stockholders that "technology is one of our greatest

strengths. We invest 6.5 cents out of every sales dollar in research and development. That's far ahead of the average in U.S. industry."

He cited several newer technologies that will be important to the company's future. These range from digital imaging and fiber optics to drug-delivery systems and membranes.

"Quality is going to be one of the major competitive battlegrounds of the 1990s," Jacobson said. To maintain its reputation for quality, 3M is adopting the criteria established for the Baldrige Award process, the nation's highest award for quality.

Called "Q90s," the 3M program strives for continuous improvement in customer satisfaction and business competitiveness.

"Another competitive battleground in the '90s," Jacobson said, "will be productivity. We're in good shape, but we have no intention of resting on our laurels. In the last five years, we've invested $4.4 billion in capital projects, much of it to continue modernizing our manufacturing facilities around the world.

"We're building from a base that's already strong and from a tradition of continuous improvement. This year, we're winding up a five-year program to improve our manufacturing productivity. We're either meeting our aggressive targets or we're close. And we'll announce targets for the next five-year period before year-end."

Jacobson said that international markets continue to offer excellent opportunities for growth. "Overseas markets are larger than the U.S. market. They're growing faster than the U.S. economy. And our penetration of these markets is less than half of our U.S. penetration." 3M's goal is to get 50 percent of sales from outside the United States by 1992.

WALTHAM, MA (MAY 8) PR NEWSWIRE - Thermo Process Systems (AMEX: TPI) today reported revenues of $51,003,000 for the fiscal year ended March 31, 1990, a 17 percent increase over $43,444,000 in revenues for fiscal 1989. Net income for fiscal 1990 was $2,326,000, compared with $1,818,000 in fiscal 1989.

"Our progress is continuing in the development of our soil-remediation business," said Walther J. Bornhorst, chairman and chief executive officer of Thermo Process Systems. "We believe we are now positioned to benefit

from the tremendous market opportunity that lies in the remediation of hazardous wastes."

Thermo Process Systems designs, manufactures, and sells advanced custom-engineered thermal processing systems for the incineration of hazardous wastes and the automated heat treating of metal parts. The company also provides services for the on-site remediation of hazardous wastes and petroleum-laden soils, in addition to a comprehensive range of metallurgical processes. Thermo Process Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

DFW AIRPORT, TX (MAY 8) PR NEWSWIRE - Passenger traffic at American Airlines increased 5.9 percent in April on the strength of continued expansion and Easter holiday travel, American reported today. The airline flew 6.17 billion revenue passenger miles (RPM) last month compared to 5.82 billion RPMs flown in April 1989.

Cargo traffic jumped more than 13 percent in April, recording its 35th consecutive month of double-digit increases.

April's performance was fueled primarily by continued growth in capacity, "and solid results in the international market," said Michael W. Gunn, the airline's senior vice president-marketing.

American's available seat miles increased 6.3 percent in April, to 9.93 billion from 9.35 billion a year earlier.

Gunn said American's international traffic "continues to perform extremely well, which is a particularly encouraging sign as we prepare to expand to Central and South America this summer from our new hub at Miami."

Gunn added that American's new service to Sydney, Australia, and Auckland, New Zealand, is exceeding expectations. Throughout its system, American boarded 6,049,000 passengers in April, up 4.4 percent from the 5,792,697 boarded last April. The system load factor decreased to 62.1 percent from 62.3 percent.

During the January-April period, revenue passenger miles jumped 7.4 percent to 23.6 billion from 22 billion in the same months of 1989; available seat miles grew 7.6 percent to 39.1 billion from 36.4 billion; the load factor declined to 60.4 percent from 60.5 percent, and passenger boardings increased 6 percent to 23,176,790 from 21,865,224.

Freight ton miles increased 13.1 percent in April to 60.5 million from 53.5 million, while mail ton miles rose 20.4 percent to 22.3 million from 18.6 million.

For the first four months of 1990, freight ton miles increased 23.3 percent to 235.5 million from 191 million. Mail ton miles rose 29.9 percent to 90 million from 69.3 million.

"Last month's double-digit growth for American is especially impressive considering that the overall cargo market was essentially flat," said William R. Boesch, American's vice president-cargo. "We are convinced that by providing our customers with the quality service they demand and expect, our results will continue to improve."

#90128p1956 05/08/1990 ~PR Newswire

OKLAHOMA CITY (MAY 8) PR NEWSWIRE - The board of directors of Kerr-McGee Corp. (NYSE: KMG) today increased the annual dividend rate by 9 percent to $1.44 per share of common stock. The higher quarterly dividend of 36 cents per share will first be payable July 2, 1990, to stockholders of record as of June 1, 1990, for the quarter ending June 30, 1990.

The increased dividend is part of the company's continuing efforts to build stockholder value, said Frank A. McPherson, chairman and chief executive officer. "The increase reflects Kerr-McGee's strong cash flow and long-term prospects," he added.

DENVER (MAY 8) PR NEWSWIRE - MinVen Gold Corp. (AMEX; Toronto: MVG) announced Tuesday its financial results for the quarter ended March 31, 1990.

Consolidated revenues for the first three months of 1990 were Cdn$7,633,222, compared with Cdn$8,669,455 for the first quarter of 1989.

MinVen recorded a first quarter consolidated loss of Cdn$2,625,874, or Cdn$.09 per share, compared with a loss of Cdn$626,336, or Cdn$.03 per share, for the first quarter of 1989.

James A. Anderson, MinVen president and chief executive officer, said, "We expected a small loss for the first quarter of 1990 due to a lack of winter production at some of our seasonal heap leaching operations, but we experienced a larger loss than in prior years primarily due to a significant decrease in the grade of ore mined at our Blackdome Mine in British Columbia."

Anderson said that recent exploration at Blackdome has provided reason for optimism as drilling and assay results show strong potential for high-grade ore in a newly discovered vein.

MinVen Gold is a publicly held, Denver-based mining company with interests in five operating mines in the U.S. and Canada. Its shares are traded on the American, Toronto and Vancouver stock exchanges under the symbol MVG.

NEW ORLEANS (MAY 8) PR NEWSWIRE - Texaco Inc.'s (NYSE: TX) new five-year strategic plan is the blueprint for building its business throughout the world and enhancing stockholder value in the 1990s, President and Chief Executive Officer James W. Kinnear told stockholders here today at the company's 89th annual meeting.

Key elements of Texaco's ambitious strategies for the new decade include: investing in a balanced program for exploration and production of oil and gas reserves, improving refinery capacity to meet growing demand for the company's petroleum products, and implementing cutting- edge technologies, Kinnear told stockholders.

Texaco, as a focused, energetic company, is "stronger now than we've been in over 20 years," Kinnear said, with "strong businesses, a good financial

position, winning strategies and excellent people."

By continuing to capitalize on the company's marketing expertise, its recognized ability to find and produce oil economically and Texaco's state-of-the-art technologies, Kinnear said the company will continue to drive toward its goal of achieving growth in value for its stockholders.

Kinnear said that this goal of growth in the value of the company means: increasing earnings and cash-flow per share, as well as the dividend yield and improving Texaco's reputation. Major components of the strategic plan include:

- Adding to Texaco's oil and gas reserves through exploration, exploitation, enhanced recovery and selective acquisitions;
- Enhancing the competitive edge of Texaco's entire manufacturing system;
- Investing in strategic markets by capitalizing on top-quality products behind the Texaco and Havoline brand names;
- Continuing the company's strong commitment to research and technology;
- Being a responsible corporate citizen - continuing with its major commitment to the environment and;
- Pursuing and benefiting from the company's quality initiative.

Texaco's determination to make the 1990s a highly successful decade is supported by its strong performance in 1989. Last year, net income was a healthy $2.4 billion; balance sheet debt was trimmed from $7.9 billion to $6 billion; the debt-to-capital ratio dipped below 40 percent; Texaco bond and commercial paper carry A+ ratings; and the company replaced 105 percent of its oil and gas production at a competitive cost.

TURIN, ITALY (MAY 8) PR NEWSWIRE - The board of directors of Fiat SpA (NYSE: FIA), the parent company of Italy's largest private-sector automotive and industrial concern, met today in Turin to examine the group's financial statements as of Dec. 31, 1989.

Consolidated net revenues were up 17.5 percent to Lire 52,019 billion ($41 billion); operating income was up 26.5 percent to $3.8 billion; net income totaled $2.6 billion, an increase of approximately 10 percent from 1988; earnings per share increased from $1.02 in 1988 to $1.13, up 10.9 percent; cash flow (net income plus depreciation) amounted to $5.0 billion, up 16 percent from the previous year.

The net financial position showed a surplus of $1.67 billion, comparable to the 1988 levels, as the improvements in the industrial operations offset the effect of including the financial and real estate companies in the consolidated figures; $4.1 billion (or 10 percent of revenues) were invested in innovation and improving the quality of products and processes. The number of Fiat Group's employees increased by 11,000, bringing the total for the group to 290,000.

On the basis of the results achieved, the board of directors, chaired by Giovanni Agnelli, will propose, at the next stockholders' meeting to be held in Turin on June 28 and 29, 1990, on first and second call respectively, the distribution of a dividend of Lire 370 on each ordinary and preference share, which compares to Lire 320 in 1988 (+15.6 percent) and Lire 400 on each savings (non-voting) share, as compared to Lire 350 in 1988 (+14.2 percent).

On the New York Stock Exchange, where Fiat stock is listed (NYSE: FIA), each ADR represents five shares in any one of three categories (ordinary, preference and savings).

The board of directors will also propose the merger of Saes SpA, the holding company of La Rinascente, the leading Italian department store chain, into Fiat SpA on the basis of five Saes shares for two Fiat ordinary or savings shares. This operation is to be completed in 1990.

To date, the following shares were purchased on the open market: 46,707,000 common shares; 7,744,000 preference shares; 6,054,000 savings shares for a total of $462.5 million. This is in accordance with the resolution of the stockholders' meeting of June 30, 1989, which authorized the purchase of such shares until Dec. 31, 1990, up to a maximum amount of Lire 1,000 billion ($789 million).

DALLAS (MAY 8) PR NEWSWIRE - Dresser Industries Inc. (NYSE: DI) today announced that its Houston-based Swaco Geolograph Division has become part of the M-I Drilling Fluids Co., also based in Houston.

M-I Drilling Fluids is a world leader in drilling fluids and was formed in December 1986 when Dresser's Magcobar operations were combined with Halliburton's IMCO operations. Swaco Geolograph primarily provides equipment and services for fluids processing, pressure control, and rig instrumentation. The companies' combined annual sales approximate $400 million.

John J. Murphy, Dresser chairman and president, pointed out that M-I and Swaco Geolograph are engaged in related oilfield operations and that the combination "will enhance operating efficiencies and further broaden the range of essential products and services M-I provides for oil and gas drilling."

As a result of the combination, Dresser's share of the M-I Drilling Fluids joint venture has been increased to 64 percent from the 60 percent ownership position previously held. Correspondingly, the share owned by Halliburton Co. has declined from 40 percent to 36 percent.

Headquartered in Dallas, Dresser is a major supplier of highly engineered products and services primarily utilized in upstream and downstream energy activities throughout the world.

#90128p2016 05/08/1990 ~PR Newswire

NEW YORK (MAY 8) PR NEWSWIRE - Unicorp American Corporation (AMEX: UAC) announced today that it has entered into a preliminary agreement with Coscan, Inc., a wholly owned subsidiary of Coscan Development Corporation (TSE: COT) (Coscan) regarding substantially all of Unicorp American's real estate assets.

Under the terms of the transaction, certain of these assets would be (1) transferred to a partnership consisting of Unicorp American and affiliates of Coscan and (2) certain other assets would be financed with participating mortgages.

Pursuant to the terms of the preliminary agreement, net proceeds to Unicorp American from the transaction are expected to approximate $41.6 million but are subject to adjustment. It is anticipated that substantially all of these proceeds will be applied to repayment of Unicorp American's senior secured indebtedness.

The agreement anticipates that the partnership will acquire certain of the

real estate assets from Unicorp American for a total cost of approximately $32.2 million, of which approximately $8 million will consist of the assumption of mortgage debt. Payment to Unicorp American will be funded by a secured loan facility provided to the partnership. $17.4 million of participating mortgage financing will be provided for other real estate assets.

The agreement contemplates that a Coscan affiliate will be the managing partner, and Unicorp American a limited partner, of the partnership. The Coscan affiliate will loan additional funds to the partnership to cover operating deficits and capital requirements, if any. Net proceeds to the partnerships from real estate operations and sales, refinancings and other capital transactions will be divided equally between Unicorp American and a Coscan affiliate after payment of all partnership loans and other obligations. The participating mortgage loans will provide the lenders with a 50 percent participation in net cash flow and net proceeds.

The company contemplated the financial impact of this transaction during the fourth quarter of 1989 and adjusted its provision for loss on disposal of real estate operations accordingly. Therefore, no gain or loss would be reported upon completion of the above described transaction.

The transaction is expected to close on or about June 15, 1990.

ST. PAUL, MN (MAY 8) PR NEWSWIRE - 3M (NYSE: MMM) shareholders today elected a new director and re-elected five to its board of directors, which now has 15 members.

Aulana L. Peters, a former commissioner of the U.S. Securities and Exchange Commission, was elected director for a term ending in 1991. Mrs. Peters is partner in Gibson, Dunn & Crutcher, a law firm in Los Angeles, Calif.

Re-elected directors, to terms ending in 1993, were Charlton Dietz, senior vice president, Legal Affairs, and general counsel; J. Alexander McMahon, chairman, Department of Health Administration, Duke University Medical Center; John G. Ordway Jr., retired chairman, MacArthur Company; Peter G. Peterson, chairman, the Blackstone Group, investment bankers; and Rozanne L. Ridgway, president of the Atlantic Council of the United States and former assistant U.S. secretary of state for European and Canadian affairs.

3M shareholders also ratified the reappointment of Coopers & Lybrand as the company's independent auditors and defeated two stockholder

resolutions. One related to 3M operations in South Africa. The other was in regard to 3M's business operations in Northern Ireland.

#90128p2026 05/08/1990 ~PR Newswire

WEST PALM BEACH, FL (MAY 8) PR NEWSWIRE - Cenvill Investors, Inc. (NYSE: CVI), a real estate investment trust, today reported results for the first quarter ended March 31, 1990.

Net income for the three months was $1,902,000 or 28 cents per share on revenues of $5,927,000 compared to net income of $2,810,000 or 41 cents per share on revenues of $6,457,000 for the same period last year.

Alvin Wilensky, president and chief executive officer, attributed the decline in net income primarily to an increase in non-accrual loans and resultant decline in interest income. At March 31, 1990, total assets were $228.9 million of which $33.8 million consisted of non- performing loans.

Wilensky noted that the company is renegotiating its revolving bank credit line and expects to receive a waiver of a previously disclosed technical violation in 1989 of a requirement that dividends declared not exceed 115 percent of net income. In connection with this anticipated waiver, the board of directors declared a five percent stock dividend in lieu of the customary second quarter cash dividend. "This action is designed to maintain shareholder participation in the company's profitability and is not an indication of any change in our long-term cash dividend policy," Wilensky said. "Cenvill had paid cash dividends for 57 consecutive quarters and expects to resume cash dividends in the third quarter," Wilensky added. The stock dividend is payable on July 6, 1990 to shareholders of record on June 1, 1990.

#90128p2027 05/08/1990 ~PR Newswire

ROWAYTON, CT (MAY 8) PR NEWSWIRE - Baldwin Technology Company, Inc. (AMEX: BLD), today announced that its net sales for the three months ended March 31, 1990, increased to $44,401,000 from $33,549,000, an increase of 32 percent. This raises year-to-date net sales to $127,811,000, a 38 percent increase over the comparable period in 1989.

Net income for the quarter was $2,555,000 against $2,696,000 for the prior year or a decrease of 5 percent. For the nine month period ended March 31 1990, net income increased to $7,868,000 from $6,325,000 or a 24 percent increase. Net income per common and common equivalent share was 14 cents per share for the quarter ended March 31, 1990, and 6 cents less than the per share income for the same period in 1989. This brings cumulative earnings for the fiscal year-to-date to $.46 per share, a 6 percent decrease from the same period in the prior year on a 32 percent increase in outstanding shares. The 1990 average shares outstanding reflects additions and adjustments for shares issued in the Enkel acquisition, the common stock offering completed Oct. 24, 1989, and the required addition of common stock equivalents.

The company commented that its record growth in sales continues, with worldwide order volume increasing 37 percent and backlogs at a record level of 62 percent over the prior year's comparable period. The quarter's profit results were impacted by a very weak U.S. printing machinery market which has slowed historical shipment rates, major new product introductions, and, to a lesser extent, the impact of a weakened yen. The demand for Baldwin products continues strong in the European and Asian sectors and the Americas show stronger trends.

In further comments, the company noted that it recently announced its agreement to purchase the Misomex Companies, having net sales in excess of $40 million and net income in excess of $4 million for their most recent fiscal year. The company's recently completed secondary public stock offering, while resulting in a temporary dilution in EPS, established a solid base for financing the Misomex acquisition and other future growth opportunities.

Baldwin Technology Company, Inc., is a leading multi-national manufacturer of materials handling, accessory and control equipment for the printing industry.

#90128p2033 05/08/1990 ~PR Newswire

ATLANTA (MAY 8) PR NEWSWIRE - Business travelers, along with more and more of the rest of the world, are discovering that Telecom USA's new

calling card offers advantages over anything else in the field, putting an end to telephone tag and the telefrustration that business travelers suffer.

Telecom USA, the Georgia-based long-distance carrier, has been promoting the card to its 500,000 customers, but now Telecom USA is launching the product in the open market.

Telecom USA has been out-advertised by multi-million dollar campaigns for competitive cards, but none of the competition's cards approaches the capabilities of the Telecom Card. The card actually helps business travelers accomplish more when they travel: meeting deadlines and participating in conference calls can all be achieved while on the road.

The range and versatility of the Telecom Card are no longer a secret as word of the features and services available through the card gets around. And few in the industry doubt the card was part of the technological dowry which helped make MCI a suitor last month.

The primary focus of current marketing efforts is the frequent business traveler, who will benefit from the Telecom Card and the "office in your pocket" concept. All the sophisticated features of an advanced office telephone can now accompany the business traveler on the road.

One of the signficant features of the Telecom Card is its Personal Identification Number (PIN), which gives the customer familiar features such as speed dialing, long distance calling, voice messaging, international calling and conference calling. It also permits access to a unique set of services, some of which are simply fun and some of which are useful and practical to the frequent business traveler.

They range from stock market, news and weather reports, to message storage and forwarding -- all geared to the interest of the traveler trying to conduct business from a phone booth or a hotel room. Telecom USA even has improved the PIN itself, by offering seven-digit codes, half of the digits its rivals use.

Yet for those who have memorized the PIN they already have on another card the Telecom USA system is set up to use the already familiar PIN. The entire system is self-prompting and customers dial only one 800 number to access all features.

#90128p2035 05/08/1990 ~PR Newswire

AUSTIN, TX (MAY 8) PR NEWSWIRE - SEMATECH has selected Du Pont Electronics

photomasks facility in Round Rock, Texas, to perform beta site testing of the new CORE-2500 mask writer developed by ATEQ Corp. of Beaverton, Ore.

Under a SEMATECH/Du Pont agreement, the system will be used in the development of a production process for manufacturing photomasks for advanced semiconductor devices with very small (0.5 micron) features. The system, which makes patterning masks used in the manufacture of semiconductors, is the culmination of a joint development project for which SEMATECH awarded ATEQ a contract and partial funding in May 1989.

The objective of the beta site program is to benchmark the performance of ATEQ's CORE-2500 in a production environment.

"We are pleased and proud to support this SEMATECH program and continue our cooperation with ATEQ," said Jack F. Strange, managing director, Du Pont Electronics, for masks. "This effort is part of Du Pont's commitment to advancing the science of laser beam mask writing technologies."

"This advanced system, together with Du Pont's efforts, is another step to assure U.S. leadership in the semiconductor industry through the 1990s," said Barry Cox, ATEQ's president and CEO.

Du Pont is one of the largest and most diversified suppliers of materials, components, and services to the global electronics industry. It serves the makers of integrated circuits, printed circuits, passive components, and users of interconnections, subassemblies, and information storage media. Du Pont's 1989 sales to the worldwide electronics industry exceeded $1.8 billion.

ATEQ Corp., a leading worldwide supplier of scanned laser equipment, designs, manufactures and markets a family of equipment to fulfill the microlithography needs of the electronics industry. Established in 1984, the company is privately held.

SEMATECH is a consortium of 14 U.S. semiconductor manufacturers that sponsors and conducts research in semiconductor manufacturing technology. Its mission is to provide the U.S. industry the domestic capability for world leadership in semiconductor manufacturing. More than half of its $200 million annual budget comes from member companies, and the remainder from the Defense Advanced Research Projects Agency (DARPA).

#90128p2041 05/08/1990 ~PR Newswire

LOS ANGELES (MAY 8) PR NEWSWIRE - CF Income Partners L.P. (NYSE: CFI), formerly Cal Fed Income Partners L.P., a Los Angeles- based master limited partnerhsip, today reported a net loss of $1,115,000, or $.08 per unit, for the three months eneded March 31, 1990, compared to a net loss of $1,380,000, or $.11 per unit, for the three months ended March 31, 1989.

The primary factor contributing to the improvement in the first quarter was the gain realized by the Partnership from sales activity in the portfolio of real estate held for resale acquired at year end.

Operating results from the Partnership's investment properties for the first quarter of 1990 were a loss of $29,000 as compared to $221,000 of income for the same period in 1989. The decrease is primarily attributable to an increase in property taxes and greater interest expense due to the compounding feature of the deferred interest debt structure on certain notes payable. Non-cash expenses consisting primarily of depreciation and deferred interest, which do not affect available cash flow, totaled $2.8 million in the first quarter of 1990, approximately the same as in the 1989 first quarter.

The first three months of activity for the Partnership's new Resale Portfolio generated $1,519,000 income before financing costs and costs to administer the Resale Portfolio. Sales activity at the wholly-owned condominium complex in Vista, Calif., and Phase I of a single-family home development in Oxnard, Calif., generated $688,000 in income for the Partnership during the first three months of 1990. The investments in real estate partnerships, which are accounted for using the equity method, produced $851,000 for the Partnership.

For the first quarter of 1990, available cash flow was $3,894,000. This amount includes $3,333,000 or $.25 per Unit which the Partnership will distribute to Unitholders of record as of April 30, 1990, payable May 15, 1990. The General Partner will also receive a distribution of $34,000, which represents the General Partner's 1 percent share of the total distributions from the Partnership Agreement, and $527,000 in payment of the 1990 first quarter Performance Incentive Fee.

"We are pleased with the results from the Partnership's investment in resale propeties," said R. Craig Overturf, president and chief executive officer of CF Management Corp., the general partner of CF Income Partners. "As the year progresses, we will continue to monitor the real estate market to maximize the sales potential of these properties and to select new option properties to add to the resale portfolio of the Partnership. At the same time, we shall maintain our focus upon the investment portfolio to improve operating performance wherever possible."

CF Income Partners L.P. is a publicly traded master limited partnership which has invested in income-producing multi-family residential,

commercial and industrial properties.

#90128p2053 05/08/1990 ~PR Newswire

WILMINGTON, DE (MAY 8) PR NEWSWIRE - The Columbia Gas System Inc. (NYSE: CG) today reported earnings on common stock for the first quarter of 1990 of $47.6 million, or $1.04 a share, compared with earnings of $76.7 million, or $1.69 a share, for the first quarter of 1989.

Estimated earnings reported at the corporation's annual meeting of stockholders on April 26 were substantially the same.

The $29.1 million decrease primarily reflects the impact of the warmest first quarter in the system's history. The record-breaking temperatures were 15 percent warmer than last year and almost 25 percent warmer than normal. During the three-month period, earnings for transmission and distribution operations decreased, while earnings for oil and gas and other operations increased.

The decrease in transmission earnings to $10.8 million from $20.1 million is attributable to the warm weather and to certain temporary adverse effects of a 1989 rate settlement with customers. Transmission throughput for the quarter was reduced when customers took delivery of storage inventory gas purchased in 1989 as part of the settlement. Gas transportation revenues were also reduced by lower transportation rates.

Distribution earnings, which were reduced by the abnormally warm weather, were $26.4 million compared to $51.1 million last year. Also depressing distribution earnings were higher operating expenses which continue to outpace allowed distribution rate increases.

Oil and gas earnings rose to $8.2 million, a $3.0 million increase over last year. The increase reflects higher oil and gas prices and increased production.

Earnings on common stock for the 12 months ended March 31, 1990, were $116.7 million, or $2.56 per share, an increase of $10.9 million, or $0.23 a share, over the same period last year. Higher transmission results improved earnings. The transmission improvement includes a $44 million gain in December 1989 for the sale of storage inventory gas according to the terms of the 1989 rate settlement with customers. Reducing these transmission improvements were the depressed transmission and distribution earnings of the current quarter, as a $14.9 million write-down in the carrying value of Canadian oil and gas properties and the $13.2 million

reserve established for estimated future environmental clean-up costs, both of which were recorded in the fourth quarter of 1989.

#90128p2059 05/08/1990 ~PR Newswire

CHICAGO (MAY 8) PR NEWSWIRE - Lew R. Wasserman, chairman of the the board and chief executive officer of MCA Inc., (NYSE: MCA) announced that the MCA Inc. stockholders, at their annual meeting today, elected Thomas V. Jones, Robert S. Strauss and Thomas Wertheimer as directors of MCA Inc. in Class II with their terms expiring at the 1993 annual meeting of stockholders.

The stockholder approved the appointment of Price Waterhouse as independent auditors for the fiscal year ending Dec. 31, 1990.

The stockholders rejected the three proposals of five stockholders: that all directors be elected annually, not by classes; that the company establish a policy to disinvest from South Africa; and that the company establish a policy not to use corporate assets to falsely defame Jesus Christ or other major religious leaders.

At the MCA Inc. board of directors meeting held after the Annual Meeting of Stockholders, the following were elected as officers: Lew R. Wasserman chairman of the board and chief executive officer; Sidney Jay Sheinberg, president and chief operating officer; Charles S. Paul, Thomas S. Pollock and Thomas Wertheimer, executive vice presidents; James N. Fiedler, Lawrence P. Fraiberg, Phyllis E. Grann, Robert D. Hadl, Stuart K. Mandel, Alvin Rush, Daniel E. Slusser, George Smith, Lawrence D. Spungin, Jay S. Stein and Alvin N. Teller, vice presidents; Harold M. Haas, vice president and treasurer; Richard E. Baker, vice president and controller; Michael Samuel, vice president and secretary; Pamela F. Cherney, assistant treasurer; Dennis F. Dallara, assistant controller; and Christine R. Hanson and Richard C. Schiller, assistant secretaries.

The board appointed its members to committees of the board as follows: Executive Committee -- Lew R. Wasserman, Sidney Jay Sheinberg and Thomas Wertheimer; Audit Committee -- Howard H. Baker Jr., Mary Gardiner Jones, Thomas V. Jones (chairman) and Felix G. Rohatyn; Incentive Stock Plan Committee -- Howard P. Allen, Thomas V. Jones, and Lew R. Wasserman (Chairman); Nominating Committee -- Howard H. Baker Jr., Mary Gardiner Jones, Felix G. Rohatyn (Chairman) and Robert S. Strauss; Stock Awards Plan Committee -- Howard P. Allen, Robert S. Strauss and Lew R. Wasserman, and (Chairman).

The board also declared a cash dividend of $.17 per share on the MCA Inc.

outstanding common stock, and a cash dividend of $1.70 per share on the MCA Inc. outstanding Series B Participating Convertible Preferred Stock, both payable June 11, 1990, to stockholders of record at the close of business May 23, 1990.

NEW YORK, (MAY 8) PR NEWSWIRE - Merrill Lynch Capital Markets today announced the hiring of Michael G. Philipp as managing director of the Institutional Financial Futures and Options business. Philipp comes to Merrill Lynch from Goldman Sachs, where he most recently held the position of vice president, international fixed income and derivative sales.

Philipp will be responsible for the managing the financial futures and options business on an integrated basis worldwide. He will report to Michael L. Quinn, senior managing director, Merrill Lynch Capital Markets.

"Michael Philipp's international experience and product expertise are an excellent addition to our firm," said Quinn. "The derivative products business has become an increasingly important segment of global capital markets.

"We have ambitious goals for our firm in this area and we are confident that Mike will make a significant contribution to the success of our efforts," added Quinn.

Philipp officially will join Merrill Lynch June 4, 1990.

STERLING HEIGHTS, MI (MAY 8) PR NEWSWIRE - As part of its "Powertrain Quality Week," Ford Motor Company (NYSE: F) today announced plans to transform its Van Dyke Plant here into a facility to produce new state-of-the-art transmissions within the next few years.

Alex Trotman, executive vice president for Ford North American Automotive Operations, made the announcement - which is subject to approval by the company's Board of Directors - to plant employees, while presenting them with Ford's Q1 Award at a ceremony this afternoon. The plant now manufactures axles and other steering and drivetrain parts.

"We've known for a long time that quality is one of the surest ways to

provide job security," said Trotman. "By achieving Q1 status, each of you has opened the door to possible new business, helping to pave the way for increased employment here at Van Dyke."

Trotman said the new transmission would be a modern, high-technology, electronically controlled gearbox, "but we cannot discuss further details of the transmission, the vehicles in which it will be used, or the cost involved, until final approval is obtained.

"But I can tell you that this transmission is part of a significant, overall effort in both the design and manufacturing of powertrain components to produce better, more fuel-efficient powertrains for our customers," he said.

Trotman pointed out that the only development he could see which could change this important decision is "if the Clean Air legislation which emerges from the present Congressional deliberations creates a situation where the company is unable to proceed with its intended future product programs." He said Ford had made Van Dyke employees aware of the Clean Air legislation issue. Ford also will pursue state and local government assistance for the project.

"Powertrain Quality Week" is a special program recognizing the attainment of Ford's Q1 Award at three major powertrain plants: the Cleveland (Ohio) Engine Plant 1, Van Dyke, and the Lima (Ohio) Engine Plant.

Van Dyke is the seventh plant in Ford's Transmission & Chassis Division (T&C) to earn the Q1 Award, making T&C the first division in the company's North American Automotive Operations to achieve 100 percent Q1 status.

Van Dyke also becomes the 52nd Ford manufacturing location to win the Q1 Award. Of the six major product lines produced at the plant, five are best-in-class.

OKLAHOMA CITY (MAY 8) PR NEWSWIRE - John J. (Jack) Murphy, chairman, president, and chief executive officer of Dresser Industries Inc., and John J. Nevin, former chairman and chief executive officer of The Firestone Tire & Rubber Co. (now Bridgestone/Firestone Inc.), were elected new directors of Kerr-McGee Corp. (NYSE: KMG) at the annual stockholders' meeting today.

Murphy has served as chairman and chief executive officer of Dresser Industries since 1983, having been elected to its board a year earlier.

During his first 23 years with the company, he served in positions of increasing responsibility in several manufacturing divisions. He was elected corporate senior vice president - operations in 1975, executive vice president in 1980, and president in 1982.

A member of the President's Export Council, Murphy also serves on the boards of PepsiCo Inc.; NCNB Texas Corp.; U.S.- U.S.S.R. Trade and Economic Council; U.S.-China Business Council; and U.S. Chamber of Commerce. He is chairman of the trustees of St. Bonaventure University (Olean, N.Y.) and a trustee of Southern Methodist University (Dallas).

Murphy holds a mechanical engineering degree from Rochester Institute of Technology and a master's degree in business administration from Southern Methodist University.

Nevin retired as chairman of Bridgestone/Firestone (Firestone and Bridgestone merged in 1989) on Jan. 1, 1990. He had joined Firestone in 1979 as president and chief operating officer and was elected to its board in February 1980. Later that year he was named chief executive officer, and in February 1981 he was elected chairman of the board.

He had previously served as president and director, then as chairman and chief executive officer of Zenith Radio Corp. during the years 1971-1979.

Prior to joining Zenith, Nevin spent 17 years with Ford Motor Co. as controller and product planning manager for several divisions, parts division manager, and vice president of marketing.

Nevin is also a director of APS Inc. and Northwestern (University) Memorial Hospital. He is a trustee of Northwestern University (Evanston, Ill.).

A native of New Jersey, Nevin holds a bachelor's degree in business administration from the University of California and a master of business administration degree with high distinction from Harvard Graduate School of Business.

#90128p2089 05/08/1990 ~PR Newswire

BETHESDA, MD (MAY 8) PR NEWSWIRE - The Washington Real Estate Investment Trust (WRIT) (AMEX: WRE) net income for the first quarter ended March 31, 1990, of $3,780,742, was up 22 percent compared with $3,090,681 for the first quarter of 1989 (24 cents vs. 22 cents per share).

Funds from operations for the first quarter of 1990 were up 20 percent to

$4,570,325 compared with $3,812,382 for the first quarter of 1989 (30 cents vs. 28 cents per share).

During the first quarter WRIT's emphasis was placed on obtaining two new major long-term Business Center leases. The 69,000-square-foot former All-American Business Center has been leased to Pepsi-Cola; and the facilities will be greatly improved and expanded by Pepsi-Cola and WRIT. The 145,000-square-foot Capitol Freeway Center at 1501 South Capitol Street in Washington has been leased to the District of Columbia Government for the use of the Metropolitan Police Department (formerly leased to the U.S. Government). These new leases will commence during the second quarter, greatly increasing WRIT's income and yields.

Income from WRIT's Shopping Centers and Apartments are improving nicely. The office rental market is soft, but WRIT expects to continue to achieve far above average occupancy levels and to increase net income. WRIT continues to invest in capital improvement programs, at this time especially in Business Parks.

Net income in the first quarter of 1990 includes additional interest income from short-term investments primarily arising from the proceeds of the sale of 1,650,000 WRIT shares in May 1989.

WRIT's second quarter 1990 dividend of 27 cents per share will be paid on June 29, 1990 to shareholders of record on June 8, 1990. This will be the 115th consecutive quarterly dividend equal to or greater than the previous dividend.

During the first quarter of 1990 WRIT paid the last scheduled monthly payment on the mortgage on Prince William Plaza shopping center, which brought the balance to zero. The rate of interest was 7 percent. WRIT now has mortgages on only five of its 28 properties. These mortgages total $11,890,764 as of March 31, 1990. WRIT's debt-to-equity ratio is an ultra conservative 1/10 to 1 (one-tenth of one-to-one). Since the market value of WRIT's equity is several times the book value, the real debt-to- equity ratio is even more conservative. Management feels that having $27,000,000 in cash, cash equivalents and short-term investments will be rewarded with more and better investment opportunities in the near future.

PHILADELPHIA (MAY 8) PR NEWSWIRE - Scott Paper Co. (NYSE: SPP) today announced that Stephen J. Conway has been appointed senior vice president for environmental affairs.

He reports directly to J. Lawrence Shane, Scott's vice chairman. Mr. Conway will lead the Company's implementation of environmental, safety and chemical control policies worldwide. As part of his responsibilities, he will serve as chairman of Scott's Environmental Steering Committee, a group of executives who provide coordination and strategic direction on environmental matters to the Company's businesses around the world.

"Mr. Conway's appointment is a result of Scott's commitment to be a leader in meeting environmental responsibilities," said Philip E. Lippincott, Scott's chairman and chief executive officer. "Scott Paper Company has a deep concern for improving our environment and responding positively to environmental challenges and opportunities that face our society."

The continued integration of environmental values with the Company's business needs will be a top priority for the new environmental affairs head.

Mr. Conway stressed that he will "maintain Scott's tradition of examining how our products and processes can better contribute to conserving the environment while delivering the quality, performance and value our customers have come to expect."

Mr. Conway joined Scott in 1982 as vice president of timberlands. In September, 1986, he was named senior vice president and president of the Natural Resource Division. His most recent position was senior vice president of the northeast region of Scott Worldwide.

He is a graduate of the University of Oregon and of Harvard University's Advanced Management Program.

NORFOLK, VA (MAY 8) PR NEWSWIRE - Lambert's Point Docks, Inc., a subsidiary of Norfolk Southern Corporation (NYSE: NSC), is one of five Virginia organizations to receive a U.S. Senate Productivity Award Certificate of Merit.

Lambert's Point Docks is Virginia's largest breakbulk marine cargo terminal, moving 500,000 tons of import-export cargo annually. The cargo is handled in crates or boxes and on pallets. Productivity is measured in tons of cargo moved per man-hour worked and was calculated at a 94 percent increase for the awards competition.

Lambert's Point Docks has had a formal productivity program for nine years.

The purpose of the U.S. Senate Productivity Award is to recognize and honor organizations with particularly effective productivity and quality improvement programs and processes that contribute to productivity and quality improvement throughout Virginia and across the nation.

M.A. "Woody" Woodall, president of Lambert's Point Docks, presented copies of the certificate May 8 to representatives of LPD unions and divisions at a luncheon.

#90128p2093 05/08/1990 ~PR Newswire

CALGARY, ALBERTA (MAY 8) PR NEWSWIRE - Canadian Occidental Petroleum Ltd. (AMEX, Toronto: CXY) reports net income of $9.2 million for the first quarter of 1990 on net sales of $134.8 million as compared to net income of $9.1 million on net sales of $139.9 million for the corresponding quarter of 1989. Earnings per common share were 14 cents for the three months ended March 31, 1990, and 1989.

Operating profits for the quarter ended March 31, 1990, were $18.6 million as compared to $24.2 million for 1989. Funds flow from operations before exploration expense was $49.4 million for the three months ended March 31, 1990, as compared to $51.4 million for the corresponding period of 1989.

In the Oil and Gas division operating profits were $12.1 million during the first quarter of 1990 as compared to $21.8 million for the corresponding quarter of 1989. Higher crude oil and natural gas prices were more than offset by lower gas volumes. In the United States gas volumes were negatively impacted by the mechanical failure of a major producing well offshore Louisiana. A replacement well is expected to be on-stream by the fourth quarter of 1990. In addition, North Sea gas production was down significantly in the first quarter due to lower nominations bu the production shortfall is expected to be made up during the remainder of 1990.

In the Chemicals division operating profits increased to $9.4 million for the three months ended March 31, 1990, as compared to $5.4 million for the corresponding period of 1989. This improvement is principally the result of higher chlor-alkali volumes compared to 1989 when weather and labour problems combined to reduce production. During the quarter chlorate and caustic soda prices improved whereas chlorine prices continued to soften.

The Alternate Fuels division reported an operating loss of $2.9 million for the first quarter of 1990 as compared to an operating loss of $3.0 million for the corresponding quarter of 1989. Improved synthetic crude oil prices for the first three months of 1990 as compared to 1989 were offset by lower sales volumes as production did not return to normal levels until mid-March 1990 following the explosion and fire at the Syncrude plant in December 1989.

Corporate expense and interest decreased by $5.4 million for the three months ended March 31, 1990, as compared to 1989 primarily the result of foreign exchange currency gains experienced in the first quarter of 1990.

Capital and exploration expenditures were $38.7 million and $41.4 million for the three months ended March 31, 1990, and 1989, respectively.

The board of directors has declared a quarterly dividend of ten cents per common share payable July 1, 1990, to shareholders of record on June 5, 1990.

SOUTH SAN FRANCISCO, CA (MAY 8) PR NEWSWIRE - Lewis Galoob Toys, Inc. (NYSE: GAL), one of the largest independent publicly held toy companies in the United States, today announced the introduction of Game Genie(TM), the world's first and only "video game enhancer."

"Game Genie adds a whole new dimension to video-game play by offering players totally new options," said David Galoob, chairman, president and CEO of Lewis Galoob Toys. "Players can have infinite lives and explore

all levels of the game, instead of having to keep starting over at the beginning. If a player wishes to fly rather than jump, or introduce some unique special effects they enjoy -- and that let them play games in different ways -- Game Genie makes it possible. Game Genie gives players a whole new slant on the video-game experience."

Although neither endorsed or licensed by Nintendo(R), Galoob's Game Genie video game enhancer works on most popular games for the Nintendo Entertainment System(R) (see note).

"Although we are newcomers to the video-game industry," observed Galoob, "we have a proven record of innovation that includes such hit toys as Micro Machines(R), Bouncin' Babies(R), Baby Talk and many more -- and we anticipate that Game Genie will be a revolutionary product in its market."

Lewis Galoob Toys designs, develops, markets and distributes a variety of quality toy products sold worldwide. The company is headquartered in South San Francisco.

HOUSTON (MAY 8) PR NEWSWIRE - Wyoming-California Pipeline Company (WyCal) said today it has placed an order for 500 miles of large- diameter pipe for the construction of its 670-mile natural gas pipeline system from Wyoming to California.

WyCal, a subsidiary of the Coastal Corporation (NYSE: CGP), said it has purchased the 30-inch pipe from Napa Pipe Corporation, a subsidiary of Oregon Steel Mills, Inc. The purchase contract calls for the Napa, Calif.-based pipe manufacturer to make initial deliveries to WyCal beginning early in 1991.

Construction on the $570 million WyCal project is scheduled to start later this year using 170 miles of pipe that WyCal already has in inventory.

The planned initial capacity for the WyCal system is 600 million cubic feet a day. By adding compression, the capacity can be expanded to 900 million cubic feet a day.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

#90128p2118 05/08/1990 ~PR Newswire

NEW YORK (MAY 8) PR NEWSWIRE - The worldwide leader in magnetic products and the creator of an innovative music delivery system have joined in marketing partnership to expand the scope of high quality personal music entertainment -- with benefits for the music industry, record retailers and consumers. Sony Magnetic Products Company and Personics Corporation will partner in furthering the synergistic benefits of a just-announced agreement to exclusively use Sony UX-S high bias audio tape in the Personics custom cassette-making system.

"This relationship opens the door for a variety of exciting cross-promotions involving both companies and our shared business partner, the music retailer," says Ken Wiedeman, director of Marketing, Sony Magnetic Products Company. "It's an innovative marketing partnership that will allow us to develop creative advertising, promotional and merchandising programs together to reach our target music customer.

The Personics System allows record store customers to sample any of the more than 4,000 songs and record up to 25 of them on a customized cassette -- complete with a personalized label. By using a combination of advanced data storage and recording technologies, The Personics System takes less than ten minutes to create an entire custom compilation, at a cost comparable to the price of a pre-recorded cassette. To date, systems are in more than 220 outlets nationwide, with installations projected to exceed 1,000 by the end of 1991. Sony currently supplies a specially modified professional Compact Disc changer and digital-ready headphones for the Listening Post at each installation.

Under the terms of the agreement, Sony Tape will be identified on the system's Listening Post as well as the customized cassettes' label and packaging. Sony Tape will also be featured prominently in "MusicMakers," Personics' monthly magazine, most notably as the presenter of the "Top 40" chart. Sony will also have exclusivity in the magazine for all magnetic

product and system-related hardware products advertising, plus the right to conduct market research and couponing programs.

"Our reputation for quality and for leading the industry in developing ways to personalize entertainment make us a natural fit with Personics' vision," Wiedeman notes. "We're very excited that our UX-S tape has been selected by Personics, and Sony will gain additional visibility by having our tape profiled in such dramatic fashion," he adds.

#90128p2139 05/08/1990 ~PR Newswire

HOUSTON (MAY 8) PR NEWSWIRE - Tenneco Inc.'s (NYSE: TGT) board of directors today approved the construction of a new production facility at its LaPorte, Texas, complex. The plant, operated by Tenneco Natural Gas Liquids, a subsidiary of Tenneco Gas, will produce 12,500 barrels of methyl tertiary butyl ether (MTBE) per day.

MTBE is a gasoline blending component which is expected to play an important role in reformulating gasolines so they meet the proposed new clean air requirements. The facility, which will require the addition of approximately 35 permanent employees, is expected to be in operation in early 1992. The major portion of the MTBE will be sold under long-term contracts to refiners.

Chairman James L. Ketelsen said, "This project reflects our ongoing evaluation and restructuring. It is a strategic action that takes advantage of the fact that we already produce the two key materials for the manufacture of MTBE, methanol and isobutane. The upgraded utilization of these materials gives us access to a growing specialty chemical market and an opportunity to earn a significant return on our investment."

Tenneco Natural Gas Liquids produces methanol at the company's plant in Pasadena, Texas, and isobutane is produced at the LaPorte complex, site of the proposed facility.

The new plant will use the company's existing distribution facilities for rail, truck and barge shipments, as well as the product pipeline network to major shipping terminals and refineries in the Houston area.

The M.W. Kellogg Co. of Houston has been awarded a contract for engineering, procurement and construction of the facility.

Tenneco Inc., is a Houston-based diversified company with major business interests in in natural gas pipelines, farm and construction equipment,

shipbuilding, automotive parts, packaging, chemicals and minerals.

#90128p2145 05/08/1990 ~PR Newswire

CHICAGO (MAY 8) PR NEWSWIRE - A new recycling breakthrough that could use up one billion pounds of old newspapers annually in the manufacture of grocery sacks was announced late yesterday by Stone Container Corp (NYSE: STO).

The disclosure follows full-scale production testing completed in the last 10 days at Stone's Jacksonville paper mill and Yulee bag plant, both in Florida.

Stone calls its new product, which is composed of 20 percent old newsprint the "Good News" bag. "We gave it this name because we're excited that we have discovered a significant new and practical use for old newspapers," said Ira N. Stone, senior vice president, who made the announcement.

"It is a recycling development for which our R&D people have been searching. Stone already has considerable knowledge about recycling newspapers, since we are one of the world's largest suppliers of recycled newsprint. Our newsprint mills around the world use old newspapers in about 44 percent of the paper we make," he said.

Production plans at the Jacksonville paper mill call for 60 million pounds of old newspapers being recycled yearly in the manufacture of the "Good News" bag. "We fully expect this figure to grow. Only the market will determine how the capacity grows," said the Stone executive. "If all grocery sacks in the country were made of paper containing 20 percent newsprint, we would use up one billion pounds of old newspapers, and that would save a tremendous amount of landfill space."

According to industry figures, that volume is equal to about the total annual newsprint usage of the Chicago Sun-Times, Chicago Tribune, and the New York Times.

"We expect to be able to be making the paper for the 'Good News' bag at several of our mills over the next few months," said Stone, adding, "this is just the beginning. We are researching the possibility of increasing the old newsprint content beyond the 20 percent level, which could mean that it might be possible to consume an even greater amount of old newspapers in the future.

"We are offering our new recycling know-how to other paper bag producers," said Stone. "We believe the industry should work together when there are opportunities where we can all help with a solution to the growing solid waste problem."

Extensive testing of the new grocery bag shows that it meets or exceeds all the properties of a 100 percent virgin bag with respect to tear, weight, appearance, and strength.

Initial shipments for the "Good News" bag are going to supermarket chains in the Southeast, but will be made available nationally in the coming weeks. "The supermarket chains that have been exposed to the new bag in the last week or so have been very excited about it," said Stone. "We expect interest to grow as the industry continues to respond to growing consumer concerns about the environment and the ability to recycle packaging taken home from the supermarkets."

Thinking about the future and how supermarkets, consumers and bag manufacturers might work even closer together, Stone suggested, "We want to encourage consumers to continue filling their paper bags with old newspapers and returning them together at their recycling center. We can recycle both papers into new bags at one time."

The new recycling development follows Stone's earlier announcements to spend some $200 million over the next two years to increase its total use of old corrugated containers and old newsprint from about two million tons to three million tons. On a combined basis, said Stone, "We believe this makes us the largest user of these recycled paper grades in the world."

Headquartered in Chicago, Stone Container Corp. is a major international pulp and paper company. With manufacturing facilities in the U.S., Canada the United Kingdom, Western Germany, the Netherlands and Mexico (an affiliate), the company's product line includes containerboard, corrugated containers, kraft paper, paper bags and sacks, market pulp, newsprint, groundwood specialties, flexible packaging, and wood products.

HOUSTON (MAY 8) PR NEWSWIRE - The British Government has approved ARCO's (NYSE: ARC) plans to develop the Pickerill Field in the U.K. North Sea, clearing the way for the first sale of a North Sea gas field's entire output to a private-sector British company.

The government's decision was announced today by Minister of State for Energy, Peter Morrison, during an appearance at the annual Offshore Technology Conference in Houston.

Purchaser of the gas will be PowerGen, one of two generating companies formed under the government's privatization program to succeed the state-owned Central Elecricity Generating Board.

Located about 40 miles off the Lincolnshire coast in the North Sea's southern basin, Pickerill Field has estimated gas reserves of 750 billion cubic feet. Production is scheduled to begin in 1992. The gas will be delivered at a plateau rate of 210 million cubic feet per day under a life-of-the-field depletion contract lasting around 20 years.

Discovered in 1984, the field is jointly owned by a group of 11 companies headed by the operator, ARCO British Limited (a subsidiary of Los Angeles-based ARCO), with a 30.5 percent interest.

An agreement between PowerGen and ARCO British Limited was reached last year. The gas will fuel a new 900 megawatt combined- cycle turbine facility at Killingholme on the Humber estuary in England. This will be the largest natural gas-fired facility in the U.K. where coal and nuclear energy account for most of the installed generating capacity.

"We are extremely pleased to be the first company to sign such an

innovative agreement," said Mike R. Bowlin, president of ARCO International Oil and Gas Co. "Until now, all U.K. gas fields have been developed for sale to British Gas. Our agreement with PowerGen is a significant milestone toward the British government's stated objective to promote competition in the gas-supply industry."

Other owners besides ARCO are: BP Exploration, Conoco (U.K.) Ltd., Superior Oil (U.K.) Ltd., Canadian Superior Oil (U.K.) Ltd., Mobil North Sea Ltd., Sun Oil Britain Ltd., Deminex UK Oil and Gas Ltd., Gas Council (Exploration) Ltd., Industrial Scotland Energy Ltd., and Coalite Oilex Ltd.

OKLAHOMA CITY (MAY 8) PR NEWSWIRE - Kerr-McGee Corp. (NYSE: KMG) announced at its annual meeting today that its stockholders elected nine directors, ratified the appointment of Arthur Andersen & Co. as independent public accountants, and defeated two shareholder proposals.

Seven incumbent directors were reelected. They are Bennett E. Bidwell, chairman of Chrysler Motors Corp.; E.H. Clark Jr., chairman and chief executive officer of The Friendship Group, an Investment Partnership; Richard D. Harrison, honorary chairman of Fleming Companies Inc.; Robert S. Kerr Jr., attorney; Jere W. McKenny, president and chief operating officer of Kerr-McGee; Frank A. McPherson, chairman and chief executive officer of Kerr-McGee; and William C. Morris, chairman and president of J. & W. Seligman & Co. Inc.

Two new directors were elected. They are John J. Murphy, chairman, president and chief executive officer of Dresser Industries Inc., and John J. Nevin, former chairman and chief executive officer of The Firestone Tire & Rubber Co.

As announced by Liberty National Bank and Trust Co., as transfer agent, the shareholder proposal concerning the Valdez Principles was defeated by a vote of 29,735,092 to 6,016,549. Frank A. McPherson, chairman and chief executive officer, said, "The stockholder vote demonstrates support for the company's existing environmental programs. We are glad to know that our stockholders agree with our strong commitment to the environment."

The bank also announced that the proposal concerning the Preferred Stock Purchase Plan was defeated by a vote of 20,492,549 to 15,979,888. "We are pleased that the stockholders continue to show confidence in the company and its directors by voting again to support the action of the board," McPherson said.

At a board meeting prior to the stockholders' meeting, the directors increased the annual dividend rate by 9 percent to $1.44 per share of common stock.

BUTTE, MT (MAY 8) PR NEWSWIRE - Montana Power Co. (MPC) (NYSE: MTP) shareholders re-elected five directors, and approved measures doubling the authorized shares of common stock and increasing the number of shares of common stock for a key employee incentive plan in MPC's annual meeting of shareholders held today, the company said.

Nearly 43 million shares, 84.3 percent of MPC's outstanding shares were voted in the meeting.

Directors returned to the MPC board were: Alan F. Cain, 50, president of Blue Cross/Blue Shield of Montana; Robert P. Gannon, 46, president of MPC's Utility Division; Warren B. Jones, 69, president of Two Dot Land and Livestock Co.; James P. Lucas, 62, senior partner in the law firm of Lucas and Monaghan, P.C.; and George H. Selover, 60, president of Selover Buick Inc.

MPC's Articles of Incorporation were amended to increase the aggregate number of shares of common stock which the company is authorized to issue from 60,000,000 to 120,000,000 shares. The change reflects a two-for-one stock split which took effect Feb. 1, and the possible need for additional common shares should rights become exercisable under a Shareholder Protection Rights Plan established in June 1989. The amendment was approved by a vote of 40,090,616 shares.

MPC's Key Employees' Incentive Stock Ownership Plan was adopted by the shareholders in 1982. The original 1,000,000 common shares authorized under the plan have been nearly exhausted. More than 40.2 million votes were cast in favor of increasing the total number of shares authorized under the plan to 2,000,000 shares.

WASHINGTON (MAY 8) PR NEWSWIRE - United Press International today announced the appointment of Pieter VanBennekom, a 21-year veteran of UPI newsgathering, to executive vice president-editorial operations, according to UPI Vice Chairman Joseph K. Taussig.

VanBennekom previously served as UPI's Washington-based senior vice president for international operations. In his new position he will oversee domestic and international editorial activities.

"Pieter VanBennekom has been central to establishing UPI's direction for the 1990s and to restoring UPI momentum," Taussig said. "His contributions to UPI's return to strength have been enormous.

"Pieter has been responsible for ensuring strong international reporting to UPI's clients in the United States," Taussig continued.

Prior to his Washington assignments, VanBennekom served as an editor in UPI's New York City bureau, and in San Juan, Puerto Rico, as division manager. Prior to joining UPI in 1969, VanBennekom reported for the Winnipeg (Canada) Free Press and The (Boulder) Colorado Daily.

"In the past year he designed and implemented UPI's unique test of satellite transmission of U.S. news to Europe, which is underway; and, inaugurated staff and technology enhancements for international operations " Taussig added.

VanBennekom, 44, has been a key executive in the company's dispute with Reuters, Ltd., over Reuters' Feb. 16 breach of a 1984 agreement to provide foreign news photos for UPI's domestic clients, Taussig said.

Taussig said VanBennekom will announce his successor in the international senior vice presidency later this month.

Taussig also announced that Executive Vice President-News James L. Whyte, who joined UPI in February after more than 30 years in executive positions in the newspaper industry, will spearhead UPI's efforts to build alliances for electronic news exchanges among U.S. newspapers.

VanBennekom, who is fluent in five languages, was a Fulbright Scholar and through the Fulbright exchange program studied journalism at the University of Colorado at Boulder, 1964-1965, following a stint as a reporter with Holland's Provinciale Zeeuwse Courant. His earlier studies centered on classical languages.

United Press International, founded in 1907, has nearly 200 bureaus and is represented in more than 90 nations. UPI serves more than 3,000 news media outlets worldwide and is owned by Infotechnology, Inc. (NASDAQ-NMS: ITCH), the New York City-based information and communications company that also controls 47 percent of Financial News Network, Inc. (FNN).

HOUSTON (MAY 8) PR NEWSWIRE - Bell Helicopter Textron Inc. announced it has delivered or received firm purchase orders for more than $100 million in new helicopter orders for offshore oil and gas exploration.

This is the highest sales figure for the petroleum industry market for Bell since the early 1980s. Bell made the announcement during the annual Offshore Technology Conference underway in Houston.

A new wave of exploration from the Gulf of Mexico, the North Sea, the jungles of New Guinea and Peru, the Middle East, Southeast Asia, and Africa is generating a requirement for helicopter transportation to inaccessible and offshore areas of activity.

The Gulf of Mexico continues to hold the spotlight with approximately 85 percent of all the new helicopter orders. Bell Helicopter Textron delivered nine aircraft in the Gulf of Mexico in 1989 at a value of approximately $17 million. An additional $85 million has either been delivered or are on order for delivery in 1990 and 1991 for 82 additional aircraft.

Several major oil companies and independents are included in this group of customers. Petroleum Helicopters Inc. (PHI) and Air Logistics of Lafayette Louisiana, Evergreen Helicopters of Galveston Island, Texas, and Houston Helicopters of Pearland, Texas have all placed orders for new 206L-3 single engine turbine aircraft.

In addition, PHI took delivery of three Model 412SP aircraft in December 1989 for new deepwater activity in the Gulf of Mexico. PHI expects to take delivery of another three 412SP helicopters this summer. Also, PHI has 23 206L-III LongRanger aircraft scheduled for delivery starting early in 1991.

Air Logistics likewise took delivery of a new 412SP late in 1989, and has 31 206L-III LongRangers on order for delivery beginning this summer.

Evergreen Helicopters of Galveston Island, Texas, has 15 206L-III LongRanger helicopters on order with deliveries beginning in 1990. Houston Helicopters of Pearland, Texas has two Model LongRanger III aircraft on order. Felton Baker, president of Houston Helicopters, said he is contemplating additional orders to meet the requirement of the smaller independent oil companies.

With 32,000 helicopters, Bell Helicopter Textron has built more rotary wing aircraft than all of the world's other manufacturers.

#90128p2172 05/08/1990 ~PR Newswire

TORONTO, (MAY 8) PR NEWSWIRE - LAC Minerals Ltd. (NYSE: LAC) today reported increased revenues and gold production during the first quarter of 1990, reflecting the consolidation of Bond International Gold, Inc. (BIG) for a complete quarter.

Total gold production for the first quarter was 245,636 ounces, of which LAC's share is 181,642 ounces, compared to 71,773 ounces of gold for the same period in 1989. The average cash cost of production significantly improved to $247 per ounce for the quarter, compared to $332 per ounce for the same period last year.

Earnings for the three months ended March 31, 1990, were $3.4 million or 3 cents per share on revenues of $111.4 million, compared to earnings of $6.0 million or 6 cents per share on revenue of $37.3 million in 1989.

Earnings from operations improved significantly to $7 million compared to a loss of $0.9 million for the same period last year. Reduced financial income and a higher effective income and mining tax rate partially offset the increase in earnings from operations. Working capital provided by operations for the period increased to $37.3 million in 1990, from $5.6 million last year.

LAC continued to benefit from its forward gold sales as the average market price for gold during the quarter was $406 per ounce. LAC's delivery commitments on forward gold sales at the end of the quarter were 490,000 ounces, of which 190,000 ounces are for delivery during the balance of 1990 at an average price of $459 per ounce, and 300,000 ounces are for delivery during 1991 at an average price of $443 per ounce.

LAC's subsidiary BIG had delivery commitments of 266,000 ounces, of which 147,000 ounces are in 1990 at an average price of $413 per ounce, 68,000 ounces in 1991 at an average price of $419 per ounce, and 51,000 ounces in 1992 at an average price of $444 per ounce, after recognition of purchase accounting adjustments on the acquisition of BIG in 1989.

EDMONTON, ALBERTA (MAY 8) PR NEWSWIRE - Banister Continental Ltd. (''Banister'') (AMEX: BAN; Toronto, Montreal, Alberta: BAC) announced today that it has received a proposal from The Churchill Corporation (''Churchill'') of Edmonton, Alberta, to exchange approximately $9.5 million of certain Churchill construction assets for a combination of Banister treasury shares and the assumption of debt by Banister. Churchill currently owns 15.7 percent of the outstanding Banister common shares.

The proposal is being examined by an independent committee of Banister's Board of Directors, which expects to make a report to the Board, for its consideration, on or about May 31, 1990.

If the Banister Board considers it appropriate to proceed with the transaction, its implementation would be subject to a satisfactory due diligence examination, regulatory approval and Banister shareholder approval.

Banister Continental Ltd. is a Canadian construction firm specializing in civil, marine, utility, building, pipeline, and industrial construction.

CALGARY, ALBERTA, (MAY 8) PR NEWSWIRE - Ranger Oil Limited (NYSE: RGO). Earnings for the first quarter of 1990 increased 40 percent to U.S. $7.7 million ($0.09 per share) from U.S. $5.5 million ($0.07 per share) for the same period in 1989.

Funds generated from operations for the quarter rose to U.S. $17.5 million from U.S. $10.2 million for the same period in 1989, an increase of 72 percent.

Revenues increased 22 percent to U.S. $35.8 million in the first three months of 1990 from U.S. $29.4 million in 1989 as a result of increased Canadian production and higher oil prices. Production for the first

quarter of 1990 averaged 17,220 barrels of oil and 45,345 thousand cubic feet of gas per day (1989 - 17,110 barrels per day and 26,369 thousand cubic feet of gas per day).

The company's working capital at March 31, 1990 was U.S. $132.4 million.

MCLEAN, VA (MAY 8) PR NEWSWIRE - Primark Corporation (NYSE,PSE: PMK) reported income from continuing operations for the first quarter of 1990 of $438,000, or 2 cents per share, compared to income of $1,910,000, or 10 cents per share, for the same period in 1989.

A one-time pension gain of $934,000 recorded in 1989 accounts for more than one-half of the decline in earnings. Additionally, the 1990 first quarter reflects start-up costs associated with Primark's new aircraft maintenance and electronic medical claims processing businesses, as well as lower advertising revenues generated by its healthcare information service business. Positively affecting the first quarter, however, are improved operating results from Primark's financial services operations and increased investment income.

Primark Corporation is a holding company headquartered in McLean, which,

through its diversified businesses, is primarily engaged in healthcare information, financial and ground transport services.

PRIMARK CORPORATION

(A) In February 1989, the Company settled all obligations of its retirement plan which was terminated in 1988. The Company recognized a gain of $1,087,000 in connection with the settlement which increased income from continuing operations by $934,000 for the three-month period ended March 31, 1989.

(B) On Dec. 31, 1989, the operations of The Aviation Group, Inc. (TAG) were ceased pursuant to the sale of substantially all of its tangible assets and the termination of certain of its major contracts. The disposal of TAG was accounted for as a discontinued operation of the Company during the third quarter of 1989; accordingly, the 1989 period presented has been restated to reflect the operations of TAG separately from the Company's continuing operations.

#90128p2242 05/08/1990 ~PR Newswire

WASHINGTON (MAY 8) PR NEWSWIRE - The Office of Thrift Supervision (OTS) today placed Mississippi Savings Bank, Batesville, Miss., in receivership and chartered a new federal mutual institution to take its place.

The new institution, Mississippi Savings Bank, F.S.B., will assume certain assets and liabilities of the old thrift, and will operate in conservatorship under the oversight of the Resolution Trust Corp.

The takeover did not result in any interruption of Mississippi Savings Bank's day-to-day operations. The institution will remain open for business as usual. Holders of insured accounts are not affected by the action, which was taken by OTS to protect insured depositors and the interests of the thrift insurance fund. Deposits remain insured to the $100,000 legal limit.

OTS initiated the action because Mississippi Savings Bank was operating in an unsafe and unsound condition and had severe liquidity problems.

Mississippi Savings' condition is due primarily to poor underwriting and by excessive reliance on costly brokered deposits to fund high-risk commercial real estate investments. Brokered deposits currently comprise nearly 70 percent of the institution's total deposit base.

Proceeds from recent assets sales were insufficient to pay brokered deposit interest rates. The thrift also has high volume of inferior quality assets, including substandard loans and real estate owned. As of Jan. 31, 1990, Mississippi Savings was not in compliance with federally mandated risk-based and core capital requirements.

On April 23, 1990, OTS issued a cease and desist order requiring the thrift to cease alleged violations of the loans-to-one-borrower regulation.

As of Jan. 31, 1990, Mississippi Savings reported assets of $173.4 million liabilities of $169.1 million and tangible capital of $4.3 million, for a tangible capital-to-assets ratio of 2.3 percent.

ROXBORO, NC (MAY 8) PR NEWSWIRE - Shareholders of Fibreboard Corp. (AMEX: FBD) have approved a 350,000 share increase in the number of shares

authorized for the company's employee stock option plan and making options available to non-executive managers at 85 percent of fair market value at the time of grant. Options for directors and executive managers of the company are only granted at full fair market value.

In addition, shareholders re-elected two incumbent directors -- John W. Koeberer and Harvie M. Merrill -- to serve until the 1993 Annual Meeting. This year the Concord, Calif.-based company's annual meeting was held in Roxboro to enable shareholders from the Eastern Seaboard to tour the new, high-technology plant which recently went on stream to provide engineered wood products to the construction industry in the eastern half of the country.

Shareholder votes were received at the annual meeting in Roxboro, by the proxy solicitor in New York and by the transfer agent in California. All ballots are being accumulated by the transfer agent in California and will be examined to assure that they have been properly counted and voted for all purposes.

Fibreboard Corp., headquartered in Concord, manufactures lumber, hardwood plywood, moulding and millwork, agricultural container components, composite structural lumber, precision molded industrial insulation and fireproofing materials. It also owns and operates Northstar-at-Tahoe, a ski resort and year-round vacation and conference center in California.

#90128p2250 05/08/1990 ~PR Newswire

OREM, UT (MAY 8) PR NEWSWIRE - Geneva Steel's (NYSE: GNV) board of directors approved on May 4, 1990, a $5.8 million expenditure that allows the company to comply with a new national emission standard for benzene emissions from coke by-product recovery plants.

To comply with the new regulation, Geneva will complete, by September 1991 a new "gas blanketing" system that meets the stringent "no detectable emissions" standard. According to Richard D. Clayton, vice president of environment and special projects, "New benzene regulations were adopted late last year. These regulations are 'technology-forcing' because they require design and implementation of technologies not yet in operation. Geneva's implementation of these new control strategies will come well before control of air toxics from other sources proposed under the Clean Air Act pending in Congress," noted Clayton.

At the time EPA finalized the regulations, it recognized that few, if any, of the coke by-products plants in the country could comply with the regulations by the effective date of Dec. 13, 1989 because of the time

required to implement the new control technologies. Consequently, the regulations contain specific provisions for a two-year extension of compliance. Geneva Steel, along with virtually all other operators of coke batteries, has requested an extension. Several extensions have already been granted in other EPA regions. Geneva Steel's extension request will be reviewed by the Utah Bureau of Air Quality and the Utah Air Conservation Committee.

Geneva officials emphasized that the request for an extension does not pose any health risk to employees or the community. To maintain compliance with Occupational Safety and Health Administration (OSHA) regulations, Geneva regularly inspects equipment and monitors employees in the coke by-product and benzol plants to assure safe working conditions and to maintain compliance with OSHA regulations. This program includes equipment inspection, leakage detection and repair programs that have been in existence for several years.

#90128p2256 05/08/1990 ~PR Newswire

ST. LOUIS (MAY 8) PR NEWSWIRE - Southwestern Bell Corp.'s (NYSE: SBC) Oyston Cable Communications Group today launched cable television service to customers in Preston, England. Preston, located about 200 miles north of London, is the largest town in the Central Lancashire cable franchise area which includes 95,000 homes.

Building on expertise in network design and service, SBC took an equity stake in Oyston in October 1989. Network construction began in January, and exactly five months later, subscribers began receiving their choice of up to four channel packages as well as optional premium movie channels.

Oyston also is in the process of designing and constructing a cable network for its franchise located in South Liverpool which comprises 125,000 homes. The Liverpool system is expected to be operational by fall.

According to Whitaker, cable television has been available in the U.K. since 1985, but only in the last 18 months has the industry "taken off." Cable currently is available in 16 U.K. franchise areas.

Oyston, headquartered in Preston, has applied for 14 additional franchises in Northern England. The U.K. Cable Authority will begin announcing the awards this summer.

Oyston is SBC's second operational cable system. SBC has an interest in Golden Channels Ltd., which launched service earlier this year in Israel.

Golden Channels' three franchises will make cable TV service available to nearly 300,000 households in Tel-Aviv and Jerusalem.

The Cable Act of 1984, Federal Communications Commission rules and the Modification of Final Judgment all offer barriers that block SBC's entry into U.S. CATV. However, legislation before Congress would allow all seven Bell Holding Companies to enter the U.S. cable market.

Southwestern Bell Corp., based in St. Louis, is an international communications corporation with 1.1 million shareowners. It provides a variety of products and services through several subsidiaries: Southwestern Bell Telephone, Southwestern Bell Yellow Pages, Southwestern Bell Telecom, Southwestern Bell Mobile Systems, Metromedia Paging Services Mast Advertising & Publishing, Gulf Printing and Southwestern Bell International Holdings Company, the parent company for Oyston.

CHICAGO (MAY 7) UPI - Michael Jordan started fast and finished faster Monday night.

Jordan, playing on a sprained left ankle, scored 11 points in the first quarter as Chicago jumped to a 12-point lead, then added 15 of his 39 in the fourth to stave off a Philadelphia rally and lead the Bulls to a 96-85 victory over the 76ers in the opening game of their Eastern Conference semifinal.

''On you home court you have to take it to them, and that is what we did tonight,'' Bulls Coach Phil Jackson said.

The best-of-seven series resumes Wednesday night at Chicago Stadium. Game 3 shifts to The Spectrum on Friday.

The 76ers moved within a field goal early in the fourth after running off 6 straight points with Chicago missing seven straight shots. A layup by Charles Barkley, who finished with 30 points and 20 rebounds, made the score 73-71 with 8:38 to play.

But Jordan, held to 4 points in the third quarter, kept the 76ers at bay, hitting three straight baskets to build back the lead.

''Even when we started that final quarter badly, our defense stood up for us,'' said Jordan.

Philadelphia made one final run, with Johnny Dawkins' layup cutting the

Sixers' deficit to 86-83 with 4:06 left. But Jordan hit a fallaway jumper along the baseline, Bill Cartwright hit a jump shot in the lane and Jordan a technical foul to put the game away. Jordan capped the night by hitting a 3-pointer from the top of the key at the buzzer.

''I was disappointed because we just didn't compete,'' said Barkley. ''It's not about winning or losing. It's about competing.''

Scottie Pippen added 18 points, 12 rebounds and 8 assists for Chicago, while Mike Gminski added 14 points for Philadelphia. The Bulls led from start to finish.

''They outplayed us tonight,'' Barkley said. ''Michael's a great player. He's going to get his points and I'm going to get mine. But the players around us are going to have to play better. That's the key.''

The Bulls came out running, ripping off a 15-4 run to start the game. Jordan, covered by Hersey Hawkins, had 7 points in less than three minutes. Hawkins finished with just 12 points after scoring a career-high 39 in the decisive Game 5 win over Cleveland in the first round.

''In the fourth quarter, he was basically rested,'' Hawkins said. ''I didn't come out aggressive at all. I didn't take it to him, and it gave him a chance to sort of relax on the defensive end.''

''I tried to put him back on his heels,'' Jordan said.

Chicago stretched that advantage to 33-21 at the end of one. The 76ers shot just 38 percent in the first quarter to Chicago's 56 percent. Philadelphia finished shooting 41 percent for the night.

The 76ers strung together 7 straight points late in the second quarter to close within 3. Jordan finished off the half with 3 free throws to give the Bulls a 53-47 edge at the intermission.

Chicago missed all 5 of its free throws in the third quarter, but still managed a 73-65 lead heading into the final period. Barkley had 10 points and 8 rebounds in the third, but the 76ers shot just 27 percent as a team.

(MAY 8) UPI - House Speaker Thomas Foley says he and his Senate counterpart, George Mitchell, will meet Tuesday with rank-and-fire congressional Democrats to discuss a possible budget summit with President Bush. Foley says NO decision was made during a meeting of Democratic leaders Monday. The White House says Bush wants to hold the deficit-reduction talks without setting any conditions.

Officials with the International Monetary Fund meeting in Washington, D-C, agreed Monday night to add 60-BILLION dollars to the I-M-F's 120-BILLION dollars in capital. Argentina's economics minister says they also agreed that access by developing countries to I-M-F lending NOT be curtailed to liberate funds for Eastern Europe.

The F-B-I says two Colombians linked to the Medellin cocaine cartel tried to buy 120 Stinger anti-aircraft missiles and automatic weapons from undercover agents. Officials say it was part of a plot to shoot down Colombian government helicopters. The suspects were arrested Saturday in Miami.

In Colombia, authorities say army raiding parties have seized a major drug traffickers' complex and nearby airfield in the Amazon jungle. More than 14 tons of cocaine... potentially worth more than one-BILLION dollars... were confiscated. Much of the cocaine, wrapped in plastic, reportedly appeared ready for shipment to the United States.

(MAY 8) UPI - Lava from Hawaii's Kilauea Volcano destroyed its 139th house Monday and then poured into the ocean, sending up huge clouds of steam. But even as the molten rock entered the sea, activity ceased at the vent seven miles upslope feeding the flow of lava. Authorities warn the breather may be only temporary for the devastated community of Kalapana.

''Grand Hotel'' received 12 and ''City of Angles,'' 10, as nominations were announced Monday for the 1989-90 Tony Awards. Nominations in 19 categories for the 44th annual Antoinette Perry awards were announced at Sardi's restaurant in New York City. This year's hostess, Kathleen Turner, had the pleasure of reading her own nomination... for best actress in a play in a revival of Tennessee William's ''Cat on a Hot Tim Roof.''

(MAY 8) UPI - The Arkansas River is expected to crest Tuesday in the Little Rock, Arkansas, area as flood waters continue to surge downstream. Already, what may be the state's worst flooding in 63 years has forced more than 300 people from their homes... and more evacuations are

predicted before the water recedes. One man in the town of Toad Suck, 25 miles north of Little Rock, says he and his mother spent the day removing furnishing from his home. He says water moccasins are swimming in what used to be his back yard.

NASA is gearing up for an unprecedented shuttle disaster drill Tuesday. Officials at Cape Canaveral, Florida, say engineers will work through a mock countown and launch starting at 3 p-m. At some point during the imaginary shuttle's climb to orbit, a major failure will occur. Just what is being kept secret to add realism to the simulation. One bit of realism that woN'T be included is the reporters. As one NASA official puts it- ''We doN'T want to do our own imitation of 'War of the Worlds' and have somebody'' believe the mock crisis is real.

Senior Bush administration officials say the United States wants to significantly increase the number of military trainers assisting Bolivia in its war against drug cartels. One U-S official calls the increase a reflection of ''the crackdown in the drug war.'' Bolivian President Jamie Paz Zamora will meet Tuesday with President Bush in Washington, D-C.

A federal prosecutor says tests on a sample of hair taken from Marion Barry shows the Washington, D-C, mayor was NOT entrapped into smoking ''crack'' cocaine on the night he was arrested. In documents filed Monday in U-S District Court, U-S Attorney Jay Stephens says tests showed Barry used cocaine ''repeatedly'' in the six weeks before his January 18th arrest. NO comment on the revelation from a Barry spokeswoman. Barry's drug trial is scheduled to begin June 4th.

#90128u0300 05/08/1990 ~United Press International

MEXICO CITY (MAY 8) UPI - Pope John Paul II issued a message of hope and commiseration to nearly 1 million Mexican faithful who flocked to see the head of the Roman Catholic Church.

The pope, who also Monday met for an hour with Mexican President Carlos Salinas de Gortari, planned to give an address at the Aguascalientes airport before going to the northwestern town of San Juan de Los Lagos, 300 miles northwest of the capital in the state of Jalisco, to say mass and crown an image of the Madonna.

Salinas received John Paul at his official residence, Los Pinos, Monday morning and presented him with a rare book, ''Mexico - Territorio de Solidaridad,'' or ''Mexico - A Territory of Solidarity.''

The hand-written, leather-bound volume is the only such copy of the work available and includes texts from Aztec poets as well as the works of such contemporary writers as Octavio Paz and other Mexican intellectuals.

During the meeting, the two discussed changes in Mexico and Eastern Europe the indigenous cultures of Mexico and problems of too much consumerism, according to a presidential statement.

''They spoke of the risks represented by consumerism and individualism in this age, and the need to ... strengthen the concept and application of solidarity,'' the statement said.

It is the pope's second visit to Mexico, which does not have diplomatic relations with the Vatican although more than 90 percent of its approximately 85 million people are Roman Catholic. His first visit was in 1979.

The trip has led to speculation that diplomatic ties will be established, although the pope has described the trip as a pastoral one.

Following the meeting with Salinas, John Paul flew in a helicopter to the impoverished town of Chalco, on the eastern fringe of the capital, where he likened the million or so followers from Chalco and neighboring Nezahualcoyotl to ''sheep without a shepherd.''

The pope was taken to the site of the open-air mass in his converted pick-up popemobile, where he was greeted by a subdued crowd, clapping quietly and waving the yellow scarves supplied with their admission tickets.

''In many of you I discover ... the faces of children victims of poverty, abandoned children with no school, with no healthy family atmosphere,'' John Paul said.

He cited problems of unemployment, underemployment, lack of opportunity and ''badly paid workers who have difficulties organizing and defending their rights.''

The pope said the church ''wants to be the voice for those who have no voice,'' and stressed evangelization as ''the best service for a brother.''

''What sensibility, and humanity than of Jesus, whose preaching of the Kingdom of God does not make him forget the need for the daily sustenance of those who follow him,'' John Paul said. ''Also today in Chalco, Jesus is the good shepherd.''

After leaving Chalco, the pope flew to the Gulf coast port of Veracruz, where he addressed many thousands gathered by the ocean and continued the theme of evangelization in the Americas.

''What is your mission today as a Christian people? ... to live and

proclaim the gospel,'' John Paul said.

#90128u0307 05/08/1990 ~United Press International

(MAY 8) UPI - The man whose out-of-control car careened through a Little League game Saturday in the Chicago suburb of Riverside says hospital tests eliminated alcohol as a factor in the accident. A grand jury is hearing evidence in the case. The accident killed three children and injured nine other people.

The cousin of Beach Boy Brian Wilson is petitioning to be named his conservator. Stan Love, a former Los Angeles Lakers basketball player, says Wilson has been brainwashed by his former psychologist and is UNable to care for himself. Wilson opposes the move. In a surprise appearance at Love's news conference in Santa Monica, California, Monday, the musician said he NO longer has a drug or alcohol problem and is in full control of his life.

#90128u0309 05/08/1990 ~United Press International

(MAY 8) UPI - Tom Browning shut down the St. Louis Cardinals without wasting much of their time.

Browning needed just 89 pitches to throw a three-hitter for the Cincinnati Reds at St. Louis Monday night. The 3-0 victory was the Reds' first complete game of the season and lasted just two hours and nine minutes.

''I like to get in and get out,'' said Browning who retired the first 10 batters and gave up only three singles. ''I like to find a groove and work it. I feel best when I work that way.''

Browning's quick work, which also consisted of three strikeouts and an intentional walk, impressed St. Louis Manager Whitey Herzog.

''Browning pitched fast, he had good control,'' Herzog said. ''He was cutting his fastball and really spotting it. We didn't do much with him.''

A three-run sixth highlighted by Luis Quinones two-run double was all the runs Browning needed.

Browning earned his first victory since April 17.

Jose DeLeon, 2-2, pitched six innings in taking the loss. He gave up seven hits and three earned runs along with three walks.

The victory finished Cincinnati's first four-game sweep in St. Louis since

August of 1966. It was the Reds' fifth straight triumph and the Cardinals' fifth straight loss.

The Reds are 12-2 on the road this season, including 5-1 on their current eight game trip and own the best record in the major leagues at 18-5.

''A complete game is a bonus by the pitcher,'' Browning said. ''It's what every pitcher shoots for when he starts a game. With our great bullpen, you probably won't see many complete games by our staff.

Browning said a good command of his pitches helped.

''I got ahead of the hitters and stayed that way,'' he said.

Cincinnati Manager Lou Piniella agreed.

''It was a well pitched game,'' he said. ''What you like to see is absolute control. He didn't really give the Cards much to hit.''

Elsewhere in the National League, Pittsburgh tripped San Diego, 4-1, New York blasted Houston 7-1, Montreal trimmed San Francisco 7-6 and Atlanta edged Chicago, 9-8.

In the AL it was: Kansas City 4, Cleveland 2 in 11 innings; Toronto 6, Chicago 1; Milwaukee 5, Detroit 4; Oakland 5, New York 1; Boston 5, Seattle 4 and Baltimore 6, California 5.

-- AROUND THE NL --

Pirates 4, Padres 1

At Pittsburgh, Barry Bonds led off the first inning with a homer for the 20th time in his career and ignited the Pirates to a four-run inning. Bob Walk, 2-3, allowed one run on five hits in six innings for the victory. Bruce Hurst, 1-4, allowed four runs on seven hits in seven innings for San Diego, which is 0-4 against Pittsburgh this year.

Mets 7, Astros 1

At New York, Frank Viola became the NL's first six-game winner and newly-acquired Daryl Boston homered and drove in three runs to lead the Mets. Viola, 6-0, limited Houston to eight hits over 6 1-3 innings before leaving the game with muscle spasms in his right hip. Rookie reliever Wally Whitehurst earned his first-major league save by pitching the final 2 2-3 innings. Jim Clancy, 1-2, took the loss.

Expos 7, Giants 6

At Montreal, Andres Galarraga belted a three-run homer and doubled home the winning run with one out in the ninth to lift the Expos. Steve Frey, 2-0, was the winner, pitching 2-3 of an inning. The Giants tied the score 6-6 with three runs in the ninth on back-to-back doubles by Will Clark and Kevin Bass and Matt Williams' two-run homer. Steve Bedrosian, 0-3 suffered the loss.

Braves 9, Cubs 8

At Chicago, Jeff Blauser hit two homers, including a two-run blast in the ninth to lift the Braves. Charlie Kerfeld, 2-2, picked up the win and Joel Boever recorded his third save. Mitch Williams, 0-2, was the loser. The earned runs were the first given up by Williams in 15 1-3 innings. Blauser and pinch hitter Tommy Gregg hit back-to-back homers in the fourth inning.

-30- 4092

#90128u0330 05/08/1990 ~United Press International

(MAY 8) UPI - The Toronto Blue Jays are tough to beat when Kelly Gruber hits at the SkyDome and Dave Steib pitches against the Chicago White Sox.

These two players extended personal successes Monday night while pacing the Blue Jays to a 6-1 victory over the White Sox.

Steib pitched 7 2-3 strong innings to boost his career record against Chicago to 19-4. Gruber continued to display his affinity for the dome by homering there again. His two-run blast in the fifth inning was his 10th of the year, all at the SkyDome. Gruber's shot snapped a 1-1 tie and the Blue Jays were on their way.

''They say these things even out,'' said Stieb, 5-1, who struck out five and walked three. ''If that's the case, they need quite a few wins to even it out.''

Stieb wouldn't share any secrets to his mastery over the White Sox, and Chicago Manager Jeff Torborg couldn't.

''I have no idea,'' Torborg said. ''With the personality changes that have taken place over the years, I really don't know. But I can see why. He's a good pitcher, he can probably dominate anybody.

Stieb allowed just four hits through the first seven innings, but was chased after giving up three singles in the eighth. Duane Ward took over with runners at first and second and retired the final four batters.

Gruber's homer, along with a two-run shot by rookie John Olerud, gave the Blue Jays a major league-leading 42 homers - including 34 at the SkyDome.

''The place hasn't changed a bit since they built it,'' Stieb said. ''You make bad pitches over the plate and they're going to hit them out.''

Jack McDowell, 1-2, walked Tony Fernandez with one out in the fifth. Fernandez took second on Mookie Wislon's single and stole third with Gruber at the plate. Gruber followed by belting a 3-2 pitch into the second deck in left field for his third homer in two days.

''It was the new slider, I threw it all night and got a lot of people out with it,'' said McDowell, who lasted five innings and surrendered three runs on seven hits and three walks.

Elsewhere in the American League, Boston edged Seattle 5-4, Oakland topped New York 5-1, Kansas City downed Cleveland in 11 innings 4-2, Milwaukee edged Detroit 5-4 and Baltimore shaded California 6-5.

In the NL, it was: New York 7, Houston 1; Montreal 7, San Francisco 6; Pittsburgh 4, San Diego 1; Atlanta 9, Chicago 8 and Cincinnati 3, St. Louis 0.

-- AROUND THE AL --

Red Sox 5, Mariners 4

At Seattle, Tom Brunansky and Dwight Evans hit two-run doubles and Greg Harris worked 6 2-3 innings to lead Boston. Harris, 3-1, scattered eight hits while allowing two runs and Rob Murphy worked the final 2 2-3 innings for his first save. Erik Hanson, 3-1, took the loss after allowing 10 hits and all five runs.

A's 5, Yankees 1

At Oakland, Calif., Jose Canseco belted two homers and Mike Moore pitched a four-hitter over seven innings, helping Oakland snap New York's three-game winning streak. Moore, 3-1, walked one and struck out none and Todd Burns notched his first save. Leary, 1-3, gave up five runs on nine hits over eight-plus innings.

Royals 4, Indians 2, 11 innings

At Cleveland, Bo Jackson and Pat Tabler singled home runs in the 11th inning and Jeff Montgomery pitched four hitless innings of relief to lead Kansas City. Montgomery, 2-1, struck out five and Mark Davis pitched the 11th to earn his fifth save. Cecilio Guante, 0-2, took the loss.

Brewers 5, Tigers 4

At Milwaukee, B.J. Surhoff drilled a three-run homer and Rob Deer added a

two-run homer. Bill Krueger, 2-0, allowed one run and three hits in 3 1-3 innings and Dan Plesac pitched the ninth for his fifth save. Jack Morris, 2-4, allowed five runs on four hits, but walked seven with no strikeouts.

Orioles 6, Angeles 5

At Anaheim, Calif., Phil Bradley's two-run double capped a five-run rally with two outs in the seventh inning. Jay Tibbs, 1-3, earned the win despite giving up five hits and four runs. Gregg Olson lost a 41 1-3-inning scoreless streak dating to last July 31, but earned his fourth save. Mark Eichhorn, 0-2, took the loss.

#90128u0408 05/08/1990 ~United Press International

MOSCOW (MAY 8) UPI - Latvian Prime Minister Ivars Godmanis said he remains hopeful Moscow will agree to talks on independence for the Baltic republic, but a spokeswoman said the government was anticipating a Soviet blockade.

Godmanis, leader of the nationalist Popular Front bloc in the republic's Parliament, said after his election Monday the republic was still waiting for an official response from Soviet President Mikhail Gorbachev to Friday's declaration of independence.

''What we have so far is totally unofficial,'' Godmanis said of a weekend statement by Latvian Communist Party leader Alfreds Rubiks that Gorbachev had rejected the declaration and said there was no chance of negotiations unless it was revoked.

Godmanis said in a telephone interview he hoped once Gorbachev had a chance to read the Latvian declaration of independence he would find it more moderate than that of Lithuania or Estonia and agree to negotiations.

''We sent the official papers (declaration) to Gorbachev along with a letter,'' Godmanis said. ''I hope the official response will be different (than the rejection reported by Rubiks).''

Godmanis pointed out that a Latvian delegation had held talks with Soviet officials two weeks ago in Moscow and more talks were scheduled May 15.

''We will see what happens,'' he said. ''If Moscow says they do not want to speak at all, then we will have something solid. Everything else is just emotions.''

Godmanis said he ''had no illusions'' that the road to independence would be easy, adding the new government had considered the possibility Gorbachev chose an economic blockade like he did against Lithuania.

''If he did the same thing (in Latvia) it would be very hard for us,'' Godmanis said.

A spokeswoman for the Latvian government, Marika Berzina, said earlier that the republic was planning to deal with a possible blockade.

''The government is considering special controls on resources,'' Berzina said. ''There would be rationing (if a blockade was imposed).''

She added that, like Lithuania, Latvia was exploring direct deals with other Soviet republics for goods rather than going through the central authorities in Moscow.

The official Soviet news agency Tass said residents of the Latvian capital Riga went on a ''panic buying'' spree because of fears of a Soviet blockade, but gave no details.

Godmanis was elected Monday by a 131-45 vote with six abstentions in the Parliament that Friday passed a declaration of independence providing for a phased break from Soviet rule.

The new prime minister joins President Anatolijs Gorbunovs, a moderate independent communist, at the top of the Latvian leadership that hopes to win a negotiated freedom from Moscow.

There has been no direct comment from Gorbachev on the Latvian declaration of independence, although in a speech to veterans Monday he criticized ''forces that would like to use the atmosphere of democracy, glasnost and freedom to implement their futile ambitious plans, including separatist plans.''

He said the separatists were pursuing an ''irresponsible policy leading to a deadlock.''

Gorbachev has refused talks with Lithuania on secession, and on April 18 he cut off all crude oil and stopped most other supplies of raw materials because of that republic's refusal to annul its March 11 declaration of independence.

The leaders of Latvia's new nationalist-controlled Parliament had hoped to avoid such a negative reaction from Moscow by drafting a proclamation of independence that excluded some of the more militant clauses in earlier declarations by neighboring Lithuania and Estonia.

Unlike the unilateral act passed in Lithuania, Latvia's declaration of independence provides for a transition period toward final secession from the Soviet Union.

And the Latvian deputies did not, as their Estonian counterparts did in a March 30 proclamation, declare all Soviet laws null and void on the

territory.

#90128u0472 05/08/1990 ~United Press International

HONG KONG (MAY 8) UPI - A group of 125 Vietnamese refugees voluntarily left Hong Kong's dentention centers for Hanoi Tuesday, bringing to more than 2,000 the number of boat people returned through the program.

The 125 refugees boarded a chartered jet, becoming the 19th group to take part in the program and bringing the number of Vietnamese voluntarily repatriated to 2,090, a government spokeswoman said.

Since the U.N.-sponsored plan began in March 1989, more than 34,000 Vietnamese have sailed into Hong Kong and many of the British colony's lawmakers say the program has not done enough to ease the political and financial strain created by the influx.

Some 54,000 boat people currently live behind barbed wire in the colony's squalid refugee camps, which have been the scene of mass protests and riots.

The government is pushing for the resumption of a policy that forced 51 boat people back to Hanoi in December.

Vietnam, upset with international condemnation of the move, has refused to accept any more refugees returned against their will.

Slightly less than 1,700 Vietnamese have sailed into Hong Kong this year, compared with 6,339 for the same period in 1989.

Hong Kong officials say the drop in arrivals is largely because of voluntary repatriation, which they say has spread the word of the bad conditions in the colony's camps and the almost nonexistent chance for resettlement.

Since June 1988, Hong Kong has defined its boat people as either political or economic migrants. Only those who can prove they have a legitimate fear of persecution in Vietnam are eligible for resettlement.

The rest, an estimated 90 percent of the colony's Vietnamese, face life in the camps or a forced return to their homeland.

#90128u0519 05/08/1990 ~United Press International

(MAY 8) UPI - Around the world, around the clock... the latest news is coming to you across the wires of U-P-I.

The Arkansas River is expected to crest today in Little Rock. The Arkansas has left a tide of destruction in its path upstream from Little Rock, running over its banks and causing Millions of dollars of damage to roads, bridges and buildings. Authorities evacuated hundreds of people along the Arkansas and in low-lying areas.

In what may be a breakthrough in the hostage stalemate, Israel says it will release Lebanese Moslem prisoners. Pro-Iranian kidnappers holding Westerners in Lebanon have demanded that Israel let go of some 400 Lebanese detainees. Israel says it will follow through with its offer only if Israeli soldiers captured in Lebanon are also released.

The head of the Islamic Amal tells U-P-I that he has advised the groups holding 16 Western hostages NOT to release any more of their captives until the United States responds to the recent release of two U-S hostages. Syria and Iran have urged the United States to display some form of appreciation to the releases in Lebanon.

Soviet President Gorbachev says nationalists in the Soviet Union are misusing the atmosphere of democracy he is promoting to sever their ties from Moscow. Gorbachev yesterday told a gathering of veterans that the actions of nationalists will only lead to a stalemate with the Kremlin.

The White House said yesterday that President Bush remains true to his campaign pledge of NO new taxes. This word has created tension among Capitol Hill Democrats who had been assured earlier that Bush was willing to discuss all options- including new taxes- to rein in the massive federal deficit.

(MAY 8) UPI - NASA plans to simulate a shuttle disaster today to test the readiness of space agency employees to respond to a disaster. The unprecedented drill will also determine the state of internal communications and contingency planning. Countdown for the mock disaster is scheduled to start this afternoon.

Costa Rican President-elect Rafael Calderon is to be inaugurated later today. Unlike recent changes of power in neighboring Panama and Nicaragua, Costa Rica's changing of the guard comes amid peace and relative prosperity. First lady Barbara bush will be among the dignitaries observing the ceremony.

America's oldest and largest AIDS service group has pulled out of an upcoming international AIDS conference in San Francisco. The head of Gay Men's Health Crisis says the move is a ''last-ditch'' effort'' to force

the U-S government to repeal a regulation that prevents people infected with the virus from entering the United States.

A writer in a popular Soviet magazine says progressive Soviet publications are experiencing paper shortages while their conservative counterparts appear to have NO problems with supplies. The writer says it's true that there's a paper shortage in the Soviet Union, but he argues that the highest readership should dictate who gets scarce resources.

The foundation created by the man who helped start the Texas oil fields in the 1930's has given Yale University its largest gift in more than 20 years. The Bass family yesterday presented a 20-Million-dollar donation to Yale to establish a school to study, research and preserve the environment.

-30- 1772

#90128u0563 05/08/1990 ~United Press International

(MAY 8) UPI - Floodwaters surging through Arkansas kept hundreds of people away from their homes early Tuesday as rain-swollen rivers spilled their banks and authorities braced for what could be the state's worst flooding in six decades.

The Arkansas River continued rising and appeared ready to crest Tuesday in Little Rock, Ark., and Wednesday in Pine Bluff, Ark., about 40 miles downstream. More than 325 homes were evacuated in six counties along the river, said a spokesman for Arkansas Emergency Services.

No deaths or serious injuries were reported in Arkansas, but officials said they expected the flooding to be the state's worst in 63 years.

''All indications (say) this is going to be worse than (the 1973 flood) in terms of height. But in terms of damage, we're doing a lot better because there was a lot of preparation that took place between '73 and now,'' North Little Rock Mayor Patrick Henry Hays said Monday.

Rising waters from the Red River began flowing over a levee along U.S. Highway 71 in the southwest corner of Arkansas, about 5 miles north of Texarkana, officials said.

About 60 people were evacuated from a group of mobile homes near the levee as a precautionary measure, said Gary Talley of Arkansas Emergency Services.

''That levee is not looking good,'' Talley said, ''and the river is expected to rise another foot or so by early Wednesday.''

Water was also seeping through the same levee on the Texas side of the border, Talley said.

In north Texas, floodwaters from the Trinity River rushed toward largely unprotected rural areas of east and southeast Texas.

So far, the Trinity played the most havoc along the hilly country around Palestine, particularly in Henderson and Anderson counties, and in the flatlands north of Houston in flood-prone Liberty County.

Already, 100 residents of Trinidad, halfway down the Trinity between Dallas and Palestine, have been evacuated.

At least 33 homes around Long Lake in Anderson County, have been inundated and about 80 people had been evacuated from the area by Monday evening, said Ray Lively, Anderson County's emergency management coordinator.

Asked how much land flooded in Anderson County, Ernie Cathey, a service hydrologist with the National Weather Service in Fort Worth, said, ''Oh, lordie, along the Trinity River, just in Anderson County, it's probably flooded 30 miles a half-mile on each side of the river.''

Residents of Trinidad said they were preparing for the flood as best they could, but some were clearly worried about their 35-foot-high, 12-mile-long levee.

''When the water starts going over, or breaks through, that Houston black clay will dissolve like sugar and the whole thing will be washed to the ground,'' said C.D. Wheatley, general manager of the Cresslen Ranch.

Besides the rivers, the weather service said the Colorado river in southwest Texas and the Neches and Sabine rivers through east-central Texas were the causes of new flood worries.

In far southwest Texas, along the Mexican border, showers and thunderstorms were forming the Big Bend area early Tuesday.

Elsewhere around the country, the upper Northwest was dampened by light rain early Tuesday, the Midwest had scattered thundershowers and New England was socked in with fog and light rain.

In Colorado, a cold front chilled the eastern half of of the state with gusty north winds of 25 to 40 mph. Fort Morgan in the northeast section of the state reported a late night gust of 64 mph, the NWS said.

In the West, light rain across Oregon and Washington, while near-freezing temperatures and light snow were reported at Stampede Pass in the Cascade range.

In northern California, northerly winds buffeted the region with gusts to

52 mph raking Eureka on the northwest coast. Southern California cooled off after several days of record-setting heat.

In the Midwest, scattered thundershowers fell across Minnesota and South Dakota. Most of the region was clear, with temperatures ranging from the 30s in Duluth, Minn., to 72 in Eau Claire, Wisc.

A high-pressure system moving across southeastern New England early Tuesday brought dense fog and scattered light rain to some coastal areas of Connecticut, Rhode Island and Massachusetts.

Temperatures ranged from a low of 38 in Burlington, Vt., where skies were mostly clear, to a high of 50 in Boston, where it was cloudy, the NWS reported.

The skies were mostly clear overnight in the mid-Atlantic region. The lows were from the upper 30s in West Virginia to the mid 50s in south New Jersey, Delaware and Pennsylvania.

The South was springlike with mild temperatures. Atlantic charted 62 degrees, Knoxville had 52 and Key West, 79.

-30- 4957

#90128u0580 05/08/1990 ~United Press International

MOSCOW (MAY 8) UPI - Foreign Minister Eduard Shevardnadze, in a message Tuesday to his Cuban counterpart, signaled Moscow's dissatisfaction with the fellow communist nation's continued resistance to reform.

Shevardnadze and Cuban Foreign Minster Isidor Malmierca exchanged greetings on the 30th anniversary of the resumption of diplomatic relations between the two countries, 16 months after Cuban President Fidel Castro seized power following a long guerrilla campaign.

''The Soviet Union values the steady bilateral political dialogue enabling both countries to compare approaches, coordinate steps and map directions of joint activity with regard to the key issues of international politics '' Shevardnadze said in his message.

''The Soviet side is fully determined to develop this dialogue and perfect our political cooperation,'' he told Malmierca.

Despite the message's friendly tone, its references to the need to coordinate steps and perfect political cooperation were clear indications of the differences that have emerged between the two nations.

Castro has adamantly rejected Soviet President Mikhail Gorbachev's ''perestroika'' drive to renew communism, saying greater freedom of

expression, movement toward a more market-oriented economy and other changes are not applicable in his Caribbean nation.

Malmierca, in his message to Shevardnadze, called the Soviet Union ''the great country of (Soviet state founder Vladimir) Lenin'' in an allusion to its orthodox communist roots.

Castro said in a speech in December that Cuba would defend socialism ''to the last drop of blood,'' and he lectured Gorbachev on conventional communism during the Soviet leader's visit to Havana last year.

Moscow has continued to give Cuba more than $5 billion a year, half its total aid total to all Third World countries, but trade between the two nations declined last year and the Kremlin wants the exchange to become more balanced with an increase of Cuban exports to the Soviet Union.

#90128u0587 05/08/1990 ~United Press International

GENEVA (MAY 8) UPI - The International Red Cross, in an appeal marking World Red Cross Day Tuesday, denounced ''arbitrary and senseless violence'' and called for respect for human life, dignity and civilized values.

''In many parts of the world, the life and dignity of millions of women, men and children are threatened every day by armed conflicts and natural disasters,'' the appeal said.

''It is impossible not to feel similar horror today at the arbitrary and senseless violence committed against so many people in the world.

''In the name of all the people trapped in solitude and anguish, in their jail cells, hospitals, and camps for prisoners and refugees ... in the name of all those who are suffering from wounds, from the loss of a father or mother, or a husband, a wife, or a child ... we call upon all citizens, peoples and governments of the world to protect human life and dignity.''

The International Red Cross comprises two organizations: the all-Swiss International Committee of the Red Cross, which is guardian of the Geneva War Conventions, and the League of Red Cross and Red Crescent Societies, which coordinates activities of the current 149 national agencies.

Both are located in Geneva.

''The life of every human being is unique and irreplaceable,'' the joint appeal said. ''The life of every human being must be respected and protected against the ravages of man and nature. Without such values and universal principles, there is no proper human life, society or

civilization.''

-30- 1710
#90128u0600 05/08/1990 ~United Press International
BANGKOK, Thailand (MAY 8) UPI - Vietnamese police have arrested an American business consultant and publisher, holding him without charge for 18 days so far, family and diplomatic sources said Tuesday.

The sources said Mike Morrow, an independent publisher and business consultant with long experience in Vietnam, was arrested in Ho Chi Minh City (formerly Saigon) on April 20.

''We have sent many telexes, but all the Vietnamese will tell us is that he has been arrested for violation of Vietnamese laws,'' said Morrow's Thai wife, Paijong. ''They won't say what laws or how long he will be held.''

Paijong said Morrow, originally from Seattle, was arrested while accompanying a French businessman for talks on the possibility of building a hotel in Vietnam.

''He has been held incommunicado,'' she said. ''I am very worried.''

She said Morrow was traveling on a proper business visa and had been picked up only three days after entering the country.

U.S. and Vietnamese diplomatic sources confirmed Morrow was being held and diplomatic efforts were under way by U.S. and Thai officials to seek clarification of his status.

The United States has no diplomatic representation in Vietnam, but officials said contacts were made through the two embassies in Bangkok.

Morrow, a Vietnamese-speaking former journalist and former publisher of the Hong Kong-based magazine Petroleum News, was expelled from Vietnam in the 1970s by the U.S.-backed government of South Vietnam.

Following the communist victory in 1975, he returned frequently to seek information on business prospects in Vietnam.

He currently owns and operates the small Asia 2,000 publishing house and also carries out import-export trading.

Morrow's arrest came amid internal political wrangling over the pace of reform in Vietnam.

Vietnamese sources said security authorities were concerned by the sharp

increase in foreigners visiting and living in Vietnam.

''The security people are concerned that the changes are getting out of hand and certain departments have taken measures to regain control,'' one source said.

A foreign businessman in Vietnam said security officials have recently carried out early morning checks at the homes of some foreigners to see that their papers were all in order.

A British journalist was detained two days last month, diplomatic sources said, because he visited Vietnam for journalistic activities on a tourist visa and then overstayed that visa.

#90128u0704 05/08/1990 ~United Press International

(MAY 8) UPI - President Bush welcomes Bolivian President Paz Zamora to the White House today for a meeting on strategy in the war on drugs.

Both leaders want to escalate the war against South American cocaine cartels... but they seem to differ on strategy.

The Bush administration wants Bolivia to militarize its crackdown against drug producers and traffickers... but, so far, Paz Zamora has rejected the idea.

The Bolivian leader also wants economic efforts to help tens of thousands of peasant farmers break away from a one-BILLION 500-Million-dollar-a-year coca crop. Bolivia has implemented an aggressive crop substitution program that features paying farmers two-thousand dollars for every two-and-a-half acres to rip out coca and plant other crops like flowers and oranges.

Aides to Paz Zamora say the Bolivian president may seek more backing in the form of a hefty and immediate increase in U-S financial aid.

Bush administration officials are reluctant about such an increase.

Coca has been grown in Bolivia for centuries and used in traditional medicine. But since the 1970's, most of the plant has gone to produce cocaine, with much of it shipped to the United States.

Soviet President Gorbachev says his efforts toward a more democratic Soviet Union have been misappropriated by nationalists.

Speaking yesterday at the Kremlin, Gorbachev told a group of veterans that nationalists are trying to use his notions of glasnost and perestroika to justify their selfish and sometimes separatist goals.

But Gorbachev reiterated that he sees the objectives of nationalists as ''futile'' efforts destined to wind up in a ''deadlock'' with Moscow.

The official Soviet news agency Tass says Gorbachev assured his audience that his system of political and economic reforms will allow the Soviet Union to ''solve the difficult problems facing it.''

Moscow has spent great amounts of energy addressing independence drives in the Baltic republics of Lithuania, Estonia and Latvia. Several other regions have also expressed nationalist sentiments.

#90128u0714 05/08/1990 ~United Press International

(MAY 8) UPI - Big day at Cape Canaveral today... as NASA managers, flight controllers and launch team conduct a shuttle disaster simulation. The unprecedented drill is intended to test internal communications and contingency planning.

William Lenoir, NASA's associate administrator for space flight... said in a letter ordering the drill that it's inteded to check management response to the loss of vehicle and loss of crew.

Engineers plan to work through a mock countown and launch starting this afternoon. At some point during the imaginary shuttle's climb to orbit... a major failure was scheduled to occur, although the nature of the mock malfunction was kept secret to add realism to the simulation.

One possible scenario would involve simulating the premature shutdown of one or more main engines... an event that would set up a ''return-to-launch-site'' abort or a crew bail-out over the Atlantic Ocean.

The news media will be absent from the test. NASA wants a strictly internal affair... and reporters are NOT allowed to listen in as it happens.

As one official put it- quoting here- ''We don't want to have somebody who doesn't know what's happening'' believe the mock crisis is real.

Two more such disaster simulations are planned before the end of the summer.

A published report in Los Angeles says Ferdinand and Imelda Marcos forked over Millions of dollars in a desperate last-ditch attempt to retain power in the final days of their regime.

The report cites documents seized from the Philippine presidential palace.

They indicate the Marcoses dispensed more than eight-and-a-half-Million dollars in cash while President Marcos campaigned against Corazon Aquino in 1986.

According to ledger entries, the Marcoses handed money over to people ranging from an accused political assassin to a an avowed communist to each member of the presidential press corps.

Also among the alleged recipients were members of the agency responsible for investigating election fraud following the violence-fraught 1986 vote.

The ledgers cited in the L-A report resemble those called upon by prosecutors in the fraud and racketeering trial of Imelda Marcos in New York.

#90128u0887 05/08/1990 ~United Press International

WEST BERLIN (MAY 8) UPI - Forty-five years after Germany's World War II defeat and the liberation of Europe, Jews honoring Holocaust victims gathered Tuesday near a lakeside mansion where jovial Nazi officers concocted the ''final solution'' in 1942 over drinks.

''Cry? One must not cry here,'' Nobel Prize winner Elie Wiesel said in a declaration read at the ceremony of remembrance. ''If you begin, you will not stop.

''How many tears does one shed for thousands of communities? How long does one lament the death of tens of thousands, of hundreds of thousands of innocent, abandoned, forsaken victims?''

The statement by Wiesel, who was not present, was read by Heather Harris, president of the World Union of Jewish Students. She called the villa on Lake Wannsee ''a site marked by evil and maladiction'' and Wiesel said the Wannsee mansion was where the final solution was drafted.

''If only the walls could speak,'' Wiesel said. ''If only the trees and clouds could testify. We need to hear them, for most German men and women in the past refused to speak, refused to remember.''

The World Jewish Congress decided to hold its three-day conference in West Berlin in conjunction with the 45th anniversary of the collapse of Nazi Germany and Victory-in-Europe Day, when the Allied powers accepted the German surrender.

But the decision sparked a controversy in the Jewish community, with some people boycotting the session and others declining to return to the city where the Holocaust was designed.

At the lakeside ceremony, Weisel's declaration said 12 senior Nazi officials met Jan. 20, 1942, in the 30-room mansion on Lake Wannsee in what is now the American sector of Berlin to plan the ''final solution of the Jewish question.''

As a result, millions of Jews were killed, many in the gas chambers of concentration camps.

Among the senior Nazi officials was Adolf Eichmann, who was to say in his 1962 trial in Israel that it was a jovial get-together. Waiters served so many drinks that by the end everyone was talking at once, he recalled.

''All the participants were highly satisfied and happily supported the decisions reached at the meeting,'' he said. ''Like Pontius Pilate, I could wash my hands in innocence.''

Many Jews criticized the decison to hold a memorial ceremony at the Wannsee mansion, but it was defended by Edgar Bronfman, the Canadian president of the World Jewish Congress.

Bronfman has said many Jews declined to attend because of the ''anguish and pain'' that Berlin signifies.

''I understand the intensity of their anger and bitterness, but we are here for a reason,'' he said. ''We are here because we have something to say to the new Germany.''

Bronfman, who visited the room in the mansion where the Nazi leaders met, said, ''God turned his countenance away from this place as he did from Auschwitz.''

Heinz Galinski, a concentration camp survivor who is chairman of the Central Council of Jews in Germany, expressed regret the anniversary of the Nazi defeat is not widely commemorated.

''It is shameful and tragic that so few commemorate this day here and in Europe,'' he said. ''This should be a day of memory for all humanity, for a Nazi victory would have meant slavery for all peoples.''

The ceremony was attended by West Berlin Mayor Walter Momper, East Berlin acting Mayor Christian Hartenhauer and Wolfgang Ullmann, deputy East German parliament speaker.

At the end of the ceremony, the Israeli national anthem was sung.

In East Berlin, the East German parliament held a special session to commemorate all the victims of World War II.

Speaker Sabine Bergmann-Pohl said in a speech that East Germany accepts responsibility for ''the humiliation, expulsion and murder of Jewish people, for the suffering that in the second World War, Germany inflicted on the nations of Europe.''

She pledged Germany's neighbors can be certain a unified Germany never again will adopt a policy of violence, but will live in peace with all peoples.

Bergmann-Pohl, who is acting East German chief of state, laid wreaths at the Soviet war memorial in East Berlin's Treptow district and at a memorial to victims of Nazism in the Friedrichshain district.

#90128u0889 05/08/1990 ~United Press International

(MAY 8) UPI - Stock prices rose marginally Tuesday on selective buying of electrical and high-technology issues on the Tokyo Stock Exchange for the fifth consecutive session to record gains.

The key Nikkei Stock Average of 225 selected issues, which was up 782.63 Monday, inched up 14.31 to close at 30,9760.58. It was the first time this year that the Nikkei was up for five sessions in a row.

The Tokyo Stock Prices Index of all major listed stocks, which gained 48.68 points Monday, also climbed 7.11 points to 2,303.60. An extimated 750 million shares changed hands, compared with 671.5 million shares Monday.

Investors bought electrical and high-technology issues, including Sanyo and Pioneer which had recorded declines in recent sessions, brokers said. Buying in these sectors drove the Nikkei up, they said.

Profit taking after Monday's rally had pushed prices down in morning trading. Bank shares, constructions and securities led the decline.

Elsewhere in Asia, prices lost ground on the Hong Kong Stock Exchange on profit taking and a rumor that Chinese leader Deng Xiaoping had died.

The Hang Seng Index shed 5.33 points to end the day at 2,953.58. The loss followed a gain of 11.94 points Monday.

Volume was a moderate 1.23 billion shares, compared with 1.81 billion shares traded Monday.

"Stocks opened higher in the morning on the strength of the market in New York," said Albert Leun, an analyst with ChinTung Investments. "But there

was some profit taking in the afternoon, and just before the market closed a rumour spread that Deng Xiaoping had died."

Trading was heavy in the first 15 minutes but retreated by mid-morning. Profit taking continued throughout the session, brokers said.

Utilities were down 6.52 and Financials lost 7.02 while Industrials gained 7.24. Properties lost 33.15.

Prices closed mixed on the Singapore Stock Exchange with profit taking eroding earlier gains.

The key Straits Times Industrial Index, which rose 34.60 Monday, gained 1.95 points to 1,516.43.

Bolstered by advances in New York and Tokyo, analysts said the market was finally seeing a technical rally following weeks of doldrums.

Brokers said United Industrial Corp.'s takeover bid for Singapore Land contributed to the advance, with investors confident the local real estate market may not have peaked. But some dealers said it was premature to say if the market had turned around.

The narrower All Singapore Index fell 0.19 to 418.35. The index had gained 10.17 points Monday. Turnover was 72.95 million shares, compared with a high 101.2 million shares Monday.

Gainers included Singapore Airlines (foreign), ASEAN Fund, Overseas Chinese Banking Corp. (foreign), Oriental Holdings, and CK Tang TSR.

Losers were Seaview, Shangri-la, Overseas United Enterprises, Golden Plus, Singapore Press (foreign), and United Overseas Bank.

In Australia, stock prices were down slightly on the Sydney Sharemarket after failing to maintain Monday's strong rally.

The key All Ordinaries Index closed down one point to 1,476.9, after gaining 16.4 points Monday. Turnover was a low 57.4 million shares, down from about 100 million Monday.

Among the industrial blue-chips, Elders IXL rose during trading to $1.98 but retreated later to finish at $1.94. News Corp. again was a leader, gaining five cents to $10.25.

Other winners included Comalco, up eight cents to $3.89, Mayne Nickless, up eight cents to $5.58, and Pacific Dunlop, up two cents to $4.80.

Among the losers were Coca-Cola Amatil, down ten cents to $9.70, CSR, down

six cents to $4.96, and Email, down five cents to $3.10.

In the mining sector, WMC fell five cents to $4.70 and MIM was down one cent to $2.15, while CRA held unchanged at $11.40.

(MAY 8) UPI - Voters in four states go to the polls today to determine candidates for November elections. Among the more notable races is in Ohio where Republican Representative Don Lukens running for his political life. Lukens- who was convicted of a misdemeanor last year for having sex with a 16-year-old- faces stiff competition from three candidates in his primary. During the next five weeks, 22 state will hold primaries.

Capitol Hill Democrats are weighing the sincerity of President Bush's stated commitment to discuss all options to reach a compromise for the fiscal 1991 budget. The White House says ''anything is available for discussions.'' But presidential spokesman Marlin Fitzwater says Bush is still true to his campaign promise of ''NO new taxes.'' Senate Democratic leader George Mitchell says there is NO consensus among Democrats for a budget summit.

NATO Secretary-General Manfred Woerner says international security would be best-served by NOT making a united Germany nuclear-free. Woerner says renouncing nuclear weapons is NOT an option at this point. Woerner- who is to travel with Defense Secretary Cheney to Alberta, Canada, later today for a NATO ministerial meeting- says a minimum amount of nuclear deterrence is needed for global security.

West German Foreign Minister Genscher says the Western part of a single German state will remain affiliated with NATO. Speaking on national radio, Genscher yesterday said such a move will occur even if Soviet troops have NOT withdrawn from the eastern section of Germany. Genscher refused to elaborate on his statement, even under direct questioning of Moscow's opposition to NATO membership of a unified Germany.

TOKYO (MAY 8) UPI - Japan's imported car sales for April soared 26.1 percent over a year ago to a record 20,142 units, the Japan Automobile Import Association said Tuesday. The association said the hike extended the string of consecutive monthly rises to 76.

Sales of large passenger cars with engine capacity of 2,000 cc or more, increased 19.9 percent to 10,074 units while those of subcompact vehicles jumped to 9.820 units, up 31.9 percent.

West Germany continued to dominate the market with sales of 11,755 units, up 9.1 percent from a year ago, covering 58.4 percent of total sales. Sales of U.S.-made automobiles increased to 2,188 units from 2,003 in April 1989.

#90128u0925 05/08/1990 ~United Press International

(MAY 8) UPI - The Bush administration is gearing up for a drive to dilute federal anti-trust laws. Yesterday, Commerce Secretary Mosbacher and Attorney General Thornburgh announced the White House will support legislation to reduce anti-trust liabilities faced by companies involved in joint production deals. Current regulations call for offenders to face triple penalties. The Bush administration wants to limit penalties to ''single damages.''

Anti-abortion activist Kathleen Bieke says she'd rather go to jail than pay a 150-dollar fine... so that's exactly where she went last night, just days before her first child is due. Bieke was arrested last year when she tried to forcibly restrain women from seeking abortion at a suburban Detroit clinic. Bieke says she chose jail over the fine because of her Christian beliefs.

Washington, D-C, Mayor Marion Barry suffered a setback yesterday during pre-trial maneuvering related to drug possession charges he faces. A federal judge in Washington allowed prosecutors to file documents that cite forensic tests which show Barry had used cocaine ''repeatedly'' during the month and a half prior to his January 18th arrest for possession of cocaine. Barry's lawyer argues that Barry was set up.

Some 20-thousand people in Winston-Salem, North Carolina, lined city streets yesterday to catch a glimpse of a scantily-clad young woman who mounted a steed to protest a 41-percent property tax increase. The demure, unidentified woman galloped through city streets at a pace slow enough to allow her long blond locks to keep her essential parts covered. An organizer of the ride says he hopes it will inspire dialogue to reduce the hefty tax hike.

MANILA, PHILIPPINES (MAY 8) UPI - Defense lawyers stormed out of a military court Tuesday at the start of the trial of 21 officers accused in the December coup attempt against President Corazon Aquino and the bench delayed the proceedings for a week.

The lawyers claimed the order creating the tribunal was not signed by the proper authority.

The trial of two generals, a colonel, nine lieutenant colonels, three majors, five captains and a lieutenant began Tuesday amid heavy security in a building next to the maximum-security cell at suburban National Police headquarters.

The 21 face charges of mutiny, murder and misconduct and could be sentenced to life in prison. They are the first group of soldiers to be

tried for the Dec. 1-9 coup attempt in which 119 people were killed and about 600 wounded.

Defense lawyers Tuesday attempted delaying the trial on the grounds that the order creating the court-martial was invalid. The court rejected the request and the two dozen civilian lawyers walked out on the proceedings.

''They might as well line them (the accused) up against the wall and shoot them,'' defense lawyer Alfredo Lazaro said.

''We feel the trial is being rigged,'' lawyer Manuel Barcelon said.

The walkout left only three military lawyers to defend the accused. Those lawyers moved to defer the trial until May 15 to allow them to prepare better for the case in light of the departure of civilian counsel.

The court agreed to the motion.

Defense lawyers had argued that the order creating the seven-man General Court Martial No. 14 was not signed by Armed Forces Chief Gen. Renato de Villa but by Col. Jorge Agcaoili. The lawyers said under the law, only De Villa, Aquino and the National Police chief are empowered to form military courts.

The prosecutors later presented a note - not a formal letter - from De Villa directing the creation of the court-martial, but the lawyers rejected it and moved to delay the hearing for a week to allow them to raise the issue to the Supreme Court.

Jeep full of heavily armed soldiers stood guard around the Counter Intelligence Command building adjacent to the maximum-security prison where the trial of the officers, led by Brig. Gens. Marcelo Blando of the army and Jose Commendador of the air force, was being held.

''This is worse than a kangaroo court,'' Commendador said as he left the courtroom.

The accused, who were all in uniform, looked defiant during the proceedings and would occasionally burst into hoots and applause when their lawyers argued their points, prompting the court to call for order.

Djyron Sarroza, 5, son of 1st Lt. Joey Sarroza, came dressed in a military uniform and carrying a placard that said ''Future Young Officers Union member,'' referring to an underground military group.

TOKYO (MAY 8) UPI - Japanese investors were expected to buy about 30 percent of the bonds in U.S. Treasury's refunding auctions this week, analysts said Tuesday.

"Considering every positive and negative factor, the Japanese investment in the U.S. treasury bonds this time will remain at about the same level, 30 percent," said Tetsuya Taura, chief director of foreign exchange department of Sumitomo Bank.

The Japanese have been steady and substantial customers at the quarterly U.S. Treasury auctions for the past several years, purchasing between 20 percent and 45 percent of newly issued Treasury securities. Japanese investors usually buy about 30 percent of new Treasury bonds, and analysts said there should be no major change this week.

"There is some concern about the Japanese involvement in this week's auction because of the fall U.S. bond yields today and yesterday," said Masakazu Kimura, chief dealer of Dai-Ichi Kangyo Bank. "But that is a small factor," said Kimura, who also predicted around 30 percent Japanese purchase of the bonds.

"The foreign currency market seems to be stabilized for the time being and anticipation of a U.S. interest rate hike is sagging," said Taura. "Those favorable market factors will encourage the Japanese buyers," he said.

NEW YORK (MAY 8) UPI - The troubled Federated Department Stores Inc. has a new problem - the landlord of its flagship Bloomingdale's store is pressing for eviction.

B. Bros. Realty Limited Partnership, owner of the site that houses Bloomingdale's flagship store in Manhattan and its main warehouse in Long Island City filed a motion April 17 seeking relief under bankruptcy laws in order to terminate Bloomingdale's lease, according to an annual report filed May 4 by Federated with the Securities and Exchange Commission.

B. Bros filed its claim with the Southern District of Ohio Bankruptcy Court, which is overseeing Federated's reorganization under the Chapter 11 Bankrputcy Code.

Federated, a subsidiary of Toronto-based Campeau Corp., filed for protection under Chapter 11 of the Federal Bankruptcy Code on Jan. 15 along with sister retailer Allied Stores Corp. Chapter 11 allows a company to delay payments to creditors while it reorganizes its operations.

In its filing, B. Bros. alleged that Federated, in creating an entity

called Bloomingdale's Inc. in 1988, transferred its interests in the leases for the two sites without B. Bros.' consent. This transfer, according to B. Bros., violated the provisions in the leases. Federated said the claim is without merit and that the protective provisions of the bankrupty code should not be lifted.

A source aligned with Federated who is close to the case said bankrupty law does not offer claimants relief unless they are suffering economic harm. This source said "the rents (paid from Federated to B. Bros.) have been current and B. Bros. has suffered zero economic harm, so what they are doing is seizing upon a technicality."

#90128u1114 05/08/1990 ~United Press International

PITTSBURGH (MAY 8) UPI - Mellon Bank is seeking a preliminary injunction in federal court to halt the state Insurance Department from going ahead

with charges the bank illegally overcharged some auto loan customers for insurance coverage.

Mellon Monday asked for the injunction in U.S. District Court. Mellon contended the Insurance Department's plan is prempted by federal law because Mellon is a national bank and falls under the "exclusive jurisdiction" of the U.S. comptroller of the currency.

"The serious criminal and civil penalties and other relief that (the department) now seeks to impose upon Mellon impinge directly on the powers of national banks under the National Bank Act," Mellon said.

The act allows banks "to lend money on the security of personal property and the incidental power to protect such loans by the purchase of insurance," Mellon said.

Additional proceedings by the Insurance Department against Mellon would cause "irreparable harm" to the bank's $1.1 billion motor vehicle loan portfolio, Mellon said. The bank said there was a "reasonable probability" it will prevail on its claims of federal jurisdiction.

Insurance Department officials two weeks ago took adminstrative action against Mellon and Transamerica Premier Insurance Co., one of Mellon's prime insurance providers, following a ten-month investigation.

The Insurance Department said coverage paid for by at least 12,000 Mellon auto loan customers was excessive and violated several state laws, including the Unfair Insurance Practices Act and the Motor Vehicle Sales Finance Act.

Mellon and Transamerica were given 30 days to respond to the order, which Mellon maintained was inconsistent with previous department policies. The dispute arose from how Mellon's insurance coverage was imposed on Pennsylvania borrowers when they did not get private insurance. Insurance Department spokeswoman Amy Dugan said the department had not examined Mellon's motion and had no comment.

#90128u1132 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The chairman of the Federal National Mortgage Association, awaiting a financial report card from the government, said Tuesday his organization has plenty of cash and securities on hand to weather an economic downturn.

Fannie Mae chief David Maxwell said the federally chartered corporation that deals in home mortgages and mortgage-backed securities currently has $3.7 billion in capital and plans to raise the amount to $6 billion by

1991. The remaining money will come from regular earnings, Maxwell said.

After a series of "stress tests" to determine whether Fannie Mae could survive a rise in interest rates or increase in mortgage defaults, Maxwell said, "Our capital would be adequate to survive ... with a cushion."

The General Accounting Office and the Treasury Department are expected to release a report on the soundness of Fannie Mae as early as next week as required by the sweeping legislation reorganizing the savings and loan industry.

"You really can't predict what they'll say," Maxwell said at a news briefing. "We've made a strong case to them." But he also said it was "not surprising" that some expect the GAO and Treasury to recommend higher capital requirements.

Although Fannie Mae, with assets of $125 billion and $246 in mortgage-backed securities, is not a bank or a thrift it purchases mortgages from financial institutions that originate the loans to provide a constant source of mortgage funds for home buyers.

Fannie Mae purchased or guaranteed $87 billion in home mortgages in 1989. The average loan was $83,000. "We don't have any (loans) to third world countries. We don't have any strip shopping centers," Maxwell said. "We just have these mortgages."

Maxwell also released a private study headed by former Federal Reserve Board Chairman Paul Volcker that said it appears Fannie Mae could survive a severe economic downturn if it adheres to its capital projections.

The report said Fannie Mae has "expressed its strong conviction" to raise its capital to $6 billion by next year, and that should it reach that goal "we believe that the risk of loss to the taxpeyer due to insolvency of Fannie Mae would be remote."

But the Volcker report also said it did not attempt to independently assess "the reasonableness of Fannie Mae's projections."

#90128u1138 05/08/1990 ~United Press International

ASHLAND, WI (MAY 8) UPI - A woman charged with a seldom-enforced state adultery law can avoid prosecution by performing community service and attending parental counseling sessions under a court agreement.

Donna E. Carroll, 28, was charged under the state law in July after she admitted during a divorce hearing that she had an affair. Her husband, Robert, also admitted to having an affair, but was not prosecuted because

authorities said there was insufficient evidence to prove any violation occurred in Wisconsin.

Donna Carroll, who had pleaded innocent, was to have been arraigned May 15 but Monday a deferred prosecution agreement was filed in Ashland County Circuit Court.

The agreement requires her to attend two months of parental counseling sessions and perfom 40 hours of community service.

She could be prosecuted, however, if she fails to attend the sessions or perform the community service, authorities said.

The agreement was signed Monday by Judge Thomas J. Gallagher, acting circuit judge for Ashland County.

Carroll recently moved from Ashland County to Janesville with her 7-year-old son.

Wisconsin's anti-adultery law makes it illegal for a married person to have sexual intercourse with anyone other than their spouse.

#90128u1148 05/08/1990 ~United Press International

LONDON (MAY 8) UPI - Lithuanian Prime Minister Kazimiera Prunskiene arrived Tuesday to seek help from her British counterpart, Margaret Thatcher, in gaining independence for her homeland from Moscow.

Prunskiene arrived from Washington, where she met President Bush, and immediately began a tight schedule of talks with politicians and officials in London.

The prime minister of the breakaway Soviet republic was scheduled to meet Thatcher Wednesday but there was no official welcome for her at Heathrow Airport, where she was greeted by Lithuanian emigres and reporters.

Prunskiene said in an interview with the British Broadcasting Corp. that she believed Thatcher would be more sympathetic to Lithuania's plight because both politicians were women.

Thatcher could assist because she has had extensive dealings with Soviet President Mikhail Gorbachev, Prunskiene said.

''We feel that Mrs. Thatcher could be a very important mediator both as regarding Moscow and Vilnius and the West,'' the Lithuanian politician said.

Prunskiene said Vilnius was prepared to negotiate but would not revoke its unilateral declaration of independence from Moscow.

The Kremlin imposed a fuel blockade against Lithuania after the declaration. The republic has responded by announcing plans to block exports of meat to the Soviet Union.

Britain, along with most other Western nations, has never recognized the Soviet Union's annexation of the Baltic states in 1940, but has taken a very cautious stance toward Lithuanian secessionism because it does not want to jeopardize its relations with Moscow.

Paul Markevicius, a spokesman for Lithuania House, Vilnius's official representative in Britain, said Prunskiene would welcome any offers of aid from London.

''She did not come over saying, 'I want aid,''' he said. ''We did not initiate this meeting specifically for that. But if that is being provided then so be it.''

Markevicius said Prunskiene's meeting with Bush yielded no concrete support, but her tour was basically intended to explain Lithuania's position to the West and gain some recognition.

She hopes later this week to meet French President Francois Mitterrand and West German Chancellor Helmut Kohl.

In London, Prunskiene was also scheduled to hold talks with Neil Kinnock, the leader of the main opposition Labor Party, and Paddy Ashdown of the centrist Liberal Democrat party.

NEW YORK (MAY 8) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 130.90 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.45-$4.70 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $118.00-120.25 per troy ounce.

Platinum, soft, 99.5 fine, producer - $482.00-$484.00; dealer-approx., $478.00-$481.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $110.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $109.37 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 304.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90128u1203 05/08/1990 ~United Press International
CHARLESTON, WV (MAY 8) UPI - Former Gov. Arch Moore, for nearly two decades the state's most powerful politician, pleaded guilty Tuesday to extorting $500,000 from a coal company and other corruption charges.

Moore pleaded guilty as part of an agreement made last month with federal prosecutors to five public corruption felonies stemming from his third term as governor between 1985 and 1989.

The former three-term governor entered his guilty pleas in U.S. District Court where, nearly three weeks earlier, he was indicted for extortion, tax fraud, mail fraud and obstruction of justice.

Moore, 67, will be sentenced July 10 by Senior U.S. Judge Walter Hoffman of Virginia, who was assigned to the case after West Virginia's federal judges asked to be recused. The maximum sentence is 36 years in prison and $1.2 million in fines.

The five-count indictment claimed the former governor extorted more than $500,000 from a Raleigh County coal operator, failed to report the money on his tax returns and tried to conceal the facts from federal investigators. In addition, he pleaded guilty to violating federal mail laws as it relates to vote-buying during his 1984 campaign for governor.

On the first count, Hoffman asked Moore, ''What is your plea?'' After a 10-second pause, Moore replied in a broken voice, ''Your honor, my plea is guilty.''

Moore subsequently stated ''guilty'' to the other four counts, including the charge that he lied to a federal grand jury this year.

His wife, Shelley, appeared emotional at times.

Moore declined to respond to a reporter's question about ''apologizing to the voters'' who elected him to three terms as governor, 12 years as a

congressman and one-term to the West Virginia House of Delegates.

Following the arraignment, the former governor stopped to shake hands with U.S. Attorney Michael Carey and other federal prosecutors involved in the two-year long investigation against him. He was then led out of the courtroom by federal marshals and again declined comment to reporters.

The decorated World War II veteran was defeated soundly in his bid for an unprecedented fourth term as governor by political newcomer Gaston Caperton of Charleston in 1988.

His arraignment Tuesday came the same day of the state's primary election.

Moore's apprehension was part of an investigation of alleged corruption in West Virginia state government that has resulted in the imprisonment of two former state Senate presidents for extortion and indictments against several other legislators.

His legal troubles follow an earlier skirmish with the U.S. government in 1976, in which Moore was acquitted of federal extortion charges. The charge levied against him centered on an alleged $25,000 bribe for which Moore was expected to exert his influence in gaining approval of a bank charter. The charter was not granted.

(MAY 8) UPI - NASA technicians are scheduled to begin a day and a half procedure today aimed at preparing the Hubble Space Telescope to snap its first picture of the heavens. The so-called ''bootstrap'' process involves beaming computer commands to the telescope to practice positioning it and to focus its wide field planetary camera.

AIDS activists say government-run tests of promising AIDS drugs ignore the needs of some people infected with the deadly virus... especially blacks, women and children. Activists yesterday told the National AIDS commission that minorities, women and children are underrepresented in clinical trials of AIDS medications.

A military panel at North Carolina's Fort Bragg will resume hearings later today against a soldier accused of premeditated murder during the Panamanian invasion. 42-year-old Panamanian native Sergeant Roberto Bryan is charged with killing a Panamanian civilian last December. The hearing will determine if there's enough evidence to warrant a court-martial.

Costa Rican President Oscar Arias Sanchez is to step down from office today. The Nobel laureate became president of the non-militarized Central American nation in 1986. His four years in office have seen him push for

regional peace and the economic development of Latin America.

There are rumblings on Capitol Hill by legislators who want to regulate America's 33-BILLION-dollar-a year diet industry. Yesterday, executives from various weight-loss programs told lawmakers about their successes but admitted that controls are needed to temper exaggerated advertising claims.

#90128u1264 05/08/1990 ~United Press International

HOLLYWOOD (MAY 8) UPI - ''Pretty Woman'' is gaining ground on ''Teenage Mutant Ninja Turtles'' in the box-office race as the comedy topped the rankings for the second consecutive week and closed in on the magic $100 million mark.

The Richard Gere-Julia Roberts modern version of ''Pygmalion'' - in which a Hollywood hooker has replaced the flower girl and a businessman the professor - dropped 5 percent from the previous week to gross $6.8 million but still managed to stay on top at No. 1.

The ''Ninja Turtle'' kiddie flick jangled the till to the tune of $5.3 million, a drop of 23 percent.

In this battle for box-office supremacy, ''Turtles'' leads ''Woman'' by $104.7 million to $90.6 million.

''Turtles'' was showing in 2,330 theaters, compared to ''Woman's'' 1,726 theaters. But then ''Pretty Woman'' has been in release seven weeks, one more than its prime competition.

Trailing the two leaders was ''Tales From the Darkside,'' an anthology of horror stories from Stephen King, Sir Arthur Conan Doyle and Michael McDowell, starring Deborah Harry and James Remar.

Making its debut on 1,535 screens, ''Tale From the Darkside,'' scared patrons out of $5 million.

No. 4 was ''Spaced Invaders,'' a quirky comedy about loser Martians who mistakingly and ineptly attack Earth on hearing a replay of the old Orson Welles radio show version of ''War of the Worlds.''

''Spaced Invaders'' struck for $3.1 million in its second week for a two-week gross of $8.4 million.

''The Guardian,'' starring England's Jenny Seagrove as a bewitching but eerie nanny in a William Friedkin horror story, was No. 5, dropping two clicks and a whopping 46 percent from the previous week. It grossed $3 million for a two-week tally of $10 million.

The only other newcomer to make the top 10 was Dabney Coleman's comedy ''Short Time,'' in which he plays a cop who mistakingly thinks he has only two weeks to live.

''Short Time'' opened in only 557 theaters to gross $1.2 million.

Worth noting: ''Driving Miss Daisy,'' this year's Oscar winner for best picture, remained in the top 10 with a take of $1.5 million playing in 1,120 houses. In its 21 weeks, ''Driving Miss Daisy'' has grossed $98.4 million on its way to the magic $100 million.

North America's 23,000 theaters grossed $62.2 million last week, compared to $70.7 in record-setting 1989. So far this year, the overall box-office tally is $1.46 billion as against $1.32 billion last year.

The top 10, this week's gross, total gross, weeks in release:

1. ''Pretty Woman,'' $6.8 million, $90.6 million, 7 weeks.

2. ''Teenage Mutant Ninja Turtles,'' $5.3 million, $104.7 million, 6 weeks.

3. ''Tales From the Darkside,'' $5 million, 1 week.

4. ''Spaced Invaders,'' $3.1 mllion, $8.4 million, 2 weeks.

5. ''The Guardian,'' $3 million, $10 million, 2 weeks.

6. ''The Hunt for Red October,'' $2.4 million, $102.5 million 10 weeks.

7. ''Q&A,'' $2 million, $5.8 million, 2 weeks.

8. ''Wild Orchid,'' $1.6 million, $5.3 million, 2 weeks.

9. ''Driving Miss Daisy,'' $1.5 million, $98.4 million, 21 weeks.

10. ''Short Time, $1.2 million, 1 week.

#90128u1278 05/08/1990 ~United Press International

JERUSALEM (MAY 8) UPI - A four-man delegation from Antigua met Tuesday with Israeli officials to investigate how a shipment of Israeli arms ordered by the Caribbean nation were diverted to an alleged Colombian drug lord.

The Foreign Ministry provided the delegation with 14 documents concerning the sale of 400 Galil assault rifles and 100 Uzi submachine guns. The

documents included letters signed by the Antiguan Cabinet secretary introducing Maurice Sarfati as ''a special envoy'' of the Caribbean country. Sarfati acted as a middleman in the deal, which was valued at at least $200,000.

In March, Colombia informed Israel the weapons had been found during a raid on the estate of an alleged major drug trafficker.

The Foreign Ministry said the meeting was ''very open and friendly'' and both countries had a ''common interest in finding out exactly what had happened.''

In a statement released Monday night, the Israeli Defense Ministry said the weapons ''were sold under all the usual procedures.''

The Defense Ministry said it had no knowledge whether Yair Klein, head of the Israeli security firm Hod Hahanit, was involved in the deal. Klein, accused in Colombia of training drug cartel hit squads, is under investigation for operating in Latin America without a Defense Ministry permit.

The Antiguan delegation was led by Patrick Lewis, the country's representative to the United Nations. He was accompanied by four American lawyers.

#90128u1291 05/08/1990 ~United Press International

BOSTON (MAY 8) UPI - Researchers fired another salvo Tuesday in a battle of the oils, contending that olive oil and corn oil have an equally beneficial effect on cholesterol levels.

Scientists in California said a study of two types of unsaturated fats contained in the two kinds of oil found no difference in the impact either has on high-density lipoprotein - HDL - the ''good'' cholesterol in the body.

The findings agree with research reported last year in the Netherlands and disagree with several previous studies that suggested the monounsaturated fats in such oils as olive oil were better from an HDL standpoint than the polyunsaturated fats found in corn, safflower and sunflower oil.

While unsaturated fats of both types are vegetable byproducts, saturated fats - the kind that can boost concentrations of artery-clogging cholesterol - are found in dairy products and fatty meats.

Although studies have found that both kinds of unsaturated fats can lower the levels of low-density lipoprotein - LDL - the ''bad'' cholesterol in

the body, some scientists thought polyunsaturated fats also had the undesirable effect of lowering HDL.

However, a study of 39 Mormons who ate diets that were rich either in polyunsaturated or monounsaturated fats found no grounds for olive oil advocates to claim victory.

The study found ''no advantage with respect to plasma HDL concentrations in using predominantly monounsaturated fats,'' said Darlene Dreon of the Lawrence Berkeley Laboratory in Berkeley.

HDL is considered the good form of cholesterol because it appears to clear fat and excess cholesterol out of the bloodstream and ferry it to the liver for processing. LDL is the bad type, because it carries most of the cholesterol in the blood that can build up and block arteries.

The scientists, from Berkeley and Stanford University, divided the 19 men and 20 women in the study into three groups. For two weeks, each of the groups ate a diet that standardized their intake of fat at 30 percent of their total daily food consumption.

Mormons were chosen for the study because they did not smoke, drink coffee or consume alcohol, which could have interfered with the findings by altering lipoprotein concentrations, Dreon said.

For 12 weeks following the initial two-week period, two of the groups ate a diet rich in polyunsatured fats while the other group ate a monounsaturated fat-enriched diet, the researchers reported in the Journal of the American Medical Association.

After 12 weeks, the groups switched diets, spending another 12 weeks eating food enriched with whichever fats they did not initially eat. Other than the fat content, the two diets were equivalent in calories, protein and carbohydrates.

Dreon found that during the study, their HDL levels did not significantly differ from group to group according to which fats they consumed.

The research ''failed to confirm the prevalent view'' that polyunsaturated fats found in corn oil lower HDL levels when compared to monounsaturated fats ''at least when used in reduced-fat, solid-food diets,'' she said.

#90128u1300 05/08/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 8) UPI - The European Community signed trade and economic cooperation agreements Tuesday with Bulgaria and similar but interim accords with East Germany.

East Germany will be incorporated into the 12-nation community after it unifies with West Germany.

The Soviet Union, Hungary, and Poland have previously signed trade and economic cooperation pacts with the EC, and Czechoslovakia signed a similar agreement Monday.

Of the recently democratized countries of Eastern Europe, only Romania has not signed a trade pact with the community, although talks are expected to begin soon.

The agreements call for a liberalization of trade, along with economic cooperation in agriculture, mining, housing, energy and other areas.

''We are very happy about this agreement,'' Bulgarian Prime Minister Andrey Loukanov said of the 10-year pact. ''It is a confirmation of the authentic nature and the irreversibility of the democratic process started in Bulgaria last November.''

Bulgaria is also seeking to join the General Agreement on Tariffs and Trade, the International Monetary Fund and the World Bank.

The prime minister said Bulgaria was ready to start discussions later this year on even closer trade ties with the EC, with eventual EC membership being a ''long-term objective.''

''Certainly, we would not object to such a development,'' he said of membership in the wealthy community. ''But I feel it would not be realistic at this stage to discuss joining the European Community immediately.''

On Monday, Czechoslovakian Prime Minister Marian Calfa said he expected his country would be ready and very willing to join the EC by the end of the century.

East German Economics Minister Garhard Pohl said his country stood ''on the threshold of integration into the EC, which will result from German unification.''

He said Western investment is needed in East German industry, trade and public facilities ''to make our economy more efficient.''

After German monetary union in July, but prior to formal German unification, East German trade must be adapted to EC competition rules.

#90128u1324 05/08/1990 ~United Press International

CHICAGO (MAY 8) UPI - Jury selection began Tuesday in the racketeering and fraud trial of three Chicago Mercantile Exchange Swiss franc traders - the first of 48 people to face trial on charges resulting from an FBI undercover investigation at the CME and the Chicago Board of Trade.

Prosectors contend franc trader Robert Mosky was the kingpin in a band of brokers who rigged trades in the Swiss franc pit to cover their mistakes and line their pockets at the expense of clients.

Traders Danny Scheck and David Zatz are codefendants in the trial. Two other franc traders indicted in the case have pleaded guilty and are expected to testify against the three defendants.

Prosecutors and defense attorneys said they expected to complete jury selection Tuesday and proceed with opening statements Wednesday before U.S. District Judge Ann Williams.

Prosecutors Dan Gilogly, Mark Pollack, and James Fleissner said explaining the complexities of commodities trading - carried out in so-called pits where screaming brokers huddle together executing buy and sell orders with frenzied shouts and hand signals - will be a big part of their job.

And defense attorney Harvey Silets, who represents Scheck, said he will seek to introduce a videotape of the Swiss franc pit during a heavy trading period as evidence that it is too hectic for any kind of organized racketeering scheme to function.

The star prosecution witness will be Randall Jannett, an FBI undercover agent who spent more than a year as a trader in the Swiss franc pit. Other expected witnesses include Swiss franc traders William Walsh and Mark Fuhrman, who have pleaded guilty and agreed to cooperate with prosecutors.

Prosecutors said the objective of Mosky's trade-rigging ring was to allow brokers - who trade on behalf of clients - to avoid losses caused by trading errors.

Mosky and other brokers pressured "locals" - traders who trade exclusively for their personal accounts - to absorb those losses in exchange for future favors, prosecutors said. Those favors took the form of illegal pre-arranged trades - sweetheart deals at the expense of the brokers' clients.

According to court documents, Jannett learned of the sweetheart deals firsthand on Feb. 16, 1988, when Mosky recruited him to take a bad trade off his hands. "Good things happen to those who help out," court papers quoted Mosky as telling the undercover agent. Later, Mosky sold Jannett nine Swiss franc futures contracts on behalf of a client at below the

going rate in a pre-arranged deal.

Mosky, 33, Chicago, is charged with racketeering conspiracy, 28 counts of mail fraud and 51 counts of violating trading rules. If convicted, he could be sentenced to 415 years in prison and fined $12.4 million.

Scheck, 28, of Skokie, Ill., is charged with eight counts of wire and mail fraud and ten counts of violating trading rules. Conviction on all counts could bring a sentence of up to 90 years in prison and a fine of up to $3 million.

Zatz, 43, of Chicago, is charged with six counts of mail and wire fraud and eight counts of violating trading rules. He would face up to 70 years in jail and a fine of up to $2.1 million if found guilty.

To date, the federal probe of the CME and CBOT - the world's two largest futures exchanges - has resulted in the indictments of 47 traders and a clerk on a total of more than 1,500 counts, ranging from racketeering and fraud to lying to federal investigators.

Fifteen of the 48 defendants have pleaded guilty. The remaining thirty defendants - traders in the CBOT soybean pit and the CME Japanese yen pit - face trial this fall.

#90128u1325 05/08/1990 ~United Press International

(MAY 8) UPI - Officials say one sailor was killed and at least 10 were injured this morning in a fire on a U-S guided-missile destroyer off the Eastern seaboard. Navy officials say the fire broke out aboard the U-S-S Conyngham, which carries about 380 personnel, including 20 officers. Two Navy vessels and three Coast Guard cutters are assisting the Conyngham, which was on routine maneuvers about 80 miles off the coast when the fire started. Five seriously injured in the blaze are being transported ashore by helicopter. Navy officials say they'll likely be taken to Norfolk-area hospitals.

Communities along the Arkansas River are bracing for what could be the state's worst flooding in 60 years. Officials say the Arkansas River is rising and appears ready to crest today in Little Rock... and tomorrow in Pine Bluff, about 40 miles downstream. NO deaths or serious injuries have been reported so far in the state.

A published report says the Bush administration is making plans to accelerate the savings and loan industry cleanup. The report says the government plans to drastically cut the price of real estate it has inherited from the nation's failed thrifts. Some real estate interests and industry sources are warning that price cuts on government land could hurt

private property values.

Family and diplomatic sources say Vietnamese police have arrested an American business consultant and publisher last month and have been holding him without charge for 18 days. The sources say Mike Morrow was arrested in Ho Chi Minh City, formerly Saigon, on April 20th. Morrow is an independent publisher and business consultant, reportedly with long experience in Vietnam.

#90128u1350 05/08/1990 ~United Press International
SAN JOSE, COSTA RICA (MAY 8) UPI - Thousands of people packed a soccer stadium Tuesday to witness the inauguration of Rafael Angel Calderon as the successor to Oscar Arias as president of the only Central American country without a military.

Arias, a Nobel Peace Prize winner, was to hand over power to Calderon in a four-hour ceremony that began at 9 a.m. in the outdoor soccer stadium packed with an estimated 20,000 people.

Nicaraguan President Violeta Chamorro arrived Tuesday morning for the

ceremony in her first trip out of her country since taking office April 25. She replaced the Sandinista-led government that had fought a civil war against U.S.-backed Contra rebels.

First lady Barbara Bush, four other Central American presidents and President Carlos Andres Perez of Venezuela were among the foreign dignitaries who arrived Monday.

Unlike recent changes of government in both bordering nations - Panama and Nicaragua - the transfer of power in Costa Rica comes amid peace and relative prosperity. Costa Rica abolished its army in the late 1940s after a brief civil war.

''The government of El Salvador would like the Costa Rican government to continue its role of promoting peace in the region,'' Salvadoran President Alfredo Cristiani said Monday after arriving in San Jose.

Cristiani said the approach of talks with leftist Salvadoran rebels has given him hopes of stability, and ''we now can have a new hope for economic aspects in El Salvador.''

''This is an age where all of Latin America is following the path toward democracy,'' he said. ''Cuba is the exception.''

Panamanian President Guillermo Endara, who took power amid a U.S. invasion of Panama in December, said Costa Rica is a model for all Central America. ''We want to have the same experience. Democracy to us is of the greatest importance,'' Endara said.

Bush arrived Monday night and delivered a personal letter to Calderon from President Bush. She said she wanted to ''join all Costa Ricans in celebrating these most precious democratic activities.''

Calderon, the son of a former president, was elected Feb. 5 in a narrow victory over ruling party candidate Carlos Castillo.

Calderon, 40, of the Social Christian Unity Party, has promised to erase Costa Rica's $4 billion foreign debt and to build housing for the poor.

He also promised to stay along the peaceful path of his predecessor, with major foreign policy changes viewed as unlikely.

Calderon has vowed to take on widespread corruption that has plagued the Costa Rican police and government, documented in an internal investigation last year.

Arias greeted the arriving foreign delegations at San Jose's international airport Monday and was congratulated by most of them for the four years he

spent pressuring other Central American presidents to negotiate regional peace plans.

The 1987 Nobel laureate told United Press International in an interview Monday that with his goals of regional peace appearing near, ''The emphasis should focus on the economic development of the region.''

Arias, who was prevented from seeking another term under the Costa Rican constitution, defeated Calderon in 1986 elections.

#90128u1388 05/08/1990 ~United Press International
GENEVA (MAY 8) UPI - U.S. Health Secretary Louis W. Sullivan said Tuesday poor and minority Americans have serious health problems despite the $600 billion the country spends each year on health care.

Sullivan, in an opening statement to the May 7-19 annual assembly of the World Health Organization meeting in Geneva, said health continues to improve for the U.S. population as a whole, with longevity increasing and infant mortality declining.

''However, we realize that our efforts are far from complete,'' he told the organization, known by its acronym WHO. ''We are working to reduce the high cost of health care and to provide affordable access to care for all of our citizens.

The WHO meeting was marked by intense back-room maneuvering over a Palestinian Liberation Organization demand that the 167-nation United Nations agency recognize its self-declared Palestinian State - a move that would mean the automatic loss of crucial U.S. funds.

Washington warned Monday it is obliged by law to immediately cease all financial payments to any organization recognizing the self-declared ''State of Palestine.''

WHO Director-General Hiroshi Nakajima appealed to members Tuesday to avoid a decision on Palestinian membership.

''I stress the fact that, by its very mandate, WHO is a technical agency, not a political one,'' Nakajima told the assembly. ''We should use political means to attain health objectives but not health issues to serve political ends.''

The U.S. argument, supported by most Western countries, is that no such state as Palestine exists under international law because it has no territory, no capital and no frontiers.

WHO relies on the United States for 25 percent of its regular budget as well as large contributions to special projects.

Sullivan did not mention the contentious Palestinian issue in his speech, focusing instead on the state of U.S health care.

''Currently, in the United States, health care costs our citizens well over $600 billion a year,'' he said. ''But 31 million Americans do not have proper health care coverage.

''Too many American children suffer from malnutrition, poverty and disease.''

''In the United States, we also have a great disparity in health status. Our poor and minority populations have serious health problems in virtually every health category,'' he said.

''Infant mortality is still twice as high for the black population as it is for the white population. Cancer, heart disease and stroke are also higher for our poor and minority citizens,'' he said.

The secretary of the Department of Health and Human Services also said more than 128,000 Americans have been diagnosed with AIDS, more than 78,000 have died and more than 1 million are believed infected with the HIV AIDS virus.

The conference is scheduled to begin debate Thursday afternoon on the issue of Palestinian membership.

If that were approved, the United States would automatically cease paying its 25 percent share of the regular WHO budget and contribution to the Program on AIDS - respectively $78 million and $25 million last year.

Nakajima has warned in intensive backroom maneuvering that loss of American money would ''cripple'' WHO and its global fight against disease and malnutrition.

Despite losing last year and ignoring private appeals to withdraw because of the danger to WHO, the PLO renewed its membership demand for its self-declared ''State of Palestine.''

#90128u1398 05/08/1990 ~United Press International

HOUSTON (MAY 8) UPI - Texas Air Chairman Frank Lorenzo has lost control of financially ailing Eastern Airlines, but has not ruled out the chance of one day resuming a role in the carrier's management, it was reported Tuesday.

Lorenzo also told the Houston Chronicle he has not given up the idea of Eastern and its sister carrier, Continental, being merged into one airline.

A federal bankruptcy judge nearly three weeks ago removed control of the airline from Lorenzo and turned it over to Martin Shugrue, a former Continental president and Lorenzo associate.

''Right now, we're rooting Marty on and with all our strength focusing on Continental,'' Lorenzo said.

Despite Shugrue's appointment, Texas Air officials have not lost touch with Eastern or given up attempts to help the subsidiary, he said.

''We're going to be as helpful as we can to see that the operations improve,'' Lorenzo said. ''At some point, there will have to be a (bankruptcy) reorganization plan. What role, if any, we play in it, we'll

have to see.''

Part of Texas Air's involvement may be the payment of $280 million to compensate Eastern for transactions between Texas Air and Eastern before the carrier filed for Chapter 11 bankruptcy protection more than a year ago.

Court-appointed examiner David I. Shapiro, who investigated transactions between the airline holding company and Eastern, concluded Texas Air had shortchanged Eastern by $285 million to $403 million.

Texas Air originally agreed to a settlement in which it would pay Eastern $280 million. But the deal was thrown into limbo when Texas Air lost control of Eastern.

''We're still anxious to see some kind of settlement,'' Lorenzo said, but he declined to reveal whether Texas Air still would agree to pay such a sum.

Lorenzo noted the $280 million settlement included $107 million cash and $173 million in transactions, such as aircraft purchases, to which Texas Air previously agreed.

Texas Air also may have to pay hundreds of millions of dollars for Eastern's pension plan. Texas Air officials estimate the company owes Eastern's pension fund $475 million, while Eastern creditors have set the figure closer to $980 million.

Lorenzo said the company also is trying to negotiate a settlement on that issue.

#90128u1414 05/08/1990 ~United Press International

GENEVA (MAY 8) UPI - Tehran, Tokyo and Libreville are the world's most expensive major cities with New York only in 32nd place, an international cost-of-living study said Tuesday.

The study to help governments and companies determine allowances for executives was based on prices for 151 products in March and compiled by the consulting firm Corporate Resources Group.

New York was rated at 100 points on the index and 32nd among the 83 cities covered.

Tehran, because of an overvalued currency, was by far the most expensive at 192 points or 92 percent dearer than New York.

Tokyo placed second with 150 points, Libreville third with 143 points.

Of the world's 15 most expensive cities, seven were in Europe - Oslo, Helsinki, Zurich, Geneva, Copenhagen, Stockholm and Paris.

Also more expensive than New York were Brussels, Tel Aviv, Madrid, Rome and London. Other cities above New York, in order, were: Brazzaville 138, Oslo 135, Osaka 133, Helsinki 130, Dakar 126, Abidjan 122, Geneva 121, Copenhagen 119, Stockholm 117, Taipei 116, Paris 111, Lyon 109, Brussels 109, Tel Aviv 107, Milan 107, Luxembourg 106, Dublin 106, Barcelona 104, Madrid 104, London 103, Munich 102, Lome 102, Toronto 101. Duesseldorf, Beijing and Lima were rated at 100 points but fractionally above New York.

Tokyo and Osaka last year were the most expensive cities but Japan has become cheaper because of the fall in value of the yen, the study said.

West German cities are among the lowest in Europe, it said, because the strong deutschmark keeps down the price of imported goods.

''Latin American cities, which closely follow the U.S. currency, rank among the less expensive because the continuous decline of many Latin American currencies ensures that they do not become more expensive despite the high level of inflation,'' the study said. Quito, the capital of Ecuador, was ranked as the world's cheapest city with just 40 points - putting it 60 percent below New York. Third and second from bottom were Asuncion and Budapest with 52 points each.

With New York always rated at 100 points on the scale, eating at home was found to be the most expensive in Tehran at 249 points with Tokyo second at 165 and Libreville third at 160 points.

Alcoholic beverages and tobacco were costliest in Oslo (198), Helsinki (183), and Algiers (170), while automobiles cost the most in Lima (249), Abidjan (184) and Tehran (173).

The cheapest food was in Quito (34), Asuncion (37) and Bombay (41), alcohol and tobacco in Budapest (53), Harare (56) and Asuncion (57), and automobiles cost the least in Cairo (55), Quito (57) and Budapest (67).

Major cities cheaper than New York included Frankfurt (98), Sydney (97), Amsterdam (96), Chicago (96), Seoul (95), Washington (95), Los Angeles (94), Hong Kong (93), San Francisco (93), Boston (93), Houston (92), Miami (92), Montreal (91), Singapore (85), Athens (85), Abu Dhabi (83), Lisbon (77), Sao Paulo (75), Rio de Janeiro (74), Jakarta (73), Bangkok (72), Karachi (72), Lagos (70), Nairobi (70), Mexico City (68), Istanbul (68), Johannesburg (66), Santiago (65), Cairo (62), Bogota (58), Buenos Aires (56), Harare (56), and then Asuncion, Budapest and Quito.

#90128u1416 05/08/1990 ~United Press International
NEW YORK (MAY 8) UPI - The American Ballet Theater, operating under new management, has opened its 50th anniversary season with a gala tribute to its glorious past.

The nation's oldest major ballet company began an eight-week engagement Monday at the Metropolitan Opera House with a $250-a-seat benefit featuring performances by old and new stars, film clips of its history, and reminiscences by co-director Oliver Smith and choreographer Agnes de Mille.

It ended with the entire company dancing an imperial polonaise against a curtain of golden tinsel, showers of golden balloons, a standing ovation and not a few tears.

Joining the company on stage for curtain calls was Jane Hermann, co-director with Smith and key figure in the company's future.

Hermann was all smiles as befits a woman of determination and optimism. The burden of giving the company new direction in the 1990s and getting it to live within its annual budget, currently $18 million, is firmly on her shoulders. Smith is just there to represent historical continuity and dispense wisdom.

A pre-eminent theatrical designer, Smith has been associated with ABT almost since its beginning in 1940s and was co-director with the late Lucia Chase from 1945 to 1980. He returned to the post with Hermann last fall after artistic director Mikhail Baryshnikov departed in a dispute over personnel and expenditures, which had mounted to $23 million annually leaving the company in debt.

Hermann had been hired away from the Metropolitan Opera to put the company back on its financial feet but is now in the position of making artistic decisions. This was something she was used to doing, and doing brilliantly as the Met's booker of outside ballet and opera attractions to fill the house between Met seasons.

She has made it clear that she plans to take ABT back to its roots, reviving dances by De Mille that established the American tone of the company and ballets by the late Antony Tudor - the so-called ''artistic conscience of ABT.'' She also intends to bring in new choreographers such as Jiri Kylian of the Netherlands Dance Theater and schedule more works by long-established choreographic masters, Sir Frederick Ashton for one.

Hermann will continue to present full-length productions of spectacular ballets of Russian origin, a specialty of the company since 1965, although

she will dump one of Baryshnikov's much-criticized choreographic contributions, ''Sylphides,'' in favor of the more authentic version Mikhail Fokine created for ABT in 1940. She might try add full-evening productions from other sources, such as the 19th century French ballet, ''Sylvia.''

She will have the help of Ross Stretton, a principal dancer with the company since 1981. He will dance his final peformance May 22, then assume the position of assistant to the directors, presumably to provide stronger artistic direction.

The Hermann era is likely to see a return to plotted ballets and more widely varied fare appropriate to a company once known as ''the encyclopedia of dance.'' There will be renewed emphasis on star dancers to replace Baryshnikov's essentially ensemble approach which improved the company's technique but failed to provide it with legends.

Star dancers were what the opening night gala was all about, with appropriate bows in the form of film clips and reminiscences to Nora Kaye, Igor Youskevitch, Margot Fonteyn, Anton Dolin, Gelsey Kirkland, Alicia Alonso, Rudolf Nureyev, Maria Tallchief, Natalia Makarova, Cynthia Gregory and Erik Bruhn, among others.

Some legends, such as Carla Fracci and Fernando Bujones, danced, Fracci as the exquisitely tormented bride-to-be in ''Jardin Aux Lilas,'' and Bujones in bravura performances of excerpts from ''Don Quixote'' and ''Swan Lake.'' Susan Jaffe, a legend in the making, danced an electrifying rose adagio from ''The Sleeping Beauty.''

Such veterans as Cynthia Harvey, Kevin McKenzie, Martine Van Hamel, Marianna Tcherkassky, and Clark Tippet appeared in excerpted variations, pas de deux and solos from 30 of the 385 ballets (by 160 choreographers) that have been in the ABT repertory in the past half century.

There were newcomers, too, including the technically sensational Faruk Ruzimatov, who comes from Leningrad's Kirov Ballet to become an ABT principal dancer, and Julio Bocca, a box-office plus after only three years with the company.

Always impressive were Leslie Browne, who starred in the ballet film, ''The Turning Point,'' and Ricardo Bustamente and Alessandra Ferri, who made an emotionally charged contribution to the program as Romeo and Juliet.

The anniversary season will include ABT's first New York performance of Ashton's ''Birthday Offering,'' a new Twyla Tharp work, ''Brief Fling,'' and revivals of De Mille's ''Rodeo'' and ''Fall River Legend'', and Tudor's ''Jardin aux Lilas'' and ''Dark Elegies.''

Guest performers will be Yekaterina Maksimova and Vladimir Vasiliev from Moscow's Bolshoi Ballet.

#90128u1423 05/08/1990 ~United Press International

DALLAS (MAY 8) UPI - A ''spare tire'' around the middle is more hazardous to your health than ''thunder thighs and hippo hips,'' researchers reported Tuesday.

A study of 1,124 healthy men and women in Milwaukee, Wis., confirmed the relative importance of the location of fat on the body, and may explain why men tend to be more at risk for heart disease than women, researchers said.

Women tend to be pear-shaped, with fat accumulating in their buttocks and thighs. Men tend to put on fat around the waist. Men also are more likely to have higher levels of cholesterol and other fats in the blood, key factors in the development of heart disease - the nation's No. 1 killer.

The study adds weight to mounting research suggesting that in the development of heart disease, the type and location of body fats are as important as the total amount of fat, said David S. Freedman, an epidemiologist at the federal Centers for Disease Control in Atlanta.

Freedman, co-author of the study published in the American Heart Association journal ''Circulation'', said researchers found the different risk for heart disease between men and women can be accounted for by taking body-fat distribution into account.

''What makes our study unique is that it is the first to examine whether the male-female differences in body-fat distribution could account for the differences in blood fats,'' Freedman said.

Researchers found that adjusting blood-fat levels of 415 women and 709 men in the study to take into account the ratio of waist circumference to hip circumference - or waist-to-hip ratio - almost completely eliminated the difference in blood-fat levels.

Freedman said the study suggests sex hormones may strongly influence body-fat distribution and blood-fat levels, although there is only indirect evidence for that now.

The team hopes to complete its analysis of data on sex hormone levels in the same group within a year or so.

''At this point, we still can't pinpoint who will develop cardiovascular

disease,'' Freedman said. ''I'm not saying that every single person who develops a spare tire around their waist will get one of these diseases.''

Freedman hesitated to recommend these people try to lose weight because some studies have shown weight-loss efforts often boomerang and weight fluctuation can be detrimental.

However, he urged people with ''spare tires'' to try reducing other risk factors, such as high blood pressure and smoking.

If Freedman's findings prove applicable in studies of other diseases, it may not be as necessary for pear-shaped individuals only 10-20 pounds overweight to be as concerned about their weight as apple-shaped people, said Deborath L. Wingard, associate professor of community and family medicine at the University of California, San Diego.

''Perhaps we should be counting 'apples' and 'pears,' not men and women,'' Wingard wrote in a commentary in the same issue of Circulation. ''By understanding these gender differences in coronary heart disease risk, we may be better able to counsel all individuals on how to reduce their risk.''

#90128u1424 05/08/1990 ~United Press International

SOUTH BEND, IN (MAY 8) UPI - Two former Culver Military Academy cadets want to make amends for the misfortunes suffered by two blind dates.

Harry Stants of Schenectady, N.Y., and Robert Baugh of Decatur, Ala., have taken out a classified advertisement in a South Bend newspaper to track down the girls who joined them for a dance, patiently waited while their car was towed from the mud and sat through graduation ceremonies.

The dates never made it home until noon the next day.

Stants and Baugh say they have forgotten the girls' names during the 50 years since the experience and say they probably are married.

But the men are returning to Indiana for their 50th class reunion next week and would like to take the women and their husbands out to dinner to make up for the problems and perhaps have a good laugh, said Stants, 68.

#90128u1425 05/08/1990 ~United Press International

KENNEY, IL (MAY 8) UPI - There will be no more go-go dancing in Kenney.

The Village Board voted 4-2 Monday night to stop the activity and also

stop a controversy surrounding the Country Lounge nightclub that has been brewing for several months.

Go-gos have been an attraction at the bar for seven years and the issue finally came to a head recently when the number of complaints increased. Many of the village's 443 residents said the bikini-clad dancers hurt the image of the town.

The owner of the bar, Charles Muehlebach, said his business will probably not survive without the dancing girls and he is considering legal action.

The town already had an ordinance against go-go dancing but it was not enforced before the meeting. Besides deciding to enforce the rules against go-go dancing, officials increased the penalty from $100 to $500 and also outlawed wet clothing contests, mud wrestling and the newly popular bar activity of dwarf-throwing.

#90128u1426 05/08/1990 ~United Press International

LAWTON, OK (MAY 8) UPI - A Census Bureau official says the questions haven't changed, so a 1980 questionnaire will be processed along with the latest forms.

Jack Lindstrom, manager of the census office in Lawton, said the 1980 questionnaire was mailed by a woman living in Seminole County, about 130 miles away. Lindstrom said the Seminole area is not served by the current Lawton office but was in an area handled 10 years ago by an office at nearby Fort Sill.

Lindstrom said the form was postmarked Apr. 28, addressed to the previous location, and he received it Monday. He said he telephoned the woman and was told, ''Yeah, Jack, that was lying around here and I thought I better get it out.''

Lindstrom said the woman, who was not identified because of confidentiality laws, apparently was unaware the form was 10 years old and he decided not to tell her.

''She's a real nice lady. I figured, 'what the heck,''' he said.

Lindstrom said the questions on the 1980 and 1990 short forms are the same and the Census Bureau will process the old one along with the new.

#90128u1432 05/08/1990 ~United Press International

MOSCOW (MAY 8) UPI - The official Communist Party daily Pravda said

Tuesday the situation in Lithuania may be the gravest crisis President Mikhail Gorbachev has faced and could affect democracy in Eastern Europe as well as U.S.-Soviet relations.

''The stakes are extremely high,'' the paper said. ''Let us be straight about it: the Lithuanian crisis affects the fate of democratic processes in Eastern Europe, the fate of disarmament talks, Soviet-American relations and a number of other aspects.''

The newspaper said the crisis over Lithuania's March 11 declaration of independence was not quite as bad as the 1962 Cuban Missile Crisis, but was among the most serious since Gorbachev came to power in April 1985.

''Perhaps, it is the most significant crisis during the perestroika period '' Pravda said. ''We had every reason to fear the worst.''

Pravda praised President Bush and other Western leaders for resisting calls to recognize Lithuania as an independent nation and to impose sanctions on the Soviet Union in retaliation for its economic blockade of the rebellious Baltic republic.

''Some time ago, the West immediately and automatically would have seized upon a similar situation as a propaganda gift of fate, and would have squeezed the utmost out of it - to our disadvantage, of course,'' Pravda said. ''Today things are different. They are more realistic.

''Many political leaders of the West have realized how unwanted a crisis can be at this present stage, how serious for the rest of the world the lesson is. They look and act wiser than Lithuania's leaders.''

Lithuania's new nationalist-controlled Parliament declared independence from Moscow on March 11, setting off a showdown marked by Gorbachev's April 18 cutoff of oil and other raw materials to the republic in a bid to force it to back down on secession.

Lithuania announced Monday that it would hold back about 10 percent of its meat and dairy deliveries to other parts of the Soviet Union as a countermove.

#90128u1461 05/08/1990 ~United Press International

MOSCOW (MAY 8) UPI - Soviet Defense Minister Dmitri Yazov ruled out Tuesday NATO membership for a united Germany and criticized U.S. plans to modernize its nuclear arsenal of air-launched cruise missiles.

Yazov's rejection of a future place in the North Atlantic Treaty Organization for Germany followed reports that Moscow may have softened

its opposition to inclusion of a single Germany in the military alliance.

''This approach to ensuring reliable security for the people of Europe is faulty and hopeless because it does not take into account the novelty of the current international situation in the world and in Europe,'' Yazov told the Rabochaya Tribuna newspaper.

Novosti, a state-run Soviet news agency, said a united Germany's ''inclusion in NATO is inadmissible to the Soviet leaders and people alike for military-strategic and, even more important, psychological reasons.''

In Washington, NATO Secretary-General Manfred Woerner said Monday the alliance would not agree to make Germany nuclear-free in exchange for Soviet acceptance of its membership in NATO.

The foreign ministers from East Germany, West Germany and the four victorious Allies from World War II - the United States, the Soviet Union, Britain and France - gathered in Bonn Saturday for the first high-level conference on the future of Germany.

Soviet Foreign Minister Eduard Shevardnadze appeared to ease away from Moscow's previous rejection of German membership in NATO, and Kremlin foreign policy adviser Georgi Arbatov said ''the way could be found and will be found'' to remove the issue as a point of contention.

But Yazov said, ''It is obvious that such a major component of the Warsaw Pact (as East Germany) must not become a part of NATO.''

Shevardnadze also proposed to postpone a decision on a unified Germany's membership in NATO until East and West Germany become a single country.

In Bonn Tuesday, West German Chancellor Helmut Kohl rejected Shevardnadze's proposal.

Yazov also criticized U.S. plans to put modernized nuclear-tipped cruise missiles on new long-range fighter planes based in Britain, West Germany, Italy and other West European countries.

President Bush announced last week the United States will not replace its short-range Lance nuclear missiles in Europe with new, more powerful versions. The Soviets say, however, the plans for new air-launched missiles pose a greater threat.

''The replacement of one type of nuclear weapon with another type that is more powerful, precise and has a longer range contradicts the idea of NATO cooperation with the East declared in Brussels'' at a recent meeting of the alliance, Yazov said.

-30- 2892
#90128u1477 05/08/1990 ~United Press International
WINDHOEK, NAMIBIA (MAY 8) UPI - Prime Minister Hage Geingob warned Tuesday that racist terms for blacks are banned and expressions of servility toward whites will be shunned in newly independent Namibia.

Geingob said in a statement that independence from South Africa in March had ushered in a new relationship ''not only between Namibia and the international community but among Namibians as a people.''

''The relationship of master and servant which was a cornerstone of colonialism has therefore to change with our policy of national reconcilation,'' he said.

''Reference to black Namibians as 'kaffir' is equally prohibited. This derogatory terminology, as everybody will agree, is not conducive to national reconciliation.''

In Afrikaans, kaffir is an old term defined as ''native.'' Geingob's statement also said no Namibians were required to use the words ''baas'' or ''missus'' - generally regarded as expressions of servility toward whites.

Independent since March 21, the vast territory of Namibia, formerly South West Africa, has a population of about 1.3 million, including about 100,000 whites - many of them Afrikaners, descendents of the orginal Dutch settlers in South Africa.

#90128u1499 05/08/1990 ~United Press International
WASHINGTON (MAY 8) UPI - The Senate rejected a series of Republican-backed changes Tuesday in legislation to reform the 51-year-old Hatch Act but GOP leaders gave sign they would abandon their week-old struggle to cripple the bill.

Senate Democratic leader George Mitchell of Maine said that if Republicans refused a fixed time for a final vote this week, he would move to to cut off debate and force a decision.

Republicans have hinted they may seek to attach broad campaign finance reform legislation to the bill and were expected to reach a decision on that move sometime during the day.

The Senate has rejected by wide margins all Republican attempts to change the bill and continued that pattern Tuesday. Defeated were:

-By 64-32, an amendment that would prohibit federal employees or postal workers from holding office in a political party.

-By 51-46, an amendment that would exclude employees of the Internal Revenue Service, the Central Intelligence Agency, the Federal Election Commission and the Justice Department from the liberalized rules of the Hatch Act.

-By 61-36, an amendment that would bar the Hatch Act revisions on soliciting for in-house political action committees from taking effect until all PACs are outlawed.

The basic legislation, which President Bush's senior advisers have said will be vetoed, would clarify limits on political activity of government workers.

While it would prohibit all on-the-job political activity, it would allow federal and postal workers on their own time to hold office in a political party, distribute campaign literature and solicit votes, organize and work on phone banks, organize and participate in political meetings, publicly endorse candidates and solicit contributions to political action committees of a federal employee organization to which both the employeee and the donor belong.

The bill, however, would prohibit federal and postal employees from running for partisan office or solicit political contributions from the general public - activities permitted in a bill approved by the House last year.

Sen. John Glenn, D-Ohio, floor manager for the bill, defended the measure, saying, ''The problem with the Hatch Act is it is so murky, so unclear, federal employees don't know what they can do on the job or off the job.''

''The bill says you cannot do anything politically on the job, but off the jobs you can do certain things,'' Glenn added. ''It takes away all this uncertainty.''

But Sen. William Roth, R-Del., warned that ''coercion will spring forward'' and said it was impossible to eliminate the perception of political activity on the job.

''The line of on-duty, off-duty is only a mirage,'' Roth said, saying adoption of the reforms would mean an end ''to a non-partisan civil service.''

#90128u1501 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The U.S. ambassador to Mongolia doesn't live in that country because he has been unable to find a ''suitable'' home, State Department officials acknowledged Tuesday at a House hearing.

The United States established diplomatic relations with the landlocked Asian nation sandwiched between the Soviet Union and China in 1987, and the current ambassador, Richard Williams, was appointed July 11, 1988.

But during a discussion of the improving human rights climate in Mongolia, Desaix Anderson, deputy assistant secretary of state for Asian and Pacific affairs, said Williams still lives in the United States.

Anderson said the problem is that Williams has been unable to find ''a suitable place'' in the Mongolian capital, Ulan Bator, a city of about a half million people. Anderson added, however, that Williams goes there ''quite frequently.''

''This is absolutely ridiculous,'' was the response of Rep. Steven Solarz, D-N.Y., chairman of the House subcommittee on Asian and Pacific affairs.

''I have never heard of such a thing,'' Solarz said.

Rep. Jim Leach, R-Iowa, joked that the department should name a member of the Peace Corps as ambassador if living conditions were a problem, and suggested that ''maybe the department needs a little more frontier mentality.''

Anderson said the department lacks the money to buy Williams a home. But he acknowledged Williams - like the two Foreign Service officers currently posted in Ulan Bator - could rent or lease a place to live.

Anderson said security also was a consideration in finding a home for the ambassador, but Solarz countered that in that case Williams probably would be safer on the streets of Ulan Bator than of Washington, D.C.

Solarz and Leach said it was particularly important for the United States to have an ambassador now in Mongolia, the world's second oldest communist country, because it is quickly embracing democratic reforms.

#90128u1521 05/08/1990 ~United Press International

NEW YORK (MAY 8) UPI - Americans still love Lucy and they proved it last week by putting the previously unaired pilot for ''I Love Lucy'' in a tie with ''Roseanne'' as the most-watched show of the week, it was reported Tuesday.

When it came to share of audience, ''Lucy'' topped ''Roseanne,'' 37

percent to 33 percent.

The combination of ''Lucy'' and the theatrical movie version of another old favorite, ''The Untouchables'' - No. 9 in the Nielsens - helped push CBS to within a tenth of a rating point of frontrunner NBC.

Among the new shows that have been introduced this spring, NBC still has the top two - ''Wings'' in 14th place and ''Carol & Company'' in 16th. Both shows are in protected spots - ''Wings'' follows ''Cheers,'' the week's No. 3 show, and ''Carol'' this week followed on hour-long ''Golden Girls'' (13th).

The special preview of ''Brewster Place'' on ABC came in tied for 17th, well down from its ''Roseanne'' lead-in. This week it moves into its regular time period, Wednesdays following ''Doogie Howser, M.D.''

ABC is still looking for the show that will capitalize on the lead-in from ''America's Funniest Home Videos.'' Last week's ''Anything For Laughs'' came in 20th, down significantly from fourth place ''Videos.''

''Down Home'' (NBC) also was unable to hold onto the audience of its lead-in, ''Carol,'' tying for 44th place.

The show it tied with is ABC's ''Twin Peaks,'' 44th last week, 45th the previous week, 28th the week before and in fifth place when it premiered as a Sunday movie on April 8.

The other spring entries include ''Equal Justice'' (ABC), 49th; ''Shannon's Deal'' (NBC), 50th; ''Bagdad Cafe'' (CBS), tied for 51st; ''Marshall Chronicles'' (ABC), tied for 58th; ''Family For Joe'' (NBC) 61st; ''Sugar & Spice'' (CBS), tied for 62nd; ''Small Talk'' (CBS), tied for 72nd; ''In Living Color'' (Fox), 76th; ''Sydney'' (CBS), 79th, and ''Capital News'' (ABC), tied for 86th.

ABC brought ''Elvis'' back and it landed in 82nd place.

CBS was the big winner among the Sunday movies with ''The Untouchables'' in ninth place. ABC's ''Burning Bridges'' came in 29th and NBC's ''Archie: To Riverdale and Back'' tied for 51st.

NBC was the most-watched network on Wednesday, Thursday and Saturday, while CBS took Monday and Sunday and ABC had Tuesday and Friday.

NBC won the week ending May 6 with a 12.1 rating and a 21 share. CBS came in a very close second with a 12.0 rating and a 21 share, while ABC had an 11.3 rating and a 20 share.

The official 30-week prime time season ended Sunday, April 15, but working

on a 52-week season, as of the week ending May 6 NBC had a year-to-date rating of 14.4 and a 24 share. ABC was second with a 12.8 rating and a 21 share and CBS third, with a 12.0 and a 20 share.

In the evening news race, ABC's ''World News Tonight'' with Peter Jennings continued to dominate with a 9.5 rating and a 20 share. ''CBS Evening News'' with Dan Rather stayed in second place with an 8.5 rating and an 18 share, while ''NBC Nightly News'' with Tom Brokaw was third with an 8.3 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 regular series for the week ending Sunday, May 6, according to the A.C. Nielsen Co., were:

1. (tie) I Love Lucy (CBS)

Roseanne (ABC)

3. Cheers (NBC)

4. America's Funniest Home Videos (ABC)

5. The Cosby Show (NBC)

6. A Different World (NBC)

7. 60 Minutes (CBS)

8. Unsolved Mysteries (NBC)

9. The Untouchables, CBS Sunday movie

10. Designing Women (CBS)

#90128u1540 05/08/1990 ~United Press International

NAIROBI, KENYA (MAY 8) UPI - The U.S. Embassy in Kenya is not supplying funds to politicians agitating for a multi-party democracy, a spokesman said Tuesday, replying to charges leveled Monday at Ambassador Smith Hempstone by a government minister.

''We utterly reject any suggestion that Ambassador Hempstone or indeed the U.S. government has been funding these people,'' spokesman Craig Stromme said. ''We have asked the Kenyan government for clarification.''

Minister for Livestock Development Elijah Mwangale used a charity event to accuse Hempstone of supplying cash to former ministers Kenneth Matiba and Charles Rubia, who caused a public storm last week by calling for the abolition of Kenya's one-party system of government.

On the same day as the two former ministers made their call, Hempstone told a Rotary Club meeting the mood of Congress was to favor multi-party democracies when allocating foreign aid.

His remarks drew strong criticism from President Daniel arap Moi, who said the United States was trying to influence his country's politics.

Matiba and Rubia also denied Tuesday any links with the U.S. Embassy, saying in a statement that ''what started as a serious open debate on our part seems to have degenerated into unnecessary attacks aimed at clouding the real issues.''

Kenya has been a de facto one-party state since 1969, and a de jure one since 1982. Moi has consistently argued that permitting more than one party would split the country along tribal lines, stirring up old rivalries and potentially causing civil war. Kenya is home to more than 40 tribal groups.

Mwangale said the government had evidence that U.S. money was flowing to those seeking a multi-party state.

''Oh yes, we are aware that these people are receiving from America cash which they have been dishing out in learning institutions,'' Mwangale said.

Stromme said the embassy had asked for clarification on whether this evidence related to Hempstone's alleged involvement or to the possible flow of private funds, which was not the concern of the U.S. government, he said.

(MAY 8) UPI - The Navy says one sailor was killed and at least 10 others were injured in a fire on a guided-missile destroyer off the coast of North Carolina. Military officials say the U-S-S Conyngham was on routine maneuvers about 80 miles off the coast when the fire broke out early this morning. The main fire was reported under control... with sailors battling secondary blazes as the ship sailed back under its own power to Norfolk Naval Station. Three of the injured sailors were flown by helicopter to a Norfolk hospital.

Jews gathered at a lakeside mansion today in Berlin to remember the Holocaust at the site where jovial Nazi officers concocted the so-called

''final solution'' over cocktails. Members of the World Jewish Congress gathered on the 45th anniversary of the Nazi German surrender that ended World War Two in Europe. The World Jewish Congress is wrapping up a three-day meeting in Berlin... a decision that led to a boycott by some, who protested holding the annual convention in the city where the Holocaust was born.

Floodwaters are keeping hundreds of people away from their homes in Arkansas as the state braces for what could prove to be its worst flooding in six decades. Emergency officials say the Arkansas River continues to rise... and appears ready to crest today in Little Rock and tomorrow in Pine Bluff, about 40 miles downstream. NO deaths or serious injuries have been reported.

Costa Rican President Oscar Arias says he will remain active in helping to solve regional conflicts as a private citizen. The 1987 Nobel Peace Prize winner is ending a four-year term today, with Rafael Angel Calderon taking his place as president. Arias canNOT run for a second term under his nation's constitution, but there are rumors that he wants his wife to run for president in 1994.

#90128u1580 05/08/1990 ~United Press International

(MAY 8) UPI - A long-simmering feud between black protesters and Korean grocery merchants heated up in a Brooklyn courtroom yesterday. A judge banned pickets at two stores in a predominantly black neighborhood. The re-instatement of a temporary restraining order against the picketing set off a raucus tirade from a black community organizer, who called the judge a ''racist.''

A couple of former Culver Military Academy cadets are trying to make amends for the misfortunes suffered by two blind dates 50 years ago. The two are returning to South Bend, Indiana, for a 50th class reunion next week. They took out a classified ad in a South Bend newspaper, hoping to track down the two girls who joined them for a dance... waited while their car was towed out of the mud, and sat through graduation ceremonies. They say the dates didn't make it home until noon the next day, and they want to buy them- and their husbands- dinner.

#90128u1608 05/08/1990 ~United Press International

LONDON (MAY 8) UPI - Share prices closed higher on the London International stock exchange Tuesday, bolstered by government predictions that inflation will fall next year.

The blue-chip Financial Times 100-stock index, which rose 27.3 points

Friday, closed up 19.8 points to 2,192.3. During the day's trading session the FT-100 gained as many as 30.1 points before retreating somewhat. The London International stock exchange was closed Monday for a banking holiday.

The narrower top 30 industrial average, which gained 20.2 points Friday, closed up 13.3 points to 1,710.1. Volume was a low 309 million shares, down from 437.5 million shares traded Friday.

Statements by Chancellor of the Exchequer John Major, who said he believed there would be a "distinct fall" in inflation next year that would enable interest rates and mortgage rates to be lowered, encouraged investors, analysts said.

The optimistic prediction added to the already buoyant market mood following the Conservative Party's better-than-expected performance in last week's local elections.

Banks, properties, breweries, buildings, and stores, all of which had been troubled in recent weeks by economic and inflationary worries, put in stronger performances in sustained trading.

In the pharmaceutical sector, Glaxo shares rose 35 cents to close at $12.62, on U.S. interest in Zofran, a drug expected to treat side effects caused by chemotherapy.

CAMBRIDGE, MA (MAY 8) UPI - The American Indian publisher of a South Dakota newspaper and a Pulitzer Prize winner are among 12 journalists named as 1990-91 Nieman Fellows, Harvard University said Tuesday.

The American journalists, who include six women, were selected from 122 applicants for the prestigious fellowships, said Nieman Curator Bill Kovach, the former editor of the Atlanta Journal and Constitution and former Washington bureau chief for The New York Times.

''They have access to anything offered at Harvard,'' Kovach said. ''They're free to study anything they want to.''

Kovach said several foreign journalists would be named to the 53rd class of Nieman Fellows later this month.

The American journalists, who receive a $24,000 stipend established through a 1938 bequest by Agnes Wahl Nieman, are:

-Tim Giago, 55, the publisher of The Lakota Times in Rapid City, S.D.

Giago, an American Indian, founded the newspaper on an Oglala Sioux Indian Reservation.

-Charles Shepard, 35, an investigative reporter with The Charlotte Observer. Shepard won a Pulitzer Prize in 1988 for his coverage of the PTL scandal.

-Jim Amoss, 42, associate editor of The Times-Picayune in New Orleans.

-Betty Winston Baye, 44, assistant editor of The Courier-Journal in Louisville.

-John Carlson, 41, Iowa City bureau chief for The Des Moines Register.

-Joel Greenberg, 34, West Bank reporter for the Jerusalem Post.

-Marcia Slacum Greene, 37, a reporter for the Washington Post.

-Dale Mezzacappa, 39, education writer for The Philadelphia Inquirer.

-Kevin Noblet, 37, Associated Press bureau chief in Santiago, Chile.

-Ana Puga, 29, Latin America correspondent for the Houston Chronicle.

-Barbara Ross, 41, a reporter for the New York Daily News.

-Katherine Skiba, 33, a reporter for The Milwaukee Journal.

#90128u1635 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The White House said Tuesday that Salvadoran President Alfredo Cristiani has been told his government's pursuit of the killers of six Jesuit priests ''is a serious matter for the United States that must be addressed.''

White House press secretary Marlin Fitzwater said that message - carrying with it implications about future U.S. aid to El Salvador - was delivered to Cristiani by White House chief of staff John Sununu at a meeting in Costa Rica.

The two men were in Costa Rica for Tuesday's inauguration of President Rafael Angel Calderon. Fitzwater said the meeting was requested by Cristiani, who has been under mounting U.S. pressure to prosecute the killers of the six priests, their housekeeper and her daughter.

The Nov. 16 murders, allegedly carried out by members of an elite, U.S.-trained military unit, provoked an international outcry and

congressional threats to cut the $85 million a year El Salvador receives in U.S. military aid. Washington also provides millions of dollars in non-military aid to the Salvadoran government.

While taking pains to assert there was ''no direct linkage,'' Fitzwater said Sununu ''simply reiterated that our congressmen, as they consider the aid issue, are quite concerned about the prosecution'' of the case.

''He emphasized that this is a serious matter for the United States that must be addressed,'' Fitzwater told reporters, ''and he said the prosecution of this case will have a significant impact in America. President Cristiani assured him that he is pursuing the prosecution.''

Asked whether U.S. officials saw evidence of a cover-up of military involvement in the killings, Fitzwater said, ''We take him at his word that he's trying to prosecute this to the best of their ability.''

House Democrats contended last week that the murder probe had been stalled since January and that key questions about the complicity of the military high command had gone unasked.

The Salvadoran inquiry is said to be complicated by the loss of at least one important piece of evidence - the diary of Col. Guillermo Benavides - and the absence of four witnesses, all military cadets in the United States for training.

While acknowledging ''something of a lull in the investigation,'' State Department spokesman Richard Boucher credited Cristiani with making ''a very strong commitment'' to prosecuting the killers.

''We see a continuing investigation and we can only urge that it be brought to fruition as soon as possible,'' Boucher said Tuesday.

#90128u1636 05/08/1990 ~United Press International

MONTREAL (MAY 8) UPI - The Canadian Paperworkers Union said Tuesday it will target Stone-Consolidated Inc.'s operations in the St. Maurice Valley in Quebec for the renewal of contracts affecting some 30,000 paperworkers in eastern Canada. The union normally targets one company and uses the negotiated deal to win similar agreements from other paper industry companies.

Negotiations on the union's proposed two-year wage package - an eight percent raise and cost of living adjustments each year - are set to begin in late May and last several weeks, a CPU spokesman said.

Don Holder, president of the CPU, said in a statement an agreement with

Stone-Consolidated would be "important enough" to set a pattern that other employers in eastern Canada would accept.

"Stone-Consolidated has also done extremely well during the life of the past agreement and its mills are in good shape, highly efficient, and its profits have been very healthy," Holder said. Holder added the CPU's locals in the St. Maurice Valley "have shown a determination to negotiate a fair and just settlement."

The Stone-Consolidated group of companies employs some 2,250 workers in seven union locals in Grand-Mere, Shawinigan and Trois-Rivieres, all in the province of Quebec, the CPU said.

Denise Dallaire, spokeswoman for Stone-Consolidated, said the CPU's decision was a surprise but didn't indicate it would pose any special problems. Stone-Consolidated, owned by Chicago-based Stone Container Corp., bought Consolidated-Bathurst for about $2.2 billion in 1989.

Other companies affected by the negotiations include Abitibi Price Inc. of Toronto, Canadian Pacific Forest Products Ltd. of Toronto and a number of Quebec newsprint producers. Most contracts covering CPU's eastern Canada members expired April 30.

#90128u1668 05/08/1990 ~United Press International

PITTSBURGH (MAY 8) UPI - Eastern Europe's trash is a treasure for smart U.S. businessmen, an international business strategy consultant said Tuesday.

"The environmental problems in Eastern Europe are the worst in the world. The controllers are the polluters," said Rod Beddows, who heads a consulting firm with offices in London and Pittsburgh. "One of the few sectors where the United States can claim a distinct global advantage is waste management."

Beddows, the guest speaker at Tuesday's meeting of The Economic Club of Pittsburgh, said before his speech that U.S. businessmen could fill a void in Eastern Europe by providing garbage collection and waste management to cities throughout the region.

Beddows, 46, said Eastern Europe's market is wide open since the fall of communism and political restraints and U.S. executives would be wise to move in and capitalize. "It's a major opportunity and a long-term opportunity," he said. "But you've got to get in there early."

Beddows, who received a doctorate from Harvard Business School and later taught at the Cambridge, Mass., university, said companies in Japan and

Western Europe are getting a jump on American executives in Eastern Europe with the introduction of more consumer goods, domestic appliances, and automobiles.

Besides waste management, Beddows said U.S. businesses could capitalize through various industries, including steel, chemicals, plastics, processing, and machine tool manufacturing.

"You have a lot of good will in Eastern Europe and you should use it," the British-born Beddows said of the United States. "You are the country that helped Eastern Europe to break free."

Beddows, whose clients include LTV Steel, Bethlehem Steel, and Inland Steel, said the key message for corporate executives is that they must adopt a global "mind-set" and target all facets of their company toward an overall global strategy. "Merely being multinational or selling products in other countries is not sufficient to be global," he said.

#90128u1696 05/08/1990 ~United Press International

BOGOTA, COLOMBIA (MAY 8) UPI - A car bomb exploded early Tuesday in front of a national election office, killing one person and wounding five others in the fourth major bombing in two weeks that police blamed on an escalating war by the Medellin cartel.

Police also said cocaine traffickers were planning a new terror tactic, buying homes to fill them with dynamite and set off ''house bombs'' to kill top officials.

The bomb in a small truck exploded about 12:30 a.m. Tuesday in front of the National Registry, the national election agency, in the city of Pereira, 125 miles west of Bogota in the state of Risaralda, according to Pereira police spokesman Gabriel Granados. Police estimated it contained 440 pounds of dynamite.

''The effects were the near total destruction of a nearby house and direct affects in the National Register offices,'' Granados said.

Pereira is the hometown of leading presidential candidate Cesar Gaviria, who has taken the strongest stand against drug traffickers among the major candidates for the May 27 election.

Killed was Diego Munoz, 22, a commercial pilot, who was in the house, while five other people were wounded, police said.

A 15-year-old boy, who Granados said was paid in Medellin to carry out the bombing, was detained for questioning. Medellin is the headquarters city

of the warring Medellin cartel.

The bomb was the fourth since April 25 when a bomb aimed at a passing police truck killed five people in Medellin. Two huge car bombs also have exploded in Cali in the past week, killing four people in explosions police said appeared part of the Medellin cartel's renewed war on Colombia's other major cocaine cartel.

Col. Oscar Pelaez, chief of the investigative branch of the National Police, said authorities have discovered that cocaine cartel agents were trying to construct ''house bombs.''

''We have detected that the narcotics traffickers are offering large sums of money in order to acquire homes 'with doors closed,' that is with all of its contents including with the cars, in order to later fill them with dynamite and explode them,'' Pelaez told reporters Monday night.

He said the homes were near his headquarters and ''in areas where government and armed forces personalities live.''

Also Tuesday, a U.S. Embassy narcotics expert said an army raid that captured 14 tons of cocaine and seized a number of clandestine landing strips had significantly disrupted the transportation network of the Medellin cartel.

Colombian Special Forces units raided the cocaine storage units and landing strips Friday in the Amazon River basin.

''That's a super significant case. That has been a base of operation of the Medellin cartel for some time,'' said the official, who asked not to be named. ''It's taken away a focal point of their distribution.''

Authorities and newspapers also reported another 31 people were killed in various other mass murders, shootings or confrontations between the army and guerrillas.

A government official in the Amazon basin state of Guaviare reported that 13 members of the same family were massacred on three farms, apparently as personal vengeance.

Bogota newspapers also reported 12 guerrillas belonging to two different rebel groups were killed by army troops.

Three policemen were shot to death Monday in Bogota, Medellin and in the state of Antioquia.

Three members of a leftist political coalition, the Patriotic Union, were shot to death in Antioquia, police said.

#90128u1733 05/08/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (MAY 8) UPI - President Frederik de Klerk leaves Tuesday night on a nine-nation European tour regarded as the most important diplomatic mission by a South African leader in four decades of apartheid.

Buoyed by a successful round of talks last week with the African National Congress and carrying tangible evidence of racial reforms, de Klerk is likely to be accorded warmer hospitality than ever before granted a National Party government leader.

Accompanied by Foreign Minister Roelof ''Pik'' Botha, the 54-year-old de Klerk was to depart late Tuesday for Paris - the first stop on his 19-day trip - where he will meet President Francois Mitterrand on Thursday.

An embittered former President Pieter W. Botha, who last week announced he had not renewed his National Party membership to protest de Klerk's path toward ''gradual abdication,'' was snubbed by the French government on a similar European trip six years ago.

De Klerk also will visit Britain to hold talks with his main European ally Prime Minister Margaret Thatcher, and tour Switzerland, West Germany, Greece, Portugal and Spain, and two other countries, believed to be Italy and Belgium.

Notably absent from de Klerk's itinerary is the Netherlands, the mother country of the Dutch-descended Afrikaners who make up the majority of South Africa's white population. The Dutch government, having adopted a strong moral stand against apartheid, refused to receive de Klerk pending further eradication of apartheid.

The mission is unlikely to result in substantial changes in the policy of sanctions against against Pretoria, nor open the gates for a flood of fresh investment in the country. But analysts believe it could go far in satisfying decades of mistrust of South African leaders.

''Certainly it's a very big departure, it's a break-out, as it were, from isolation,'' said John Barrett, director of the South African Institute of International Affairs. ''It's difficult to quantify, but people over the years have felt that everyone was cutting them off.''

''This demonstrates how eager leaders in the West are to see some changes here and it does show that when you move, people abroad are willing to respond,'' he said.

Since his racial reform address to Parliament on Feb. 2, de Klerk has legalized the ANC, the South Africa Communist Party and more than 30 other organizations. He also released ANC leader Nelson Mandela from 27 years imprisonment and dozens of other political prisoners, declared a moratorium on executions and eased restrictions on the media.

In last week's talks with the ANC, which may lead to a formal suspension of the movement's limited guerrilla war against white rule, de Klerk pledged to move swiftly to lift a nearly 4-year-old state of emergency and substantial progress was reported on other outstanding obstacles to formal negotiations.

Mandela responded by saying he would no longer call for an intensification of punitive sanctions against South Africa, imposed by most of the countries de Klerk intends to visit.

On the eve of his departure, Parliament approved by a vote of 105-33 legislation giving de Klerk sweeping powers to grant immunity to political exiles, including members of the ANC. Only the right-wing Conservative Party voted against the bill, which will enable de Klerk to meet ANC demands for the return of ANC exiles in advance of power-sharing negotiations.

De Klerk has proposed negotiations with the country's black majority on a new constitution abolishing all forms of racial discrimination while protecting minority interests. But he has rejected majority rule as ''suicide'' for the white minority.

LOS ANGELES (MAY 8) UPI - Prosecutors Tuesday declined to file cocaine charges against actor Todd Bridges, saying there is insufficient evidence to prove he was in possession of the drug when arrested during the weekend.

However, a man arrested with Bridges, Stephen Mallen, was charged with one count of possession of cocaine for sale. Mallen was scheduled to be arraigned in Municipal Court later Tuesday.

Bridges, 24, and Mallen, 36, were arrested early Saturday after police spotted the pair in the actor's luxury car outside a closed business in North Hollywood. Police said they found 48 grams of cocaine in the vehicle.

But Deputy District Attorney Norm Shaprio said there was insufficient evidence to prove that Bridges was in possession of the drug. Shapiro said Bridges was outside of the car, making a telephone call, when police found the cocaine.

Shapiro said the cocaine was found in Mallen's pants pocket, his wallet and in a bag next to the passenger seat.

''We just can't put the substance in the possession of Bridges,'' Shapiro said.

Bridges, a former child star of such television sitcoms as ''Diff'rent Strokes'' and ''Fish,'' was expected to be released from custody later Tuesday.

However, his legal troubles are far from over. He faces a pending retrial on a charge of assault with a deadly weapon for allegedly shooting and wounding a drug dealer inside a south central Los Angeles cocaine ''rock'' house in February 1989.

The actor was acquitted in November of more serious charges of attempted murder and attempted manslaughter in the shooting of Kenneth ''Tex'' Clay. Jurors deadlocked on the assault count and prosecutors decided to retry Bridges on the count.

Bridges also faces a bail revocation hearing Friday stemming from a missed court appearance in the assault case on Apr. 6. Bridges claimed he didn't show up in court that day because of a traffic accident, but Deputy District Attorney William Hodgeman has expressed doubts about the actor's excuse.

If he fails to persuade the judge, Bridges' $25,000 bail may be revoked and he will be taken back into custody.

At his trial last year, Bridges testified that after ''Diff'rent Strokes'' went off the air in 1986, his life hit a downward spiral during which he couldn't find work, lost $1.5 million to embezzlers, became suicidal and eventually started ''freebasing,'' or smoking, cocaine every day.

He testified that he does not remember shooting Clay because of the effects of a four-day cocaine binge.

After his acquittal on the more serious charges, his attorney, Johnnie Cochran, said that Bridges no longer abused drugs and intended to join

anti-drug forces.

(MAY 8) UPI - The Navy says one sailor was killed in a blaze aboard the guided-missile destroyer U-S-S Conyngham early today. At least 12 sailors were hurt in the flames, which broke out about 80 miles off the North Carolina coast. Five of those injured were seriously hurt and are hospitalized in Virginia.

Sources at NASA say technical difficulties may delay next week's scheduled shuttle launch. Space agency managers are discussing the problem today at Cape Canaveral. NASA had NO immediate comment on the problem or its possible impact. The shuttle Columbia's trip involves a Spacelab astronomy mission.

Vice President Quayle and British Prime Minister Thatcher met in London today in a meeting that proved to be largely ceremonial. Quayle arrived in Britain yesterday on the second leg of a three-nation tour that will have him leaving for Paris later today. Quayle's trip is his first to Europe as vice president.

For the fourth time in two weeks, the Colombian cocaine cartel is being blamed for a car bombing. Police say one person was killed and five were injured when a huge car bomb exploded in front of a national election office in a city 125 miles west of Bogota.

Primaries leading up to the November elections are being held today in four states. Elections are taking place in Ohio, North Carolina, Indiana and West Virginia. In Ohio, Republican Representative Don Lukens hopes to retain his seat despite a sex scandal in which he was convicted of a misdemeanor.

ELLICOTT CITY, MD (MAY 8) UPI - A Maryland county has become the nation's first jurisdiction to adopt legislation requiring safety helmets for bicycle riders, but police said Tuesday they would push for ''voluntary'' compliance if the measure becomes law.

The Howard County Council voted 3-2 Monday night to approve a bill that would require children and adults to wear safety helmets when riding bicycles on public roads or paths, the nation's first such law.

The law would take effect in 150 days if signed as expected by County Executive Elizabeth Bobo.

Officials in the county near Baltimore approved fines of up to $50 for first-time violators. A second violation would carry a $100 fine if it occurred within 12 months of the first, but in both instance, a judge could waive the fine if a cyclist showed proof of having purchased a helmet.

The helmets cost about $50, an expense some opponents contend is prohibitive.

Howard County police, left with the task of enforcing the measure, said they would press for an education effort first, to make sure riders know

about the law.

''Enforcement is going to be approached in an educational aspect first of all,'' said Howard County police spokesman Gary Gardner. ''We hope there will be voluntary compliance. We don't want to go out there and pull over all the cyclists.''

Dr. Andrew Dannenberg, speialist with the Johns Hopkins Injury Prevention Center, said passage of the legislation in Howard County should have ''a ripple effect nationally,'' encouraging other jurisdictions to approve similar laws.

''Rather than trying to get all the other counties to pass similar legislation, I will try to get state or national legislation,'' said Dannenberg.

Advocates pushed the bill to reduce the number of head injuries caused by bicycle accidents. Doctors testifying for the measure said about 600 children die in bike accidents every year, with head injuries being the most frequent cause of death.

#90128u1790 05/08/1990 ~United Press International

NEW YORK (MAY 8) UPI - The attorney for the accused ringleader in the Bensonhurst racial slaying Tuesday blamed a former girlfriend for the mob violence that led to the slaying of a black youth, insisting Keith Mondello is ''a jerk'' but ''not a killer.''

''It never had anything to do with race,'' Stephen Murphy told the jury of the slaying of the teenager. ''It was a horrible mistake.''

''He let her (the former girlfriend) make a jerk of him,'' Murphy said. ''If you want to convict him of being a jerk, he is a jerk.''

In his turn, prosecutor Paul Burns ridiculed Murphy's argument. He said Mondello, 19, goaded his friends until they turned into a baseball bat-wielding white mob last Aug. 23, mistaking Yusuf Hawkins, 16, and three other black youths for a gang of outsiders looking for trouble.

''He knew there was a gun on the scene. He set this mob in motion, and that shows a depraved indifference to human life,'' Burns said.

Outside the courthouse, about 70 demonstrators milled around, waving signs reading ''Justice for Yusuf'' and ''Jail the Whole Racist Lynch Mob for Life.''

At one point, they formed a circle and set an American flag afire. As it

began to burn, about 20 police officers waded into the crowd and put the fire out. They arrested 13 persons for disorderly conduct.

As Mondello's trial wound down, the jury for accused triggerman Joseph Fama, 19, began its second day of deliberation.

Two juries were selected for the trial because Mondello gave statements to police accusing Fama of shooting Hawkins when the 16-year-old ventured into the predominantly white Brooklyn neighborhood to look at a used car.

In an unexpected move before proceedings began Tuesday, state Supreme Court Justice Thaddeus Owens ruled that Mondello's jury, if it is cannot agree on a second-degree murder charge, can consider first-degree and second-degree manslaughter.

Murphy told the jury that Mondello's former girlfriend, Gina Feliciano, 18 put ''the wheels in motion'' for the violence by telling Mondello she had invited black and Hispanic friends to her birthday party after breaking up with him.

As the squabble between the two escalated, Feliciano began taunting him, Murphy said, adding that Mondello ''was terrified by Gina's reports that her black and Hispanic friends were coming to get him.''

Witnesses have described how Mondello and Fama and other white youths in the neighborhood whipped themselves into a frenzy in the hours before the Aug. 23 attack, collecting baseball bats and waiting for the expected arrival of the outsiders.

When Hawkins and his friends walked into the block, they were mistaken for Feliciano's friends and the mob attacked.

''He's not a killer. He's not a gangster. He was afraid. Plain and simple, he was afraid,'' Murphy said.

He said said Feliciano and her mother ''are liars and they are despicable people'' for testifying that Mondello was carrying guns the day of the attack.

The two ''polarized the entire city by claiming this is a racial attack,'' he said. ''She divided 8 million people in this city.''

''She wanted him as her boyfriend and he didn't want her. So they made him the heavy.''

In his final statements, Burns said Mondello's ''reckless behavior'' whipped the mob into a frenzy.

''Just setting the mob in motion at the very least is murder in the second degree,'' he told the jury.

''Even the dropouts in this neighborhood had to realize that Yusuf Hawkins and his friends were not menacing invaders,'' he added.

Mondello and Fama are the first of eight young men to be tried in the case. The other six were scheduled to go on trial next month.

WASHINGTON (MAY 8) UPI - Banking regulators voted to slash the price of certain real estate the government inherited from the nation's failed thrifts by as much as 20 percent to accelerate the cleanup of the savings and loan industry. "This won't be a fire sale," said William Seidman, chairman of the Federal Deposit Insurance Corp. "This won't apply to every property."

The government has been obliged to take over an estimated $16 billion worth of real estate from failed thrifts because of the federal guarantee on deposits in the institutions.

The real estate is reported to range from desert acreage in Arizona and condominiums in Florida to an office building in Dallas and housing developments in Denver.

Despite warnings the price cutting could hurt private property values, the Resolution Trust Corp. board, which Seidman also heads and which oversees the mammoth thrift bailout, voted 4-0 for the plan. "The time is for us to move out this property as fast as we can," said C.C. Hope, an RTC board member.

If the strategy works, the government will be able to sell its repossessed real estate faster and reduce the money it must spend to oversee and maintain its vast inventory. Seidman said the price slashing will apply only to property appraised above its "true market price."

The price on commercial properties that fall into the category will be lowered by 15 percent on the market for six months. If there is no sale after an additional three months, the price will be cut another five

percent by a total of 20 percent.

The prices on houses that go unsold for four months will be also be lowered by 15 percent and then by another five percent if there is no movement on the property after three months. If there is no sale after that, Seidman said, "We scratch our heads."

Seidman proposed the plan, contending it is the cheapest way to manage the savings and loan crisis. "This is a controversial subject," Seidman said. "This is meant to reduce the cost (of the savings and loan bailout) to the taxpayer to sell the properties to raise cash to reduce the debt." Seidman estimated accelerating the sale of property by even six months could save the government as much as $1.2 billion.

At the White House, presidential spokesman Marlin Fitzwater said, "We want the assets to be disposed of, but we aren't in the business of determining the level of the discount. "We have no judgment at this point," Fitzwater added. We obviously don't want to wreck the economy, but we want these properties disposed of."

-30- 2778

#90128u1844 05/08/1990 ~United Press International

MIAMI (MAY 8) UPI - Hundreds of disgruntled Pan Am Corp. employees threatened to turn the company's annual meeting Tuesday into a free-for-all by jeering as Chairman Thomas Plaskett sought to recap his strategy for saving the company.

Plaskett vowed to recess the meeting shortly after it began, if employees of the troubled Pan American World Airways refused to keep quiet. Workers responded by chanting, "No meeting."

The workers, many wearing Teamster T-shirts and caps, eventually did quiet down, allowing Plaskett to deliver his report. But fireworks resumed once shareholders were given a chance to address the meeting.

Many who spoke launched personal attacks on Plaskett, questioning his management prowess and his $500,000 annual salary. When Plaskett told the meeting Pan Am expects to post a loss for 1990, one employee shouted, "Surprise, surprise." Pan Am lost $336.6 million last year.

Paul Newman, a Pan Am shareholder from Cincinnati, asked Plaskett why he didn't take a pay cut when recommending the same for other employees. Plaskett, who joined Pan Am in 1988, said he could have taken a job elsewhere if the terms of his contract weren't to his liking. The workers then began chanting, "Go, go, go."

Others urged Plaskett to resolve the carrier's bitter labor dispute with

the International Brotherhood of Teamsters. The Teamsters, which represents about 6,000 Pan Am reservations, passenger service and cargo agents and clerical workers, have worked under a company-imposed contract since February 1988.

Terms of that contract included an eight percent pay cut and a lower wage scale for newly hired employees. Although it could strike under federal labor law, the union thus far has not done so.

One of Plaskett's most vocal critics, William F. Genoese, director of the Teamsters airline division, asked Plaskett to meet with him Tuesday afternoon but was rebuffed. "Bill, you do this every year," Plaskett told him.

Earlier, Plaskett told shareholders that Pan Am will seek to expand its route system and improve its service while it searches for an alliance or merger with an airline partner. "We must build or become part of a larger route network," he said.

Plaskett said Pan Am has talked to "almost every other U.S. airline about some form of combination - ranging from small equity investments and joint-marketing agreements to full-scale mergers.

"We've been looking at every conceivable idea, but, as of now, we don't have an agreement with anyone," he said. "Our plan for the next several years is based on continuing to strengthen our route system and achieve our quality objectives without such a deal, while we search for a long-term opportunity."

Plaskett also reiterated the airline's commitment to Miami. The airline increased its daily departures from Miami to 60 from 45 last winter, making it the largest carrier at Miami International Airport. "We believe strongly that the continued development of this gateway is a key to our turnaround strategy," Plaskett said.

CHAPEL HILL, NC (MAY 8) UPI - North Carolina basketball guard King Rice is accused of choking a woman, dislocating a law officer's thumb and damaging a wall outside a magistrate's office in incidents that began early Tuesday.

Rice, 21, of Binghamton, N.Y., was released from the Orange County Jail on a $2,500 secured bond followrrest for assault on a female, resisting arrest and damage to property.

He faces a May 31 district court hearing on the three misdemeanor charges

in Chapel Hill.

Dean Smith, veteran Tar Heel coach, declined to say how the rising senior would be reprimanded for the incidents that occurred the final day of the school year.

''King had just completed exams and certainly didn't make a wise choice in celebrating too much last night,'' Smith said in a prepared statement. ''Both he and his girlfriend agree on that.

''He'll be treated like any other student,'' Smith said. ''I'm sure he'll get a lawyer and let the courts move from there. As a member of the basketball program, he has certain responsibilities and that issue will be dealt with privately.''

Rice, a standout on the Tarheel team, made 217 assK!e past season. He has a scoring average of 9.2 points per game.

Chapel Hill Police Capt. Ralph Pendergraph said an officer spotted Rice about 3 a.m. assaulting his date in an apparent domestic dispute outside a private dormitory near the University of North Carolina campus.

Officer Ed Brooks reported Rice ''tried to choke the female in his presence and dragged her down the sidewalk,'' said Pendergraph.

The 6-1, 191-pound Rice ''indicated he did not want to be arrested and had to be physically subdued,'' said Pendergraph.

In the ensuing struggle, Rice allegedly dislocated the thumb of police officer Ben Wiseman. The officer was treated and released from a local hospital, Pendergraph said.

Rice was taken before an Orange County magistrate who issued an arrest warrant and allowed Rice to make a telephone call. After making the call, Rice ''became agitated again and struck the wall outside the magistrate's office,'' said Pendergraph.

''There's a circle the size of a fist punched in the plaster board,'' Pendergraph said.

Pendergraph and Rick Brewer, North Carolina sports information director, said they did not know who posted the bond to get Rice out.

#90128u1871 05/08/1990 ~United Press International

(MAY 8) UPI - A major pipeline carrying about 100,000 barrels of crude oil daily from 36 offshore rigs in the Gulf of Mexico to Louisiana has sprung a

leak and been shut down indefinitely, the operator said Tuesday.

"We don't know when it will resume operation," said Anita Larsen, spokeswoman for Texaco Inc., which operates the 112-mile pipeline that carries crude from the gulf's South Marsh Island oilfield to the Houma, La., terminal.

The shutdown of the pipeline, combined with a fire at a Chevron Corp. refinery in California, helped trigger a small rally in oil markets Tuesday.

The pipeline, owned by Chevron, Exxon Corp., Mobil Corp., Texaco, Marathon Oil Co., and Conoco Inc., carries crude oil from rigs owned by these and other companies, Larsen said.

She said the leak was first discovered Sunday, when approximately 900 barrels of crude spilled into the gulf. Bad weather and high seas have prevented divers from inspecting the leak and determining its cause, she said.

The pipeline, which has a daily capacity of 125,000 barrels, was carrying 95,000 barrels a day at the time of the spill, Larsen said. A small fire Monday afternoon temporarily knocked out one of the refining units at Chevron's El Segundo, Calif., refinery.

The unit, producing about 65,000 barrels daily, "will be down roughly 48 hours," said spokesman Russ Spackman. The entire refinery has a daily output of about 250,000 barrels.

Spackman said the accident has had "minimal impact" on refinery operations. "It's gotten more attention in the financial community than warranted," he said.

#90128u1883 05/08/1990 ~United Press International

(MAY 8) UPI - It is NOT yet known what caused a fatal fire early today aboard the guided-missile destroyer U-S-S Conyngham off the coast of North Carolina. One sailor was killed and at least 12 others were injured in the blaze, which apparently began in the ship's engineering center and spread to its combat information center. The 437-foot ship is under its own power... and is expected to arrive back at Norfolk Naval Station late today.

There was NO official welcome today for Lithuania's prime minister at London's Heathrow Airport. Kazimierz Prunskiene was greeted by Lithuanian emigres and reporters on her arrival from Washington, where she met with President Bush. Prunskiene will ask for help in gaining independence for

her Soviet republic in talks tomorrow with British Prime Minister Thatcher.

Former West Virginia Governor Arch Moore pleaded guilty today to public corruption. Moore's guilty plea was part of an agreement made last month with federal prosecutors after he was charged with five public corruption felonies resulting from his third term as governor between 1985 and 1989. Moore could receive a maximum sentence of 36 years in prison and one-point-two-Million dollars in fines.

Emergency officials say the Arkansas River crested at Little Rock today... about five feet above flood stage. The river has flooded at least 450 homes and damage estimates are running into the Millions of dollars. Floodwaters also were reported in north Texas, with high waters rushing toward largely unprotected rural areas of east and southeast Texas.

BUDAPEST, HUNGARY (MAY 8) UPI - A Hungarian journalist said Tuesday that Hungary, a Warsaw Pact nation, sold six Soviet-made MiG-21 aircraft to the United States this year.

Istvan Toth Kozma, a former reporter for the Peoples Army newspaper and now a freelance journalist, said in an interview with Budapest radio he had learned about the secret transaction from pilots.

''I have precise information in my possession about the Hungarian army selling six MiG-21 aircraft to America after March 15,'' he said.

Kozma said the the aircraft were taken apart, placed in containers and shipped to the United States.

A Hungarian Defense Ministry spokesman dismissed the story as ''erroneous'' and said the six the Soviet planes in question were discarded models stripped of all weaponry.

''The Hungarian Defense Ministry has never sold any military equipment or weapons which are still deployed, let alone those of the most up-to-date techniques, to the United States,'' ministry spokesman Gyorgy Keleti said.

Keleti said the planes were sold to an American businessman for an undisclosed price by the Hungarian foreign trading company Novex.

''We want to buy medical equipment with the money,'' he said.

Kozma said ''the six aircraft were to become curiosity items for the arsenal of the Warsaw Pact, but, since these machines could be used, the Americans decided to fly them.''

He said an American pilot came to Hungary for three weeks earlier this year and took off in the aircraft 40 times at an army airport to learn how to fly the MiG-21.

''Because of Soviet troop withdrawals and the cutbacks in the Hungarian army, a lot of equipment could be discarded,'' Kozma said.

Hungary recently elected its first non-communist government in more than 40 years. Under an agreement, all Soviet troops will be withdrawn from Hungary in 1991.

On Sunday, The Washington Post reported that the former Romanian communist regime sold advanced Soviet military technology to the United States.

The report said the U.S. government paid communist officials $40 million over 10 years for advanced Soviet military technology, including radar systems that aided American development of the Stealth bomber.

(MAY 8) UPI - Talks between Romania's interim President Ion Iliescu and leaders of a 16-day-old protest in Bucharest's main square were canceled toay when Iliescu refused to allow television cameras into the meeting. The protesters wanted to discuss their demands for electoral reform. They said the president knew that the presence of television cameras was one of their demands.

The trial of 21 officers accused in the December coup attempt against Philippine President Corazon Aquino began today in Manila. However, the proceedings were interrupted for one week when defense lawyers stormed out of the military court. The lawyers claimed that the order creating the tribunal was NOT signed by the proper authority.

CAPE CANAVERAL, FL (MAY 8) UPI - A German X-ray telescope set for launch in three weeks atop a U.S. Delta 2 rocket will allow astronomers to study the most violent objects in the universe in more detail than ever before, scientists said Tuesday.

Opening a new window on the universe, the ''ROSAT'' satellite was built to conduct the first complete survey of deep space X-ray sources using a compact telescope 1,000 times more sensitive than any previous instrument.

The results will complement the visible light studies of the Hubble Space Telescope and the ultraviolet investigations scheduled for later this month aboard the shuttle Columbia.

ROSAT is a joint venture between West Germany, Britain and the United States, which supplied one of its instruments and the Delta 2 rocket. The solar-powered satellite is set for launch at 5:35 p.m. EDT May 31 to kick off a 1 1/2-year mission of discovery.

Once in orbit, the robot observatory will map the sky in an unprecedented search for X-ray sources, focusing on more than 1,400 targets of interest. The mission represents the most ambitious X-ray astronomy effort ever mounted and scientists say the results should revolutionize knowledge of the universe.

''X-ray astronomy must be done in space because X-rays don't penetrate the atmosphere,'' said Alan Bunner, ROSAT program scientist for NASA. ''This is a completely space-borne science, a relatively young science, and one that has added enormously to our understanding of the universe.''

Gamma rays, X-rays and ultraviolet radiation from deep space cannot penetrate Earth's atmosphere and, until recently, knowledge about the universe was limited to studies in the visible light, infrared and radio regions of the electromagnetic spectrum.

But a suite of Spacelab telescopes scheduled for launch later this month aboard Columbia will study the ultraviolet universe in unprecedented detail and ROSAT will push back the frontiers of X-ray astronomy. NASA's Gamma Ray Observatory satellite is scheduled for launch in November.

ROSAT is scheduled to be fired into an orbit tilted 53 degrees to the equator at an altitude of 360 miles. With its solar panels pointed constantly at the sun, the satellite's telescope will be able to survey the entire sky every 180 days.

The first science data from the satellite is expected to be radioed back to Earth a few days after ROSAT reaches orbit and engineers activate and check out its systems.

Bunner said X-ray astronomy is important because it allows scientists to study ''processes that are going on in the universe that are occurring at very high energies and very high temperatures, temperatures on the order of 1 (million) to 100 million degrees.

''So we're talking about the sites for the release of enormous amounts of energy,'' he said.

X-ray emissions also can indirectly provide evidence for the existence of as-yet-undetected objects such as black holes, thought to be the collapsed remnants of massive stars with such intense gravity that not even light can escape.

While such objects are invisible by definition, dust and debris sucked into a black hole would be accelerated by the titanic gravity of the collapsed star, causing extreme heating and the emission of X-rays that could be detected from Earth orbit.

Such radiation ''also reflects processes ... in physics that are occurring under conditions of extreme magnetic and gravitational fields,'' Bunner said. ''So X-ray astronomy tells us a story about the universe that is quite different from what we see in optical wavelengths.

''To get the whole picture about what's happening in the universe and understanding the birth and evolution of the stars, one has to have all of these wavelengths, from infrared to gamma rays. X-ray astronomy is sort of one-quarter of this major picture of the physics of what's going on in space.''

#90128u1967 05/08/1990 ~United Press International

NEW YORK (MAY 8) UPI - It wasn't recent losses that most rankled shareholders Tuesday at Time Warner Inc.'s first annual meeting since the $14 billion merger that created the world's largest media and entertainment company. It wasn't even the company's rather imposing $10.8 billion debt load.

Indeed, the most dramatic moments during the 2 1/2-hour meeting came over questions concerning the $34.2 million annual compensation package paid to Time Warner Co-chairman Steven J. Ross.

Ross' deal, consisting of salary, bonuses and stock appreciation rights, makes him the second-highest paid chief executive officer in the country, according to a ranking earlier this month by Business Week magazine.

Whether Ross should make so much was a matter of some debate among shareholders of Time Warner, which had a loss of $256 million in 1989 and posted a $51 million loss for the 1990 first quarter.

"I admire Steve Ross' entrepreneurial genius," said David Brown, a shareholder from New York who held stock in Ross's Warner Communications Inc. prior to the two-step merger in which Time Inc. technically acquired Warner last January. "But, to a certain degree, you've got to question this," Brown said.

Ross, saying he wanted to "clear up once and for all questions about my contract," spent several minutes detailing his compensation package for shareholders who packed a 1,150-seat midtown Manhattan theater.

He said that regardless of what he has made in the past, the 1.8 million shares he now owns in Time Warner "are going to make me more money than I've ever made in my life."

Ross, whose Kinney Service Corp. - a parking lot business - acquired Warner in 1969, steered the movie company on a path that saw its stock appreciate in value by nearly 800 percent in 20 years.

Ross, together with counterpart J. Richard Munro, who is stepping down Wednesday, and Time Warner President Nicholas J. Nicholas, who will replace Munro as co-chief executive, emphasized Time Warner's focus on reducing debt associated with the merger.

"If you look at both Time and Warner, neither company has historically carried very much debt relative to cash flow," said Nicholas. Debt reduction is "a top priority" at the corporate level, Nicholas said, but he declined to detail specific plans.

While the spotlight fell on Ross for much of the meeting, Munro stole the early moments with remarks concerning his ten-year tenure as chief executive of Time and then as co-CEO of Time Warner.

"I'd be less than honest if I didn't admit relief at reaching the ten-year limit I set for myself when I became CEO," said Munro. "On the other hand, I'd be less than human if I didn't confess a tinge of regret ... at the thought of stepping down at the most exciting point in our corporate history."

Explaining the decision to merge Time with Warner, Munro said global competition dictated the deal. "No matter how dynamically we grew, we couldn't play in their league unless we found a parnter with interests and values comparable to ours, a company that would complement rather than duplicate our operations and give us what we didn't have but needed most of all - immediate access to international markets."

Under the Time Warner umbrella rests the industry's top-earning movie studio, the leading producer of prime-time television shows, the largest magazine publisher in the United States, the second-largest record company in the world, the second-largest cable-system in the nation, the country's top cable television programmer and a leading paperback book company.

#90128u1977 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - White House spokesman Marlin Fitzwater said Tuesday that President Bush would veto a family and medical leave bill because it dictates employee benefits to businesses.

''We believe that leave should be granted on a voluntary basis,'' Fitzwater said.

The administration believes in such leave but thinks that companies should be allowed to offer it as an optional employee benefit, he said.

The Family and Medical Leave Act, which has attracted some Republican support as well as strong Democratic backing, would require businesses with more than 50 workers to offer up to 12 weeks of leave for employees to care for newborns, adopted children or a seriously ill child or parent.

House action on the bill is expected this week.

House Speaker Thomas Foley, D-Wash., said he hopes Bush will reconsider his position. ''I believe that after the legislation has passed the House and Senate and the president has a chance to reflect on its importance ... the president will sign the bill.''

Foley would not predict whether there are enough votes to override a veto.

Rep. Marge Roukema, R-N.J., one of several Republican supporters of the bill, said she asked Bush for a meeting to convince him of its merits.

''Common decency requires that we set up this minimum standard of job security, and that's what this bill is about. The bill is not about mandates. It's about values, family values,'' Roukema said. ''I think the president will have an open ear and an open heart when he hears the facts.''

''This is, in fact, a family issue,'' said Rep. Curt Weldon, R-Pa. ''This is right for America. This is right for the Republican Party. This is

right for the Democratic Party.''

Labor Secretary Elizabeth Dole defended the administration's position, saying, ''One of my highest priorities is making work and family complementary, not conflicting, goals. But we cannot achieve that end when in the wisdom of Washington, we tell businesses how and what benefits to offer its workers.''

Businesses have objected to the legislation.

''This particular proposal, if passed, will take away flexibility that business owners have in terms of working out the needs of their company and the employees' needs,'' said Angela Jones, public relations counsel for the National Federation of Independent Busineses.

''If you have someone who's in a highly skilled position ... it'll be difficult to go out and temporarily replace them ... and you won't get (comparable) productivity from the person.''

Diane Generous, lobbyist for the National Association of Manufacturers, said if the bill becomes law, then companies may be reluctant to hire women of child-bearing age.

''I think it will cross an employer's mind. It's something to consider,'' she said.

But Judy Lichtman, president of the Women's Legal Defense Fund, said such discrimination has been illegal since 1964.

Brenda Iles of DeRidder, La., told reporters of how she was asked to resign by her employer, Sears Roebuck and Co., when she requested a six-week leave to care for her newly adopted daughter.

''The loss of my $20,000 annual salary devastated my family economically. Unable to pay the bills, we were eventually forced to file for bankruptcy and to sell our house,'' Iles said. ''I am an example of what will happen if the president vetoes this bill.''

Reporters asked Fitzwater what women should do to get leave if employers deny such benefits.

''They should look for other jobs,'' Fitzwater said. But upon reflection, he clarified his comments, saying, ''I did not intend to suggest individuals seek other employment (when they need such leave). We urge flexibility.''

#90128u1991 05/08/1990 ~United Press International

MEXICO CITY, Mexico (MAY 8) UPI - Pope John Paul II said Tuesday a ''new phase of better understanding and dialogue'' has begun between church and state in Mexico, a country with millions of devoted Catholics but an officially anti-clerical government.

On the third day of a visit that has drawn accusations of political meddling as well as unrestrained adoration, the pope celebrated a mass for Mexico's bishops and hundreds of thousands of faithul in Aguascalientes, 300 miles northwest of Mexico City.

''A new perspective of contacts between the church and the political community of this country is taking shape in our days and in this new phase of better understanding and dialogue,'' the pope said.

The Vatican announced Tuesday in Rome that the pope has named Archbishop Girolamo Prigione, already apostolic delegate in Mexico, as the Holy See's permanent special envoy to Mexico - a possible prelude to the establishment of full diplomatic relations with Mexico that were broken off in 1857.

Prigione, 68, has been apostolic delegate in Mexico since Feb. 7, 1978. Vatican sources said he will remain apostolic delegate in addition to his appointment as permanent special envoy.

The Vatican appoints an apostolic delegate in countries which have no regular diplomatic relations with the Holy See. His post is strictly ecclesiastical - to watch over the state of the church in the territory assigned.

President Carlos Salinas de Gortari named his special representative to the Holy See shortly before the pope left for his second Mexican visit. The pope, who began a one-week pastoral visit Sunday, first visited Mexico in 1979.

John Paul II delivered a special message to Mexico's teachers upon arrival at the Aguascalientes airport, during which he called for greater teaching of the Christian virtues because of the need in education to react to public opinion and spawn political awareness.

''The question of education is the responsibilty of all, that demands to an increasing extent the consideration of public opinion and awakes a new interest in the diverse limits of political responsibility,'' the pope said.

''My message to you today, Catholic teachers, is: open the world of teaching to Christ. In a firm and patient way you have to show how through Christ we find all of the true human values ....''

Later, the head of the Roman Catholic church traveled to the neighboring town of San Juan de los Lagos in the state of Jalisco to say mass and crown an image of the Madonna.

On Monday, Salinas met John Paul II for more than an hour at his official residence, Los Pinos. During the meeting, the two discussed changes in Mexico and Eastern Europe, the indigenous cultures of Mexico and problems of too much consumerism, according to a presidential statement.

The trip has led to speculation that diplomatic ties will be established, although the pope has described the trip as a pastoral one.

Jorge Barrera Vazquez, grand master of the Mexico City Masonic Lodge, charged in comments to the Mexican press that the reason for the pope's visit was to pressure the government into changing the constitution, which mandates the separation of church and state and bans priests from voting or wearing religious garb in public.

Giancarlo Zizola, an Italian journalist and author of two books on the pope, was quoted this week in the Mexican news magazine Proceso as saying this constitutional state of affairs is unacceptable to the Vatican.

''The pope can no longer stand it that in a Catholic country where Christians played a determining role, a secular, not to say anticlerical, political and social tradition is maintained,'' Zizola said.

#90128u2010 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The Treasury Department kicked off its three-day quarterly refunding Tuesday with the auction of nearly $10.6 billion in three-year bills at an average yield of 8.74 percent - an increase from the last sale.

The $30.5 billion that the United States plans to raise through the refunding will be used to finance the bailout of the savings and loan industry, settle securities reaching maturity and raise cash to keep the

government running.

The Treasury Department said the yield was the highest since 9.12 percent May 9, 1989, and an increase over the last refunding Feb. 6, when the three-year notes yielded 8.43 percent. The total amount of bids received Tuesday for the three-year notes was $37.3 billion.

The securities sold at an average price of $99.702, with 100 equal to the face value and a single point representing $10 on each $1,000 investment, the Treasury Department said. The interest rate on the notes, sold in minimum denominations of $5,000 and maturing May 15, 1993, was 8.63 percent.

The quarterly refunding continues Wednesday with the auction of $10 billion in ten-year notes that mature May 15, 2000. On Thursday, the Treasury will offer 30-year bonds that mature May 15, 2020. The ten- and 30-year securities sell in minimum denominations of $1,000.

The government-backed securities in the refunding are sold primarily to large institutions, such as banks, pension funds and mutual funds, in the United States and overseas. Some individuals participate.

The Treasury Department also plans to raise an additional $10 billion for the remainder of the April-to-June quarter through regular auctions of 13-, 26- and 52-week bills, a two-year note in May and a five-year note in June. Government officials said it may also be necessary to issue cash management bonds in the interim to raise money.

#90128u2017 05/08/1990 ~United Press International

PROVIDENCE, RI (MAY 8) UPI - Two men are suing a former boss, saying he ordered them to fondle or have sex with his secretary and threatened to fire them for refusing, a lawyer said Tuesday.

Gary Showalter, 35, and Nenh Phetosomphone, 45, filed suit last month in U.S. District Court seeking more than $1 million in damages from the Allison Reed Group and two of its former employees, Noel Smith and Carol Marsella.

Both Providence residents worked at Techni-Craft Plating in Cranston, an Allison Reed Group subsidiary where Smith was their boss. Smith allegedly ordered Phetosomphone to fondle Marsella's breasts during a card game at the office in Janury 1989.

When he refused, Smith allegedly said Marsella wanted to be fondled and if he refused he would be fired. In his complaint, Phetosomphone said he eventually complied with Smith's orders on several occasions during card

games.

Smith tried to pressure Showalter into having sex with Marsella, then harassed him and threatened to dismiss him when he refused, the suit alleges.

''This is a very unusual case,'' said Susan E. Deveney, lawyer for both plaintiffs. ''This is the first sexual harassment case I've handled where the plaintiffs are men. And I haven't heard of any others before this.''

Smith's lawyer, Edward DiPippo, said his client denies the allegations and is confident the case will be dismissed. Marsella's lawyer, George L. Santopietro, said he has filed a motion to have the case dismissed.

Showalter still works for Techni-Craft, but Phetosomphone quit in July 1989.

Both men said the situation hurt their relations with their families. Showalter said he feared losing his job because one of his children has a severe heart defect and he depended on his medical insurance to pay for the child's care.

The men are seeking $500,000 each in compensation and $500,000 in punitive damages.

''People should be aware of how difficult this case is for these men. In cases of this sort, it is very difficult for people to bring this type of action. They have to place their personal lives on the line,'' Deveney said.

#90128u2033 05/08/1990 ~United Press International

MOSCOW (MAY 8) UPI - The Estonian Parliament, ignoring warnings from Moscow, passed legislation Tuesday invalidating Soviet laws in the Baltic republic and changing its name to the Republic of Estonia.

Deputies in Lithuania also continued their defiant drive for secession from the Soviet Union, adopting a law on private enterprise and approving an amnesty for prisoners convicted of a wide range of crimes before the Vilnius legislature's March 11 declaration of independence.

With nationalist sentiment sweeping the Baltic region, a union of mainly Russian workers in Latvia called on laborers to prepare for a general strike to protest the independence proclamation Friday by that republic's Parliament.

The three tiny republics, annexed by the Soviet Union in 1940, gave no

indication of any willingness to back down from independence declarations approved in the past eight weeks.

In Tallinn, the Estonian legislature by a 73-14 vote passed a measure further implementing its March 30 proclamation. The text of the law was telexed to news agencies in Moscow.

The measure, ''proceeding from the goal of restoring an independent Estonian state,'' reinstates six articles of the 1938 Estonian Constitution from the end of the Baltic nation's brief period of freedom between the two world wars.

One of the constitutional clauses declares Estonia an ''independent and sovereign republic,'' while another article reinforces the March 30 proclamation's negation of Soviet laws: ''In Estonia, only such laws have effect which have been put into force by its own institutions.''

The new law also drops the name of ''the Estonian Soviet Socialist Republic'' and reinstates the pre-1940 appellation, the Republic of Estonia.

It declares Estonian the republic's official language, drops the Soviet-designated coat of arms, flag and anthem as state symbols and restores the national colors of blue, black and white.

The measure repudiates Soviet President Mikhail Gorbachev, who last month imposed an economic blockade against Lithuania and warned Estonia and Latvia against taking further steps toward secession.

The Estonian Parliament, newly controlled by nationalists following the March 18 elections, set a ''transition period'' toward full independence in its proclamation six weeks ago, but the law passed Tuesday apparently signaled a new phase in the republic's bid to end a half century of Soviet rule.

In Vilnius, the Lithuanian Legislature passed a measure legalizing private enterprise in the republic, the official Soviet news agency Tass said.

The law, saying ''private property of a private business belongs to an individual or individuals,'' gives firms the right to own, buy and sell property. New Soviet laws give the Baltic region expanded economic freedom but do not extend those rights.

The Lithuanian Parliament also approved an amnesty granting freedom to many criminals convicted before that republic declared independence, Tass said.

The law frees from prison women, men over 60, minors and severely

handicapped people who were convicted of minor crimes and are first-time offenders, Tass said.

The amnesty also applies to first-time offenders convicted for crimes of negligence or theft of state property and all those who received prison sentences shorter than five years, Lithuanian Parliament spokesman Aidas Palubinskas said by phone from Vilnius.

The official Soviet Communist Party newspaper Pravda ridiculed Lithuanian Prime Minister Kazimiera Prunskiene, who after a meeting with President Bush in Washington arrived in London to appeal for British recognition of her people's independence drive.

''Kazimiera Prunskiene is not met at airports as a premier,'' Pravda said. ''There are no honor guards, and she has to produce her passport.''

Pravda said Lithuania's nearly two-month-long showdown with Moscow may be the gravest crisis Gorbachev has faced and could affect democracy in Eastern Europe as well as U.S.-Soviet relations.

Lithuania announced Monday that it would hold back about 10 percent of its meat and dairy deliveries to other parts of the Soviet Union in retaliation for Moscow's economic embargo, under which crude oil deliveries and most supplies of other raw materials have been s

In Riga, the Russian-dominated Latvian Council of Work Collectives called on workers to begin preparing for a political strike, Tass said.

SAN SALVADOR, EL SALVADOR (MAY 8) UPI - Salvadoran leftist rebels Tuesday repeated a demand that the armed forces be purged as part of a negotiated settlement of the country's 10-year civil war.

Political observers say the issue could prove to be a stumbling block in U.N.-mediated peace talks scheduled to begin May 16 in an unspecified location in Venezuela.

''We consider that changes (in the military) will seriously affect the negotiation process and the possibility of arriving at a cease-fire,'' the leftist Farabundo Marti National Liberation Front, or FMLN, said in a communique.

''It is impossible to arrive at agreements based on democratization as long as the impunity of the army is defended and a deep purge is not carried out,'' the rebel communique said.

El Salvador's politically powerful military leadership has energetically rejected FMLN demand for a purge. But some changes have been made quietly. Several of the military's most reactionary officers have been reassigned to positions as military attaches in foreign countries in recent months.

More than 72,000 people have died in the decade-long civil war and related political violence.

NEW HAVEN, CT (MAY 8) UPI - Yale University scientists have confirmed what parents have always suspected, that consuming sugar can elevate children's adrenaline level and affect their behavior for hours.

A study of 14 children found there was a tenfold increase in adrenaline levels in the blood of those given simple sugar and then monitored for five hours.

''Scientists have had difficulty substantiating what many parents have always suspected, that giving children too many sugary foods affect their behavior, said Yale pediatricians Timothy Jones and William Tamborlane.

The pair planned to present their findings at an annual meeting of the American Pediatric Society, the Society for Pediatric Research and the Ambulatory Pediatric Association in Anaheim, Calif.

During the study, 14 children and nine adults were given glucose orally and had their blood tested every 10 minutes to measure levels of glucose and adrenaline, a hormone that can cause tremors and nervousness.

The researchers found little difference between the blood sugar levels in adults and children. In both groups, blood sugar peaked and then dropped to levels slightly below normal three to four hours after the initial influx of sugar.

However, consuming the glucose caused adrenaline levels to increase by 10 times in the children, whose levels were twice those of the adults. Because of the adrenaline change, nearly all the children complained of being weak and shaky.

''Such increased adrenaline levels may lead to anxiety, difficulty concentrating and the kind of crankiness associted with missing a meal,'' said Jones.

''This response might have profound effects if normally fidgety children eat sugary meals,'' he said.

WASHINGTON (MAY 8) UPI - Conservative political fund-raiser Carl ''Spitz'' Channell, a former West Virginia motel operator who became the first person convicted in the Iran-Contra scandal, has died.

Channell, 44, died Monday at a Washington hospital, Jeff Barb, director of the Lohr Funeral Home in Channell's hometown of Elkins, W.Va., confirmed Tuesday.

The cause of death was not immediately available, said an employee of the Washington coroner's office who declined to be identified. The funeral was tentatively scheduled for Saturday, but final arrangements were pending.

Channell operated a motel until 1979 before he became a major national fund-raiser for conservative causes. He founded or gained control of numerous conservative organizations, among them two political action committees, a tax-exempt foundation and the organization Western Goals, which has two subsidiaries.

Channell pleaded guilty to using his non-profit National Endowment for the Preservation of Liberty to raise more than $2 million to arm the Nicaraguan Contra rebels.

On July 7, 1989, he was sentenced to two years of probation and ordered to pay a standard $50 federal court assessment for conspiring to defraud the government of taxes due on the money he and former White House aide Oliver North raised for the guerrillas.

Channell's confession was part of an agreement reached with independent prosecutor Lawrence Walsh in exchange for Channell's testimony against North, the fired National Security Council aide identified as the chief operator in covert U.S. arms sales to Iran and the diversion of profits to the Contras.

Federal Election Commission and Internal Revenue Service records indicated Channell raised more than $5 million between 1985 and 1986 and through his foundations and political action committees spent much of the money on a propaganda blitz to win public support for Contra aid.

The Lowell (Mass.) Sun reported that $5 million in profits from the Iran arms sales was diverted for conservative political purposes and some of it

was funneled to Channell's organizations.

Channell denied he received any Iran arms money.

Government records indicated that groups run by Channell bought political advertisements against congressional candidates unsympathetic to the Contras.

Channell's activities angered Democrats early in 1986 when Congress was considering appropriating more official funding for the rebels. Channell and other conservative group leaders campaigned in favor of the plan and against members of Congress who opposed the legislation.

One of the groups that joined in the campaigns was the National Conservative Political Action Committee, where Channell had served as finance chairman. NCPAC leader Terry Dolan, Channell's former boss who died in December 1986, sought the defeat of 33 members of Congress who opposed aid for the Contras.

Channell's endowment also paid the Robert Goodman Agency of Baltimore nearly $200,000 to produce a series of pro-Contra advertising films that contained footage of Soviet military equipment. A spokeswoman for Goodman's agency said the films were from White House files and were supplied directly by North.

Western Goals was founded by the late Rep. Larry McDonald, R-Ga., and the John Birch Society. McDonald died when a Soviet military jet shot down Korean Air Lines Flight 007, in which he was a passenger, in 1983.

(MAY 8) UPI - The guided-missile destroyer U-S-S Conyngham is sailing back to Norfolk Naval Station in Virginia after a fire that killed one sailor and injured at least 12. The vessel is expected to arrive in port late today. The Conyngham was on routine maneuvers about 80 miles off the coast of North Carolina when the fire started early today. The flames apparently started in the ship's engineering center and spread to the combat information center.

Republicans in Congress apparently will NOT support a suggestion to raise income taxes to help reduce the federal deficit. Assistant Senate G-O-P leader Alan Simpson and other Republicans met with President Bush at the White House today. Afterward, Simpson told reporters that ''Nobody is talking about raising income tax rates.'' Instead, the Wyoming Republican said other things could be considered... including value-added taxes, a higher tax on alcohol and cigarettes, a national lottery, and a one-cent national sales tax.

Costa Rica's new president is being inaugurated in a ceremony held in a packed San Jose soccer stadium today. 40-year-old Rafael Angel Calderon is the son of a former Costa Rican president and was elected three months ago by narrowly defeating the ruling party candidate. Among the dignitaries at today's swearing-in... Nicaraguan President Violeta Chamorro and first lady Barbara Bush.

Paris is the next stop tonight for Vice President Quayle, on his first tour of Europe since becoming the number two man in the White House. Earlier today, Quayle met British Prime Minister Thatcher at her official London residence. The two discussed the unification of Germany and the future role of NATO. Quayle also presented Thatcher with a silver dollar marking the 100th anniversary this October of the birth of President Dwight Eisenhower.

BUCHAREST, ROMANIA (MAY 8) UPI - Talks between interim President Ion Iliescu and demonstrators were canceled Tuesday when Iliescu refused to allow television cameras into the meeting and protest leaders refused to meet him without being filmed.

In a statement issued by the Provisional Council for National Unity, Iliescu said, ''The (protest) delegates demanded cameras despite the fact we provided facilities for recording the meeting in shorthand.''

The provisional council has ruled Romania since late December following the bloody overthrow of communist dictator Nicolae Ceausescu.

The protesters, who have staged regular demonstrations in the capital's University Square for 16 days, object to the presence of former high-ranking communist officials in Iliescu's government. They want election laws changed to prohibit former top communist politicians holding high office.

Romania is scheduled to hold elections May 20.

Iliescu has accused the protesters of wanting to use media coverage for propaganda purposes.

The provisional council said, however, that ''there is still a possibility for talks'' between the two sides.

The protest leaders said the presence of cameras at the meeting was a condition previously agreed to by Iliescu.

''We have nothing to hide and we don't understand what he would have to hide,'' said Cornel Feroiu, president of the Independent Group for Democracy.

''Iliescu is clearly the guilty party, because he refused the dialogue,'' Student League spokesman Marian Munteanu said.

The protesters also seek establishment of a free press, the appointment of a civilian interior minister and punishment of high-level communists involved in decades-long suppression of the Romanian people.

MOSCOW (MAY 8) UPI - Bob Hope brought his USO tour to Moscow for the first time Tuesday, entertaining U.S. Embassy employees with jokes about Soviet bugs, american fast food and and Soviet leader Mikhail Gorbachev.

The crowd of about 300 shivered through the nearly two-hour show on a chilly May evening outside the condemned new U.S. Embassy office building, due to be torn down without being used because it is so riddled with listening devices.

''That place has so many bugs it should be known as the roach motel,'' Hope said to loud applause from embassy staff. ''And we thought California had problems with the Medfly.''

The show was part of a tour that took Hope to military bases in England and Germany, where he also visited the Berlin Wall - more than 40 years after he entertained troops participating in the Berlin airlift.

But unlike most of Hope's stops in nearly 50 years touring for the USO, the only military personnel in the crowd at the Moscow show were 15 Marine embassy guards and a few military attaches.

He also introduced in the audience a group of 42 female pilots who flew during World War II. They were in Moscow for Wednesday's celebration marking the 45th anniversary of the victory over the Nazis.

There was some confusion when Hope referred to hundreds of air force personnel in the crowd - apparently using the script from a show at Rhein Main Air Base in Frankfurt.

Before leaving the Soviet Union Wednesday night Hope was to visit Red Square and the McDonalds restaurant that opened in Moscow earlier this year.

''Before all the Soviets had to fear was nuclear war, now they're afraid of a Big Mac attack,'' Hope quipped.

He said with the arrival of McDonalds, a new deal signed by Baskin-Robbins ice cream and plans for a Pizza Hut, ''We don't have to worry about nuclear missiles, they'll kill themselves with junk food.''

Baskin-Robbins will have 10 flavors to start with in Moscow, Hope said, including ''Rocky Road to freedom,'' ''Berlin Walnut,'' and a flavor named after President Mikhail Gorbachev's wife: ''Raisa - one bite and you get an irresistible desire to shop.''

Gorbachev himself was the target of several of Hope's jokes. He said the Soviet president, who is struggling with serious economic problems, will receive a special honor in the United States during the summit later this month: ''He's being named an honorary savings and loan executive.''

Singer Rosemary Clooney, actress Brooke Shields, Miss Universe Mona Grudt and Hope's wife, Dolores, joined him for the show.

The Moscow show, which will be edited with other shows on the tour into one NBC television special, will air May 19.

SAN JOSE, COSTA RICA (MAY 8) UPI - Rafael Angel Calderon Jr. saying he was taking over a country ''with an empty treasury,'' was inaugurated Tuesday as the 10th democratically elected head of Costa Rica since a 1948 revolution abolished the army.

Calderon replaced Oscar Arias, who is seen as the father of the Central

American peace process over the past four years and whose departure was lamented by many foreign leaders.

''Unfortunately for all of us, we do not receive today, as has been said, the first fully developed country in Latin America. We find an empty treasury ... and one of the largest deficits in our national history,'' Calderon said.

He said the economic situation would force his new government ''to apply corrective measures of self-sacrifice during the first twelve months of our administration.''

Calderon praised Arias for his peace work and said Arias left office with the region ''halfway down the road toward a better future.''

''It is for us, the presidents of Central America, to assume the responsibility for leading our peoples into a new stage in the process, in which the great goal will no longer be to silence the roar of cannon fire, but to take off at last toward economic development,'' he said.

Calderon, 41, the son of a former president, was elected Feb. 4 in a narrow victory over the ruling party candidate.

In an indication that Costa Rica is confident that peace is finally rooting itself in the troubled region, Calderon vowed in his inauguration speech to remove border guards from the frontiers with Nicaragua and Panama and redeploy them to urban areas troubled by crime.

''Now that the democratic revolutions of Eastern Europe have confirmed our conviction that, without freedom, there has not been nor will there ever be any social justice, Latin America's dramatic reality reminds us that, without social justice, there has not been nor will there ever be any true freedom,'' Calderon told some 20,000 people packed into a soccer stadium.

The domestic and foreign policies of his Social Christian Unity Party are expected to bring little change to Costa Rica, whose people are known for their tranquility, national pride and dedication to ''the pure life.''

Unlike recent changes of government in both bordering nations - Panama and Nicaragua - the transfer of power in Costa Rica comes amid peace and relative prosperity. Costa Rica abolished its army in the late 1940s after a brief civil war.

Panamanian President Guillermo Endara, who took power amid a U.S. invasion of Panama in December, said Costa Rica is a model for all Central America.

''We want to have the same experience. Democracy to us is of the greatest importance,'' Endara said.

''The government of El Salvador would like the Costa Rican government to continue its role of promoting peace in the region,'' Salvadoran President Alfredo Cristiani said Monday after arriving in San Jose.

U.S. First Lady Barbara Bush headed the U.S. delegation, which received a warm welcome, as did Arias.

Bush arrived Monday night and delivered a personal letter to Calderon from President Bush. She said she wanted to ''join all Costa Ricans in celebrating these most precious democratic activities.''

Nicaraguan President Violeta Chamorro, who was inaugurated just two weeks earlier, was among the foreign dignitaries on hand for Tuesday's ceremony.

Under a partly cloudy tropical sky and a slight breeze in 78 degree weather, the stadium was bedecked in the blue, red and white of the Costa Rican flag.

Arias told United Press International Monday that he was leaving ''a better Costa Rica'' and that his peace effort has laid the ground work for Calderon to concentrate on improving the economy.

In keeping with his campaign promises, Calderon also vowed to build low-income housing and decrease the gap between rich and poor. He also promised to fight drug trafficking. Costa Rica is known as a key transit point for cocaine being trafficked from Panama and Colombia to the United States.

He did not, however, address the issue of corruption which has plagued both the national police and sectors of the government.

#90128u2219 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The World Bank proposed Tuesday to double the $1.3 billion capital of its affiliate that helps the private sector in developing countries after the International Monetary Fund announced a $60 billion boost in its own resources.

The IMF's Development Committee and the World Bank also discussed the possible establishment of a $1.2 billion World Bank concessional fund for environmental protection in developing nations.

A Treasury official, John Niehuss, was expected to tell the panel that the Bush administration opposes the so-called "Green Fund," which would tackle environmental problems that breach countries' borders. Treasury sources said that the fund poses budgetary problems and that its objectives and

beneficiaries are ill defined.

Discussions on whether the World Bank should make a full resumption of lending to China, suspended after last year's repression of the pro-democracy movement, made no progress, bank sources said. Niehuss told Congress Tuesday the administration continues opposing loans to China except for "basic human needs."

World Bank President Barber Conable asked the member nations represented by the Development Committee to double the $1.3 billion capital of the International Finance Corporation, the bank affiliate that supports the private sector in developing countries with loans, investments and technical assistance.

The World Bank, which provides long-term loans to support development projects and economic reforms in developing countries, does not expect to ask for a capital increase of its own over the next few years because there are not enough countries able to absorb higher levels of lending, bank officials said.

Earlier, the IMF said the hike in its resources will allow it to strengthen support for Third World debt reduction, help Eastern Europe's emerging democracies and promote world trade liberalization.

Within the IMF's Interim Committee, a policy advisory body, industrial and developing nations hammered out Monday night a compromise to increase by 50 percent the $120 billion capital of the fund. The 152-member organization provides short- and medium-term loans to countries suffering from shortfalls in their external accounts.

The panel also agreed that Japan would move up from being the fifth-largest IMF shareholder to jointly hold the No. 2 position with West Germany, currently No. 3. Voting at the fund is based country quotas in the institution's capital.

France and Britain agreed to share the No. 3 position. The compromise would drop Britain from No. 2 and slightly increase the shareholding of France.

A compromise between developing and industrial nations linked the capital hike to provisions to help the 11 countries with $4 billion in overdue obligations to the fund and called for eventually suspending those refusing to be put under IMF-supervised economic programs to clear arrears.

Developing nations chalked up two victories - promises that the next review of IMF resources would take place in 1993 so that the capital could be increased again sooner and that their access to lending would not be reduced. The U.S. Treasury Department wanted to stretch the IMF capital

increase until 1995.

The developing nations feared that an insufficient capital hike would compel the IMF to curtail member countries' access to lending in order to provide for the financial needs of the new Central and Eastern European democracies.

To guarantee the financial help to countries in arrears, which will come from the IMF's Enhanced Structural Facility, the fund pledged to use up to three million ounces of its capital in gold.

The IMF will also raise $1.3 billion to help clear arrears by increasing the interest rate charged on its loans to developing nations by 0.35 percent and by lowering the rate it pays to industrial nations providing loanable funds.

(MAY 8) UPI - Jury selection is expected to be complete today in the racketeering and fraud trial of three Chicago Mercantile Exchange Swiss franc traders. They are the first of 48 people to face trial on charges resulting from an F-B-I undercover investigation at the C-M-E and the Chicago Board of Trade. Two other franc traders indicted in the case have pleaded guilty and are expected to testify against the three defendants.

A Chicago alderman says the drug problem is so severe in one section of the city's West Side that a majority of residents say they wouldn't mind the military patrolling their streets. Alderman Ed Smith said a door-to-door survey showed that residents are ''98 percent'' in favor of having the U-S military assist Chicago police in the war on drugs.

Sources in Thailand say Vietnamese security agents have been holding an American businessman for the past 15 days without filing any charges against him. The sources said Mike Morrow, an independent publisher and business consultant with long experience in Vietnam, was arrested on April 23rd in southern Vietnam. A French businessman arrested with Morrow was released after several days.

#90128u2238 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The government Tuesday released 1,400 pages of former White House aide Oliver North's diaries that renew questions about the role of George Bush and other Reagan administration officials in the Iran-Contra affair.

The documents, ordered released by a U.S. District Court judge, give a daily account of North's meetings, plans and observations from 1984 to 1986, during which Reagan lieutenants traded weapons to Iran for hostages. The profits of the sales were funneled to the Nicaragua Contra rebels.

North, a National Security Council aide, used hundreds of spiral-bound reporters' notebooks to log meetings with top administration people, including Vice President George Bush, CIA Director William Casey, Assistant Secretary of State Elliott Abrams.

In one entry, dated Dec. 20, 1985, North lists Bush's March 1985 trip to Honduras under the heading, ''third country solicitation plan.''

Bush has denied his meeting with Honduran leaders was an attempt to solicit help for the Contras in exchange for U.S. military and economic aid.

Like most of the accounts, the Dec. 20 entry raises questions about Bush's role in the Iran-Contra operation but contains no revelations of the meeting.

In another entry, dated Aug. 6, 1986, North lists a noon meeting with Bush that reads, ''mtg w/V.P.'' The meeting lasted 15 minutes, according to the

account, which contains no other details.

At the White House Tuesday, press secretary Marlin Fitzwater said of the new revelations, ''The vice president's role in the Iran-Contra affair was completely examined in the congressional inquiry and we have nothing to add.''

Aug. 6 proved to be a busy day for North, who logged two conversations with Abrams, a meeting with Bush's national security adviser Donald Gregg and a call from Contra leader Adolfo Calero.

Separate accounts list hundreds of calls to and from Abrams, who has never been indicted for any crime related to the affair.

Last May, North was convicted of one count each of obstructing Congress, destroying government documents and receiving an illegal gift in the form of a $13,000 security system for his home. He is appealing the conviction.

U.S. District Judge Norma Holloway Johnson ordered the release of North's 2,600 pages of diaries after the Justice Department refused to open the files to two public interest groups.

The government has until May 17 to release the remaining 1,200 pages unless it contends their exposure would jeopardize national security secrets.

Eleanor Smith, an attorney with Public Citizen who sought release of the diaries, called the judge's order ''A sweet victory for the public's right to know what it's government is up to.''

Tom Blanton, deputy director of the National Security Archive, which joined the lawsuit, said of North's diaries: ''These notebooks are the daily diary of an American nightmare.''

Blanton said the diaries renew the questions: ''What did Bush know and when did he know it?''

Several hundred pages of North's diaries were released to congressional committees investigating the Iran-Contra affair in 1987. But much of the material was blacked out by North and his attorney, Brendan Sullivan, Blanton said.

One document released Tuesday includes an entry of Nov. 25, 1986, the day North was fired and the White House divulged the diversion of arms profits to the Contras. North noted a 6:45 p.m. phone call from Reagan, who reportedly called to tell the NSC aide that he was a ''national hero.'' Other notations include a phone call North placed to his mother and a notation to phone a lawyer at the Legal Defense Fund.

WASHINGTON (MAY 8) UPI - Jurors in the upcoming trial of Mayor Marion Barry should be sequestered and provided with complete court transcripts while in deliberation, federal prosecutors said in court papers made public Tuesday.

''Sequestration would not prejudice the trial; to the contrary, it would assure the defendant and the public a fair trial,'' said the documents filed in U.S. District Court.

The motions, filed late Monday, were in response to requests from Barry's attorney, R. Kenneth Mundy, asking that the jury at the scheduled June 4 trial not be sequestered. Mundy also is asking that a full transcript of the trial proceedings not routinely be provided to the jury.

''Having access to a trial transcript would affect the deliberations no differently from providing the jury with other items juries routinely

receive,'' U.S. Attorney Jay Stephens said in the motion.

And Stephens moved to block a request by Mundy to consolidate four of the five cocaine possession counts against Barry into a single offense. Those four all dealt with the mayor's activities at a downtown Ramada Inn in December 1988.

Government attorneys said they would provide proof that each cocaine count in the indictment was the result of a separate occurrence and should be treated as such.

''Each count charges the defendant with a separate, distinct, illegal drug transaction,'' the court documents said.

Barry, 54, is charged with three felony counts of perjury and five misdemeanor counts of cocaine possession following his Jan. 18 arrest and Feb. 15 indictment.

In other court documents, Stephens argued against Mundy's request to suppress videotape and audiotape evidence that allegedly shows Barry smoking crack cocaine at the downtown Vista International Hotel the night of his arrest. Stephens argued use of the surveillance equipment was in keeping with federal law.

The documents were the prosecutor's final pre-trial motions in response to Mundy's actions.

U.S. District Judge Thomas Penfield Jackson scheduled a May 25 hearing on the motions.

If convicted of all charges, Barry could be sentenced to 20 years in prison and fined $1.25 million.

He would be precluded from holding office only if jailed after a felony conviction. Barry has not anounced if he will seek a fourth term.

#90128u2286 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The House gave final congressional approval Tuesday to a bill making it a federal crime for any person or company to develop or possess biological weapons or to help other countries obtain such weapons.

The bill, passed on a 408-0 vote, would allow the government to seize and destroy any such weapons discovered in this country and provides criminal penalties for violators.

Although the United States ratified the 1972 treaty barring biological weapons, it has not yet enacted laws called for in the treaty to prevent development of such weapons.

''By passing this legislation we are letting the rest of the world know that we are serious in our desire to stop biological terrorism,'' said Rep. Robert Kastenmeier, D-Wis., said during debate on the bill.

(MAY 8) UPI - One sailor was killed and at least 12 others injured when fire broke out this morning aboard the guided-missile destroyer U-S-S Conyngham off the coast of North Carolina. The cause of the fire is NOT immediately known. The main blaze was brought under control, but the Navy says secondary fires caused ''a serious situation.''

Pravda says freedom-driven Lithuania may be Soviet President Mikhail Gorbachev's gravest crisis yet. The official communist newspaper today for the first time admitted the seriousness of the situation by comparing it to the Cuban missile crisis. It says the crisis will affect the fate of democracy in Eastern Europe and disarmament talks.

Bolivian President Jamie Paz Zamora is at the White House today for talks with President Bush. Zamora is almost certain to ask for more U-S aid in the war against drugs. In an interview, he said he plans to request as much as 150-Million dollars to help curb Bolivia's coca leaf crop.

A possible problem with the shuttle Columbia's cooling system could delay next week's launch for several days. NASA says that if the problem is confirmed and can't be fixed at the launch pad, it could mean a delay of up to a month. Columbia is scheduled for a Spacelab mission to study high-energy astronomical targets.

Sentencing is set for July 10th for Arch Moore, the former West Virginia governor who pleaded guilty to extorting 500-thousand dollars from a coal company. Moore pleaded guilty today to that charge, plus four other extortion charges, all stemming from his third term as governor between 1985 and 1989.

NEW YORK (MAY 8) UPI - The dollar ended mixed Tuesday in directionless New York foreign exchange trading as players attempted to shepherd it into new and most likely lower price ranges against the European units.

Analysts said the market was fumbling for a new rapport between the dollar and West Germany's mark in particular after news of higher U.S. unemployment swept aside expectations of higher U.S. interest rates.

"Today we've been treading water," said Anne Parker Mills, a currency analyst with Shearson Lehman Hutton. "It was a very unsatisfactory day." "The dollar looks like it wants to fall into a new trading range against the Europeans," she said, "but it hasn't done so."

Many players sought a cue from the Treasury's quarterly refunding this week. Strong foreign investor interest in the auctions of $30.5 billion in U.S. government securities could reinforce the dollar.

Analysts said the Treasury's auction Tuesday of $10.6 billion in three-year bills went well, with strong Japanese participation, though the yield on the instruments at auction was up from the last such sale.

The absence of a clear dollar trend shifted activity into cross-trading - the direct exchange of non-dollar units like marks and Japanese yen.

In late New York trading, the dollar was quoted at 1.6570 West German marks, up slightly from 1.6560 late Monday. Against the Japanese unit, the dollar fetched 157.50 yen, down from 158.20.

Chief customer trader Paul Okura of the Bank of Tokyo said players drove the dollar down close to the psychologically important 1.65 mark level, but it found technical support there and retraced upwards.

"Gradually the dollar is going down, but at this point people's focus is on the (Treasury) auction," he said.

Other dollar rates: 1.4310 Swiss francs, unchanged; 5.5670 French francs, up from 5.5620; and 1,215.50 Italian lire, up from 1,214.50. The British pound climbed to $1.6710 from $1.6675.

In Europe, the dollar closed mostly lower in quiet trading. Traders said it was still depressed by last week's U.S. employment data, which provided the clearest evidence to date that the American economy is slowing.

"As anticipated, the dollar continued to drop down after the employment figures," said George McMahon, a Kleinwort Benson foreign exchange manager in London. "It hasn't really done too much today right across the board."

The dollar rose in Frankfurt to 1.6575 deutsche marks compared with 1.6550 andadvanced in Zurich to 1.4355 Swiss francs against 1.4320.

In London, the pound moved up to $1.6710 against the previous Friday's close of $1.6610. A one-day bank holiday did not dispel relief at Conservative Party survival in key local elections last week.

The dollar declined in Brussels to 34.1850 Belgian francs from 34.20 Monday and fell in Milan to 1,215 lire compared with 1,218. Markets in Paris were closed for the Victory-in-Europe holiday.

In Tokyo, the dollar climbed against the yen but slipped against the European units as dealers bought dollars to trade for marks. The U.S. currency closed at 158.05 yen, up from Monday's close of 157.80.

Republic National Bank in New York closed cash gold at $370.50 an ounce, off from $372.25 Monday. The New York Commodity Exchange settled spot gold at $370 an ounce, down from $371.90. In Zurich, gold fell to $370.50 an ounce from $372.50. London gold declined to $369.50 an ounce from $371.25 Friday.

Republic closed cash silver at $5.02 an ounce, off from $5.05. Comex spot silver ended at $4.989 an ounce, off from $5.016. Zurich silver was unchanged at $5.07 an ounce. London silver fell to $5.01 an ounce from

$5.06 Friday.

(MAY 8) UPI - U.S. crude prices leveled off Tuesday after being pushed up to a technical resistance point by news that a large crude-oil pipeline in the Gulf of Mexico was being shut down indefinitely to repair a leak.

The benchmark West Texas Intermediate crude for June delivery edged up 1 cent to $18.28 a barrel on the New York Mercantile Exchange after trading as high as $18.58. Trading was a moderate 74,302 contracts.

''There was a sell-off at the end of the day by a large trader who wanted to sell everything in sight,'' said Mary Haskins of Paine Webber Inc. in New York.

She said the trader may have had an insight into the weekly inventory report of the American Petroleum Institute.

''We'll see when the stats come out,'' Haskins said, adding most traders

were looking for a slight buildup in crude stocks and a slight drawdown in product supplies.

Released after the Merc closed, the API report showed crude stocks last week declined a mere 500,000 barrels to 371.9 million barrels, while gasoline inventories fell 1.8 million barrels.

The report provided little relief from the world oil glut that has driven crude prices down in recent weeks and marked the fifth consecutive week in which U.S. crude inventories have stayed near the nation's peak storage capacity of 372-373 million barrels.

Early Tuesday, Texaco Inc. said it was closing down a pipeline that carries 95,000 barrels of crude oil daily from 36 offshore oil platforms in the Gulf of Mexico to the Louisiana coast until a leak can be repaired.

''That emotionally sort of pushed prices up. It was more of a reaction to the news than any reality of supply and demand,'' Haskins said.

WTI prices climbed to nearly $18.60 a barrel, which traders saw as a resistance level because it represented ''a 50 percent retracement'' of a recent downward move in prices, Haskins said.

Heavy selling late in the session drove prices down, she said.

Unleaded gasoline for June delivery gained 0.62 cent on the Merc to 62.48 cents a gallon after trading as high as 63 cents a gallon.

On the New York Harbor cash market, prompt delivery unleaded gasoline was up 1.1 cents to 63.75 cents a gallon.

A report of a fire in a unit at Chevron Corp.'s big El Segundo, Calif., refinery was the catalyst for the rise in gasoline prices, Haskins said.

''Gasoline sort of took off after that. The market was looking for things to react to,'' she said.

The unit, producing about 65,000 barrels daily, ''will be down roughly 48 hours,'' said Chevron spokesman Rod Spackman. The refinery has a total daily output of about 250,000 barrels, he said.

Spackman said the accident has had ''minimal impact'' on refinery operations. ''It's gotten more attention in the financial community than warranted,'' he said.

On the U.S. Gulf Coast cash market, WTI lost 10 cents to $18.20 a barrel.

On the European spot market, Britain's widely traded North Sea Brent

gained 5 cents to $16.70 a barrel for June scheduled contracts. Monday was the last day of trading for May contracts.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - gained 10 cents to $14.50 a barrel.

June delivery heating oil added 0.90 cent to settle at 51.34 cents a gallon, while prompt delivery heating oil gained 1.15 cents to 56.60 cents a gallon on the New York Harbor cash market.

#90128u2410 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The Agriculture Department, acting in the wake of two huge corn sales, gave the Soviet Union permission Tuesday to buy up to 22 million metric tons of U.S. grain without having to ask for government approval.

The Kremlin already has purchased 18.9 million tons of corn and wheat this fiscal year, including 2.35 million tons of corn in the past five days.

Ordinarily, the Soviet Union would have to ask permission for purchases that exceed 12 million tons. However, the so-called trigger level was raised to 16 million tons last October and then to 20 million tons in December.

''Today's increase in the consultation level ... results from contact between the two sides over recent days and takes into account recent increases in (Soviet) purchases of U.S. corn,'' the Foreign Agricultural Service said in a statement.

Soviet purchases this fiscal year include 15.6 million tons of corn, 3.3 million tons of corn, 1.2 million tons of soybean meal and 342,000 tons of soybeans.

Last year, the Kremlin bought a record 21.7 million tons of U.S. corn and wheat, including 16.3 million tons of corn.

#90128u2430 05/08/1990 ~United Press International

EAST RUTHERFORD, NJ (MAY 8) UPI - Harry Weltman resigned as general manager of the New Jersey Nets Tuesday, saying his team's last-place finish left him suffering from stress and a skin rash.

''This was probably the toughest of the three years,'' Weltman said by conference call from his office at the Meadowlands. ''They were all very tough. This year has taken its toll. I began to feel the stress. I began

to weigh my own personal goals much more readily.

''When I had to see a dermatologist I knew there was something wrong and maybe I wasn't hiding the stress as well as I thought. For some reason I had a skin rash which I'd never had before.''

Weltman said the rash was not serious and disappeared once he made the decision to resign. He hinted that Nets ownership did not let him run the club the way he wanted.

''It's always difficult when you have more owners than players,'' he said.

Weltman lasted three years as general manager of the beleaguered franchise. His team finished with the worst record in the NBA (17-65), worse than the two expansion teams - Minnesota and Orlando.

The Nets traded their best player, Buck Williams, to Portland before the season, and under Coach Bill Fitch were unable to build a cohesive starting unit.

''Rebuilding a franchise is a very tough job, much more difficult than starting a new one,'' Weltman said. ''We did not bring in a whole slate of veteran players, we wanted to develop players. The way to build is to bring in young players and provide an environment for them to learn in, which means you must be prepared to lose a lot of close games at first.''

Weltman expressed no regrets about leaving and said he thought the team has taken steps toward turning things around.

''My progress is a lot more real than is apparent,'' he said. ''I really do feel that the nucleus of a pretty good team has been set in place. If I made a mistake it was in overestimating the team that I got in the first place. Unfortunately, Pearl Washington didn't turn out to be very good for us.

''Our roster has been improved dramatically. I just wish we had a chance to see these guys play. We couldn't overcome injuries to key players.''

#90128u2431 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The oil industry, pressing its attack on alternative fuel provisions in pending clean air legislation, issued a study Tuesday contending ''gasohol'' actually increases car emissions of smog-causing pollutants.

The study, performed by a consultant hired by the American Petroleum Institute, said while the gasoline-grain alcohol fuel mixture reduced

emissions of carbon monoxide by 25 percent, it boosted hydrocarbon and nitrogen oxide pollution linked to ozone smog.

In particular, the study said gasohol was more prone to evaporate than gasoline and thus released 50 percent more hydrocarbon fumes from car fuel systems during normal operations.

Overall, the study said gasohol would cause a 6 percent increase in the ozone-forming potential of vehicle emissions.

The study, done by Sierra Research Inc. of Sacramento, Calif., said gasohol also was more expensive than gasoline, meaning that if Congress required greater use of such fuel mixtures, ''motorists would end up paying more for dirtier air.''

That conclusion was disputed by a spokesman for the Renewable Fuels Association, who said numerous independent studies found gasoline-ethanol fuels provided clear environmental benefits.

Eric Vaughn, association president, charged the oil industry was waging a ''distortion campaign'' to dissuade Congress from enacting alternative fuels legislation that would require expensive changes in refining operations and end its near-monopoly on motor fuels.

''This report is part of the greatest oil slick since the Exxon Valdez,'' said Vaughn, whose group represents farm interests that would benefit greatly by increased use of ethanol, which is derived from corn.

Vaughn charged the report was based on faulty analytical methods and assumptions that were manipulated to place ethanol in the worst possible light.

The controversy is the latest round of a massive lobbying war now raging as the House braces for floor debate later this month on its clean air bill, with alternative fuels expected to be a major battleground.

The Senate already has passed a clean air bill that would require greater use of grain alcohol and related fuel additives in cleaner-burning ''reformulated'' gasolines sold in the nation's smoggiest cities.

The oil industry study was limited in that it looked only at gasohol, a mixture of 10 percent grain alcohol and 90 percent gasoline. It did not examine the performance of ethyl tertiary butyl ether, or ETBE, a fuel additive made from grain.

Environmental Protection Agency officials declined to comment on the validity of the oil industry study, but said there was a big difference between gasohol and ETBE in terms of environmental benefits.

Don Zinger, assistant director of the EPA's Office of Mobile Sources, said while gasohol had high evaporative emissions, ETBE generally did not because it was incorporated into gasoline with more sophisticated refining techniques.

''There are other uses of ethanol (besides gasohol) that come out more environmentally beneficial,'' said Zinger.

Congressional efforts to promote ethanol provisions also came under attack from five former administrators of the Federal Highway Administration, who charged federal tax breaks for ethanol were dramatically cutting revenues for the federal highway trust fund, which pays for road improvements.

The administrators also questioned the environmental benefits of ethanol, saying it would only provide marginal reductions in carbon monoxide emissions.

WASHINGTON (MAY 8) UPI - Congressional Democrats agreed Tuesday to participate in a budget summit with President Bush but warned that they may back out if any options for reducing the deficit - including income tax hikes - are ruled out in advance.

House Democrats announced their acceptance after a party caucus. Senate Democrats, who met earlier, indicated a summit with Bush was ''inevitable'' and were expected to accept later.

''The general consensus of the (House Democratic) caucus was that if the president wanted to talk it was our responsibility to respond and sit down with him,'' said Rep. Steny Hoyer, D-Md., the caucus chairman.

He said Democrats felt ''we ought to listen to the proposals that the president was prepared to make'' to solve the growing deficit problem.

But some Democrats were skeptical.

''We did a lot of lip-reading in the last presidential election and now it's come home to roost,'' Rep. Richard Durbin, D-Ill., said, referring to Bush's ''read my lips - no new taxes'' pledge. He said a summit ''could easily be a trap'' for Democrats on taxes.

Senate Democratic leader George Mitchell of Maine delayed announcing Senate acceptance of Bush's summit offer until after conferring with House Speaker Thomas Foley, D-Wash.

Party leaders said talks could begin this week. A bipartisan group of congressional leaders was scheduled to meet with Bush early Wednesday and will likely set a date for the negotiations, a White House spokesman said.

Earlier, after a Republican congressional leadership meeting with Bush at the White House, assistant Senate GOP leader Alan Simpson of Wyoming appeared to foreclose any income tax increases. But he left the door open to raising several other taxes or user fees.

''The president isn't talking about 'new taxes,' because he already has revenue in his budget proposal and that has always been in the budget proposal,'' Simpson said after the hourlong session. ''Nobody is talking about raising income tax rates.''

Simpson later backpedaled, saying he stated only his views on income taxes not necessarily Bush's.

Mitchell warned that Democrats may back out of a summit if any conditions are set beforehand, as Simpson initially suggested.

In a meeting Sunday with congressional leaders, Bush promised everything, including taxes, would be on the negotiating table.

''No preconditions means no preconditions,'' Mitchell said when asked about Simpson's comments. ''If there are preconditions, we would have to reconsider the situation.''

Senators leaving the ''spirited'' luncheon echoed the feeling of Sen. Patrick Leahy, D-Vt., that a budget summit is ''inevitable.''

''We will go to a summit,'' said Sen. Dennis DeConcini, D-Ariz.

''Generally there's agreement,'' added Sen. Christopher Dodd, D-Conn. ''There's no alternative.''

DeConcini said several senators expressed ''some reluctance to go because of the last summit'' last year, which produced a gimmick-riddled deficit reduction package nobody liked and which could not be implemented.

He said Senate Democrats felt Bush must raise the subject of tax increases.

''I don't think the Democrats are going to talk taxes until the president talks taxes,'' Deconcini said. ''We're not going to raise the issue.''

He said Democrats ''ought to try to force him (Bush)'' to set the amount of deficit reduction needed before budget talks begin.

Simpfon, at the White House, predicted that the soaring costs of bailing out the nation's faltering savings and loan industry is ''the real sinker in this whole game'' because it's driving up the deficit.

Simpson pointed to a variety of alternatives the administration would consider in the coming budget discussions to reach the goal of bringing the deficit down to the $64 billion level required by the Gramm-Rudman balanced budget law for the fiscal year starting Oct. 1.

''Value-added taxes, additional user fees, taxes on booze and cigarettes, a national lottery, a one-cent national sales tax, all sorts of things like that are in the mix, some of it talked about and some of it not,'' Simpson said.

White House press secretary Marlin Fitzwater, briefing reporters later, refused to comment on specific proposals Bush may consider.

''We're not going to prejudge the process by speculating in any fashion on specifics. We want to go into this with as honest and open approach as possible,'' Fitzwater said.

Bush budget director Richard Darman has estimated a shortfall in reaching the 1991 deficit target that's up to $20 billion higher than expected and predicted S&L bailout costs could increase the deficit.

#90128u2446 05/08/1990 ~United Press International

WASHINGTON (MAY 9) UPI - The Bush administration wants the Securities and Exchange Commission to have regulatory control of the "one market" of stocks and stock index futures, Treasury Secretary Nicholas Brady said

Tuesday.

At present, the Commodity Futures Trading Commission oversees the stock index market and CFTC Chairman Wendy Gramm said there was no evidence to justify stripping her agency of jurisdiction.

Leaders of the Senate Agriculture Committee signaled opposition to Brady's proposal to include shifting the regulatory authority as part of a bill to toughen overall controls on the futures industry. Brady announced the plan in a letter delivered to the committee just before it began a hearing on the CFTC-SEC dispute.

"It's a nice letter. It guarantees nothing will be done," said committee Chairman Patrick Leahy, D-Vt., arguing the bill would bog down in parliamentary "holds" and filibusters. Brady said legislation to accomplish the change would be submitted "within the next week."

Leahy said CFTC reorganization should be handled seperately while the question of jurisdiction was studied. There has been sharp-edged debate within the administration and the financial world over the roles of the SEC and the CFTC for many months. Recent gyrations in the market have only intensified the debate.

Brady and a deputy who testified at the hearing said the transfer of stock index regulation is warranted because of increased volatility in financial markets. They blamed four stock market plunges in the past three years on connections between stock trading and the indexes, which are based on stock prices.

"All (four 'market breaks') shared the characteristic of enormous selling pressure from the stock index futures markets," Brady wrote. Brady argued stocks, stock options and stock indexes were all parts of "one market" that deserves a single regulator. "We should take steps now to unify and harmonize regulation to reduce the likelihood that minor events will precipitate major market disruptions - and to have the tools in place to contain systemic risk when such disruptions occur," he said.

Brady said the administration plan would give SEC authority over stock index futures, oversight authority over futures exchanges' ability to set margins and modify the "exclusivity clause" that says only the futures markets can deal in financial instruments with any degree of "futurity."

The futures markets involve trading contracts for possession of commodities at a future time at a set price. Because of that, they have enormous influence in determining prices for commodities that range from grain to precious metals.

"The reasons given in support of any jurisdictional change do not

withstand objective scrutiny," CFTC's Gramm said in prepared testimony. "Any type of quick-fix regulatory shift will only raise false hopes, increase regulatory complexity, raise capital costs and diminish the liquidity, efficiency and competitiveness of U.S. futures markets."

Gramm said economists have failed to find any link between futures margins and volatility in the stock market. Nor is there "concrete evidence" brokers are abusing regulations, she said. In the end, she said "jurisdictional gerrymandering," such as the transfer of stock index futures, "would only increase regulatory costs and confusion."

SEC Chairman Richard Breeden asked for passage of legislation to reduce the reach of the "exclusivity clause," to give the SEC or the Federal Reserve Board control over margins on stock index futures, and to transfer of stock indexes to the SEC.

#90128u2450 05/08/1990 ~United Press International

BOSTON (MAY 8) UPI - Jimmy Rodgers, who led the Boston Celtics to their worst consecutive playoff showings in 38 years, was fired Tuesday after just two years as coach of the NBA's winningest franchise.

''This has been a very difficult and trying time for all us,'' Celtics General Manager Jan Volk said in announcing the action, which came just two days after the Celtics were eliminated from the opening round of the Eastern Conference playoffs by the New York Knicks.

''We felt that we needed to make a change and, in the interest of all concerned, we felt it necessary to do so as quickly as possible,'' Volk said.

The Celtics, who have won 16 NBA championships, were swept by the Detroit Pistons in the first round in 1989. Boston had not suffered back-to-back, opening-round elimination since 1951-52.

Rodgers, 47, spent 16 years as an assistant coach in the NBA, succeeding K.C. Jones as head coach of the Celtics in the spring of 1988. He came to Boston in 1980, accompanying Bill Fitch when the Cleveland coach left the Cavaliers to take over the Celtics job.

The normally easy-going Rodgers showed the strain of Boston's struggles during the 1989-90 season, occasionally snapping at reporters.

In Rodgers' first season as head coach, three-time MVP Larry Bird was lost to injury after just six regular-season games. Bird underwent heel surgery and did not play again that season as his teammates compiled a 42-40 record before losing in the playoffs to a Detroit team that went on to win

the NBA championship.

This season, with a healthy Bird, the Celtics were 52-30 but again were first-round playoff losers, squandering a 2-0 lead against the New York Knicks in a best-of-five series. The Celtics became just the third team in NBA history to lose a five-game series after winning the first two contests.

Rodgers tried to implement a fast-break offense and Boston struggled through the first half of the season barely over the 500-mark. Players were in favor of the half-court offense, which Boston used while winning three NBA titles since Bird joined the team in 1979.

After Sunday's loss to New York, Bird said he believed Rodgers' job was safe and denied there was a clash of wills regarding between the star and the coach.

''Our relationship's good,'' Bird said. ''Some press started it all. I respect the man. I respect all the coaches I ever had.''

Bird said that playing for Rodgers has been an ''awesome experience,'' and added, ''Of course I don't agree with everything, I agree with 95 percent of it.''

''Jimmy Rodgers will be here long after Larry Bird's gone,'' Bird said when asked whether he expected a coaching change.

(MAY 8) UPI - U-S Health Secretary Sullivan says that despite the 600-BILLION dollars Americans spend each year on health care, the poor and minorities continue to have serious medical problems. Sullivan told the opening of the annual convention of the World Health Assembly in Geneva that 31-MILLION Americans simply CAN'T afford the high cost of health.

European Community leaders in Brussels today signed new economic agreements with Bulgaria and East Germany. The agreements call for relaxed trade restrictions and economic co-operation in agriculture, mining, housing and energy. Bulgaria's prime minister says the move confirms the ''irreversibility'' of his country's democratic reforms.

(MAY 8) UPI - The National Association of Realtors says sales of previously owned homes fell one-point-six percent in the first three months of 1990...and signficantly more than that in the Northeast.

Realtors say the Northeast market has bottomed out, as home sales have slipped five-point-five percent.

The Arkansas River crested five feet above flood stage today at Little Rock, flooding homes, washing cattle downstream and driving snakes to higher ground. The river has flooded at least 450 homes, and damage estimates are in the Millions. Other rivers also are surging over their banks in the state's worst flooding in about six decades.

According to a new international cost of living study, Tehran is by far the most expensive city in the world. Contrary to its reputation, New York ranks only 32nd,. Based on prices of 151 products, the study ranked Tehran Tokyo and the African city of Libreville as the three costliest cities. West German cities are among the cheapest.

#90128u2502 05/08/1990 ~United Press International

NEW YORK (MAY 8) UPI - For the fifth straight week, U.S. crude oil supplies remained at near-capacity levels last week, indicating little relief from the glut that has depressed world oil prices, the American Petroleum Institute reported Tuesday.

For the week ended May 4, crude oil inventories slipped a mere 500,000 barrels to 371.9 million barrels from 372.4 million barrels in the prior week but remained well above year-ago levels of 344.7 million barrels.

Crude oil inventories have been at this near-capacity level since early April, when oil prices plummeted 14 percent in a 10-day period.

The API new report indicates no near-term relief from the effects of the world oil glut, caused in part by overproduction of the 13-nation Organization of Petroleum Exporting Countries.

Crude oil imports declined marginally last week to 6.0 million barrels a day from 6.1 million barrels a day in the previous week and were level with year-ago daily imports.

The weekly oil-industry survey also showed a slight fall in gasoline production to 6.7 million barrels daily from 6.9 million barrels a day in the previous week and were less than the year-ago daily output of 6.8 million barrels.

U.S. refineries operated at 84.4 percent of capacity last week, compared with 83.8 percent a week earlier and 84.1 percent a year ago.

Gasoline supplies declined to 219.2 million barrels from 221.0 million barrels in the prior week and stayed behind year-ago levels of 222.6

million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also dropped, to 168.1 million barrels from 168.9 million barrels a week earlier, but remained higher than year-ago levels of 155.3 million barrels.

Gasoline imports slipped to 439,000 barrels daily from 507,000 barrels daily in the previous week but were well above year-ago imports of 272,000 barrels daily.

Imports of all refined products eased to 1.9 million barrels daily from 2.3 million barrels daily in the preceding week and were less than year-ago imports of 2.1 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - inched up to 96.9 million barrels from 95.9 million barrels a week earlier and were sligthly higher than year-ago levels of 95.8 million barrels.

Distillate production edged up to 2.9 million barrels daily from 2.8 million barrels daily in the preceding week and was higher than year-ago output of 2.7 million barrels daily.

Distillate imports fell to 204,000 barrels a day from 339,000 barrels a day in the previous week and were less than year-ago imports of 266,000 barrels a day.

LIMA, PERU (MAY 8) UPI - U.S. Ambassador Anthony Quainton said Tuesday the United States may send equipment and weapons to Peruvian security forces but will not be sending troops to suppress the cocaine trade and Peru's guerrilla war.

''The articles (in newspapers) saying we intend to send troops to Peru are not true,'' the ambassador told newsmen after visiting the Chamber of Deputies.

''We do not have any intention of sending troops to Peru to participate in anti-insurgency operations, and even less so against narcotics traffickers '' he said.

He said, nevertheless, the United States and Peru are undertaking discussions about how the Peruvian armed forces may be helped. He said the aid may be in the form of equipment, communications, and arms and would amount to $35 million.

Left-wing politicians have criticized the government of President Alan Garcia on the basis of reports saying U.S. forces would arrive to help Peruvian soldiers and anti-drug agents man a jungle fort.

Both the Peruvian and American governments have denied the reports.

Peru is currently battling an insurgency by a hard-line communist movement that calls itself Sendero Luminoso, Spanish for Shining Path, the hemisphere's most fanatic insurgency. Shining Path has extended along the spine of the Andes and into major cities since May 1980. The guerrillas consider themselves the vanguard of Maoist world revolution.

In the central jungle, Shining Path rebels are allied with cocaine traffickers.

Peru and neighboring Bolivia are the world's leading growers of the coca plant, whose leaves are the raw material from which cocaine is produced. Colombia, where the leaves are refined into cocaine, is the world's leading marketer of the drug.

WASHINGTON (MAY 8) UPI - A Nevada company has agreed to stop distributing weight control products after the government warned they falsely claim to have therapeutic value, the Food and Drug Administration said Tuesday.

Phoenix International Marketing Corp. of Sparks, Nev., agreed to stop distributing its ''Phoenix Fiber Cookie, Phoenix Fizzie, Phoenix Nutritious Beverage and Phoenix Vitamins and Minerals Capsules,'' the FDA said.

''The products make drug-type claims but ... use of these products in lieu of medication prescribed by a physician could present serious adverse health consequences for some individuals,'' FDA said.

The move came after the FDA notified the company that the '''Phoenix for Life' weight control program'' violated federal law by making ''unsubstantial medical claims that the products were useful for weight control, cardiovascular disease, colon cancer, diabetes and diverticulitis '' the FDA said.

Tests also found the cookies contained double the 120 calories claimed, the FDA said.

In addition to stopping distribution of all products, the company agreed to recall all promotional materials that make therapeutic claims and withdraw and relabel any existing cookie stock, the agency said.

''The company said notices of this action were going to 387 primary distributors and 50,000 sub-distributors and other involved individuals,'' the FDA said. ''The company said it will also introduce replacement cookie

with a new formulation.''

#90128u2589 05/08/1990 ~United Press International
CAPE CANAVERAL, FL (MAY 8) UPI - The shuttle Columbia's launch next week on a long-awaited Spacelab astronomy flight could be delayed several days because of problems with the ship's Freon cooling system, officials said Tuesday.

If the problem is deemed unacceptable for flight and cannot be fixed at launch pad 39A, sources said, NASA engineers could be forced to haul the shuttle back to its hangar for repairs, a move that would cause a major delay for the 36th shuttle mission.

''We're trying to understand it and to understand where do we go from here '' said William Lenoir, NASA's associate administrator for space flight. ''Will we get ourselves convinced that it's OK and we'll press on with flight? I don't know.''

The problem with one of Columbia's two coolant loops, used to carry heat away from the shuttle's electronic gear, cargo and crew cabin, came to light during the first day of a two-day flight readiness review to clear Columbia for blastoff May 17 on a 10-day mission.

Lenoir said engineers hoped to develop a plan of action overnight and to resolve the issue over the next few days.

''We're not going to fly unless we think it's absolutely safe,'' he said. ''We're not going to launch unless we're convinced we have two healthy Freon loops that we understand and that, to the best of our ability to project ahead, both are going to last the entire scheduled mission.''

Columbia and a seven-member crew are now scheduled for liftoff at 12:45 a.m. EDT May 17 to begin a critical Spacelab mission to study ultraviolet and X-ray radiation from deep space that is blocked by Earth's atmosphere.

But during routine checks Sunday, engineers discovered problems with one of two Freon cooling systems on board Columbia. The flow of coolant through part of the system suddenly dropped, possibly because of a sticky valve or contamination in a filter.

Making such repairs at the launch pad with the shuttle in a vertical position has never been attempted before, but NASA Administrator Richard Truly downplayed the potential for hauling Columbia back to its hangar, saying, ''We'll think a long time before we don't try to fix it on the pad.''

While the full impact of Columbia's cooling problem was not immediately known, engineers said the shuttle's scheduled liftoff May 17 was in jeopardy. Truly said his only concern was making sure the shuttle is safe for flight.

''Nobody remembers the century that Galileo looked at the planet Jupiter (and) nobody's going to care whether we fly on a Tuesday or Thursday. I look at this mission the same way,'' he said.

''You want to understand it. And that's what we're off trying to do. We're off looking at previous flight experience on this loop and on this vehicle and it may very well be that they recommend that we go fly (as is). I just don't know.''

The shuttle's two Freon cooling system loops are used to carry heat away from the ship's electronic gear. The valve in question is located beneath the floor of the shuttle's payload bay above the ship's cargo of four telescopes.

Fixing the valve would be difficult at the launch pad with the shuttle in the vertical position and could take five to 10 days, sources said, delaying launch to late this month.

Complicating the repair job, engineers would have to take special care to protect Columbia's fragile cargo, located on two pallets directly below the area of the payload bay floor where the suspect valve is located.

''The valve normally controls the proportion and rate of Freon distributed between the crew cabin heat exchanger and the cooling system for orbiter payloads,'' the NASA statement said. ''On Sunday, engineers saw an unexplained change in the flow rate.''

While still working, Freon coolant loop No. 1 is operating at a reduced flow rate and ''engineers are reviewing data on the system and conducting troubleshooting activities,'' the statement said.

''They definitely think it's in the valve area,'' said one official. ''That's good news. Those loops run through the whole payload bay and the crew compartment, all through there. ''They think they know where it is, they just don't know what's causing it.''

Columbia and a seven-member crew - a post-Challenger record - plan to spend nine or 10 days in orbit to study high-energy astronomical targets.

To collect as much data as possible, Columbia's crew will work in two 12-hour shifts throughout the flight with mission commander Vance Brand, 59, co-pilot Guy Gardner, 42, and John ''Mike'' Lounge, 43, responsible for keeping the shuttle shipshape and pointed in the right direction.

The ''Astro-1'' observatory will be operated by astronauts Robert Parker, 53, and Jeffrey Hoffman, 45, along with civilian astronomers Ronald Parise 38, and Samuel Durrance, 46. All four hold doctorates in astronomy.

ALLENTOWN, PA (MAY 8) UPI - A ''clearly distraught'' gunman who threatened to jump from the 23rd floor of Pennsylvania Power & Light Co.'s corporate headquarters surrendered Tuesday after 20 minutes on a narrow windswept ledge, police and utility officials said.

City police said construction worker Scott Dutko, 27, threatened no one but himself during the incident and no shots were fired. No charges were filed immediately.

PP&L guards evacuated about 1,000 people from the 24-story building after Dutko went to the 22nd floor and demanded access to the roof about mid-morning.

PP&L spokesman Jim Marsh said when told by employees he would have to see security, Dutko brandished a .22-caliber handgun, pointed it ''at his own head and said, 'Get me someone up here now.'''

''He was clearly distraught and made it clear he intended to end it all,'' Marsh said.

Police Chief Wayne Stephens said members of his department's emergency response team found Dutko standing ''like a statue'' on an 8-inch-wide parapet that surrounds the building's 23rd floor.

''He was on the ledge and made many overtures toward jumping. It very windy up there. I don't know how he kept the balance he kept,'' he said.

Stephens said after talking with police negotiators, Dutko turned over the handgun and a few minutes later allowed officers to pull him down from the ledge.

Dutko was led from the building in tears. Stephens, who described the suspect as ''despondent and not communicating well,'' said police had not determined why he wanted to commit suicide.

Marsh said after the confrontation on the 22nd floor, Dutko managed to find his own way to the 23rd floor and onto the ledge. There is a storage area but no offices on the 23rd floor.

#90128u2645 05/08/1990 ~United Press International
NEW YORK (MAY 8) UPI - Imelda Marcos collapsed in tears Tuesday, interrupting her rackeeteering trial for the second time, just as an FBI witness testifed that her daughter received funds from a secret account linked to the Marcoses.

The former Phillipine first lady, dressed as usual in black and wearing a blood pressure monitor, was taken in tears from the third-floor courtroom

of in U.S. District Court in Manhattan to a first-floor nurse's station.

Benjamin Cassiday III, one of her lawyers, said she fell ill.

Courthouse sources said her illness was ''the same as before,'' referring to April 26 when she broke down in tears, her blood pressure shot up and she had to be escorted from the courtroom.

Wearing a sad face and dark glasses, Marcos emerged from the aid station on the arms of two U.S. marshals, told reporters she felt ''OK,'' then slowly walked out of the building.

Marcos is charged with racketeering, conspiracy, fraud and obstruction of justice for allegedly plotting with her husband, the late Philippine President Ferdinand Marcos, to divert more than $200 million from the Philippine treasury for personal use.

The defendant began sobbing as FBI agent James Trimbach was discussing withdrawals her daughter, Imee, made from a secret account that was linked by previous testimony to her parents.

U.S. District Judge John Keenan excused the jury, explaining that Marcos was ill and that the trial would continue in the morning.

Earlier Tuesday, the prosecution set up a huge, eight-color chart that it said shows how millions of dollars in illicit funds flowed from around the world into a fortune in New York real estate and art.

The six-foot high, 12-foot wide chart was splashed with bright lines and arrows that stretched from ''sources of funds'' on the left through ''intermediary accounts'' in the middle to ''use of funds'' at the right.

Next to the chart was a photograph, blown up to about 2 1/2 by 3 1/2 feet, of Midtown Manhattan's Crown building, bought by the Marcoses.

Trimbach said the purpose of the chart was to show how the funds made their way from banks in Geneva; Manila, the Philippines; New York; Boston, and Nassau, the Bahamas, to New York and went toward purchasing the $51 million Crown building and a $6 million collection of arts and antiques.

Judge Keenan warned jurors not to be impressed with the chart's size or flashy colors, or photo enlargement of the Crown building.

Trimbach testified that he spent six months tracking the movement of the funds. ''In May 1987 I was assigned to trace the flow of funds for the purchase of the Crown building,'' he said.

The Marcoses bought the 26-story building in 1981 for $51 million.

Donning a pair of horn-rimmed glasses, Trimbach also pointed to lines in the chart that purportedly showed the origin of funds that paid for the $6 million collection of antiques and art from the collection of New York philanthropist Leslie R. Samuels and and his wife.

Mrs. Marcos's co-defendant, former Saudi arms dealers Adnan Khashoggi, is charged with obstructing justice and fraud.

#90128u2653 05/08/1990 ~United Press International

NEW YORK (MAY 9) UPI - A former Bear Stearns & Co. executive pleaded innocent Tuesday to charges he was involved in a $1.6 million embezzlement and money laundering scheme.

A trial date of Sept. 10 in U.S. District Court in Manhattan was set for Joseph Stella, 46, formerly a vice president and manager of the stock loan department at Bear Stearns.

Stella, 46, of Staten Island, and three others were charged with allegedly covering up the laundering of more than $16 million in checks through an embezzlement of securities from Bankers Trust Co. and fees from stock loan transactions in 1980 and 1981.

Bear Stearns was not involved in the alleged wrongdoing.

Although the May 1 indictment alleges the four laundered the money, they were only charged with counts related to obstruction of the government's investigation.

The indictment charges Stella, his attorney and older brother Fred Stella and his client, Roger Capozzi Sr., with conspiracy to obstruct justice, perjury and obstruction of justice.

Capozzi allegedly cashed checks for Fred Stella through a Brooklyn clothing embroidery business.

A fourth man, Joseph Pontarelli, 47, of Manhattan, was charged with filing a false tax return and income tax evasion. He allegedly cashed checks for Fred Stella through a Manhattan liquor store, according to the indictment.

If convicted, Joseph Stella faces up to five years in prison and a $250,000 fine, while his brother faces 30 years and a $1.5 million fine, prosecutors said.

Capozzi faces a possible 35 years in prison and a $1.75 million fine and Pontarelli faces a possible eight years and a $500,000 fine.

#90128u2720 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - Bolivian President Jaime Paz Zamora asked President Bush for fresh U.S. aid Tuesday to help underwrite a campaign to combat Bolivia's coca crop, the raw material of cocaine, aides said.

Paz Zamora told Bush he needs about $150 million a year in foreign investment to finance a crop substitution and economic development program and would like the United States to pick up at least a third of the bill, the aides said.

Clemente Cohen, a spokesman for the Bolivian president, said that although Bush made no specific commitment, he was supportive and Paz Zamora was ''very optimistic.''

Bolivia, along with Colombia and Peru, produce virtually all of the world's cocaine, and the United States is the biggest consumer. Last winter, the four nations signed an agreement to increase joint drug-fighting efforts.

Bush held about three hours of talks at the White House with Paz Zamora Tuesday, during which follow-up agreements were reached to combat drugs and promote trade.

In a departure statement, Bush praised Paz Zamora for being a leader in the drug war and for overhauling the economy of Bolivia, still one of the poorest nations in South America.

''Mr. President,'' Bush said, ''let me assure you that you and your countrymen will not stand alone in the fight against cocaine or in the drive for economic development.''

Paz Zamora, speaking through an interpreter, said, ''I know we are going to have very efficient results. ... This is a new stage to our relationship.''

Bush has already recommended $150 million in economic and $35 million in non-combative military assistance to Bolivia in the 1991 budget year, more than double current spending, as part of his Andean anti-drug strategy.

Cohen said the assistance Paz Zamora requested Tuesday would be in addition to Bush's proposal now before Congress. He said the Bolivian president made similar requests for funds on a recent trip to Italy, Belgium and Spain.

Under Bolivia's crop substitution program, farmers are paid $2,000 per

hectare, about 2.5 acres, to tear up coca and plant flowers, oranges or other crops.

In the first four months of 1990, Bolivia paid farmers to destroy more than 8,400 acres of coca, a record pace made possible in large part by a collapse in coca prices caused by a mounting crackdown against cocaine traffickers.

In an interview published Tuesday in The Washington Post, Paz Zamora reiterated his opposition to getting the Bolivian military more involved in the fight against drug traffickers, a major goal of Bush's anti-drug strategy.

During his meeting with Bush, however, the role of the Bolivian military was generally avoided and the two presidents focused instead on their mutual efforts to combat narcotics, aides said.

Paz Zamora, 51, arrived in Washington Monday and met with officials from the State Department and the president of the Inter-American Development Bank.

On Wednesday, he is to meet with congressional leaders and officials from the U.S. Chamber of Commerce and to address the National Press Club.

#90128u2761 05/08/1990 ~United Press International

STERLING HEIGHTS, Mich. (MAY 9) UPI - Ford Motor Co. announced Tuesday plans to convert its Van Dyke plant in suburban Detroit into a facility that will produce automotive transmissions within the next few years.

The 1.9-million square foot Sterling Heights plant, opened in 1968, currently makes axles and other steering and drive train parts, employing 1,600 hourly and salaried workers.

Alex Trotman, executive vice president for Ford's North American Automotive Operations, said the conversion is subject to approval of the company's board of directors. Ford will seek state and local government assistance for the project, he said.

Trotman was at the Van Dyke plant Tuesday to award workers Ford's Q1 Quality Award, making the facility the 52nd such Ford location to be so honored.

Trotman said the new transmission will be a modern electronically controlled gearbox. ''But we cannot discuss further details of the transmission, the vehicles in which it will be used or the cost involved until final approval is obtained,'' he said.

The new transmission is part of Ford's efforts to provide its cars with more fuel efficient powertrains, he said.

Trotman said the only development that could hinder this program is if the Clean Air legisltion now in Congress creates an obstacle for its future product programs.

Ford recently reopened its Romeo plant north of Detroit to build a new family of V8 engines. It is believed that the new transmissions could be used with those engines.

#90128u2792 05/08/1990 ~United Press International

WASHINGTON (MAY 8) UPI - The Senate rejected a series of Republican-backed changes Tuesday in legislation to revise the 51-year-old Hatch Act, but GOP leaders gave no sign they would abandon their week-old struggle to cripple the bill.

Senate Democratic leader George Mitchell of Maine filed a cloture petition - which would cut off debate and force a final vote sometime after Thursday - but said he would withdraw it if Republicans agreed to a fixed time for a vote.

Republicans had hinted they might seek to attach broad campaign finance reform legislation to the overall bill, which would ease restrictions on political activity by government employees.

But following a closed-door party caucus, GOP lawmakers said they would not, at least for the time being, try to tie the contentious campaign proposal to the legislation.

Still, Republican senators vowed to continue efforts to change the bill, which the White House has said the president would veto. ''We'll just keep proposing amendments,'' said Sen. Mitch McConnell, R-Ky.

The Democratic-led Senate has thus far rejected by wide margins all major Republican attempts to change the bill. It continued that pattern Tuesday, defeating:

-By 64-32, an amendment that would prohibit federal employees or postal workers from holding office in a political party.

-By 51-46, an amendment that would exclude employees of the Internal Revenue Service, the Central Intelligence Agency, the Federal Election Commission and the Justice Department from the liberalized rules of the Hatch Act.

-By 61-36, an amendment that would bar the Hatch Act revisions on soliciting for in-house political action committees from taking effect until all PACs are outlawed.

-By 66-30, an amendment that would have extended the provisions of the bill to all military personnel.

Despite those actions, however, the Senate also accepted, on a voice vote, an amendment from GOP leader Robert Dole of Kansas that would require that anyone who violated the Hatch Act twice not be hired for another government job.

The basic legislation, which President Bush's senior advisers have said will be vetoed, would clarify limits on political activity of government workers.

While it would prohibit all on-the-job political activity, it would allow federal and postal workers on their own time to hold office in a political party, distribute campaign literature and solicit votes, organize and work on phone banks, organize and participate in political meetings, publicly endorse candidates and solicit contributions to political action committees of a federal employee organization to which both the employeee and the donor belong.

The bill, however, would prohibit federal and postal employees from running for partisan office or solicit political contributions from the general public - activities permitted in a bill approved by the House last year.

Sen. John Glenn, D-Ohio, floor manager for the bill, defended the measure, saying, ''The problem with the Hatch Act is it is so murky, so unclear, federal employees don't know what they can do on the job or off the job.''

''The bill says you cannot do anything politically on the job, but off the jobs you can do certain things,'' Glenn added. ''It takes away all this uncertainty.''

But Sen. William Roth, R-Del., warned that ''coercion will spring forward'' and said it was impossible to eliminate the perception of political activity on the job.

''The line of on-duty, off-duty is only a mirage,'' Roth said, saying adoption of the reforms would mean an end ''to a non-partisan civil service.''

#90128u2796 05/08/1990 ~United Press International
(MAY 8) UPI - A sailor dies in a fire at sea... a new president in Costa Rica... the drug war is discussed at the White House... and the next shuttle mission may be delayed. Those stories and more, next from U-P-I.

The Pentagon has NOT yet released the name of the sailor killed this morning in a fire aboard the guided-missile destroyer U-S-S Conyngham on maneuvers off the North Carolina coast. However, reports say the victim is a Montgomery, Alabama man.

A secretary for U-S Bankruptcy Judge A. Pope Gordon Senior has confirmed that it was the judge's son, A. Pope Gordon Junior who died in the fire.

And a Montgomery T-V station has quoted the secretary as saying that Gordon is NOT the only fatality.

The fire aboard the ship injured 12 men. The injured were taken by helicopter to two Virginia hospitals for treatment of burns and smoke inhalation.

The U-S-S Opportune, a Navy salvage ship, is now towing the disabled destroyer, which was expected to arrived at the Norfolk Naval Station late Tuesday.

The Conyngham was on routine maneuvers about 80 miles off the coast of North Carolina when the fire started early today. The flames apparently started in the ship's engineering center and spread to the combat information center.

By mid-day, all fires abord the Conyngham were out.

#90128u2818 05/08/1990 ~United Press International
(MAY 8) UPI - Bolivian President Jamie Paz Zamora met with President Bush at the White House today. He was expected to ask for an additional 150-Million dollars in U-S aid to help fight Bolivian drug traffickers.

In an interview Paz Zamora said his country needs the money immediately to expand a crop substitution program that pays farmers to rip out coca leaves used to make cocaine and to plant alternative crops.

Bolivia is already due to receive 150-MILLION in U-S assistance in fiscal 1991, double the current figure.

Drug experts say the program should be expanded now while the price of coca is plunging because, of mounting raids on cocaine laboratories. Any prolonged delay, they warn, could lead to an opportunity lost.

Bolivia is one of the world's biggest growers of cocaine and the United states is the biggest consumer of the drug.

NASA officials say a faulty valve on the shuttle Colombia could delay next week's launch by a few days... or maybe even up to one month.

Technicians will try to fix the valve in the ship's Freon cooling system. But they say that if they have any doubts about its safety, they will haul the shuttle back to the hangar for repairs. That could push the launch date back by one month.

Engineers today discovered the glitch during routine safety checks. They say the flow of coolant through part of the system suddenly dropped, possibly because of a sticky valve or contamination in a filter.

The shuttle's two Freon cooling system loops are used to carry heat away from the ship's electronic gear.

Experts say fixing the valve at the launch pad with the shuttle in the vertical position could be difficult... and may take five to 10 days.

Engineers face an even tougher job by trying to make the repairs without damaging the shuttle's fragile cargo... sensitive ultraviolet telescopes.

#90128u2839 05/08/1990 ~United Press International

SAN DIEGO (MAY 8) UPI - Some of the medical debris that washed up on Southern California beaches had been distributed by a Department of Defense supply depot in central California, but investigators cannot pinpoint the source of the dumping, the Navy said Tuesday.

The waste was identified as three injectors of atropine, which is used as an antidote to nerve gas. The automatic injectors, considered a serious public hazard, were found along with 100 vials of penicillin and several hundred strips of anti-malaria pills over a 12-mile stretch of San Diego coastline last week.

Unlike the injectors, the vials and pill strips did not carry identification markings, officials said.

The latest wave of medical debris was the first since a flood of syringes and other hazardous wastes washed ashore in late 1988. Much of that beached debris carried military labels and markings.

San Diego County health officials have issued a public warning to beachgoers about the injectors, which immediately inject atropine when

placed against the skin, said Linda Miller, a spokeswoman for the county Hazardous Waste Task Force.

Atropine is routinely supplied to Navy ships and other military units. Each injector contains two milligrams of the drug, enough to elevate heart rate and even induce delirium in some cases, Miller said.

''We want people to watch out for these injectors. It would be so easy for someone to become injected with a simple jab to the skin. And if that person is a child or a heart patient, that could mean hospitalization,'' Miller said.

''We don't know how many more might be out there. If there are more, you can just picture someone walking through the sand and kicking into it, or a child finding it and playing with it,'' she said.

Lot numbers printed on the injectors were traced by Navy investigators to a Defense Department depot in Tracy, Calif., the same depot identified as the original supplier of beached medical debris in 1988, Navy spokesman Cmdr. Doug Schamp said.

But investigators who sifted through records at the Tracy depot failed to determine exactly which Armed Forces branch received the injectors, said another Navy spokesman, Chief Petty Officer Martin Wicklund.

''Injectors with that lot number were provided to all branches of the military. Depot personnel don't have any information about where these particular injectors were eventually sent,'' Wicklund said.

The Navy also is cooperating with investigators for the county's Hazardous Waste Force, formed last year after the flood of needles, bandages, intravenous bags and other medical wastes began drifting in from the Pacific.

#90128u2857 05/08/1990 ~United Press International

(MAY 8) UPI - Moscow apparently has NOT softened its opposition to NATO membership for a united Germany.

Soviet Defense Minister Dmitri Yazov today ruled out such membership, calling it a faulty approach ''to ensuring reliable security for the people of Europe.''

Yazov's statement appears to contradict reports of an apparent softening of opposition.

During high-level talks on Saturday in Bonn on German unification, Soviet

Foreign Minister Eduard Shevardnadze said the issue of NATO membership could be delayed until after East and West Germany are united.

And a Kremlin foreign policy adviser said ''the way could be found'' to remove the issue as a point of contention.

But in Bonn today, West German Chancellor Helmut Kohl rejected Shevardnadze's proposal. Kohl says all problems posed by German unity must be resolved before the two countries merge.

Lithuanian Prime Minister Kazimiera Prunskiene is in London for talks with Prime Minister Thatcher on the Baltic republic's push for independence.

Prunskiene said in an interview that she thinks Thatcher might be sympathetic to Lithuania's situation because both she and Thatcher are women.

Prunskiene also says Thatcher could be of great help because of her previous dealings with Soviet President Gorbachev.

Britain has NEVER recognized Moscow's annexation of the Baltic states in 1940. But Thatcher, like President Bush, has taken a cautious stance toward Lithuania's independence move. Neither leader wants to jeopardize relations with the Kremlin.

In Moscow, the official Communist Party daily says the situation in Lithuania may be the most serious crisis Gorbachev has faced.

#90128u2870 05/08/1990 ~United Press International

LOS ANGELES (MAY 8) UPI - A federal court jury awarded blues singer Tom Waits $2.48 million in damages Tuesday, finding Frito-Lay Inc. and its ad agency illegally impersonated his voice for a radio jingle to advertise a new corn chip.

The size of the verdict, which included $2 million in punitive damages astonished even Waits, who nevertheless said he won ''because we were right.''

''It's been a long, scary, expensive process - a long, long journey,'' Waits said. ''Maybe we've made the path easier for people who will follow.''

''Instead of just being a fly on their forehead, maybe now we'll be a bee in their ear,'' Waits added. ''I don't have global record sales in the billions, but I still have a protectable position.''

Waits, who attended every day of the three-week trial in U.S. District Court, added that ''it's one thing to wear my hat. But it's another to wear a mask, and my clothes and do a complete, full mind and body impersonation.''

Frito-Lay radio aired a commercial for one month in the fall of 1988 that featured a near-perfect imitation of Waits' off-beat, raspy voiced song, ''Step Right Up,'' but with lyrics touting Frito-Lay's Salsa Rio Dorito.

The ad was produced by Tracy-Locke Inc. of Dallas, which was ordered to pay $1.5 million in punitive damages.

Waits' lawyers contended that the imitation amounted to voice piracy and trade appropriation and violated the federal Lanham Act, which bans false advertising.

The lawsuit relied on a legal theory, developed in a 1988 federal case ruling in favor of singer Bette Midler, who eventually won $400,000 when a jury found that an advertising agency had misappropriated her voice in a commercial.

In the Midler case, the 9th U.S. Circuit Court of Appeals created new law by declaring it was illegal to deliberately imitiate the voice of a professional singer in an ad when that voice is distinctive and widely known.

But, unlike the Midler ruling, the Waits case was the first to involve someone imitating a famous voice but singing original lyrics - instead of a song the artist had become known for.

In his closing argument, Waits' lawyer, Howard King, emphasized Waits' distinctive, gritty voice and style. King pointed out that Waits is widely known for his 17 albums and extensive tours.

King also pointed to trial testimony of how Waits' ''Step Right Up'' repeatedly was the inspiration for Tracy-Locke in creating the Dorito commercial. To perform the jingle, the ad agency hired Stephen Carter, who does a professional Waits' imitation and who listened to Waits' recordings before making the commercial.

Testimony showed that even the producer of the ad was concerned that Carter sounded too much like Waits.

Waits has a personal policy not to do commercials - and the Frito-Lay jingle made it seem as if Waits endorsed the Salsa Rio Dorito.

''I was angry - very angry. Somebody had studied me a little too close,'' Waits testified during the trial. ''It was the equivalent of all the scars

the dimples, the lines all being in the same place.''

Defense attorney Anthony Liebig told jurors that the ad merely intended to imitate a bluesy style used by Waits - someone who ''is not a household name or a mainstream balladeer.''

The six-person jury deliberated for one day before ruling against Frito-Lay and Tracy-Locke on every point. The jurors found that the defendants had misappropriated Waits' voice; that he was entitled to $100,000 for his services; to $200,000 for his peace, happiness and feelings; to $75,000 for injury to his good will and publicity value, and to $100,000 because of the false designation of his voice.

Liebig called the verdict ''extremely generous'' and said there probably will be an appeal. ''I guess the jury must have liked him (Waits) more than I thought,'' he added.

#90128u2872 05/08/1990 ~United Press International

(MAY 8) UPI - Republicans apparently WON'T back an income tax hike if and when they come together with Democrats for a proposed budget summit with the president.

Assistant G-O-P Senate leader Alan Simpson today ruled out Republican support for such a hike to reduce the federal deficit.

But Simpson did say that other means of raising revenue would be considered, including value-added taxes, additional user fees and taxes on liquor and cigarettes.

But the Wyoming Republican insisted that President Bush is NOT backing away from his 1988 campaign pledge of ''NO new taxes.''

Simpson made the comments today after meeting with President Bush at the White House. Later, White House spokesman Marlin Fitzwater refused to comment on specific proposals Bush might or might NOT consider.

Bush met Sunday night with congressional leaders to discuss a possible budget summit, and talks on such a meeting are continuing on Capitol Hill.

Four states have kicked off a five-week flurry of election primaries.

Voters in North Carolina, Ohio, Indiana and West Virginia today are among the first of 22 states set to choose candidates for the November general election slate.

Observers say the North Carolina race is among the hottest as Democrats

fight to win what has been an often-bitter four-way race for the right to challenge Republican Senator Jesse Helms.

Election polls show Charlotte Mayor Harvey Gantt with a small lead in that extremely close race.

In Ohio, G-O-P representative Donald Lukens, convicted in a sex scandal involving a minor, is struggling to salvage his career.

Mainstream Republicans virtually abandoned Lukens after the conviction. Polls show the 59-year-old trailing badly in the four-way race.

#90128u2920 05/08/1990 ~United Press International

TORONTO (MAY 9) UPI - General Motors of Canada said Tuesday it will takeover the Canadian operations of Sweden-based Saab Automotive AB and merge it with its Passport division in September.

At a joint press conference, GM president George Peapples and Saab president David Herman said Passport dealers will become the sole Canadian distributor of the Saab 900 and 9000 series.

Peapples said it was ''a natural marriage'' between two carmakers intent on distributing a top quality, high performance car.

GM's Passport dealers in Canada currently carry the Impulse, Trooper and

Pickup models from Isuzu of Japan, and the Optima which is an Opel design manufactured by Daewoo of South Korea.

Herman said the decision to distribute its cars through Passport was ''a well planned, timely and responsive initiative.''

''Considering the size of the country and the Canadian market, it has for some time been clear that current sales levels .... (were) not sufficient to warrant a separate organization,'' Herman said.

There are about 10,000 Saab car owners in Canada with annual sales in the 1,000 to 1,200 range.

Herman said Saab wants to focus its attention on increasing sales in the United States and West Germany. In 1989, Saab sold 31,300 cars in the U.S. and 6,000 in West Germany. Worldwide sales totalled 109,500 cars.

A number of Saab's 32 dealers are expected to switch over to Passport, which expects to have 85 dealerships up and running by the end of 1990, Peapples said.

Peapples said Passport hopes to push Saab's annual sales to between 2,000 and 2,500 cars over the next few years.

Some of Saab-Scania's 39 employees will be offered jobs at Passport, said Ulf Bundell, president of Saab-Scania.

(MAY 9) UPI - DIGEST

Basketball

Jimmy Rodgers, who led the Boston Celtics to their worst consecutive playoff showings in 38 years, was fired after just two years as coach of the NBA's winningest franchise Tueseday. The Celtics, who were swept by the Detroit Pistons in the first round in 1989, had not suffered back-to-back, opening-round elimination since 1951-52. ... Harry Weltman resigned as general manager of the New Jersey Nets, saying his team's last-place finish left him suffering from stress and a skin rash. Weltman, who hinted that Nets ownership did not let him run the club the way he wanted, said the rash was not serious and disappeared once he made the decision to resign. ... Rony Seikaly of the Miami Heat, who improved significantly during his second pro season - averaging 16.6 points and 10.4 rebounds per game - was named the NBA Most Improved Player for 1990. The 6-foot-11 center, the ninth pick overall in the 1988 draft, averaged just 10.9 points and 7.0 rebounds during his rookie year.

College Basketball

Diego Garcia, a 6-1, 177-pound guard from Florida Internatinal University, has signed a two-year contract to play professional basketball in Spain. Garcia will join the Valladolid Team in the Spanish First Division League.

International

With the Goodwill Games rapidly approaching, 1,000 to 2,000 hosts are still needed near Seattle to provide accomodations and transportation for up to 1,400 Soviet visitors in what will be the largest Soviet-U.S. cultural exchange ever. Each Soviet guest will stay with an average of two or three host families during the two weeks of the games from July 20 to Aug. 5.

Law

Five-time Wimbledon champion legend Bjorn Borg, accused by a Swedish magazine of using narcotics, stormed out of a Swedish court when the judge in the libel case refused to hear a witness. Borg said the man's testimony was cruicial to his defense.

Soccer

Costa Rica, which has gone through four coaches in the last two years, arrived in Italy to begin preparations for its first appearance in the World Cup finals. Costa Rica faces tough first-round opposition with three-time champion Brazil, followed by Sweden and Scotland. ... The U.S. national soccer team plays Poland in a World Cup tuneup game at Hershey, Pa. that will test the Americans' ability against a quality opponent. The U.S. team has planned four games in 16 days to simulate a World Cup schedule.

Tennis

Three-time Wimbledon champion Boris Becker of West Germany advanced to the third round of the $1 million German Open in Hamburg, West Germany while seventh-seeded Michael Chang was upset by Argentina's Juan Aguilera. As Becker sailed through to the next round, Chang, the French Open champion, crashed in a 6-3, 6-2 setback. ... Austrian tennis player Barbara Paulus, ranked No. 16 in the world, blamed her high school teachers for having to drop out of this year's French Open. ''I have to study for my final oral exams, which are unfortunately scheduled for around then,'' said the 19-year-old high school student. ... Swedish clay court specialist Kent Carlsson, once ranked No. 6 in the world, announced the end of his tennis career at the age of 22 due to persistent injuries. Carlsson peaked his injury-plagued career with five grand prix titles in 1988, placing him

sixth on the ATP computer rankings. ... Swedish tennis star Mats Wilander has donated $30,000 to a junior tennis academy at his home in Vaxjo, Sweden. The sum, which will be matched by the club, will be used to improve the development of junior players.

Track and field

Rosa Mota, an Olympic gold-medal winner and world class runner, will make her first appearance at the 19th annual L'eggs Mini Marathon in New York on May 26. Mota, 31, became the only Portugese woman ever to capture an Olympic medal.

#90128u3099 05/08/1990 ~United Press International

(MAY 8) UPI - South African President Frederick de Klerk leaves today for a nine-nation European tour regarded as the most important diplomatic mission by a South African leader in four decades of apartheid .

A U-S businessman is advising entreprenuers to go east. Consultant Rod Beddows told U-S business conventioneers in Pittsburgh that Eastern Europe's market is wide open and urged U-S executives to- in his words- ''move in and capitalize.''

The White House is pressuring Salvadoran officials to prosecute the men who killed six Jesuit priests last November. The Bush administration says it may review U-S aid to Salvador if the matter is NOT seriously pursued.

The Senate has rejected a series of Republican-backed revisions of the Hatch Act. Those measures include a provision that would prohibit federal employees or postal workers from holding public office.

-30- 1036

#90128u3237 05/08/1990 ~United Press International

(MAY 8) UPI - Two of the Baltic republics are stepping up their defiance of Moscow. The Estonian parliament today passed a resolution further implementing its March 30th declaration of independence. The measure says Soviet laws are NOT valid in Estonia, and it drops the words ''Soviet Socialist'' from the republic's name. In Lithuania, deputies approved a measure legalizing private enterprise in the republic.

Costa Rica has a new president today... Rafael Angel Calderon . First lady Barbara Bush and Nicaraguan President Violeta Chamorro were among the thousands in attendance at Calderon's inauguration. The new president replaces Oscar Arias, who is seen as the father of the Central American peace.

The first person convicted in the Iran-Contra scandal has died. A funeral home director has confirmed that conservative political fund-raiser Carl ''Spitz'' Channell died yesterday at a Washington hospital. The cause of death was NOT immediately available. Channell pleaded guilty to using his NON-profit National Endowment for the Preservation of Liberty to raise more than two-Million dollars to arm the Nicaraguan Contra rebels.

The House is expected to act this week on a family and medical leave bill, but the White House says President Bush will veto it. The Family and Medical Leave Act would require companies with more than 50 workers to offer up to 12 weeks of leave for the care of newborns, adopted children or a seriously ill child or parent. Democrats and even some Republicans defend the bill, but the Bush administration opposes it because it dictates employee benefits to businesses.

-30- 1779
#90128u3595 05/08/1990 ~United Press International
(MAY 8) UPI - Costa Rica's new president says he has inherited an empty treasury and one of the largest deficit's in the nation's history. Rafael Angel Calderon was inaugurated today as Costa Roca's 10th democratically elected head of state since a 1948 revolution abolished the army. Calderon says the government will have to sacrifice for 12 months top begin improving the economic situation.

Defense Secretary Cheney says he's all for NATO retaining its nuclear first-strike option. Cheney told reporters aboard a flight to Canada that he wants to keep the nuclear option even if the United States and the Soviet Union reach parity in their conventional forces in Europe. Cheney says he feels the first-strike option provides a measure of security.

West German's finance minister is Washington today for a meeting with President Bush. Theo Waigel commented on German re-unification saying East Germans will have to shoulder most of the costs for the move. The West German official says East Germans will be responsible for cleaning up their own pollution and bolstering their failing industries... although some help will come from private investors.

Conservative political fund-raiser Carl Channell has died. Channell was the first person convicted in the Iran-Contra scandal for using his NON-profit political action committee to raise more than two-MILLION dollars to arm the Contras. Channell later identified National Security Council aide Oliver North as the chief operator in the covert arms deal. The cause of Channell's death is NOT yet known.

#90128u4056 05/08/1990 ~United Press International

(MAY 8) UPI - Two sailors die in Navy accidents... House Democrats agree to budget talks with President Bush... Texas-Arkansas flooding forces hundreds to flee. U-P-I has it all, next:

Authorities are trying to determine what caused a fire to break out today in the boiler room of the guided-missile destroyer U-S-S Conyngham . The blaze killed one sailor and injured a dozen others.

White House spokesman Marlin Fitzwater says the fire started while the ship's boiler was being lit during routine maneuvers, 80 miles off the coast of North Carolina.

The ship lost power shortly after the blaze was extinguished. Officials did NOT immediately know the extent of the damage, but say there was NO known impact on the weapons aboard the destroyer.

The Navy identified the dead sailor as Lieutenant Algernon Gordon... a native of Montgomery, Alabama. The injured were taken by helicopter to two Virginia hospitals for treatment of burns and smoke inhalation. Three of

them were in guarded condition... and the others listed as satisfactory.

The Conyngham is being towed to its homeport of Norfolk, Virginia, where it's expected to arrive late tonight or early tomorrow morning.

The Navy also reports a second sailor was killed today in an UNrelated accident in Chesapeake Bay near Virginia's eastern shore. Officials say the sailor... whose identity was NOT released... was killed when the propellers of a hovercraft malfunctioned.

-30- 1615

#90128u4081 05/08/1990 ~United Press International

(MAY 8) UPI - It appears the Democrats will participate in a budget summit with President Bush.

House Democrats today accepted an invitation to the meeting and their Senate counterparts indicated that a meeting with Bush was ''inevitable.''

Senate Democrats are expected to accept the invitation later. But warn they may pull out of the talks if any options for reducing the deficit are ruled out in advance... and that includes raising income taxes.

One Democratic senator says lawmakers should force Bush to set the amount of deficit reduction needed before starting the talks. But another added that there would probably be NO talk of new taxes UNless the president raises the issue.

The chairman of the House Democratic Caucus says the consensus among the group is that if the president wants to discuss the budget it was Democrats' responsibility to sit down and listen.

A White House spokesman says a bipartisan group of congressional leaders will meet with Bush tomorrow and likely set a date for the negotiations.

Hundreds of families are taking refuge from rising rivers in Arkansas and Texas as work crews continue to shore up levees and operate pumps to fight the worst flooding in at least 60 years.

Authorities say up to 450 families have fled their homes in Arkansas and another 200 have evacuated from near the surging Trinity River in Texas.

Emergency Services spokesman Gary Talley says the Arkansas River at Little Rock has hit its high point... five feet above flood stage. Authorities expect the level to hold steady for about 24 hours before it begins to drop.

About 70 National Guardsmen are leading sandbagging operations, and 29

Arkansas counties are now eligible for disaster relief.

NO deaths or serious injuries have been reported in Arkansas, but nearly 200 head of cattle were swept to their deaths north of Little Rock.

Damage estimates are expected to run to the Millions of dollars.

#90128u4094 05/08/1990 ~United Press International

(MAY 8) UPI - House action is expected this week on a bill that would require large businesses to offer UNpaid leave for employees to care for newborns, adopted children or a seriously ill family member.

But White House spokesman Marlin Fitzwater says President Bush does NOT plan to sign the bill if it passes Congress. Fitzwater says Bush will veto the measure because he believes companies should be allowed to offer leaves as an optional employee benefit.

The Family and Medical Leave Act has strong Democratic support and has even attracted some Republican backing. It would require companies with more than 50 employees to offer up to 12 weeks of UNpaid leave.

House Speaker Thomas Foley says he believes after the bill passes the House and the Senate, the president will have had a chance to reflect on its importance and will sign the measure. Foley would NOT predict whether there are enough votes to override a veto.

New Jersey Representative Marge Roukema... a Republican supporter of the bill... asked for a meeting with Bush to tell him the merits of the act. Roukema says the bill is NOT about mandates... but family values.

Defense Secretary Cheney says NATO's nuclear first-strike option provides the alliance with security and he wants to retain it.

Cheney made his comments today to reporters during a flight to Calgary, Canada, for tomorrow's NATO Nuclear Planning Group meeting of defense ministers.

The first-strike option is part of NATO's ''flexible response'' strategy whereby Western forces could use nuclear weapons first to halt an attack by overwhelming Soviet conventional forces.

Cheney added that NATO should keep the option even if the United States and the Soviet Union reach parity in their European conventional forces.

A senior defense official says that Cheney expects the probability of actually employing the strategy would be reduced by lower numbers of

conventional forces.

The NATO ministers will begin discussing the process of setting up a review of the alliance's strategy at tomorrow's meeting.

#90128u4157 05/08/1990 ~United Press International
(MAY 8) UPI - Engineers at Cape Canaveral today staged an UNprecedented mock disaster aboard a simulated shuttle to test contingency and communications drills at the Florida spaceport.

NASA Administrator Richard Truly says an engineering failure would, in reality, force astronauts to attempt a daring emergency landing at Kennedy Space Center. Today's test is the first in a planned series of new safety checks designed to prevent disasters such as the explosion of the Challenger.

NASA officials also said today that next week's scheduled launch of the shuttle Colombia could be delayed by a few days or up to one month.

Technicians will try to repair a faulty valve in the shuttle's Freon cooling system, but they say it'll be tricky because the shuttle is on the launching pad and in a vertical position.

If they caN'T satisfactorily repair the stuck valve, they'll have to haul the Colombia back to its hangar.

The delay could seriously back up NASA's busy summer schedule.

The first person convicted in the Iran-Contra scandal has died at a Washington, D-C, hospital.

Conservative political fund-raiser Carl Channel pleaded guilty to using his NON-profit political action committee to raise more than two-MILLION dollars to arm the Nicaraguan Contra rebels. Later, he named National Security Council aide Oliver North as the chief operator in the plot to sell arms to Iran and divert the cash to the Contras.

The cause of death of the 44-year-old former West Virginia motel operator was NOT immediately available.

Channell's death comes as the government releases 14-hundred pages of Oliver North's diaries.

A U-S District Court judge ordered the pages released today. They give daily accounts of North's meetings, plans and observations which could shed new light on what roles then-Vice President Bush and other Reagan

administration officials may have played in the affair.

#90128u4269 05/08/1990 ~United Press International
(MAY 8) UPI - Two UNrelated Navy accidents killed two sailors today. A fire in the boiler room of the U-S-S Conyngham left the aging guided missile destroyer disabled off the North Carolina coast. The blaze killed one officer and injured 12 other sailors.

In Chesapeake Bay near Virginia's Eastern Shore, the Navy says one sailor aboard a hovercraft was killed when the vessel's propellers malfunctioned. Both accidents are under investigation.

Work crews are shoring up levees and operating pumps as the flooded Arkansas River crests at Little Rock. Up to 450 families remain out of their homes in the state's worst flooding in 63 years. In southeastern Texas, another 200 families have fled the rising Trinity River.

Three-term conservative stalwart Senator Jesse Helms easily won the Republican nomination in today's primary elections in North Carolina. Voters in Ohio, Indiana and West Virginia also cast ballots in primaries.

The Senate continues to reject Republican attempts to change legislation easing restrictions on political activity by government workers. Senate Democratic leader George Mitchell late today filed a cloture petition... which would cut off debate and force a final vote sometime after Thursday.

Yesterday's cease-fire in Beirut did NOT hold. Police in the Lebanese capital say rival Christian forces battled with tanks, cannons and rocket launchers in and around Beirut today. At least two people were killed and 17 more wounded.

#90128u4304 05/08/1990 ~United Press International
(MAY 8) UPI - Jury selection began today in Los Angeles in the trial of four men charged in the 1985 torture-slaying of U-S drug agent Enrique Camarena . The suspects include a convicted drug kingpin and a relative of a former Mexican president.

A New York City jury began deliberations late today in the trial of the accused ringleader of last year's Bensonhurst racial slaying. In closing arguments, the defense attorney said 19-year-old Keith Mondello was ''a jerk'' but ''NOT a killer.''

A separate jury deliberated for a second day in the case of the accused triggerman, Joseph Fama. Last August's shooting death of black teen-ager

Yusef Hawkins in the mostly white neighborhood inflamed racial tensions in New York.

Two Providence, Rhode Island, men have filed a more than one-Million-dollar sexual harassment suit against their former boss. Their lawyer says the boss during a card game ordered the men to fondle the breasts of his secretary or have sex with her... and threatened to fire them for refusing.

Police in Allentown, Pennsylvania, talked down a ''clearly distraught'' gunman who threatened to jump from the 23rd floor of the Pennsylvania Power and Light headquarters. NO shots were fired, but the building was evacuated during the incident.

Officials in Martin County, Florida, says the country fair will NO longer hold a greased pig contest. The decision to end the 27-year tradition caps a two-month dispute between the fair board and animal rights activists, who claimed the contest was cruel and frightening to piglets.

#90128u4461 05/08/1990 ~United Press International

(MAY 8) UPI - There's still NO word as to what caused the fatal fire this morning aboard the guided missile destroyer U-S-S Conyngham. The warship was on routine manuevers 80-miles off the North Carolina coast when fire erupted in the boiler room and spread to the combat information center. One officer died in the blaze and 12 other sailors were injured. The Coyngham is under tow and is due to arrive back at Norfolk, Virginia, late tonight or early tomorrow.

8-

As many as 650 families fled their homes in Arkansas and Texas to escape flooding today. Work crews in the Little Rock, Arkansas, area were scurrying to shore up levees as they operated pumps to hold back the advancing water. Damage estimates are expected to run in the Millions of dollars. In southeastern Texas, the floodwaters surging down the Trinity River are described as the worst in 80 years.

Early returns from today's primary election in Ohio indicate Republican Congressman Donald Lukens has lost his battle to rescue his political career after being convicted last year of having sex with a 16-year-old girl. In the three-way race for the Republican nomination, initial results show Lukens in third place. He badly trailed challengers state Representative John Boehner with 48 percent and Representative Tom Kindness with 34 percent.

The State Department admitted today the U-S ambassador to Mongolia does

NOT even live in the country. Richard Williams was appointed ambassador to Mongolia in July 1988 after the United States established diplomatic relations with the Asian nation the previous year. But Williams lives in Washington, D-C, because he has been UNable to find a ''suitable'' home. Officials say, however, he does frequently travel to Mongolia.

#90128u4478 05/08/1990 ~United Press International

(MAY 8) UPI - Pope John Paul is continuing his week-long visit to Mexico amid signs of increasingly warmer relations between the Vatican and the Latin American nation. The pontiff today named a permament special envoy to Mexico... a possible prelude to the establishment of full diplomatic relations. Mexico broke off diplomatic ties with the Vatican in 1857.

A Maryland county has become the nation's first jurisdiction to introduce legislation which requires safety helmuts for bicycle riders. The bill, expected to become law in 150 days, says children and adults must wear helmuts while biking on public roads or paths. Doctors testifying for the measure said about 600 children die every year from head injuries sustained in bike accidents.

Researchers are still embroiled in the great oil controversy. A new study finds that olive and corn oil have an equally beneficial effect on lowering cholestorol... and that there's virtually NO difference in the impact of either oil on so-called ''good'' cholestorol. The findings dispute several previous studies that suggested olive oil was the healthier of the two.

Gamblers in Alaska can now take part in a new lottery that'll be based on the thawing of the ice floe between Alaska and Siberia. Lottery officials had hoped to conduct the game on both sides of the Bering Strait... but ruble problems nixed the idea of the lottery taking place in the Soviet Union. First prize will be a trip for two to Moscow.

REDWOOD SHORES, CA (MAY 9) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services, today announced the availability of its Oracle Financials accounting products and Oracle Manufacturing products for use on all of Amdahl Corporation's large-scale processors. This is the first time these software products have been available on mainframe computers.

Both products will operate under Amdahl's UTS system, an implementation of AT&T's UNIX System V Release 3.1. The UTS system can run in native mode on Amdahl's 580, 7300, 5890 and 5990 series of mainframes, either on a

dedicated processor or in a domain using Amdahl's Multiple Domain Feature (MDF). It can also operate as a VM guest on any System/370 mainframe.

Oracle Financials is a family of financial applications designed for both centralized and decentralized accounting departments of any size. The Oracle Financials software packages available for use on Amdahl systems include Oracle General Ledger, Oracle Payables, Oracle Purchasing, Oracle Assets, Oracle Receivables, and Oracle Revenue Accounting.

Oracle Manufacturing is a full-function manufacturing product family, tightly integrated with Oracle Financials. Oracle Core Manufacturing products available on Amdahl mainframes are Oracle Inventory, Oracle Bill of Materials, Oracle Work in Process, Oracle Master Scheduling, Oracle MRP and Oracle Order Entry.

Oracle Financials for Amdahl is available in 90 days. Oracle Manufacturing for Amdahl is available in December 1990. ABOUT AMDAHL

Amdahl Corporation (Amex:Amdahl) has had more than 10 years experience in the development of UNIX system products and is also a major supplier of IBM-compatible mainframes, data storage subsystems, and data communication products. Headquartered in Sunnyvale, California, the company's annual sales are in excess of $2 billion.

Oracle Corporation (Nasdaq:ORCL) is the largest supplier of database software and services and the third largest software company in the world. Oracle develops and markets products for database management and applications development, in addition to families of integrated applications packages. These products, as well as Oracle's systems integration and data publishing services, provide customers complete, enterprise-wide information management solutions. Oracle products are available on over 80 hardware platforms, from PCs to supercomputers, and are offered in 90 countries worldwide.

LOS ANGELES (MAY 9) BUSINESS WIRE - Rally Ventures Ltd., a Los Angeles-based investment and venture capital firm, Wednesday announced net gains from operations, before taxes, of $2,500,567 for their first fiscal quarter ending March 31, 1990.

After provision for taxes of $1,004,908, earnings were equal to 51 cents net per share, or a total of $1,495,659 after tax. Since the company operates as a registered business development company under the Investment Act of 1940, the provision for income taxes is presented in the statement of operations in total, as required by the AICPA Audit Guide for Audits of Investment Companies., Paragraph 8.21.

Comparable figures for the first quarter of the prior year 1989 have no meaning since the company was inactive for that period, they compare favorably to the reported 21 cents net per share for the last six months of 1989 after current management took over.

DALLAS (MAY 9) BUSINESS WIRE - An international team of six U.S. and German electronics and aerospace companies, under the project name of ''PRISMA'' (Primary Imaging Systems for Multiple Applications), is currently preparing for a demonstration of an imaging radar in a high-flying non-metallic aircraft.

The PRISMA team consists of two U.S. corporations: E-Systems Inc. and Hughes Aircraft Co. and four German companies: Elekluft GmbH, Grob Luft-und Raumfahrt GmbH & Co. KG, Messerschmitt-Boelkow- Blohm (MBB) GmbH and Telefunken Systemtechnik GmbH.

The platform, designated as EGRETT II, is a new derivative version of the Proof-of-Concept EGRETT I aircraft. Since its initial flight in June 1987 the EGRETT I has successfully flown over 160 flight test missions and demonstrated its usefulness last year as a high-altitude research aircraft in the context of the International Cirrus Experiment.

The easily removable, reconfigurable payload of the EGRETT II demonstrator aircraft will allow use of multiple sensors including a Synthetic Aperture Radar (SAR) with a Moving Target Indicator (MTI) capability, and a real-time data link to the ground.

The initial demonstration is planned to take place in the United States during the last half of 1991. A team consisting of participants of the six companies has been designated and dispatched to E-Systems Greenville, Texas Division where design and integration activities are centered. Demonstrations are planned to take place within the Federal Republic of Germany during the second phase in late 1991.

The EGRETT I Proof-of-Concept aircraft will have its debut for public viewing at the Hannover Air Show (ILA-90) from May 15-20, 1990. Additional information concerning the PRISMA project, the participants, and the spectrum of applications will be available at the Deutsche Aerospace AG (DASA), Grob, E-Systems and Hughes displays.

E-Systems (NYSE:ESY) is a major worldwide developer and producer of electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

RALEIGH, NC (MAY 9) BUSINESS WIRE - Electricity is the energy of the future in transportation, industry, and in the home, CP&L Chairman and President Sherwood H. Smith Jr. told shareholders at the company's annual meeting May 9 in Raleigh. And Carolina Power & Light Co. (NYSE: CPL) will be a leader in this future.

"It's energy for transportation, not just for electric vehicles but for high-speed trains as well," he said. "It's the energy for electrotechnologies that will sharpen our industries' competitive edge.

"And it's the energy for our homes, as high-efficiency appliances redefine the lifestyles of our residential communities. There's no doubt that electricity has been our customers' power of choice for many years, and electricity's power for the future is even more certain."

Smith cited several examples around the CP&L service area as proof of electricity's bright future:

- An electric-powered van that is being used by the Raleigh Housing Authority in a demonstration project. CP&L, through the N.C. Alternative Energy Corp., helped sponsor the purchase of the van. The demonstration project is studying the feasibility of electric-powered vehicles in fleet applications.

- Industries such as the G.R. Ennis Foundry in Leland, the AAR Brooks and Perkins Co. in Aberdeen, and the Masonite Plant in Sellers, S.C., that are using new electrotechnologies in their manufacturing processes to increase efficiency and save time and money.

- New high-efficiency heat pumps that represent a revolution in comfort

and economy in home air conditioning and heating.

"Our primary interest is meeting the growing demands of this region with a reliable supply of electric energy," Smith said. "With our energy management programs, we expect our base-load generating capacity to be adequate for the next ten years."

Smith said that the company enters the 1990s managing for premiere performance. "It means we aim to be the best supplier to our customers, the best employer to our staff, the best value to our shareholders," he said.

Yet, Smith said, performing as a premier utility implies more than maintaining a strong financial condition and an excellent operating record. He said CP&L expresses its commitment to the communities it serves in two particular ways - preserving the environment and supporting education in the Carolinas.

#90129b0087 05/09/1990 ~Business Wire

BERKELEY, CA (MAY 9) BUSINESS WIRE - Calypte Biomedical, a company focused on AIDS diagnostics, Wednesday announced it has developed diagnostic tests for the detection of HIV-1 antibodies in urine.

Infection with the HIV-1 virus is the beginning of the disease process that eventually leads to AIDS. Current FDA-licensed AIDS diagnostic tests are all designed to detect HIV-1 antibodies, indicating an immune response to the virus, in blood samples. To date, no urine test has shown acceptable results.

Calypte said extensive data indicate its urine tests are the first to match the accuracy of existing blood tests. Calypte has developed both multi-test plates for blood bank, hospital, clinical and contract laboratory use, and single-use dipsticks for physician's offices and potential home use.

Urnovitz said Calypte's urine test technology has been validated in substantial ''preclinical'' studies. One independent study, conducted by MetPath, a leading clinical reference laboratory, has been accepted for

publication by the Sixth International Conference on AIDS (San Francisco, June 20-24).

Over 7,500 samples have been run to date using Calypte's HIV-1 Urine Tests. In MetPath's double blind study conducted at their New Jersey facility, 7,357 urine samples from a low risk population were screened for HIV-1 antibodies using Calypte's urine test. Matched to 1,748 of these samples were blood samples from the same individuals, which were screened using an FDA-licensed blood test at a second independent reference laboratory in the Midwest.

In Calypte's laboratories, urine samples were screened from 300 individuals with AIDS Related Complex (ARC) or AIDS using the Calypte urine test. All 300 were HIV-1 positive by the urine screening test and matched-sample blood screening. Calypte's urine test demonstrated 100 percent sensitivity in both low and high prevalence populations -- it did not miss screening a single individual whose blood was also HIV-positive.

The specificity was 99.6 percent, equal to or better than most FDA-licensed blood tests.

Urnovitz said the FDA's recent decision to consider applications to market home tests for HIV infection could dramatically change the dynamics of the AIDS diagnostic market, and has accelerated the company's commercialization strategy for the single-use urine test. Investigational New Drug (IND) applications for both single- and multi-use tests could be filed during 1990. The tests are currently designated for research use only.

According to Urnovitz, until late-April the FDA had been opposed to home AIDS testing primarily because of concerns about effective counseling for individuals who test positive for HIV infection. However, he said the success of drugs such as AZT and other medical advances are believed to have lessened the psychological blow of testing positive.

Based in Berkeley, Calypte Biomedical is a company dedicated to the development, manufacture and marketing of diagnostic test for infectious diseases. The company is initially focusing on AIDS. In addition to urine and blood test for screening HIV-1 infection, Calypte has a test under development for monitoring the progression and activity of HIV-1 in asymptomatic individuals as a marker for the rational administration of antiviral drugs such as AZT.

#90129b0092 05/09/1990 ~Business Wire

LAKEWOOD, CO (MAY 9) BUSINESS WIRE - K N Energy Inc. (NYSE:KNE) Wednesday reported first quarter consolidated net income of $11,294,000, or $1.15 per common share, after payment of preferred dividends.

For the same period in 1989, K N reported consolidated net income of $6,911,000, or 71 cents per common share.

Weather during the first quarter was nine percent warmer than the most recent 10-year average, measured on a degree-day basis, and 13 percent warmer than the 1989 first quarter. The warmer-than-normal weather resulted in natural gas sales volumes being approximately 1.5 billion cubic feet (Bcf) below expectations.

''The negative earnings effect of warmer weather was more than offset by increased natural gas transportation throughput and significantly higher prices in January on sales of hydrocarbon liquids extracted at company-owned gas processing plants,'' said Charles W. Battey, K N Energy's chairman and chief executive officer. ''Since January these extracted product prices have declined to 1989 levels.''

''In addition, Wyoming Fuel Co., K N's wholly owned mining subsidiary, achieved profitability, as expected, and sold 385,000 tons of high Btu, low sulfur coal from its southern Colorado mine during the first quarter, an increase of 239,000 tons, compared with the 1989 first quarter,'' Battey stated.

''First quarter results also benefitted from K N's oil and gas subsidiary's leasing of an additional 12,400 acres of high potential coal bed methane acreage in the Raton Basin of southern Colorado to Meridian Oil Inc.''

K N Energy, with operations in seven states, supplies natural gas to residential, commercial, industrial and agricultural customers through three pipeline systems. Principal operations serve over 300 communities and 221,000 direct customers in Colorado, Kansas, Nebraska and Wyoming.

Operating one of the 10 longest natural gas pipeline systems in the United States, K N Energy has annual sales exceeding $350 million and assets in excess of $520 million.

SAN FRANCISCO (MAY 9) BUSINESS WIRE - Bank of America has appointed

Robert P. Morrow III as Managing Director and head of its Mergers & Acquisitions department.

Morrow, who has spent his entire career in corporate banking and finance, joins the bank from Merrill Lynch Private Resources. As its executive director in San Francisco for the past eight years, he was responsible for a range of investment banking services.

Said Morrow, ''We have a major opportunity to capitalize on the bank's large West Coast market share and expand the size and scope of our merger and acquisition activities.''

The Mergers & Acquisitions department consists of 12 professionals with offices in San Francisco and Los Angeles. Morrow is based in San Francisco.

Prior to joining Merrill Lynch, Morrow spent 10 years at Wells Fargo Bank in its corporate banking group, leading that unit as a senior vice president.

Morrow, 40, holds a bachelor's degree in political science and English from the University of North Carolina, and he is a graduate of Stanford University's Graduate School of Credit and Financial Management as well as the Program for Managerial Development at the Harvard Business School.

REDMOND, WA (MAY 9) BUSINESS WIRE - Paul G. Allen, Microsoft Corp. co-founder, and Michael R. Hallman are the newest members of Microsoft's board of directors.

Both were elected at the board of directors meeting on May 5, 1990.

Allen, 37, co-founded Microsoft in 1975 with Bill Gates, Microsoft's chairman and chief executive officer. He served as the company's executive vice president of research and new product development and was a member of the board until 1985. He is also the second largest shareholder in the corporation.

''I'm very excited to help set Microsoft's future directions,'' said Paul Allen. ''As a member of the board, I look forward to the opportunities to make a further contribution to the company.''

''Paul and I go back a long way,'' said Bill Gates. ''Paul's strength as a visionary, in being able to look ahead in technology and markets, will

add strength to our board. I welcome his return as a member of the board.''

In 1985, Allen founded Asymetrix, a Bellevue, Wash.-area software firm, where he serves as chairman and president defining and directing company strategy. Allen started the company to create software that helps mainstream PC users create their own solutions to match their individual tasks.

In 1988, Allen bought the Portland Trail Blazers, a National Basketball Association franchise. He is also a member of the board of directors of Egghead Discount Software, a retailer based in the Seattle area. He attended Washington State University.

As previously announced, Hallman will succeed Jon A. Shirley as company president and chief operating officer upon Shirley's retirement June 30. Hallman, former president of Boeing Computer Services, managed a staff of 13,000 people and a computer equipment inventory valued at $1.3 billion at Boeing. Hallman, 44, a Seattle resident, has more than 23 years of computer experience.

With the election of Allen and Hallman, the Microsoft board has increased from five to seven members. Members include Allen, Gates, Hallman, Shirley and three outside members, David F. Marquardt, Robert D. O'Brien and William G. Reed Jr. Shirley will remain on the board after his retirement.

Microsoft Corp. (NASDAQ: MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

#90129b0116 05/09/1990 ~Business Wire

SAN FRANCISCO (MAY 6) BUSINESS WIRE - Western Investment Real Estate Trust (ASE:WIR) Wednesday announced record operating revenues and earnings for the first quarter 1990.

Mr. O.A. Talmage, chief executive officer, attributed the improved results primarily to income generated from recent shopping center investments.

Also contributing to the improved results were increases in rents from the Trust's existing real estate portfolio due to scheduled increases, consumer price index adjustments, and renegotiation of expiring leases.

The Trust declared an increase in the quarterly dividend to 36 cents per share payable June 15, 1990, to shareholders of record May 25, 1990. This is a 1/2 cent increase over the dividend paid the previous quarter and a 2-1/2 cent, or a 7 percent increase, over the 33-1/2 cents paid the like quarter last year.

This is the Trust's 105th consecutive quarterly cash dividend and the 28th consecutive dividend increase. The indicated annual dividend rate based on the June 15, 1990, dividend of 36 cents is $1.44 per share.

For the quarter ended March 31, 1990, operating revenues increased to $7,694,000 as compared to $6,557,000 for the like period in 1989, a 17 percent increase.

Net income before gains on sales of real estate investments rose to $4,874,000, or 31 cents per share, compared to $3,426,000, or 29 cents per share, for the like period in 1989, an increase on a per share basis of 7 percent.

Depreciation and amortization expense increased by $250,000 to $1,342,000, or 8 cents per share, primarily as a result of new property acquisitions in 1989.

Western Investment Real Estate Trust is a self-administered equity Real Estate Investment Trust based in San Francisco which has invested in properties consisting, for the most part, of community shopping centers and commercial buildings in Northern and Central California and Nevada.

Founded in 1962, the Trust has investments in 57 income producing properties including 35 supermarkets and shopping centers.

#90129b0140 05/09/1990 ~Business Wire

SAN MATEO, CA (MAY 9) BUSINESS WIRE - The representative plaintiffs and their counsel in the lawsuit entitled ''Joseph B. Moorman, et. al. v. Southmark Corporation, et. al.,'' San Mateo (California) Superior Court Case No. 322135, announced today the partial settlement of their lawsuit. The terms of the settlement are complex, involving the establishment of targets for the share price of outstanding units of defendant NATIONAL REALTY, L.P. (AMEX -- NLP; newspaper symbol -- NtlRlty) and mechanisms to

facilitate meeting the targets.

The effectiveness of the settlement is conditional upon its final approval by the Court, at a hearing counsel anticipate will be held in June or July of this year.

A significant feature of the settlement is the establishment of targets to be achieved by National Realty. As of each of the anniversaries of this date, the targets, per outstanding Unit of National Realty, are as follows:

Anniversaries of This Date	Target Per Unit
First Anniversary	$11.00
Second Anniversary	$14.25
Third Anniversary	$19.00
Fourth Anniversary	$22.75
Fifth Anniversary	$30.00

Whether the targets are achieved shall be determined by averaging over the 30 days prior and the 30 days subsequent to the foregoing anniversary dates the closing price of National Realty's outstanding units on the American Stock Exchange ("AMEX"). There shall be added to this average closing price all distributions made by National Realty, subsequent to this date, compounded at 9 percent per annum. Thus, achievement of the targets may be accomplished both through increases in the share price of National Realty's units and by distributions made by National Realty to its limited partners. By way of illustration only, a $1.00 distribution made by National Realty on this date (no such distribution is being made) would count as $1.09 towards achievement of the target for the first anniversary of this date, $1.19 towards achieving the second year's target $1.29 towards achieving the third year's target, $1.41 towards achieving the fourth year's target, and $1.54 towards achieving the fifth year's target.

If the targets for any two successive years are not met, or if the target for the fifth year is not met, then Syntek Asset Management, L.P. (''SAMLP''), the general partner of National Realty, has agreed to resign as general partner of National Realty, to be replaced by a successor elected by the limited partners. Should SAMLP resign as general partner, and should an affiliate of SAMLP be nominated to succeed it as general partner, then SAMLP and each of its affiliates, including Messrs. Phillips and Friedman, agree to vote any units of National Realty they then own pro rata to the vote of unaffiliated limited partners in the election.

SAN JOSE, CA (MAY 9) BUSINESS WIRE)--DEST, manufacturer of a complete family of innovative desktop scanning and OCR solutions, Wednesday announced that Ingram Micro D will distribute the entire line of DEST hardware and software products in the United States, effective immediately.

''This landmark agreement between DEST and Ingram Micro D further establishes us in the reseller channel,'' explained DEST President and Chief Executive Officer Tom Griffiths. ''Ingram Micro D has a strong relationship with all major U.S. computer resellers and VARs, including Connecting Point of America, MicroAge, and ComputerLand, making it easy for individual resellers to get DEST products on their shelves.''

In the last two months, DEST signed reseller agreements with ComputerLand Canada and Intelligent Electronics, which make DEST products available in all 60 ComputerLand Canada stores, and all Entre Computer Centers and Todays Computers Business Centers.

DEST's comprehensive line of desktop scanners includes the PC Scan 2000 and PC Scan 3000 series gray-scale graphics and text scanners for Macintosh, and IBM PC, PS/2 and compatible computers. The DEST software line features Recognize!, a new high-accuracy omnifront OCR software package, which runs on IBM AT, PS/2 and compatible computers, and DEST's PC Scan 2000 and PC Scan 3000 series scanners.

Ingram Micro D Inc. is one of the world's largest distributors of microcomputer products, marketing and distributing more than 6,000 products from over 500 of the world's top hardware manufacturers and software developers.

It serves as a wholesaler distributor to over 40,000 reseller customers in the United States, Canada and Europe. Ingram Micro D Inc. operates two international subsidiaries, Ingram Micro D Ltd. of Canada and Ingram Softeurop of Belgium. The company is headquartered in Santa Ana, Calif., and achieved sales in excess of $1 billion in 1989.

New DEST Corp., based in San Jose, Calif., is a leading designer, manufacturer, and worldwide distributor of desktop scanners. DEST pioneered optical character recognition solutions and image processing software for business and office environments, and has an installed base of more than 40,000 customer sites.

LOUISVILLE, CO (MAY 9) BUSINESS WIRE - Storage Technology Corp. (NYSE:STK) announced Wednesday that it intends to file a registration statement with the Securities and Exchange Commission for a planned offering of $125 million of convertible subordinated debentures due 2015.

The company said it expects to use a substantial amount of the proceeds from the planned offering for the purpose of making additional redemptions or repurchases of its 13.5 percent senior debentures due 1996.

The company said that it anticipates the interest rate on the new debentures will be considerably lower than its current senior debt and that the offering will be non-dilutive to current shareholders.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high performance computers.

#90129b0159 05/09/1990 ~Business Wire
NORTHBROOK, IL (MAY 9) BUSINESS WIRE - Odesta Corp. Wednesday announced a joint development agreement with Digital Equipment Corp. to develop electronic mail software for personal computer users of MS-DOS/MS-Windows, OS/2-Presentation Manager and Macintosh systems.

The software will fully conform to CCITT X.400 international electronic messaging standards, and will work as clients as Digital's ALL-IN-1 MAIL Server for VMS. As a result, organizations will be able to fully integrate all desktop users into a responsive, manageable, and coherent messaging system -- from local workgroups to international communication with users of other mail systems on different computer systems and communication networks.

''Users of personal computers need to communicate throughout and beyond their organizations with a function-rich, reliable, and instinctively easy-to-use system. And managers of messaging systems need a coherent, comprehensive system than ends the nightmare of gateway maintenance and 'lanarchy,''' said Daniel Cheifetz, Odesta's founder and president.

''The Digital-Odesta agreement will deliver what both users and system managers need -- the first solution that combines the most advanced human interface technology from Odesta with the power, reliability, and broad

connectivity of Digital's international, X.400 standards-based mail system.''

David Whitten, Digital's marketing manager of electronic messaging systems said, ''Odesta's expertise in powerful desktop applications that manage, analyze, and communicate documents and data is a strong complement to Digital's electronic mail strategy.

''Today's announcement continues our strategy of offering customers full-function, X.400-conformant mail systems that fully satisfy the needs of users of all major desktop devices.''

In 1984, the International Telegraph and Telephone Consultative Committee (CCITT) adopted the X.400 series of standards for Message Handling Systems. CCITT is an operating arm of the International Telecommunications Union, an inter-governmental treaty-level organization.

X.400 allows electronic messaging systems from different vendors to exchange information so that a sender on one system can reach recipients on multiple systems. X.400 has been endorsed by the International Standards Organization (ISO) and the National Bureau of Standards (NBS), and has received overwhelming support from public telecommunications agencies, telecommunications and computer companies.

Digital Equipment Corp. was the first company to endorse, develop and deliver network products compliant with the CCITT X.400 standards. The software being developed by Odesta and Digital will act as desktop clients in Digital's client-server computing model for X.400 electronic mail.

Digital Equipment Corp., headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

Odesta Corp., founded in 1982, develops and markets a broad range of innovative software for the way people work individually and in groups. Its products, designed from a human factors perspective, are the first to provide powerful, visual, object-oriented applications for information management and decision support.

Odesta is recognized as a leader in developing breakthrough Macintosh applications and integrated VAX/Macintosh solutions. The company markets its products and related services to business users and application developers who require solutions with a high degree of flexibility and individual control. Odesta is headquartered in Northbrook, and is a privately held corporation.

AKRON, OH (MAY 9) BUSINESS WIRE - Goodyear has challenged its inclusion in a list of companies with underfunded pension plans released this week by the federal agency that insures private pensions.

The Pension Benefit Guaranty Corporation (PBGC) survey incorrectly calculated the company's fund position and the results are factually flawed, according to Oren G. Shaffer, Goodyear's chief financial officer.

If the PBGC had reviewed currently available public filings made by Goodyear to the federal government, it would not have reached the erroneous conclusions concerning Goodyear, Shaffer said.

Goodyear pension contributions have always met or exceeded levels required by the Employee Retirement Income Security Act (ERISA) of 1974, he said.

''It is regrettable that the PBGC creates unwarranted concern among our employees, when our pension fund assets currently represent more than 90 percent of liabilities, a strong position by any standard,'' he said.

TUCSON, AZ (MAY 9) BUSINESS WIRE - Artisoft Inc. announced Wednesday that it has retained Montgomery Securities, a nationally recognized San Francisco-based investment bank, to advise the company on a range of strategic financial alternatives, including a possible sale or merger with another company.

Melody S. Robidoux and C. John Schoof II, respectively chief executive officer and president/founder of Artisoft said, "In the past year, Artisoft has experienced rapid growth in the local area network (LAN) industry, currently one of the fastest growing market segments in the personal computer industry." According to Dataquest, personal computers connected in networks are expected to increase from 22 percent in 1989 to 63 percent

by 1992.

Artisoft's sales revenues have grown from $7 million to $20 million during the current fiscal year and are projected to increase to $53 million in fiscal year 1991. Additionally, in December 1989, Inc. Magazine named Artisoft the 39th fastest growing privately held U.S. corporation, citing a net sales percentage increase of 5,092 percent from 1984 to 1988.

The company's best known product is the LANtastic LAN, which, in the last two years, has won six major industry awards including four PC Magazine Editors' Choice Awards, a PC World Best Buy Award, and a BYTE Magazine Award of Distinction. The Network Eye, another Artisoft software product, won the company's seventh industry award, a LAN Magazine Product of the Year, in the same time frame.

"Our successful group of local area network personal computer products and the resulting organizational and financial growth prompted us to hire an advisor to evaluate all of Artisoft's financial and organizational alternatives.

"We believe the market for Artisoft products is still virtually untapped and that a strategic alliance between Artisoft and another company could bring resources to assist in reaching the full market potential," Robidoux and Schoof said.

"Those resources could include capitalization, additional distribution and production opportunities, and added computer industry expertise. However, any plan ultimately undertaken by the company will ensure the continued success of Artisoft, its products, customers and employees," they added.

SAN JOSE, CA (MAY 9) BUSINESS WIRE - BT Tymnet Inc., provider of the international value-added network TYMNET, Wednesday announced it has been chosen by Motorola Inc., Communications Sector, to support the CoveragePLUS system.

The three-year contract is worth over $15 million.

CoveragePLUS is the first long-haul vehicle communications system to feature nationwide vehicle tracking with both a voice and data link. BT Tymnet will support the nationwide data requirements.

CoveragePLUS is designed for a broad base of users that need to communicate with their vehicles on a regional or nationwide basis. Subscribers to the service may include firms such as private trucking fleets, common carriers, construction fleets, field service fleets, hazardous waste handlers and government agencies.

Due to Motorola's expansive nationwide coverage, combined with BT Tymnet's leadership position in providing network access, CoveragePLUS subscribers can access their drivers in locations across the United States.

Users equip their vehicles with a CoveragePLUS radio and data terminal. When turned on, software in the mobile unit logs on to the nearest CoveragePLUS node site, which notifies the dispatcher of the vehicle's location.

These node sites, and subscriber company dispatch locations, have dedicated connections to the TYMNET Network, which links them to the Motorola hub. When a mobile unit moves into a new coverage area, it automatically logs on to that system, and the process repeats itself.

Providing nearly seamless coverage for communications, CoveragePLUS is the first system to offer ''real-time'' position information as well as an instant two-way link. Tracking, load status and estimated time of arrival of every vehicle are also features of the system allowing users to better manage their fleet, improve customer service and increase driver efficiency.

BT Tymnet Inc., an international value-added network supplier, is one of the world's largest providers of public, private and hybrid network solutions. The company owns and operates the TYMNET Network, which offers protocol conversion, error protection, enhanced security features, electronic data interchange (EDI), card services and electronic messaging.

Motorola Inc., Communications Sector, is one of the world's leading

manufacturers of highly specialized two-way electronic communications systems, products and components for distribution in worldwide markets.

#90129b0620 05/09/1990 ~Business Wire

LOS ANGELES (MAY 9) BUSINESS WIRE - Irwindale-based Ioptex Research Inc., the nation's fourth-largest maker of cataract implant lenses, filed suit in federal court Tuesday against the U.S. Department of Health and Human Services (HHS) to overturn a new rule fixing reimbursement for intraocular lenses (IOLs) at $200.

Ioptex is the first IOL manufacturer to file suit against the HHS rules. The company and other IOL manufacturers have charged that the Medicare price fix is a violation of the law, and will preclude availability of newer, second generation lenses to senior citizens who have cataract surgery in outpatient surgery centers.

The suit, filed in the U.S. District Court for the Central District of California, requests declaratory and injunctive relief.

''In 1987, Congress passed a law requiring the HHS Department to establish reasonable payments based on the cost of purchasing various classes of IOLs,'' said Joseph Mandato, president of Ioptex. ''We believe that the new HHS rule violates that law by establishing the same fixed price, regardless of the class of lens, and by setting a reimbursement amount that is well below current market price and completely unreasonable.''

The IOL industry has proposed that reimbursement levels be based on three lens classes: the original 1987 multipiece IOL, the now predominant single-piece device and advanced technology lenses now entering the market.

''By establishing a uniform, below market price for IOLs, the DDS Department is inviting increased use of IOLs that may not be the best available and will make it impossible for physicians to prescribe the the newer, advanced lenses that offer hope of improved vision and faster healing time for the 1 million seniors who undergo cataract surgery each year,'' Mandata said.

The IOL industry, which is based almost entirely in Southern California, has already been hurt by the rule, according to Mandato.

''IOL companies will be forced to compete purely on price, opening the door to foreign competitors, who could come in and dominate the marketplace,'' he said. ''Jobs will be lost, as U.S. companies are forced to move manufacturing overseas. Other IOL companies simply are not going to make it.

#90129b0622 05/09/1990 ~Business Wire

MIDDLETOWN, PN (MAY 9) BUSINESS WIRE - CareerCom Corp. (NYSE:CCM) Wednesday reported results for the three and six months ended March 31, 1990.

Revenues for the three months ended March 31, 1990 declined slightly to $35,656,000 from $37,320,000 in the comparable period of fiscal year 1989. Net income for the second fiscal 1990 quarter was $63,000 or 1 cent per share, compared with a loss of $2,832,000, or 25 cents per share in the second fiscal 1989 quarter.

The weighted average number of shares outstanding for the second fiscal quarter ended March 31, 1990 decreased to 10,196,691 from 11,220,125 for the comparable quarter last year.

Revenues for the six months ended March 31, 1990 increased to $76,600,000 from $73,183,000 in the comparable period of fiscal year 1989. Net income for the six months was $2,729,000 or 27 cents per share, compared with $261,000, or 2 cents per share in the first half of 1989. The weighted average number of shares outstanding for the six months ended March 31, 1990 decreased to 10,215,000 from 11,636,000 for the comparable period last year.

Revenues and net income in the most recent fiscal quarter were adversely affected by a 37 percent decrease (from approximately 2,140 to approximately 1,350) in average enrollments in the company's Truck Driver Training Division between the second quarter of fiscal 1989 and the second quarter of fiscal 1990.

In addition, net income for this year's second fiscal quarter was also adversely affected by two other factors. In March 1990, the Company sold its administrative building located in Lemoyne, and incurred a one-time charge of $370,000 (2.2 cents per share net of tax) as a result of the sale; and, as a temporary measure against falling Truck Division enrollments, during January and early February 1990, the Company accepted student notes for a portion of tuition and fees payable, and provided $600,000 (3.5 cents per share, net of tax) as a reserve against future

loan delinquencies with respect to such notes.

CareerCom Corp. is a leading owner and operator of career training institutes located throughout the United States. The Company currently maintains 71 accredited, post-secondary schools offering programs of study in a variety of career-oriented disciplines.

PURCHASE, NY (MAY 9) BUSINESS WIRE - John A. Georges, chairman and chief executive officer of International Paper, Wednesday announced the appointment of Milan J. Turk as vice president and group executive-specialty products.

Prior to joining International Paper, Turk was executive vice president of Mobay Corp., and before that, president of the Stauffer Agricultural Products Division of Chesebrough-Pond's Inc.

In his new capacity, Turk will be responsible for the company's Masonite, Veratec, Arizona Chemical and GCO Minerals businesses. He will report to David I.J. Wang, executive vice president.

Georges also announced that Robert M. Amen has been appointed vice president-bleached board and label business. He will report to Robert A. Moore Jr., vice president and group executive-bleached board. Amen will be responsible for bleached board marketing, operations control and planning as well as the label business.

Amen joined International Paper in 1980 and has held several positions in finance and marketing, including senior vice president-International Pulp Sales. He served most recently as vice president and controller.

Georges announced that Andrew R. Lessin has been appointed controller. He will report to Robert C. Butler, senior vice president and chief financial officer. Lessin joined International Paper in 1977 and has held several financial management positions. He served most recently as staff vice president and director-tax.

Prior to that he had been manager of finance and planning for timber and wood products and concurrently treasurer and controller of IP TImberlands Ltd. (IPT). IPT is the company's publicly traded master limited

partnership.

Mark A. Capone has been appointed director-tax. He will report to Butler. Capone joined the company in 1986 and has held several tax management positions. He served most recently as director-state, timber and partnership tax and chief tax officer for IPT.

International Paper, headquartered in Purchase, is a worldwide producer of paper and forest products. The company is a major producer of wood pulp, printing and writing papers, paperboard and packaging products, and wood products.

The company also operates specialty products businesses and distributes paper and wood products. International Paper has manufacturing operations in 22 countries and exports its products from the United States to more than 70 nations.

#90129b0652 05/09/1990 ~Business Wire

WOODLAND HILLS, CA (MAY 9) BUSINESS WIRE - Dataproducts Corp. (ASE:DPC) Wednesday reported revenues of $333,662,000 and a net loss of $8,112,000, or 41 cents per share, for the fiscal year ended March 31, 1990.

For the fiscal year ended March 25, 1989, revenues were $353,364,000 and net income was $3,782,000, or 19 cents per share. The net loss in the fiscal year just completed included a special provision of $8 million which was the cost of the company's restructuring program offset by the gain on the sale of the Woodland Hills real estate.

For the quarter ended March 31, 1990, revenues were $91,092,000 and net income was $3,620,000, or 19 cents per share. This compares with revenues of $85,253,000 and net income of $202,000, or 1 cent per share for the same period a year ago.

The fourth quarter's net income was somewhat better than management's projections for the quarter, which were part of the six months' earning forecast initially set forth in Dataproducts' Schedule 14D-9 SEC filing of Nov. 9, 1989.

The fourth quarter operating results reflect the positive impact of a

one-time ''end-of-life'' provisioning by a customer anticipating the company's termination of production of a product and the reduction in expense levels resulting from the company's restructuring program.

Backlog as of March 31, 1990 was $82 million.

Dataproducts is a leading computer printer manufacturer. The company manufactures a wide variety of computer printers and printer consumables.

#90129b0653 05/09/1990 ~Business Wire

NEW YORK (MAY 9) BUSINESS WIRE - EL AL Israel Airlines reported its fourth consecutive net annual profit amounting to $24.2 million for fiscal year 1989.

This reflects a 29 percent increase in net profits over 1988. Revenues increased by seven percent to $713.5 million.

EL AL carried 1,741 million passnegers, reflecting 12 percent growth over 1988, with the company's systemwide load factor also rising to 75.9 percent. Overall cargo tonnage carried on all EL AL routes amounted to 165,000 tons.

''We succeeded in holding to our long range growth program through efficient operations while maintaining a high level of productivity on the part of our worldwide staff,'' said Raphael Harlev, EL AL's president.

''EL AL inaugurated service in 1989 to Stockholm, Budapest and Warsaw and has signed a commercial agreement with Aeroflot, which is pending approval by the Russian Government. In 1990 we are planning to expand service to Eastern Europe by inaugurating flights to Zagreb, Sofia, Prague and East Berlin.''

''In 1990, EL AL plans to surpass its successful 1989 profits by continuing to provide the most nonstop service and flying more passengers to and from Israel than any other airline,'' says David Shein, vice president, general manager, EL AL, N.A.

EL AL completed the first stage of a major re-equipment program, replacing older aircraft with three new technology Boeing 757 airliners.

An additional two 757's were purchased and will enter service in 1990. The company has also announced its intention to purchase two Boeing

747-400 aircraft for delivery in 1994 and 1995, and has placed options on an additional two 747-400s.

These aircraft are intended to replace existing 747's currently in EL AL's fleet.

SAN JOSE, CA (MAY 9) BUSINESS WIRE - Management of Pacific Western Bancshares (ASE:PWB) Wednesday said that Alpha Capital Co. has filed a 13D stating that it has increased its total shareholdings to 623,828 shares (approximately 5.1 percent).

''Alpha Capital Co. has been a long-time shareholder and we appreciate the confidence they have expressed by increasing their ownership position,'' said Phillip R. Boyce, chairman and chief executive officer of Pacific Western Bancshares, the parent company of the $1.2 billion Pacific Western Bank in San Jose.

''Management feels highly confident that further, significant opportunities exist in our marketplace for profitable growth. We continue our stated policy of seeking to maximize long-term shareholder value.

''We have further strengthened both our commitment to this market and our position in it with the acquisition of Household Bank's Northern California division,'' Boyce said. The acquisition added $200 million in deposits and five branches.

For the quarter ended March 31, Pacific Western reported net income of $4 million, or 31 cents per share, an increase of 64 percent over the like period in 1989. It was the most profitable first quarter in the company's history and represented a return on shareholders equity of more than 22 percent (annualized).

''Management and our directors have continued to increase their share ownership in the company, which we believe is an excellent investment opportunity,'' Boyce added. ''Our high level of returns, continuing increases in earnings, and confidence in this vibrant and growing region of Northern California are the foundation for our opinion.''

Pacific Western and its principal subsidiary have 26 offices in Santa Clara, Santa Cruz and Monterey counties and, in addition to commercial banking, offer trust and asset management services.

PALO ALTO, CA (MAY 9) BUSINESS WIRE - Hewlett-Packard Co. and Cascade Microtech Inc. Wednesday announced that HP has purchased a minority equity position in Cascade Microtech of Beaverton, Ore.

In addition, HP has licensed to Cascade certain wafer-probing technology developed by HP. Specific terms of the agreement were not disclosed.

Cascade Microtech manufactures probing equipment and computer-aided test software that customers often use with HP's high-frequency test and measurement equipment in the computer, communication, semiconductor and defense industries. Probing refers to the electrical contacts necessary to extend measurement capability to high-speed semiconductors.

Customers using Cascade Microtech equipment include major United States and foreign electronics companies developing advanced components or systems using high-speed semiconductors and related technologies. More than 40 percent of the company's business is from international customers.

HP's equity investment in Cascade is one of several steps HP has taken since 1988 to strengthen its overall position in key businesses. They include the acquisitions of Apollo Computer Inc. and Eon Systems Inc.; equity investments in Actel Corp., Sequoia Systems Inc., 3Com Corp. and Octel Communications Inc.; and joint ventures with Oki Electric Industry Co. and Northern Telecom.

HP is the first outside investor Cascade has accepted. The investment is part of Cascade's commitment to providing greater service to customers. The company has been continuously profitable since its founding in 1983. Cascade has 70 employees, including a wholly owned subsidiary in Japan and field offices in Los Angeles, New Jersey and Tokyo.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

#90129b0662 05/09/1990 ~Business Wire

SHREVEPORT, LA (MAY 9) BUSINESS WIRE - Crystal Oil Co. (ASE:COR) Wednesday reported the operating results for the three months ended March 31, 1990 and 1989.

Crystal Oil Co.
Financial Highlights

	Three Months Ended	
	3/31/90	3/31/89
Revenues	$ 8,033,000	$ 7,809,000
Income from operations before provision in lieu of income taxes	1,752,000	1,488,000
Net income/a	$ 1,025,000	$ 881,000
Increase to equity/b	1,717,000	22,689,000
Income per common equivalent share	4 cents	4 cents
Average of common shares outstanding	25,409,191	21,601,933

(a) Includes the effect of a non-cash charge to operations of $692,000 and $578,000 for the three months ended March 31, 1990 and 1989, respectively, for a provision in lieu of income taxes for financial reporting purposes only. Because of the company's quasi-organization in 1986, the offset to such charge is to increase paid-in capital.

(b) Includes the effects of the closing of a discount to market common stock rights offering in which the company raised apprpoximately $21,230,000, net of expense in 1989 and the net effect of non-cash charges to operations for a provision in lieu of income taxes for financial reporting purposes only which is recorded as an increase to paid-in capital in 1990 and 1989.

#90129b0666 05/09/1990 ~Business Wire

BEVERLY HILLS, CA (MAY 9) BUSINESS WIRE - Following in the tradition of always setting the standard in the industry, the William Morris Agency on Wednesday announced it has developed and put into initial operation a computer-based executive communication and information network that is a first for the entertainment industry, according to Walter Zifkin, chief

operating officer of William Morris.

When fully operational by year end, the 250-computer network will offer all agents real-time access to its totally integrated database. It already is in use, with nearly 80 computers installed.

William Morris selected the advanced NeXT Inc. computer as the key element for its network after an evaluation of all available standard computers against agency requirements. The William Morris application is the first sizable corporate purchase of the computer, whose advanced design and innovative features gained wide acclaim at its October 1988 introduction.

For 92 years, the agency's internal culture has relied heavily on encouraging cross-pollination of ideas between departments. This new powerful technology will assure this goal is met even as William Morris grows geographically amidst an explosion of increasing amounts of new industry information.

Other requirements defined by the internal study included multitasking (the capability of doing a number of jobs at once), networking all units together, and data security.

The NeXT computer met these critical needs and the first machines were up and running in December 1989. Now nearly 80 have been installed in the Beverly Hills and New York offices.

Agents are already relying heavily on electronic mail (E-mail), which allows agents to pass around client and project material electronically, thereby eliminating a massive number of paper memos and reports, a staple of the agency business.

The NeXT computer operates within a multimedia environment, allowing the use of digital high-fidelity stereo sound and high-quality images (including full-motion video) within all applications.

Businessland Inc. is part of the team providing NeXT computers and related services. ''It takes more than the latest technology to make it all work '' said Kevin R. Compton, vice president of Businessland Advanced Systems, the only national reseller authorized to market the NeXT computer. Businessland is providing initial training, installation and maintenance services for the entire network on both coasts.

William Morris is the largest and oldest talent agency in the world, operating on a global stage through headquarters in Beverly Hills and a network of offices in New York, London, Munich, Rome, Sydney and Nashville.

ORLANDO, FL (MAY 9) BUSINESS WIRE - Eastman Kodak Company's directors Wednesday elected Kay R. Whitmore chairman of the board, president, and chief executive officer, effective June 1.

As chairman and CEO, Whitmore succeeds Colby H. Chandler, who will retire on May 31. Whitmore retains the Kodak presidency, which he has held since 1983.

Chandler, 64, has been chairman and CEO of the company since 1983. He joined Kodak as an engineer in 1950, and in 1974 he was named general manager of the U.S. and Canadian Photographic Division and was elected to the board of directors and an executive vice-president. He became president in 1974.

Whitmore, 57, was designated last December to succeed Chandler as CEO on June 1. Whitmore joined Kodak as an engineer in 1957. He held several top management positions in film manufacturing in Rochester and in the Latin-American Region before being elected a vice-president in 1978 and an executive vice-president in 1981. He joined the board of directors in 1982 and became president in 1983. He has been an executive officer since 1986.

In other board action today, the directors declared a cash dividend of $.50 per share on the company's common stock, payable July 2 to shareowners of record on June 1.

BOCA RATON, FL (MAY 9) BUSINESS WIRE - The Siemens companies in Boca Raton have contributed $25,000 toward computer equipment for the Communications Systems Laboratory to be housed within Florida Atlantic University's newly-constructed 110,800 square foot Science and Engineering Building.

The contribution - made collectively by Siemens Communications Systems, Siemens Information Systems, Tel Plus Communications, and Siemens Credit Corp. - will be used to obtain the latest equipment for the lab, which will provide students in computer engineering, electrical engineering and computer science the opportunity to study communications technology in a state-of-the-art environment.

The Communications Systems Lab will be under the direction of Dr. Mohammad Ilyas, an associate professor of computer engineering, who expects to have the lab running sometime during the summer. The lab will be located on the fourth floor of the $12 million Science and Engineering Building, which has not yet been occupied.

The largest and newest building on the Boca Raton campus, the facility will house offices and laboratories from nine departments and research centers within the Colleges of Science and Engineering. Relocation has begun and will continue throughout the summer, according to University officials.

"Siemens has had a ten-year relationship with FAU, during which time the company has employed many of our graduates," said Dr. Roger Messenger, chairman of FAU's Department of Electrical Engineering.

"This kind of donation symbolizes the relationship we must have with corporations like Siemens; it helps the University in its efforts to produce top-quality engineering graduates, who, in turn will go on to strengthen Siemens operations."

Volker Jung, president and chief executive officer of Siemens Communication Systems, said, "Siemens is pleased to support Florida Atlantic University as it strives to offer excellence in engineering education. We encourage other technology companies to provide the financial support our schools need to benefit all of us today and in the future."

Siemens Information Systems President H. Werner Krause added, "The Siemens companies in Boca Raton consider the school a valuable resource for engineering talent, and we will continue to support the university in its efforts to offer the best education available."

Hans Schromm, president and chief executive officer of Tel Plus Communications, said, "FAU is known throughout the country for its superior engineering program and the high quality of its graduates. We are pleased to help make it possible for the school to offer programs, like the communication lab, which further enhance its reputation."

LONDON (MAY 9) BUSINESS WIRE - LASMO plc, the leading independent oil and gas exploration and production company announced Wednesday the sale, to Seafield Resources, of a package of North Sea assets for 16.5 million (some $27 million at at current exchange rates (a)).

Included in the package is LASMO's interest in the producing Audrey Gas Field in the southern North Sea, together with its interests in 19 exploration blocks.

LASMO North Sea Chairman Joe Darby commented, ''LASMO announced its intention last February to sell these assets as part of a streamlining of the company's North Sea business. We recently announced a swap of some of the assets earmarked for disposal for a significant interest in the Andrew Field in block 16/27a.

The sale is subject to the approval of the Secretary of State for Energy and any other necessary consents.

LASMO plc, with 1989 revenues of 263 million ($425 million at year-end exchange rates), has operations in 16 countries. LASMO shares trade on London's International Stock Exchange and in the US in ADR form. Shares are quoted on the SEAQ International System and prices may be accessed on the Reuters Equities 2000 service under the symbol LSMR.L, and on Quotron under the symbol LSMRU.EU.

(a) US$ equivalents are presented for convenience only at the May $1.

ST. CHARLES, MD (MAY 9) BUSINESS WIRE - Interstate General Co. L.P. (ASE: IGC) announced Wednesday that its managing general partner has authorized a quarterly cash distribution of 20 cents per Class A unit, payable on June 1, to unitholders of record on May 21.

This will be the third consecutive quarter that IGC has paid a 20 cents distribution, following three quarters of 18 cents distributions. As a publicly traded partnership, IGC's distributions are similar to dividends paid by stock companies.

Founded in 1957, IGC is a diversified real estate development and building organization. Headquartered in St. Charles, the company is currently engaged in four related areas of operation: community development, homebuilding, investment properties and management services. IGC is a master limited partnership that first issued units to the public in February 1987. The company is listed on the American and Pacific stock exchanges,

VINELAND, NJ (MAY 9) BUSINESS WIRE - IGI Inc., (AMEX: IG) posted net sales of $5,024,935 for the first quarter ended March 31, up 8.6 percent from $4,626,385 the year earlier period. Net income for the quarter was $49,728, or one cent a share vs. $35,481 or one cent a share, a year ago.

Edward B. Hager M.D., chairman of the board said, "The results reflect the continued growth and profitability of IGI's core business operations. "Our ability to fund sharply higher expenses for development of Novasome and Ultrasponge technologies at our majority-owned subsidiary, Micro Vesicular Systems Inc., ("MVS"), is due to the excellent revenue and margin growth in our core businesses of poultry biologics and companion pet care products," he said.

MVS has agreed to continue its three year working relationship with a large company for pharmaceutical and biological Novasome and Ultrasponge applications.

Separately, IGI's Vineland Laboratories division has received approval from the United States Department of Agriculture for field testing of a Novasome based poultry vaccine against reovirus. Vineland has marketed a Novasome based vaccine for Newcastle disease for the past several years.

The United States Patent Office has recently informed MVS that it intends to grant a patent covering the Ultrasponge biodegradable superabsorber. This follows an earlier Notice of Allowance for a completely biodegradable diaper and another recent Notice of Allowance for Novasome encapsulated humectants (moisturizers) for use in shampoos and other such personal care applications.

U.S. patent No. 4,917,951 issued in April covering the manufacture of Novasome with certain steriod molecules such as cholesterol to enhance suppleness and flexibility.

Dr. Hager said, "Active work and negotiations continue with a number of leading companies for testing and commercial applications of consumer, pharmaceutical and industrial products utilizing Novasome and Ultrasponge technologies."

IGI Inc., is a diversified profitable biotechnology company. Its majority-owned subsidiary Micro Vesicular Systems Inc., ("MVS") has

created novel patented technologies for lipid vesicle ("Novasome") microencapsulation (often called "liposomes") and biodegradable superabsorbents ("Ultrasponge"). These are being developed for a wide variety of commerical applications.

IGI's Vineland Laboratories, EVSCO Pharmaceuticals and Tomlyn Products divisions produce and sell poultry vaccines, small animal pharmaceuticals and pet care products worldwide. Novasome and Ultrasponge are trademarks of a subsidiary of IGI Inc.

#90129b0711 05/09/1990 ~Business Wire

ORLANDO, FL (MAY 9) BUSINESS WIRE - Eastman Kodak Company chairman and chief executive officer Colby H. Chandler reiterated to shareowners Wednesday that the company expects an improving financial picture through the remainder of the year.

Speaking at Kodak's annual meeting in Disney's Contemporary Resort Hotel, Chandler said: ''As 1990 unfolds and our gains from restructuring take hold, we look forward to higher sales, better earnings, and improved cash flows -- especially in the latter part of the year.''

Chandler said that significant progress has been made on an aggressive action plan unveiled in 1989 to substantially improve operating cash flow for the long term.

''We have sold or closed a number of businesses which either did not add significant value or did not strategically fit with the company's direction,'' he said.

''Many corporate services and other non-value creating activities have been outsourced. Other units and organizations have been combined or realigned. Worldwide employment is down by five percent. The employee wage dividend formula has been tied directly to company performance. And inventory levels have been reduced significantly.''

Chandler noted that Kodak's first-quarter results, announced last week, were slightly below those for the first quarter of 1989, but said ''they are consistent with the company's business plan for 1990, which calls for improved performance. The payback,'' he said, ''will become visible through the second half of 1990.''

Kodak president Kay R. Whitmore, who will become Kodak's chairman and CEO when Chandler retires on June 1, told shareowners that the company clearly

intends "to be the best in imaging. That is our past. That is our future. And that is the only position we will accept.

''We will meet the customers' equation for value as they sort out their desire for quality, convenience and price. As these inputs change in the customer value equation, we are determined to be there with the solution.''

Whitmore emphasized that film-based products ''will remain Kodak's major earnings generator for years to come,'' but added that the company is prepared to aggressively pursue new forms of electronic imaging, with special emphasis on hybrid technologies.

''The message should be clear,'' Whitmore said. ''Kodak is ready for the electronic age. We believe the timing is right for this balanced approach. And we believe no company is better prepared -- or more fully committed -- than Kodak to accomplish that.''

#90129b0717 05/09/1990 ~Business Wire

ORLANDO, FL (MAY 9) BUSINESS WIRE - Eastman Kodak Company expects its imaging business in Eastern Europe to grow at the rate of 20 percent per year, William F. Fowble, group vice-president and general manager of the Photographic Products Group, told financial analysts attending the company's annual meeting in Orlando Wednesday.

''In Eastern Europe and the Soviet Union, there is a large pent-up demand for high-quality photographic products and services,'' Fowble said.

Fowble noted that a joint venture established last year in Hungary has been extremely successful in providing film and processing services to consumers and professional photographers there. A similar joint venture was launched six weeks ago in Poland. ''We are getting established well ahead of the competition,'' Fowble said. ''These partnerships are an important way in which we are aggressively seeking to expand Kodak's traditional business. We have been able to maintain our pricing levels for Kodak film at a premium in these countries.''

Fowble noted that the joint ventures handle the trading arrangements to export goods, thereby paying Kodak in hard currency. ''We are also in the process of negotiating a number of joint ventures in the Soviet Union involving the sale of consumer products such as film, cameras and finishing supplies,'' Fowble said. ''Other ongoing Soviet Union negotiations involve facilities to build Ektachem analyzers, ink-jet printers and x-ray processors.''

''We are really at the start of a growth curve in this part of the world '' Fowble noted. ''But it is one with enormous potential and, in Eastern Europe, already a profitable one.''

TOLEDO, OH (MAY 9) BUSINESS WIRE - Owens-Corning Fiberglas Corp. (NYSE:OCF) announced Wednesday the appointment of Dr. Sharell L. Mikesell 46, to vice president, Technology, with company-wide responsibility for research and development and corporate engineering.

He will also become a member of the Management Council, the company's policy-setting group. He succeeds Dr. Michael G. Griffith, who resigned to accept a position with another company.

Robert J. DeGange, 45, formerly vice president, Sales for the Industrial Materials Group, was named to succeed Dr. Mikesell as vice president, Textile Materials Marketing, for the Industrial Materials Group.

He will have marketing responsibility for the U.S. and certain products sold worldwide. Fiber glass textiles are principally used in electrical circuit boards and as reinforcements for packaging materials and other paper products. Emerging growth areas are the flooring and specialty paper markets.

Since joining Owens-Corning in 1976 as Laboratory Manager at Owens-Corning's Technical Center in Granville, Ohio, Dr. Mikesell has held a number of important research positions with the company. In 1984, he became manager, Marketing, Textile Operating Division in Toledo, Ohio, and was named vice president in 1986.

Since joining the company in 1967, DeGange has held a number of sales and marketing management positions in Owens-Corning's construction, textile

and composites businesses. He was appointed vice president, Sales in 1984.

Mikesell received a bachelor of arts degree in chemistry in 1965 from Olivet Nazarene College in Kankakee, Ill. He also earned a master of science degree from Ohio State University in 1968, and a doctorate degree in polymer science from the University of Akron in 1971. He holds three U.S. patents in the area of electrical laminate technology for printed circuit boards.

DeGange received a bachelor of science degree in 1967 from the University of Michigan, Ann Arbor, and a master of business administration degree in 1979 from the University of Chicago.

#90129b0744 05/09/1990 ~Business Wire

ALBANY, NY (MAY 9) BUSINESS WIRE - Lawrence Group Inc.'s (ASE: LWR) net earnings for the three months ended March 31 were $2,275,000, which represents a 55 percent increase over net earnings of $1,464,000 for the same period in 1989.

Operating results for the first quarter of 1990 reflect the positive impact on earnings generated as a result of LIG's acquisition of United Republic Reinsurance Co. (URRC) during the fourth quarter of 1989. LIG's operating results for the first quarter of 1989 did not include URRC. Per share earnings increased to 16 cents from 13 cents as reported for the first three months of last year.

Gross premiums written and reinsurance assumed increased 25 percent over the first quarter of 1989. Our direct business was up 13 percent and the consolidation of URRC's financial data with LIG for the three months period ended March 31 accounted for the balance of the improvement. Reinsurance premiums ceded declined by 32 percent reflecting an increase in the amount of risk we are retaining.

Net premiums earned increased by 63 percent reflecting the increase in our direct business and the impact of the URRC acquisition, as well as the reduction in reinsurance ceded. Investment income rose 86 percent to $2,969,000 before taxes reflecting the increase in the average invested asset base between the two quarters.

Total operating expenses increased at approximately the same rate as net premiums earned with the result that underwriting income (premiums earned less operating expenses) was up 19 percent. LIG's combined ratio of 97.9 percent remained well ahead of the Industry average. Total assets exceeded $200 million for the first time as of March 31 marking another milestone in our growth.

Through its subsidiaries, Lawrence Insurance Group Inc. is currently licensed or accredited in 45 states and Washington, with applications in process in the remainder.

The group is comprised of United Community Insurance Co.; United Republic Reinsurance Co., Senate Insurance Co.; and Commercial Resources Insurance Co. Executive offices of Lawrence Insurance Group Inc. are located at 770 Broadway, in New York City, while the operating headquarters is at 33 Elk Street, Albany, N.Y.

#90129b0747 05/09/1990 ~Business Wire

DALLAS (MAY 9) BUSINESS WIRE - Atmos Energy Corp. (NYSE:ATO) Wednesday reported net income of $6.0 million, or 98 cents per share, on operating revenues of $114.5 million for its second fiscal quarter ended March 31.

This compares with net income of $7.2 million, or $1.19 per share, on operating revenues of $124.3 million for the prior year's second quarter.

Volumes of gas sold and transported by the company during the second quarter totaled 35.2 billion cubic feet (Bcf) compared to 39.5 Bcf during the second quarter a year ago.

The company attributed the decline in results to unseasonably warm weather during the quarter. Weather during the second quarter was 21.2 percent warmer than normal and 14.6 percent warmer than the previous year's second quarter.

For the six months ended March 31, Atmos reported net income of $10.9 million, or $1.79 per share, on operating revenues of $221 million. This compares with net income of $11.6 million, or $1.90 per share, on operating revenues of $218.2 million for the six months ended March 31, 1989.

Volumes of gas sold and transported by the company during the six month period were relatively flat at 70.0 Bcf for the current year and 70.2 Bcf for the same period the previous year.

Charles Vaughan, Atmos chairman said that the $8.9 million rate increase filed in Kentucky in February is proceeding, with hearings scheduled to begin June 20th. He also said that the company is hopeful of having a Kentucky rate increase in effect before the fiscal 1991 heating season and that the company was monitoring rates of return in its other jurisdictions as well.

The board of directors of Atmos Wednesday declared a 29 cents per share regular quarterly dividend on the company's common stock to be paid on June 11 to shareholders of record on May 25.

Atmos Energy Corp. provides natural gas service to more than 527,000 customers in Texas, Louisiana and Kentucky through its operating companies - Energas Co., Trans Louisiana Gas Co. and Western Kentucky Gas Co.

LIBERTY CORNER, NJ (MAY 9) BUSINESS WIRE - Richard E. Whittaker is joining Schering-Plough HealthCare Products as senior vice president, marketing and sales, OTC/seasonal.

The newly created position makes him responsible for all aspects of sales and marketing for product lines that contributed about $400 million in sales to Schering-Plough in 1989.

The brands under his direction include such leading over-the-counter pharmaceutical products as 'Afrin' and 'Duration' nasal sprays; 'Coricidin' and 'Drixoral' cold and decongestant tablets; 'Correctol' and 'Feen-a-mint' laxatives; 'Chlor-Trimeton' antihistamine; 'PAAS' holiday products; and the No. 1 family of suncare products in the U.S., with 'Coppertone,' 'Shade,' 'Tropical Blend' and 'Solarcaine.'

Whittaker comes to Schering-Plough after 18 years at Johnson & Johnson, where he held a series of progressively more responsible marketing positions. Most recently, he was vice president of marketing for the Wound Care Franchise at Johnson & Johnson Consumer Products Inc., where he was also a member of the management board.

Previously, he served as director of international OTC product management and director of product management of J & J's McNeil Consumer Products Division, where he was responsible for several OTC products, including TYLENOL.

Whittaker holds a bachelor of science degree from Drew University in New Jersey and a master of business administration degree from the Wharton School in Pennsylvania. He resides in Flemington, N.J., with his wife and their two children.

He will be based in Liberty Corner, where Schering-Plough HealthCare Products will open its new administrative headquarters in June. He will also maintain offices in Memphis, Tenn., site of the division's operational headquarters and most of its manufacturing, distribution and research. The division is a unit of Schering-Plough Corp. of Madison, N.J.

NEW YORK (MAY 9) BUSINESS WIRE - Deborah A. Salerno, president of Fulton Ventures Inc. (''Fulton''), Nevada Corp. (OTC) and Richard S. Marten, president of Atlantic Film Studios Inc. (''AFS''), a Virginia corporation, Wednesday announced the signing of an option agreement providing for the acquisition of AFS by Fulton.

AFS was incorporated in 1987 for the purpose of developing a facility for the production of feature length motion pictures, television programming, animation, and commercial product.

Initial studio construction began in 1988 on a 75-acre site in the city of Suffolk, Va. The Honorable Governor Gerald Baliles presided over the dedication cermony on Nov. 4, 1988. AFS became operational in June 1989 with the opening of Phase I, a 27,530 square foot facility encompassing Sound Stage ''A'' and support space.

Expansion continued in 1989 and 1990 in Phase II and III with the construction of Support Buildings ''1'' & ''2'', which include Sound Stage ''G'', dedicated to commercial and video production. Phase IV, consisting of Sound Stage ''B'' is scheduled for completion in December 1990. The buildout of AFS is projected over a period that extends through 1994. It includes a total of eight sound stages, support buildings, and a full back lot.

In its first several months of operation, AFS was the site for the production of Orion Pictures' Film ''THE NAVY S.E.A.L.S.'' starring Charlie Sheen and Michael Biehn to be released this summer.

WHITE PLAINS, NY (MAY 9) BUSINESS WIRE - IBM United States Wednesday

announced the transfer of marketing for typewriters and supplies from the National Distribution Division to Information Products, under the Personal Systems line of business.

William R. Bowles, general manager, Information Products, said, ''These changes create a fully integrated typewriter and supplies organization -- one with a streamlined structure that will make us more competitive than ever.''

The new organization, typewriter and supplies marketing, becomes effective July 1 and will be headquartered in Lexington, Ky.

The transfer focuses IBM's typewriter and supplies expertise in an integrated product and marketing organization. The new group will provide increased synergy between plant and field functions, as well as improve the product and technical support available to typewriter and supplies remarketers.

The National Distribution Division will continue to market Personal System/2 products, printers and software.

MORRISTOWN, NJ (MAY 9) BUSINESS WIRE - AT&T's UNIX Software Operation and Object Design Inc. of Burlington, Mass., Wednesday announced that AT&T has licensed software technology from Object Design for possible inclusion in a future version of the object-oriented AT&T C++ Language System.

The new technology, known as ''parameterized types,'' enables programmers to more easily develop standard libraries of safe, reusable code. Support for the feature helps to lower the costs of developing and maintaining software because it encourages more widespread use of standard software libraries.

''Parameterized types is an important new feature for the C++ language,'' noted Bjarne Stroustrup of AT&T Bell Laboratories, author of the C++ language. The X3J16 Committee of the American National Standards Institute (ANSI), which began the process of setting a C++ standard last December, has said that parameterized types should be part of its C++ standard.

''The Object Design implementation of Parameterized Types will provide AT&T's UNIX Software Operation with an excellent foundation for the full implementation of the feature,'' siad Mike DeFazio, director of system

software, UNIX Software Operation. ''We consider C++ a strategic product and we are delighted to be working with ISVs like Object Design to enhance C++ technology.''

''Object Design implemented parameterized types based upon research papers published by Dr. Stroustrup,'' said Tom Atwood, founder and chairman of Object Design. ''We used the facility to implement collections and optimized non-procedural query capabilities for OjectStore, our high performance object-oriented database mangement sytem.'' By implementing parameterized types, he noted, ''AT&T continues its leadership in the advance of C++.''

''Our customers are major beneficiaries of this agreement, as they will recieve early access to the paramerized types with ObjectStore, while getting the assurance that it will be the basis for the future standard,'' explained Ken Marshall, president and chief executive officer of Object Design.

''Object Design is committed to following the ANSI standard for C++,'' he added, noting that the inclusion of parameterized types will help to increase software reliability and provide seamless integration of ObjectStore applications with the C++ language.

A strength of the C++ Language System is that it provides strongly typed code and the full benefits of object-oriented programming. Among its advantages, object-oriented programming offers a paradigm for writing reusable software that is modular and easily extensible.

Object Design Inc., headquartered in Burlington, Mass., develops and markets high-performance object-oriented database management systems and application development software.

#90129b0778 05/09/1990 ~Business Wire

EL SEGUNDO, CA (MAY 9) BUSINESS WIRE - Paul J. Crowley has been named president of CSC Consulting, the commercial systems integration arm of Computer Sciences Corp. (NYSE:CSC) and elected a corporate vice president.

In addition, CSC's European operations, headed by Chairman John M. Thompson, has been separated from the consulting group's organizational structure and will now report to William R. Hoover, chairman and president of Computer Sciences. Both the domestic and European organizations will continue to work closely together, Hoover said, because of serving numerous multinational clients.

The two organizations have been the focal point of the company's successful efforts to expand its commercial activities in the United States and Europe. Their combined revenue totaled $276 million in the fiscal year ended March 30, 1990, and they currently have a combined annualized revenue rate of more than $350 million, Hoover noted. The two organizations are approximately equal in revenue size.

Crowley formerly was chairman of CSC Partners Inc., a major unit of CSC Consulting. He co-founded Partners in 1976. The Waltham, Mass.-based firm soon forged a reputation for quality in the field of systems consulting and integration and grew rapidly. In CSC's latest fiscal year, Partners had revenue of $65 million, up 52 percent from the prior year and more than triple its annual revenue when acquired by CSC in 1986.

Thompson was named to head CSC's European operations last October. He had previously been vice chairman of Index Group, the lead consultancy activity of CSC Consulting, with responsibility for all of Index's European business.

In a related action, James A. Champy was named senior vice president of CSC Consulting in the group president's office, a new position. He will also continue to serve as chairman and chief executive officer of Index Group, based in Cambridge, Mass.

With revenues of $1.5 billion, CSC is the largest independent professional-services company in the computer industry, and a major supplier of computer and communications systems and services to industry and government.

ATLANTA (MAY 9) BUSINESS WIRE - EQK Green Acres L.P. (NYSE:EGA) Wednesday May 9 reported its results of operations for the three months ended March 31, showing net funds generated (cash flow) of $3,490,000 or 34 cents per unit.

Net income for the first quarter was $1,150,000 or 11 cents per unit.

For the same quarter in the previous year, net funds generated (cash flow) was $3,270,000 or 32 cents per unit and net income was $1,080,000 or 11 cents per unit.

The company previously announced its second quarter dividend of $.325 per unit payable August 15 to unitholders of record on June 29.

This was the fourteenth consecutive quarter in which the company's dividend rate was increased.

EQK Green Acres L.P. owns and operates Green Acres Mall, a super-regional shopping mall located in Nassau County, Long Island, New York.

DALLAS (MAY 9) BUSINESS WIRE - National Realty L.P. (ASE:NLP) Wednesday announced it settled, subject to the approval of the California state court, a previously-reported class action entitled Joseph B. Moorman, et al. vs. Southmark Corp., et al. relating to the transaction by which National Realty was formed out of 35 pre-existing limited partnerships.

The terms of the settlement are complex, involving, among other things, the issuance of 2.75 million warrants to purchase a like number of National Realty's units of limited partnership to members of the plaintiff class.

The settlement also involves the contribution by certain co-defendants of cash and notes payable to the partnership aggregating $5.5 million (including $2.5 million to be contributed by National Realty's general partner and its general partners over a four-year period), and the adoption of a five-year plan intended to increase the value of the units.

This plan requires appointment and operation of an oversight committee to oversee implementation of the plan, the appointment and operation of an audit committee having a majority of members unaffiliated with Syntek Asset Management L.P. (''SAMLP''), National Realty's general partner, or the general partners of SAMLP.

The settlement also provides for the limitation and deferral or, under certain circumstances, waiver of certain future compensation payable to SAMLP or its affiliates pursuant to National Realty's agreement of limited partnership. The settlement requires distribution to unitholders of all of National Realty's operating cash flow, if any, in excess of renovation costs and the redemption of National Realty's unit purchase rights.

National Realty has also agreed to pay attorneys' fees for the plaintiff class in an amount to be determined by the court.

The members of the oversight committee will be Ronald T. Baker, president of the Partnership Securities Exchange, Inc., Kenneth R. Kelley, a real estate consultant and advisor and formerly senior vice president for property sales in the McNeil organization and Robert A. McNeil, formerly the individual general partner of certain of the partnerships the assets of which were acquired by National Realty as part of its formation.

National Realty L.P. is a national real estate investment partnership engaged in the acquisition, financing, operation and sale of real estate and related assets.

#90129b0836 05/09/1990 ~Business Wire

COLUMBUS, OH (MAY 9) BUSINESS WIRE - Two nutritional products designed specifically to meet the needs of people with renal disease have been introduced by the Ross Laboratories division of Abbott Laboratories.

ALTERNA is a low-protein milk substitute made for persons on protein- and phosphorus-restricted diets. REPLENA is the first complete nutritional product developed specifically for persons with kidney disease. REPLENA helps to maintain nutritional status by providing a source of calories and other key nutrients.

Some 350,000 people in the United States have acute or chronic renal (kidney) disease. In thousands of people each year, the disease progresses to end-stage, which means those people must have transplants or dialysis to stay alive.

Researchers say dietary intervention is crucial. ''The evidence suggests that the earlier we can intervene in these patients with impaired kidney function, the more likely we are to be successful in slowing down the progression of renal disease,'' says Dr. Lee Hebert, professor of medicine and director, division of renal diseases, The Ohio State University.

ALTERNA tastes like lowfat milk, is an appetizing drink and can also be used in place of milk in recipes. It has only 29 percent of the protein and 52 percent of the phosphorus found in regular lowfat milk.

REPLENA has a pleasant vanilla flavor. It adds calories without significant increases in protein.

While REPLENA Specialized Liquid Nutrition is designed for persons who are pre-dialysis, ALTERNA Low-Protein Milk Substitute may be used by both pre-dialysis and dialysis persons.

REPLENA is available in ready-to-use cans, and ALTERNA comes in both packets and powder form which are mixed easily with water to create a refreshing beverage. They add variety to meals, so persons with kidney disease are more likely to adhere to their diets.

The products are available through Ross Laboratories by calling toll-free 1-800-544-7495 (VISA and MasterCard only), or by ordering through a retail pharmacy.

NEWTON, MA (MAY 9) BUSINESS WIRE - Wedgestone Financial (NYSE:WDG) Wednesday reported a net loss of $787,000 for the three months ended March 31, 1990, compared to a net loss of $115,000 during the same period in 1989.

The primary reason for this loss was the continued high level of underperforming assets, which represented 81 percent of the Trust's total assets at March 31, 1990, compared to 77 percent at Dec. 31, 1989, and 53 percent at March 31, 1989.

During the quarter, the Trust prepaid $1,000,000 of its debt. On May 1, 1990, the Trust prepaid an additional $1,000,000 of debt.

Pursuant to modifications in the Trust's debt agreements, the Trust, as previously announced, has agreed to cease making new loans; to accumulate cash from operations, loan repayments and sales of foreclosed properties, setting aside only those amounts needed for operating costs and for funding existing commitments; and to apply this cash to debt repayment.

Wedgestone Financial is a publicly owned real estate investment trust which has specialized in short-term and intermediate-term mortgage loans, mainly to developers

BOSTON (MAY 9) BUSINESS WIRE - Lifetime Corporation (NYSE:LFT) reported Wednesday that it had filed a registration statement on FORM S-3 to register an aggregate of 2,377,353 shares of Common Stock owned by certain stockholders of the Company.

The shares are being registered pursuant to registration rights contained in various investment agreements under which the shares were acquired by the selling of stockholders.

One of the selling stockholders, Skopbank (Cayman) Ltd., a subsidiary of the Finnish bank Skopbank, has advised the Company that it intends to sell part of the shares registered on its behalf by no later than October 31, 1991 in compliance with applicable banking regulations. Skopbank has recently established a branch office in New York City and must reduce its holdings of the Company's stock (presently 583,333 shares, or 7.2% of the outstanding stock) to no more than 5% by that date.

Among the shares being registered are 960,688 shares owned by the Company's management. The Company is informed that management intends to sell sufficient of such shares from time to time through customary brokerage channels to make payments of interest due under a certain loan which was incurred in connection with financing of the acquisition of shares of the company's stock.

Except for the sales contemplated by Skopbank and management, the Company is not aware that the selling stockholders have any present intention of selling additional shares covered by the registration statement.

Lifetime Corporation, through its Kimberly Quality Care, ASB Meditest, and

Office Angels divisions is one of the nation's largest providers of home health care personnel and services and supplemental staffing for health care institutions, is a leading provider of paramedical examinations to insurance companies, schools, and businesses, and is a provider of temporary and permanent office personnel.

#90129c0018 05/09/1990 ~Comtex

WASHINGTON (MAY 9) COMTEX - A congressional resolution directing the Federal Reserve Board to gradually wrest inflation from the economy received an endorsement today from the nation's largest farm organization.

Dean Kleckner, president of the American Farm Bureau Federation, told a House Banking subcommittee on domestic monetary policy that farmers need a stable economic environment for long-term planning.

"There is no more vexing an issue for farmers and ranchers than trying to estimate the impact of future inflation rates on the productive value of an asset, the collateral value of the asset for borrowing purposes, yearly cash flow from the asset and the interest cost of borrowing money to purchase the asset," said Kleckner.

Rep. Stephen L. Neal (D-N.C.), the subcommittee chairman and author of the legislation, concurred. "Farmers must spend their time farming, not trying to guess what the Fed will do."

Neal added that farmers would not be the only beneficiaries from a consistent monetary policy.

"I think benefits accrue to everyone," he said.

Critics of Neal's resolution, which calls for the Fed to steadily eliminate inflation over five years and then pursue policies that maintain price stability, warn the cost of achieving this goal may result in a recession, higher unemployment and lower productivity. While top Fed officials have publicly supported the resolution, the Fed is under growing political pressure to avoid moves that might derail economic expansion, especially in an election year.

Neal is convinced that long-term gains outweigh any short-term disadvantages and if Congress and the administration give the Fed the mandate to act, then transitional costs will be minimized.

"The most serious hurdle to overcome is that we'll pay too big a price to

reach zero inflation," Neal said. "If market participants believe we're serious about attaining zero inflation, then the Fed would not have to raise short-term rates and labor costs would not rise. It seems to me if we get people to believe it, the costs will go down."

Neal also added his bill will reduce unemployment in the long-term.

"A significant hurdle to overcome with this legislation is the idea that inflation is good for employment," Neal said. When we had high levels of inflation in the 1970s, we had high unemployment. Attaining zero inflation and maintaining it will lower unemployment in the long-run."

Although inflation has stabilized at 4-5 percent, Kleckner argues there is no indication that it can be held there.

"My reading of history is that inflation at some level, be it 5 percent, 10 percent, 85 percent, or some other level, is not sustainable long term " Kleckner said. "Either the monetary authorities allow inflation to continue to move higher or they squeeze it lower. There is no middle ground. Much of the uncertainty in the financial markets now is over that very point."

Kleckner said this resolution is particularly important for the agriculture community, which went through the "financial wringer" in the early 1980s when inflation plunged from double digits to 4 percent.

"Farmers and ranchers ... had to put off investment decisions due to the problems of the 1980s," Kleckner said. "They are now considering long-term production and investment decisions. They need to know right now what the long-term monetary policy will be during the 1990s."

BLOEMFONTEIN, South Africa (MAY 9) - South Africa's wool exports rose 16 percent in 1989 over 1988, an increase worth 54 million rands (20.4 million dollars), Trade and Industry Minister Kent Durr said here.

Addressing the National Woolgrowers' Association late Tuesday, he said South African wool production in 1989 was 93.2 million kilograms, 6.5 percent up on the previous year.

South Africa's sheep stock of 16.1 million head made the country the world's fifth ranking wool producer, while only Australia produced more fine merino wool, he said.

QUITO (MAY 9) - China has granted Ecuador a 20-million-yuan (five-million-dollar), interest-free credit for development programs, the Foreign Ministry said Wednesday.

The ministry said the loan would be paid back over 20 years.

China also donated three million yuan (800,000 dollars) to purchase materials needed to begin smaller development projects, the ministry said.

The ministry added that the Chinese Government also agreed to purchase 20,000 tons of Ecuadoran bananas this year.

The announcement was made one day after Ecuadoran Foreign Minister Diego Cordovez concluded a visit to China.

#90129d1820 05/09/1990 ~French/German News Agency
TOKYO (MAY 9) - Two leading credit-rating agencies said Wednesday they had assigned their top ratings to Nippon Telegraph and Telephone Corp. (NTT) despite uncertainty about the future of the Japanese telecommunications giant.

The triple-A ratings announced by the Japanese units of Moody's Investors Service Inc. and Standard and Poor's Inc. of the United States apply to an 11-year bond issue for 50 billion yen (316 million dollars).

The two agencies noted that negative factors such as lower profits arising from intensified competition with new common carriers had been offset by staff cuts and other measures such as accelerating capital investment.

Moody's said its rating was based on NTT's "dominant martet position and solid financial position" while Standard and Poor's said the outlook for the partly-privatised company was "stable".

Speculation about the future of the former government monopoly drove NTT share prices sharply lower last year, causing the Finance Ministry to postpone its fourth public offering of shares in the company.

A government advisory committee in March called for NTT to be broken up into three separate companies, and although the plan was supported by the Post and Telecommunications Ministry the cabinet deferred the issue until 1995.

#90129d2340 05/09/1990 ~French/German News Agency

FRANKFURT (MAY 9) - The West German central bank the Bundesbank injected a net 3.1 billion Deutschemarks into the banking system at rates ranging between 7.75 percent and 8.05 percent on Wednesday.

The injection was carried out by means of a repurchase of commercial instruments for 14 days and for 34 days.

The total amount was 25 billion marks to replace expiring arrangements totalling 21.9 billion marks for 28 days at rates ranging from 7.80 percent to 8.00 percent.

For the 14-day arrangement the bank made available 10.3 billion marks atrates ranging between 7.75 percent and 8.00 percent. The banks had soug 13.3 billion marks. The central bank accepted all offers made at the lowest rate of 7.75 percent.

For the 34-day arrangement, the bank allowed 14.7 billion marks at rates ranging between 7.80 percent and 8.05 percent. Total demands were 39.8 billion marks. The Bundesbank accepted 27 percent of requests at the lowest rate of 7.80 percent.

Last week the Bundesbank allocated 29.8 billion marks at rates ranging between 7.80 percent and 8.10 percent.

#90129d2360 05/09/1990 ~French/German News Agency

SEOUL (MAY 9) - South Korea is to buy a total of 390 metric tons of enriched uranium from the Soviet Union in the next 10 years at 590 dollars per kilogram (2.2 pounds), some 45 percent cheaper than Seoul pays to sellers such as the United States and France, officials said here Wednesday.

They said that the trade deal of the strategic material was politically significant as the two countries are now moving to establish diplomatic relations.

A formal contract for the purchase of Soviet uranium which will constitute 19 percent of fuel needed for the country's eight nuclear power plants will be concluded between the state-owned Korea Electric Power Company and the Soviet Atomic Energy Export Corp later this month, officials said.

In exchange, the Soviet Union has agreed to buy South Korean electronics goods amounting to 30 percent of the price of the uranium sales, and this year alone it will buy some seven million dollars worth of video-tape recorders, officials added.

#90129d2400 05/09/1990 ~French/German News Agency

LAGOS (MAY 9) - The Nigerian oil minister has confirmed that the country has returned to its official OPEC production quota of 1.611 million barrels per day (bd), press reports said here Wednesday.

The reduction of Nigeria's oil production by 140,000 bd follows an agreement reached by Organisation of Petroleum Exporting Countries meeting in Geneva last week to reduce production by about 1.445 million bd in a bid to boost prices, Jibril Aminu was quoted as saying.

Nigeria had started producing more than its OPEC quota following "wanton disregard" of their quotas by some other OPEC members which had given them an undue advantage on the international oil market, he said.

#90129d2530 05/09/1990 ~French/German News Agency

PARIS (MAY 9) - French company Aerospatiale said Wednesday it had signed an agreement with British Aerospace for a five-year feasibility study on a second generation supersonic plane to succeed Concorde.

A decision on whether to go ahead and produce the plane would be taken in 1995 on the basis of the results of analysis of the potential market and of the technical and environmental protection aspects of the new plane, Aerospatiale president Henri Martre said.

If a new generation of the supersonic plane developed by the two companies and put into service 21 years ago were produced, it would go into service around the year 2005.

Aerospatiale and British Aerospace would invest some 200 million francs (35 million dollars) over five years in the feasibility study.

If they then decided to go ahead with the project, the development programme would require investment of some 60 to 70 billion francs (10.5

to 12.2 billion dollars).

"We are giving ourselves five years to detail completely this project, for which we will be the key factor because of our joint experience with Concorde," Mr. Martre said.

But he stressed that given the scale of the project, Aerospatiale and British Aerospace would need partners from all over the world, from such countries as the United States, the Soviet Union, Japan and West Germany.

#90129d3110 05/09/1990 ~French/German News Agency

KUWAIT (MAY 9) - Kuwaiti authorities Wednesday released on bail leading former deputy Dr. Ahmad al-Khatib and six opposition figures a day after their arrest, informed sources said.

Dr. Khatib had tried to resist arrest by security forces as they moved on Al Raoudha in the southern outskirts of the capital to halt an unauthorized public meeting, according to an Interior Ministry communique.

Dr. Khatib and the six unidentified men were arrested Tuesday at a diwaniyah -- a traditional Kuwaiti informal gathering.

The general practitioner was a member of the last Kuwaiti parliament which was suspended in 1986 and is one of 32 former deputies who have rejected a proposed formula for restoring parliamentary life to this Gulf state.

News of the arrests was broadcast at dawn Wednesday on Kuwaiti radio and only carried in the semi-official daily Al-Anbaa under the headline: "Nobody is above the law."

The newspaper also blasted "those who have adopted negative attitudes and refuse to participate in building Kuwait's future."

The arrests came a day before the closure of registration of candidates for national council elections to take place June 10. Some 406 candidates have already submitted their names.

Kuwaiti ruler Sheikh Jaber al-Ahmad al-Jaber al-Sabah announced last month that a council of 50 elected members and 25 others appointed by himself would be set up as a transitional body to decide on ways to modify previous parliamentary practices.

The group of 32 former MPs opposed to a national council say there is no provision for such a structure in Kuwait's 1962 constitution and have called for a boycott of the election.

Kuwait's parliament was suspended in 1986 after the government charged that MPs, who often opposed legislation proposed by the cabinet, had abused democracy.

Dr. Khatib and the group of 32 former MPs are calling for the restoration of the 50-member parliament as it existed before 1986.

Students at Kuwait University staged a strike Tuesday to protest against expulsion measures, saying they were stricter than at universities abroad, the daily Kuwait Times reported.

Reliable sources said the students would launch a three-day strike starting Monday if their demands were not met.

-30- 2487

#90129d3190 05/09/1990 ~French/German News Agency

HAVANA (MAY 9) - Defense Minister Raul Castro Ruiz sent an autographed but curt message Tuesday to his U.S. counterpart, Richard Cheney, about U.S. military maneuvers in the Caribbean.

At a press conference here, General Castro -- who also is Cuba's vice president -- said with a grin that he was sending Mr. Cheney a copy of the Cuban armed forces newspaper Bastion.

The newspaper's front page bore a photograph of May Day demonstrators in Havana carrying a banner that read: "Yankees, Stop F------ With Us."

To the front page photograph, Gen. Castro added, "To my friend, Cheney -- R.C.R."

"It is a message from the Cuban people," he said. "I wanted to send it to President George Bush, but I am only vice president and cannot do so because of protocol."

The gesture follows a statement here by a U.S. diplomat that three nearby U.S. military maneuvers did not threaten Cuba.

Last week, the simultaneous exercises called "Global Shield," "Ocean Venture" and "Defex" were held in eastern Cuba and in the Caribbean.

The maneuvers are held annually, but Cuban officials said this was the first time they were conducted simultaneously.

A Defense Ministry statement issued here called the military maneuvers " a deliberate attempt to pressure Cuba and increase the tensions in the region."

The ministry complained that during the Global Shield exercise, U.S. B-52 bombers were flown to within 80 kilometers (50 miles) of Havana.

The U.S. bombers were within "eight minutes flying time from the capital," the Defense Ministry statement said.

Bastion reported that elements of the U.S. 82nd Airborne Division -- which played a key role in the U.S. invasions of Grenada in 1983 and Panama last year -- participated in the exercises.

Bastion also said U.S. forces staged "a mock air strike" in the western part of the island. It provided no details.

Friday, the U.S. State Department rejected Cuban assertions that the U.S. military maneuvers were designed to unnerve Havana. A day earlier, Cuba's representative to the United Nations issued a protest about the exercises.

In response to the U.S. maneuvers, hundreds of thousands of Cubans conducted five days of their own military and civil defense exercises.

LONDON (MAY 9) - Visiting Lithuanian Premier Kazimiera Prunskiene met with Margaret Thatcher Wednesday in a lobbying bid for pressure from the British prime minister on Moscow in the Lithuania crisis.

Going into the talks, Prunskiene told journalists Lithuania was willing to make compromises on defence and border issues stemming from the Baltic republic's self-proclaimed independence from the Soviet Union.

But she said Soviet President Mikhail Gorbachev's demand for withdrawal of the declaration of independence could not be met. She said she was confidence independence could be a achieved by the end of 1991.

The British government, while saying Britain has never recognised the Soviet annexation of the Baltic republics, has called for a negotiated settlement of the current crisis.

Prunskiene carried her lobbying effort to Washington last week, where President George Bush said his administration would not intervene in the crisis.

MONROVIA (MAY 9) - Hundreds of people in the capital and in other parts of this west African country were stranded Tuesday because of a petrol shortage.

Monrovia was especially hard hit during the evening rush hour Tuesday when hundreds of students, workers and shoppers were unable to find taxi cabs or buses to get home.

There was a real fight to board the few available buses, and many people were seen climbing through windows to get seats.

Commercial vehicles and private cars lined up in long queues filling stations.

Officials at the state-run Liberia Petroleum Refining Company (LPRC) said the shortage which began at the weekend was caused by a lack of foreign exchange to purchase petroleum.

LPRC Managing Director Perry Zulu said his corporation needed four million dollars monthly to provide the regular supply of gasoline.

He said, however, that the government was providing one million dollars and added that "even that amount was difficult to get."

He said because of the foreign exchange crisis the LPRC has reduced its daily supply from 2,000 barrels to about 1,500 barrels.

It was not known how long the gasoline shortage would last.

Last year the government increased the price of gasoline from 2.9 to 3.5 dollars a gallon.

JERUSALEM (MAY 9) - Labor Party leaders agreed Wednesday to a compromise formula designed to get the party back into power in a reformed national unity government with the right-wing Likud party.

The Labor decision represents a retreat from its previous insistence on a positive answer to United States proposals on furthering peace talks with Palestinians, and will face tough opposition in wider party forums which must authorise the decision.

Labor doves and left-wing political parties hurried to condemn the decision, while the Likud appeared determined to press ahead with efforts to form a narrow right-wing administration.

The previous coalition between the two blocs was toppled by Labor on March 15 over the refusal of Likud Premier Itzhak Shamir to give a positive response to the inititiative of U.S. Secretary of State James Baker on advancing the peace process.

Labour's former defence minister, Itzhak Rabin, was the prime supporter of a return to the coalition with the Likud, and the decision represented an embarrassing reversal of positions by party chairman Shimon Peres.

BEIRUT (MAY 9) - The Lebanese economy, already battered by 15 years of civil war, has been delt another irreversible blow by last week's plunge of 100 points in the exchange rate of its currency against the U.S. dollar.

Economic analyst Samir Makdisi of the American University of Beirut attributed the collapse to ''disastrous consequences'' of the latest round of fighting in the Christian sector of Lebanon.

Some 100 days of street battles pitting army troops loyal to General Michel Aoun and militiamen under Samir Geagea not only killed 1,050 people and wound 3,250 others, but totally destroyed the economic infrastructure of

Lebanon.

Once known as Monte Carlo of the Arab world, the Christian enclave in central Lebanon where around a million Christians live was also a thriving Mideast business center and a tourism paradise.

The relative peace maintained in the enclave by the strong, but well-trained and organized Lebanese Forces militia of Samir Geagea attracted multi-national corporations and tourists seeking sandy beaches on the Mediterranean and glittering casinos and bars.

The rest of the Lebanese areas under Moslem control were living in a comparative Dark Ages with the rule of Moslem fundamentalists who banned liberal life and chased away foreigners and investors.

A long-sought Christian dream of security and self-rule within the boundaries of their 800 square-kilometre enclave appeared to be about to come true.

#90129d3450 05/09/1990 ~French/German News Agency

PARIS (MAY 9) - The French cabinet proposed wide-reaching regulations Wednesday for identifying the financial resources of drug traffickers which would even require banks to provide tipoffs on suspicious assets.

The legislative package, part of an anti-drug crusade adopted by leaders of the seven Western industrial nations at their Paris summit last July, would allow courts in other countries to order the confiscation of assets of drug dealers in France. U.S. law grants courts such power.

The measures would also give French drug enforcement agents access to confidential financial transactions and tax records. French banking institutions would be obliged to inform the Economics Ministry of any suspicious transactions or investments.

French Premier Michel Rocard, in unveiling the package, said drug trafficking has become a major global industry with a volume of 500 billion francs (125 billion dollars) annually, putting it on a par with the oil industry and global arms sales.

He said drug barons are exerting increasing political power in Colombia and other countries, making drugs a major international threat. Drug offences are rising in France, with heroin seizures up 37 per cent in 1989 and cocaine seizures up 57 per cent, he said. A total 4,410 persons were arrested in France on drug charges last year.

Under U.S. law, assets of suspected drug dealers can even be confiscated

pending trial. Lawyers for deposed Panamanian strongman Manuel Antonio Noriega asked last week to be removed from his case, saying all of Noriega's financial assets had been confiscated, blocking payment of their fees.

#90129d3470 05/09/1990 ~French/German News Agency

BEIJING (MAY 9) - Volkswagen of West Germany plans to go ahead with plans to set up a joint venture to put its popular Golf cars on China's highways company officials said Wednesday.

The project, which has been officially approved, calls for joint production of 150,000 vehicles by 1996 with China's First Automotive Works, said Burkhard Welkener, the deputy general manager of Shanghai Volkswagen.

An accord finalizing the deal will be signed in the second half of the year, Mr. Welkener said by telephone from Shanghai.

Several test models are due to roll off the assembly line this year, he said.

The creation of the joint venture comes at an odd time, analysts said, with China's industrial production hard hit by recession and the auto market practically dried up as a result of Beijing's current austerity policies.

Mr. Welkener said the Golfs, to be manufactured in the northeastern city of Changchun, would mainly be for use by hotels, joint venture companies, taxi firms and executives.

Investment in the project is expected to reach at least a billion Deutsche marks (745 million dollars), he said. The firm is expected to be the largest auto joint venture in China.

Volkswagen already has a large presence in Shanghai, where it has a plant which is scheduled to manufacture 17,000 Santanas this year, compared to 15,690 last year.

The West German corporation also has a joint venture plant in Changchun which is expected to put out 6,000 Audi-100 models under license. The first models came off the assembly line in January.

But Volkswagen, like the other foreign automakers here Peugeot and American Motors, has been hard hit by the austerity plan announced in September 1988 to rein in double-digit inflation and cool an overheated economy.

The company's plant in Shanghai had to halt production for 49 days last year due to a slump in sales.

Annual production here by joint venture automakers currently does not surpass 30,000 units.

Valletta (MAY 9) - Italy will provide Malta with 250 billion lire (200 million dollars) in aid over four years starting in 1991 under a protocol signed between the two countries here Wednesday.

It is the third financial proocol to a 1981 treaty by which Italy undertook to guarantee Malta's neutrality. The second protocol, signed in 1986, provided 180 billion lire (144 million dollars) over four years.

The agreement was initialled by Malta Foreign Minister Guido de Marco and by Italian undersecretary for foreign affairs, Senator Claudio Vitalone.

According to de Marco, Italy has also offered to make available helicopters and patrol boats to help Malta combat international drug trafficking.

Both de Marco and Vitalone hailed Wednesday's agreement as concrete evidence of Italo-Maltese friendship, and Vitalone said Rome supported Malta's efforts to integrate itself more closely with Europe.

More than half the funds will go to make up for Malta's heavy trade trade imbalance with Italy, while the rest, consisting of grants and low-interest loans, will be for infrastructural projects and technical assistance, as yet unspecified.

Maltese Prime Minister Eddie Fenech-Adami has said Malta intends to formally apply for European Community membership some time after July 1, when Italy takes over the presidency of the Community. dpa ds 091530 mai 90

#90129d3590 05/09/1990 ~French/German News Agency

TOKYO (MAY 9) - Prime Minister Toshiki Kaifu has already put his Asian tour behind him and has returned to the herculean domestic task of bringing

genuine reform to Japan's political system.

Mr. Kaifu said he was "firmly resolved" to present an electoral reform package by November, when Japan celebrates the centennial of the founding of its parliamentary system.

Speaking Saturday at a dinner in Jakarta shortly before his return, Mr. Kaifu said his proposals would be based on recommendations made to him in late April by a blue-ribbon panel.

The package would propose adoption of a new mixed system of electoral representation in the bicameral parliament's lower house, the more powerful of the two legislative bodies, and greater control over political funding.

"One of the main purposes of the reform is to make possible a change of power, or make it easier," Isao Sato, the panel's vice president and an expert on constitutional law, told reporters Tuesday.

Since 1955, political power has remained firmly in the hands of the ruling Liberal Democratic Party (LDP), which Mr. Sato said had as a result shown "increasing arrogance" over the years.

This "arrogance," combined with the Recruit shares-for-favors scandal that rocked Japanese politics last year, was in large part responsible for the stinging defeat handed the LDP in July's legislative elections, when it lost its upper house majority for the first time.

Suddenly the conservatives began giving serious consideration to political reform, which has been widely demanded by Japanese voters.

Mr. Kaifu, who took office following the defeat in an LDP bid to spruce up its image, naturally came out in favor of electoral reform.

But few observers expected him to keep pushing the cause after the LDP's suprisingly strong showing in February legislative elections.

LUXEMBOURG (MAY 9) - Luxembourg's ambassador to NATO resigned two weeks ago because he "infringed security regulations", Luxembourg Foreign Minister Jacques Poos said on Wednesday.

The ambassador, Guy De Muyser, aged 64, had held the post of permanent representative, or ambassador, to NATO in Brussels since 1983.

He had been ambassador to Moscow from 1981 to 1983, having held the senior

post of Marshal at the Court of the Grand Duke Jean de Luxembourg from 1971 to 1981.

Mr. Poos told parliament here that Allied secret services had warned his government "at the beginning of April" that Mr. De Muyser "was believed to have infringed security regulations" laid down by the North Atlantic Treaty Organisation (NATO). He resigned on April 25.

Mr. Poos gave no details. But reports, which have not been confirmed officially here, said that it was believed that Mr. De Muyser had allegedly visited Moscow several times without advising the NATO secretariat as he should have done.

He had maintained friendship with some Soviet citizens since his tour of duty in Moscow, and was believed to have allegedly handed a NATO document, considered to be classified, to one of the people he knew there.

The unofficial sources said that leaks a short time earlier had however enabled the international press to publish the contents of the document.

Mr. Poos said that his government had withdrawn authority for the ambassador to have access to confidential information "as a preventive measure", and he resigned.

Observers said that the reference to preventive measures implied that Mr. De Muyser had allegedly acted in an imprudent manner without significant consequences, and that he had not been seriously indiscreet nor active in espionage.

#90129d3630 05/09/1990 ~French/German News Agency

BEIRUT (MAY 9) - Rival Christian forces locked in fierce gunbattles Wednesday in areas east of Beirut as Lebanese President Elias Hrawi met Syrian President Hafez Assad in a Damascus summit.

Police said bombshells traded by supporters of General Michel Aoun and militiamen under Samir Geagea rained down on residential neighbourhoods in and around the Christian sector of Beirut.

The drawn-out flareup shattered a brief nighttime truce. Bombardments earlier killed 10 people, among them two senior Lebanese Army officers, the head of the military academy, Colonel Francois Zein, and his assistant.

Aoun's artillery started early Tuesday pounding the coast north of Beirut where the Lebanese Forces militia maintains strongholds.

Two more people were killed Wednesday and 45 others wounded, police said.

The new casualties bring the total number of people killed to 1,090 and the toll of wounded to 3,280 since fighting between the two Christian factions started January 31.

Aoun's press office issued a warning by the general saying he would shell any ship approaching Lebanese territorial waters off the Christian enclave in central Lebanon.

''The coastal area from Beirut to Madfoun Bridge (the northern edge of the enclave, 30 kilometres from Beirut) has been declared a military zone that no one should approach,'' said the warning.

The army's seige is meant to prevent Geagea's militia from importing arms to Juniyeh port, around 20 kilometres from Beirut.

Meanwhile President Hrawi, accompanied by Prime Minister Salim Hoss, arrived suddenly in Damascus for talks with Assad on the worsening Lebanese crisis.

The visit, the second this year, came only a week after Egyptian President Hosny Mubarak met Assad in Damascus on Middle East issues.

The two sides are to stress improving security in West Beirut and establishing a militia-free zone in the capital under sole Lebanese Army control, according to the newspaper an-Nahar.

Security sources in Beirut said that both General Aoun and Geagea were preparing for a decisive battle over East Beirut.

Newspaper reports said both sides were bringing in ammunition and arms and fortifying their positions along frontlines in and around the capital.

#90129d3660 05/09/1990 ~French/German News Agency

JOHANNESBURG (MAY 9) - Some 22,000 white miners represented by eight trade unions announced an agreement Wednesday for a 13.5 percent annual pay rise in talks with the Chamber of Mines, representing the major mining houses.

The award falls 1.4 percent under the official year-on-year inflation rate, which is widely regarded as an underestimate.

Rand Mines' key marginal East Rand Proprietary Mines (EPRM), which lost 20.2 million rand (7.78 million dollars) in the first quarter, was excluded from the agreement.

With the gold price at 370 dollars an ounce EPRM is unviable, but the town

of Boksburg, east of Johannesburg, is largely dependent on the mine for employment, so unions are thought to be willing to settle for wage cuts in real terms to save jobs.

The Chamber of Mines begins annual pay talks Thursday with the black National Union of Mineworkers, which has a membership of some 230,000.

An NUM spokeswoman said she was unable to reveal what the union's pay claim would be.

WASHINGTON (MAY 9) - Decimation of the tropical rain forests of Africa, Asia and South America is threatening resources which may hold the keys to cures for the world's worst diseases, scientists say.

Tropical plants holding potential cures for cancer, AIDS and other diseases are falling prey to deforestation, population growth and poor land management in the tropical rain forests, said University of Illinois Professor Djaja Soejarto, who recently returned from research in the Philippines.

"If they do get extinct, that means we will never find the cures that we are looking for," said Mr. Soejarto, principal investigator in the Asia project for the National Cancer Institute's (NCI) medicinal plants study.

His group collects plant samples with the help of local researchers and botanical collaborators in the Philippines, Indonesia, Thailand, Malaysia, Papua New Guinea, Nepal and Taiwan.

Similar groups are working in the African and South American rain forests.

The five-year study -- funded by a 2.5 million dollar NCI grant -- began three years ago to find possible chemical keys to fighting acquired immune deficiency syndrome and cancer, Mr. Soejarto said.

But tropical rain forests are being leveled at the rate of 20 hectares (50 acres) per minute, according to the World Wildlife Fund, threatening plants which hold compounds such as those already discovered for childhood leukemia and Hodgkin's disease, the researchers said.

And while today's loss is the plants, tomorrow's could be the people unable to receive the medicinal plant cures, scientists said.

Researchers said that of some 2.5 million plant species in the tropical rain forests, between 825,000 and 1.3 million species may become extinct by the year 2000.

Tropical plants are now used in 47 clinically useful prescription drugs, said Mr. Soejarto, adding that of the 95 plant species used in prescription medicines, 39 were from tropical rain forest plant species.

But some researchers contend that while deforestation is a problem, lack of land management is the main culprit.

Harvard University Professor Peter Ashton, co-principal investigator in the Asia project, said there was little restraint on who could enter the forests to settle there or to collect and sell medicinal plants.

The local people know what they are looking for because many of the plant species have been used as folk cures in their cultures for hundreds of years,
the researchers noted.

The World Health Organization estimates that about 88 per cent of people in developing countries rely chiefly on traditional medicines for their primary health care needs.

Mr. Soejarto said that development and deforestation also threatened to displace villagers whose knowledge of natural cures helped scientists short-cut research.

In addition, he said, the enormous variety of plant life in tropical rain forests made it more likely that scientists would find medicinal cures there than in other types of forests.

"The chances of finding a drug that will cure AIDS, cancer, diabetes, liver disease, Alzheimer's or what have you ... the chances will be higher from the tropical rain forest region," said Mr. Soejarto.

Research on natural cures is costly and time consuming but far outweighs the short-term gains of synthetic medicinal production, said Dr. Gordon Cragg, an NCI chemist who specializes in natural products.

"Nature produces unusual compounds which synthetic chemists wouldn't dream of," he said.

Aside from medicinal values, the plants could post economic gains for developing countries, the researchers said.

In the United States, one quarter of all prescription drugs sold contain at least one ingredient derived from plants, representing an eight-billion-dollar industry annually, Mr. Soejarto noted.

BAGHDAD (MAY 9) - Iraqi Airways is to buy five Airbus A-310-300 aircraft in a deal totalling 500 million dollars, the national carrier's director general Noureddin Safi said Wednesday.

He said a delegation representing the Airbus consortium was expected here in the coming days to conclude the transaction for the airplanes, capable of carrying 250 passengers and scheduled for delivery in early 1992.

The airline will buy another 10 Airbus planes in the next few years to beef up its fleet to 30 modern wide-bodied jets, he said.

Mr. Safi added that Iraqi Airways would lease two A-310-300s until the five aircraft are delivered.

He announced in February that the airline was holding talks with both the U.S. aircraft manufacturer Boeing and Airbus Industrie to consider purchasing either the Boeing 767 or the A-310-300.

He said that a 500-million dollar bank loan was obtained from Arab and international groups for the purchase of wide-bodied carriers to replace the company's aging Boeing 707s and 727s.

Mr. Safi announced profits of 30 million dinars (96 million dollars) for 1989, an increase of 16.6 per cent over the previous year.

#90129d3870 05/09/1990 ~French/German News Agency
LYONS, FRANCE (MAY 9) - The gardening products division of French group Rhone-Poulenc has taken a majority stake in a West German and a Belgian company, making it the market leader in this sector in West Germany, Austria and Belgium, the company said Wednesday.

Rhone-Poulenc Agro was already the market leader in this sector in France.

The French group did not say what level of stake it had taken in Shell-Agrar, a subsidiary of Deutsche Shell, or Torpha of Belgium, and did not give the value of the deals.

Shell-Agrar, which markets products under the Sovilo and Fertiligene brand names had sales of 380 million francs (66.6 million dollars) last year.

Torpha, which specialises in fertilizer for the Benelux market, had sales totalling 36 million francs (6.3 million dollars) last year.

Rhone-Poulenc Agro's gardening products division had sales of 450 million

francs (78.9 million dollars) in 1989.

#90129d3880 05/09/1990 ~French/German News Agency
MONROVIA (MAY 9) - Liberian President Samuel Doe Wednesday gave rebels trying to overthrow his government another two weeks to lay down their arms without facing reprisals.

The president told a nationally broadcast press conference that he was extending the original deadline he set a fortnight ago because no rebels had responded to it.

The president cited ''travel impediments'' as the reason for the lack of response, but did not elaborate. He also named five points where the rebels could surrender without facing retaliation.

Doe declined to mention a casualty figure in the civil war, which began in December when insurgents led by charles Taylor invaded Liberia's Nimba County from neighbouring Ivory Coast.

The president, who earlier this week visited Togo and Nigeria in a bid to seek foreign mediation to defuse the situation, said his goal was ''maintaining peace and harmony in Liberia''.

Some reports have spoken of the rebels advancing to within 80 kilometres of Monrovia. There have also been reports of government troops killing innocent civilians.

The U.S. had advised the about 5,000 Americans in Liberia last week to leave the country in view of the escalating civil war.

TOKYO (MAY 9) - Japan is to raise its import quota on South Korean silk yarn by 10.3 percent but will leave its quota on silk fabric unchanged, a Ministry of International Trade and Industy official said Wednesday.

The official said the quota on silk yarn would be lifted from 6,800 bales to 7,500 bales in the year to March while the quota on silk fabric would be left at 5.95 million square metres. The quota on imports of raw silk from South Korea is also believed to be unchanged at 5,500 bales.

Japan raised its quota on silk yarn imports from South Korea by 9.7 percent last year but left those on silk fabric and raw silk unchanged. Textiles is one of the few areas in which Japan suffers a trade deficit.

A bale of silk weighs 60 kilograms or 132 pounds.

#90129d3980 05/09/1990 ~French/German News Agency
JOHANNESBURG (MAY 9) - Sales of new cars dropped 24.2 percent to 14,400 vehicles in April against March's figure of 19,000, the National Association of Automobile Manufacturers of South Africa said Wednesday.

Compared with the corresponding month in 1989, April's sales reflect a decline of 22.2 percent, or 4,100 vehicles.

In a statement, NAAMSA attributed the sharp drop in sales to consumer and business uncertainty, the high cost of finance and general uncertainty about the outcome of socio-political developments in South Africa.

-30- 719
#90129d4020 05/09/1990 ~French/German News Agency
BERLIN (MAY 9) - The number of unemployed in East Germany soared by 70 percent in April over the previous month's level to 65,000, the labor ministry said Wednesday.

Almost 12,000 of the jobless had a university degree, 36,000 were technicians and 16,000 were unskilled labourers.

The president of the West German businessmen's federation said in an interview to be published in the West German newspaper Bild on Thursday that East German industry could expect to lose a million jobs as German unification took effect.

But this would mean "only a temporary increase in unemployment as at the same time a million and a half new jobs will be created by the end of 1991 " Tyll Necker said.

#90129d4100 05/09/1990 ~French/German News Agency
TEHERAN (MAY 9) - The Iranian parliament Wednesday approved a motion to cancel financial "facilities" made available to foreign companies doing business with Israel, official sources said.

The measure, endorsed by 180 of parliament's 270 MPs, also pledged "major political and material support to the Islamic revolution in Palestine" and recognized Jerusalem as the capital of a "Palestinian state in exile."

The motion had been proposed by hardliner and former interior minister Ali Akbar Mohtashemi and passed after two days of debate despite opposition

from Ali Mohammad Besharati, Iran's deputy foreign minister.

It was also aproved by the Council of Guardians, charged with overseeing parliamentary legislation.

"All financial facilities planned with foreign companies linked to the Zionists are cancelled and the Foreign Ministry will prepare a list of such companies," the text said.

It called for a parliamentary conference here "of representatives from Islamic countries to deepen support for the Islamic revolution in Palestine" and said Iran should invite Moslems from around the world to contribute to an international fund for Jerusalem.

The motion also appealed to Iranian foundations to boost their assistance to families of Palestinians killed by Israeli troops.

ABIDJAN (MAY 9) - U.S. African affairs official Kevin Callwood has begun a four-day working visit to the Ivory Coast, whose president has opened the door to multiparty politics, a U.S. Embassy spokesman said Wednesday.

Mr. Callwood, deputy assistant secretary of state for African affairs arrived late Tuesday from Togo, and will meet government officials and other Ivorians to discuss economic and political developments.

After widespread unrest over planned austerity measures which the government retracted earlier this year, Ivorian President Felix Houphouet-Boigny on April 30 announced the introduction of a multiparty system.

U.S. commercial interests and a rebellion in neighbouring Liberia are also to feature in the talks, the spokesman said.

Some 60,000 Liberians have taken refuge in the Ivory Coast since fighting broke out between rebels and Liberian government troops on December 24.

The U.S. envoy is to leave here Friday for Europe on his way back to Washington.

#90129d4150 05/09/1990 ~French/German News Agency

TOKYO (MAY 9) - The Bank of Japan said Wednesday it shared the blame for soaring land prices as its easy credit policy contributed to the unprecedented rise.

In its April monthly report, the bank admitted for the first time that its monetary policy of pursuing low interest rates was in part responsible for soaring land prices.

But the bank said that speculative buying, land acquisition for tax-saving purposes and a strong demand for land in major cities were the direct cause.

The central bank had maintained its key official discount rate at a record low of 2.5 percent for more than two years, until it initiated a series of hikes in May 1989.

The monetary relaxation led to larger increases in the money supply, which helped push up land prices, the report said.

#90129d4190 05/09/1990 ~French/German News Agency

KATHMANDU (MAY 9) - Nepalese Prime Minister Krishna Prasad Bhattarai will have talks in New Delhi in late May with Indian counterpart Vishwanath Pratap Singh on a long-running trade dispute, a senior Nepalese official said here Wednesday.

It would be Mr. Bhattarai's first foreign trip since becoming premier.

The two countries are locked in a 14-month-old conflict over the renewal of trade and transit treaties that has seen India close all but two of its 21 transit routes into Nepal, causing acute economic hardship in the

landlocked Himalayan kingdom.

Mr. Bhattarai had asked Mr. Singh in a letter in April to return Indo-Nepalese trade and transit relations to where they were on March 23, 1989, when the old agreements expired, until fresh negotiations for new treaties could be finalized.

During the last seven months Nepal's exports to India totalled only 84.2 million rupees (2.95 million U.S. dollars), against imports from India worth 2.7 billion rupees (94.8 million dollars), for a trade deficit of 2.616 billion rupees (91.85 million dollars), a Nepalese Finance Ministry official said.

Although there are currently no official trade relations between Nepal and India, trade has been carried out unofficially through Jogbani and Raxaul, the two open transit points.

The situation has forced up prices of consumer products and construction goods by 35 to 45 percent.

After the expiry of the agreements in March 1989, Nepal imposed tariffs of between 15 percent and 90 percent on various goods to make the cost of Indian products on a par with that of other foreign-made goods.

As a result, most Indian goods are being smuggled into Nepal to avoid the higher customs duties, and prices have gone up with businessmen claiming that special payments need to be made to both Nepalese and Indian border officials,
as well as to the carriers.

After the lapse of the trade agreements, India stopped the supply of petroleum products, including oil and coal to run factories in Nepal.

To meet demand, Nepal began importing petroleum products from other countries, including Singapore, with prices ballooning by more than 55 percent, a spokesman of the Nepal Federation of Trade and Industry said.

New Delhi has assured Kathmandu of its willingness to resolve the trade question, the Nepalese ministry official said.

LONDON (MAY 9) - The African, Caribbean and Pacific (ACP) countries which have signed the sugar protocol of the ACP-EEC convention expressed concern here Wednesday over the sugar prices they had been guaranteed, participants said.

ACP delegates said at the opening of a three-day special conference here that they were concerned that the price guaranteed by the European Economic Community for its sugar had been frozen at the 1985-86 level, which they said was threatening their export revenue.

They also said they were worried about the results of the current Uruguay Round of multilateral trade talks within the General Agreement on Tariffs and Trade (GATT) and the effect of political developments in Eastern Europe on the EEC's economic relations.

The sugar meeting which opened Wednesday was the third of its kind, after one in 1977 in Barbados and one in 1985 in Guyana.

BUCHAREST (MAY 9) - A meeting will take place Saturday between Romanian interim president Ion Iliescu and anti-government demonstrators occupying the University Square in Bucharest, Rompres agency reported Wednesday.

A meeting Tuesday between the Romanian leader and demonstrators, who have occupied the square for more than two weeks, ended shortly after it began when Mr. Iliescu refused to allow the session to be filmed by reporters.

The official news agency did not give any details about the new meeting, and representatives of the three protest organizations in the square, questioned by Agence France-Presse, said they "knew nothing" about a new meeting.

An spokesman for the demonstrators said Tuesday that they wanted assurances that "point eight" of the Timisoara declaration would be observed.

This excludes from the next three legislative elections former senior communist party officials, and demands the resignation of Interior Minister Mihai Chitac and his deputy General Corneliu Diamandescu.

Elections are to be held in Romania on May 20.

WARSAW (MAY 9) - The number of jobless in Poland, which stood at 317,000 at mid-April, could soar to a million by the end of the year, the PAP news agency said Wednesday, quoting unidentified experts.

The country could expect a wave of mass redundancies affecting 150,000 people by August 1, and only half of 320,000 people leaving college this year could expect to find work, PAP said.

If the forecast of a million jobless by the end of the year were realised, a special government fund for the jobless would barely cover unemployment payments, with nothing left for the promised creation of new jobs.

The workforce in Poland is some 18 million people, for a population of 38 million.

LONDON (MAY 9) - The Monopolies and Mergers Commission is to conduct an enquiry into the British new car and spare parts market in response to calls from consumer associations, the government said Wednesday.

The Commission is to examine why the price of some new cars is higher in Britain than elsewhere in Western Europe and determine "whether such price differences are caused by suppliers' exclusive distribution or policies and, if so, whether those policies need to be changed."

Some 2.3 million passenger cars were sold in Britain last year.

The news of the enquiry sent shares in auto makers and parts producers such as Lucas and GKN lower on the London stock market.

ABU DHABI (MAY 9) - South Korean electronics giant Gold Star Trading Company plans to set up a warehouse and distribution centre in the United Arab Emirates (UAE) with an investment of nearly one million dollars, a company official said Wednesday.

"We expect to sign an agreement shorty to set up a spare parts and distribution centre to cater to the Middle East and maybe Africa," according to Kwang Soo-Shin, Goldstar director for the region.

He said the company planned to invest about one million dollars in the facility, which will be located in Jebel Ali Indisrial area in the emirate of Dubai, some 160 kilometres (100 miles) north of Abu Dhabi.

Goldstar exported consumer electronics goods worth five million dollars to Dubai in the first three months of 1990 and expects the figure to reach 300 million dollars by the end of the year, Mr. Kwang said.

Dubai is a major re-export centre for the Gulf and Middle East.

The Middle East, where sales totalled 50 million dollars in the first three

months of 1990, accounts for about 15 percent of Goldstar's business.

LONDON (MAY 9) - The Lithuanian economy will grind to a standstill by May 25 if the economic sanctions imposed by Moscow on the breakaway republic are not lifted or eased by then, Lithuanian Prime Minister Kazimiera Prunskiene said here Wednesday.

"By May 25 we will have a crisis," Mrs. Prunskiene said, adding that because of the economic blockade "the different branches of our economy will come to a halt."

Speaking to reporters after holding talks with British Prime Minister Margaret Thatcher, Mrs. Prunskiene said a shortage of crude oil and fuel would affect light industry and transport throughout the Baltic republic, which formally declared its independence from the Soviet Union on March 11.

She said a Lithuanian government minister was in the United States and was involved in negotiations with U.S. and Canadian companies on possible ways to ease the economic difficulties posed by the sanctions.

"Those that wanted to punish Lithuania have actually been satisfied," she said, adding that "the wisest course for Moscow is to enter into dialogue with us."

AMMAN (MAY 9) - Jordan's Central Bank Governor Mohammad Saeed Nabulsi said Wednesday he expected higher remittances from Jordanian expatriates, an increase in exports and squeeze of imports, and Arab aid to help achieve financial stability over the next year.

Speaking to reporters, Nabulsi said that he expected remittances from Jordanians working abroad to increase by 25 percent from 650 million dollars in 1989 to 750 to 800 million dollars in 1990.

He said that after due payments of foreign debt to the London and Paris clubs of international creditors, the Central Bank has started rebuilding its foreign reserves, reaching 390 million dollars at the end of last month. The reserves include 350 million dollars in compulsory deposits by commercial banks in Jordan but exclude 750,000 ounces of gold reserves.

The governor said that central banks in Gulf Arab states have deposited 100 million dollars in the name of the Jordanian government in return for an equal amount deposited in Jordan dinars to help Amman in maintaining stability of its national currency.

Nabulsi said the government expected 400 million dollars in Arab financial aid in 1990 and pointed out that the United Arab Emirates paid a gift of 20 million dollars Wednesday.

He stressed there was no need for further devaluation of the Jordanian dinar for at least 12 to 18 months.

Nabulsi said he is scheduled to leave May 16 to London for further negotiations to reach a final agreement with the London Club of international commercial creditors to reschedule 1.1 billion dollars in loans to the kingdom.

TOKYO (MAY 9) - Japan's House of Representatives budget committee passed a 66.17 trillion yen (421 billion dollar) budget for fiscal 1990 late Wednesday, committee officials said.

The lower house plenary session will vote Thursday to clear the budget and send it immediately to the House of Councillors for further deliberations, they said.

The budget for the fiscal year ending in March will become law by June 9 under the Japanese constitution.

Because of the belated passage of the budget by parliament, the government adopted a stopgap budget covering spending for 50 days between April 1 and May 20.

RIYADH (MAY 9) - Libya's representative to the United Nations, former foreign minister Ali Triki, appealed in an interview published here Wednesday for normal ties and "fruitful cooperation" between his country and the United States.

Interviewed by the Saudi newspaper Asharq al-Awsat, Mr. Triki accused the United States of continued "duplicity" over the Arab-Israeli conflict, but urged the Bush administration to negotiate with Libya to settle differences outstanding since 1979.

Libya was a major exporter of oil to the United States in the 1970s, but the U.S. ambassador to Tripoli was withdrawn in December that year after a mob sacked the embassy in protest at the presence in the United States of the recently deposed Shah of Iran.

The embassy was closed in May 1981 and relations have deteriorated since then, with Washington describing Libyan leader Moamer Kadhafi as a supporter of international terrorism.

U.S. war planes attacked Libyan cities in April 1986 after the United States charged that Tripoli was behind an attack on U.S. servicemen in West Germany.

#90129d5020 05/09/1990 ~French/German News Agency

BERLIN (MAY 9) - The East German trades union federation set up by the former communist government said Wednesday it was disbanding itself to prepare for German reunification.

The West German trades union federation DGB had made the disbanding of the East German federation a condition of closer ties with East German unions, on the grounds that the federation had been totally discredited by its collaboration with the communist administration.

East German railworkers union president Peter Rothe told a press conference after an emergency meeting of leaders of the 20 unions in the federation that "the process of disbanding the FDGB has begun."

A congress would be called shortly to approve the decision, he added.

"The name of the FDGB has been discredited," Mr. Rothe said, and "the confederation was no longer in a position to carry out its functions."

The FDGB's assets will be shared among the various unions and coordination of the unions would in the future be handled by a council of trades union leaders, he said.

The FDGB, with more than nine million members, played a key role under the former communist administration as the only organisation, under party control, officially recognised as defending workers' interests.

The FDGB has been headed by a temporary leadership since the resignation in November of 63-year-old president Harry Tisch, who was a member of the Communist Party politburo.

He has since been charged with abuse of trust.

#90129d5120 05/09/1990 ~French/German News Agency

LONDON (MAY 9) - The premium of cash over three months copper widened back out to 210 pounds per ton on the London Metal Exchange (LME) Wednesday from 130 Tuesday, after the LME authorities decided to take no action over May contracts.

Cash metal soared to 1,730 pounds per ton in afternoon trading, up from 1,655 on Tuesday. Three months metal moved ahead in its wake, reaching 1,528 pounds per ton in afternoon kerb trading, up from 1,520 pounds in

afternoon deals and 1,510 on Tuesday.

The LME board's decision came after it called Thursday for details of market members' positions on May contracts, after a severe squeeze prompted suggestions of attempts to manipulate the market. The LME board said it will continue to monitor developments on the copper market. Traders said short term supply concerns are continuing to underpin prices.

Aluminium climbed in sympathy with copper, with three months metal reaching 1,538 dollars per ton on the kerb against 1,530 on the ring and 1,518 on Tuesday, while zinc also went firmer, reaching 1,720 dollars against 1,716 and 1,695.

Nickel was the day's only loser, edging back to 8,725 dollars per ton on the kerb, unchanged from ring deals but down from 8,745 on Tuesday.

AMMAN (May 9) - The United Arab Emirates (UAE) has granted 20 million dollars to Jordan, raising the country's foreign currency reserves to 390 million dollars, the central bank's governor said.

Mohammad al-Nabulsi told reporters that the grant was the first instalment of a 1990 package of aid from Arab countries, which is estimated to total 400 million dollars.

Saudi Arabia and other Gulf states granted 380 million dollars last year as part of efforts to overcome the economic crisis in Jordan, whose foreign debt rose to 8.3 billion dollars in 1989.

Mr. Nabulsi said his country had also received a deposit of 100 million dollars from Arab banks designed to help stabilize the Jordanian dinar against the dollar.

#90129d5660 05/09/1990 ~French/German News Agency
NEW DELHI (MAY 9) - A powerful cyclone struck southern India Wednesday, leaving a "trail of destruction and death," the Press Trust of India (PTI) news agency reported.

State-run television said 11 people had died, mostly when their houses collapsed, as heavy rains and gale-force winds battered coastal areas of Andhra Pradesh state, flooding villages, uprooting trees and snapping electricity and communication lines.

PTI reported six deaths, including an 11-year-old boy and an 85-year-old man killed in Machilipatnam town and Krishna district as gales of up to 230 kilometres (140 miles) per hour lashed the region.

Three other people had died earlier in neighbouring Tamil Nadu state.

The cyclone, which had been threatening the region for two days, crossed the coast of Andhra Pradesh state at around 7 p.m. local time (1330 GMT) and hit at a point where the river Krishna joins the Bay of Bengal, PTI said.

Andhra Pradesh state Relief Commissioner Arjun Rao was quoted as saying that the storm, which was packing winds of up to 250 kilometers (150 miles) per hour, would weaken as it travelled further inland.

The loss to human life would be minimal because of the evacuation of nearly 120,000 families from the most vulnerable coastal areas, PTI said.

The television said an Indian cargo ship reported caught in the eye of the cyclone had steered clear and was safe. The M.V. Vishwamohini was reported to be sailing towards the port city of Madras.

District authorities in Andhra Pradesh had earlier been alerted to keep watch in case the ship went aground.

Power supplies were cut off, and long-distance buses and 38 trains running through the southern region were cancelled.

Sea waters flooded several villages in Andhra Pradesh and state government authorities were engaged in last-ditch evacuation efforts after moving tens of thousands of people to improvised shelters, PTI said.

Authorities had raised the crisis signal, alerted the armed forces to be ready for rescue operations, warned fishermen not to venture out, mobilised scores of boats and lorries, in addition to emergency relief camps.

Experts have said that the storm would be one of the worst ever to pound India, with some forecasting that its destructive potential would be greater than a cyclone that killed almost 10,000 people in 1979.

The last major cyclone killed 48 people and affected half-a-million more in Andhra Pradesh last November, also destroying thousands of hectares (acres) of standing crops.

#90129d5710 05/09/1990 ~French/German News Agency

KABUL (MAY 9) - Afghan government troops have hemmed in guerrillas near the capital while heavy fighting rages in neighbouring provinces, an official spokesman said Wednesday, amid fears of stepped-up rebel rocket attacks on Kabul.

Sporadic fighting continued in the Paghman hill region, 20 kilometres (12 miles) northwest of the city, and an unspecified number of mujahedeen fighters were trapped there, spokesman Humayun Mukammel said.

He said security forces would use "special tactics" to flush out the encircled rebels, who despite military pressure have continued to fire rockets on Kabul.

The government says its troops are battling the mujahedeen in eastern Nangarhar and Kandahar provinces bordering Pakistan. Mr. Mukammel said

troops had dealt "heavy blows" on guerrilla positions during the past 20 days.

There were no details of the fighting except government claims that both sides were using rockets and that its armed forces had the advantage of air power to minimise its casualties.

Diplomats here said Afghan forces ran the risk of overstretching themselves by opening up too many battle fronts, leaving the capital vulnerable, particularly ahead of a crucial 'loya jirga', or grand national assembly, scheduled before the end of the month.

The guerrillas were almost certain to step up their rocketting of the capital to scare off people who might agree to attend the loya jirga, which is expected to adopt a new constitution, observers said.

President Najibullah is seeking to introduce sweeping political and economic reforms as part of his initiative to end Afghanistan's drgging civil war, but the rebels have clearly said they do not want to have anything to do with the president.

Diplomats here said that since the Soviet withdrawal in February last year government forces had adopted a strategy of successfully defending positions they already controlled rather than going after the guerrillas.

"With the Paghman operation, it looks like the government is actually hunting the mujahedeen, but trying to do this in too many places at the same time can leave them very vulnerable," a diplomat said.

Reports here indicate that troops are engaging militants in at least five fronts and that there had been hand-to-hand fighting in many places, with guerrillas putting up stiff resistance.

The guerrillas, observers believe, have resorted to rocket attacks on Kabul to relief the pressure on them in the provinces, particularly in regions bordering Pakistan.

Six people, including five children, died in rocket attacks on Kabul Tuesday and at least five more missiles slammed into the city Wednesday, but no details were immediately available.

#90129d5730 05/09/1990 ~French/German News Agency

WASHINGTON (MAY 9) - The United States will offer to abandon its giant Clark Air Base in the Philippines in exchange for a five- to 10-year extension of its lease on nearby Subic Bay Naval Station when talks on the future of the facilities open Monday in Manila, a senior U.S. military

officer said.

The officer, who has been closely involved with contingency planning on the bases' future at the Hawaiian headquarters of the Pacific fleet, said the U.S. proposal would be quickly put forward by special negotiator Richard Armitage once next week's preliminary discussions begin.

In those talks, Washington has officially said it will seek continued access to Clark, Subic Bay and four smaller installations beyond September 1991, when the current U.S.-Philippines bases agreement dating from 1951 expires.

The staging, training and resupply functions of Clark and Subic Bay, the largest U.S. bases overseas, have been the cornerstone of U.S. defense strategy in Asia since World War II, extending the reach of American forces from the central Pacific to the Middle East.

But rising anti-base sentiments in the Philippines and demands by the U.S. Congress for the expensive network of foreign bases to be trimmed in response to Soviet retrenchment are expected to force a compromise, said the officer and other U.S. officials who spoke with AFP this week on condition they not be named.

"The negotiations are going to be very quick," said the officer, who described Mr. Armitage, a former assistant secretary of defense, as "one of the toughest negotiators in the U.S. Government."

"Armitage is not going to let this thing get out of hand and he's not going to let it go long," he added, noting that negotiations that began in 1987 on an interim extension of the base leases dragged on for months and generated significant ill will on both sides.

"My guess is he's going to go in and say 'here's our position, take it or leave it'," he said.

LAGOS (MAY 9) - The Nigerian government Wednesday here warned that it would take reciprocal measures to protect its citizens from the actions some foreign governments in their bid to apprehend hard drug traffickers in their countries.

Nigeria would not ''tolerate molestation of her innocent citizens by any country or countries, in the name of ascertaining whether Nigerians carry hard drugs'', the nation's number two, Vice-Admiral Augustus Aikhomu, said in a speech at the opening of a three-day national seminar on drug enforcement.

''We shall reciprocate by subjecting the nationals of such countries to similar treatment they give to innocent Nigerians'', he told the seminar, attended by diplomats, foreign organisations, university teachers, lawyers and members of the security agencies.

He said that Nigeria, whose hundreds of citizens have been arrested recently within and outside the country on drug offences, has taken necessary steps at both national and international levels to ensure that the problem was brought under control.

The chairman of the newly-created National Drug Law Enforcement Agency (NDLEA), Fidelis Oyakhilome, meanwhile announced that Lagos had entered into an informal agreement with Thailand, the United States, Great Britain and Ghana with the purpose of exchanging information, narco-intelligence and mutual assistance.

Plans were underway to contact Ivory Coast, West Germany and Nordic countries for similar accord, Mr. Oyakhilome told the seminar.

#90129d6170 05/09/1990 ~French/German News Agency

HAMELIN, WEST GERMANY (MAY 9) - Syrian author Rafiq Shami has been awarded the 1990 Hamelin Pied Piper literary prize for his book ''Storytellers of the Night'', it was announced here Wednesday.

It is the third time the prize, worth 10,000 marks, has been awarded since being sponsored 1984 by the town of Hamelin for writers of fairy tales, stories of fantasy or legends. The prizegiving will be held June 8.

The 1946-born author grew up in Damascus and moved to West Germany in 1972. The jury chose Shami's book from 163 candidates, saying it had the unmistakable flavour of the Orient.

The Pied Piper of Hamelin was, according to German folklore, the musician who rid the town of its rats by leading them with his piping to the river, where they drowned. When authorities refused to pay him, he led the town's children to a mountain, where they disappeared.

#90129d6320 05/09/1990 ~French/German News Agency

PARIS (MAY 9) - Japan's representative to UNESCO Wednesday called on director-general Federico Mayor to postpone implementation of his controversial plan to restructure the U.N. body, saying that publication of the plan had created a "crisis of confidence" in UNESCO.

Since the United States and Britain quit the United Nations Educational, Scientific and Cultural Organisation in 1984-5 over the way it was run, particularly disliking its "Third World orientation", Japan has been UNESCO's chief financial contributor.

In addressing the 51-member UNESCO executive board which began meeting here Wednesday, Mizuo Kuroda did not explicitly threaten to suspend the Japanese contribution, but clearly indicated that his government did not want to see it used to strengthen the UNESCO bureaucracy.

Japan and several other member countries are upset at the proposed creation under the restructuring plan of a large number of new posts at director level, and thus their cost. They also complain there has been no consultation at all with the executive board.

Mr. Mayor indicated in an explanatory note for his plan that the cost of the new posts would be covered by those being abolished or the freezing of vacancies.

But he was told that the savings made in staff costs ought to be used for the benefit of UNESCO's programmes and not for the expansion of its already over-heavy bureaucracy.

Mr. Mayor's plan was made public at the beginning of March, when it immediately caused a major stir, particularly among staff members worried about their future. Staff members staged a demonstration Wednesday morning outside the board meeting room.

The Japanese delegate said that his government, which had shown confidence in the director-general, became "negative and critical" following the publication of the restructuring plan, which he said had caused "great disappointment".

The Chinese delegate also called on Mr. Mayor, though in much gentler

terms, to suspend implementation of his plan and suggested the creation of a working group to discuss it.

He asked that the proposed new staff nominations -- which on the instigation of Canada the council had insisted Mr. Mayor submit to it -- should not be examined in this session.

France assured the director-general of its confidence in him, but like other countries raised doubts about the value of creating the proposed new posts of "coordinators" or a "panel of eminent personalities" to advise him.

The plan's proposed recourse to outside "consultants" has also angered UNESCO workers, who while the board was meeting attacked what they called attempted "illegal recruitment" within the organisation.

The UNESCO staff association said it too should be consulted in the drafting of reforms, which they said should respect existing and proved procedures.

The staff, who staged a warning strike on March 14, complain that Mr. Mayor's plan could result in the introduction of highly-paid people, recruited "by the back door", with questionable qualifications.

#90129d6450 05/09/1990 ~French/German News Agency

PARIS (MAY 9) - The immediate future of France's Socialist government seemed secure after Communist Party members of parliament said late Wednesday that they would not back the conservative opposition in a no-confidence motion.

The party's central commitee issued a statement saying it refused to take sides in a row over a government measure to amnesty allegedly corrupt politicians, after Prime Minister Michel Rocard suggested that, as a compromise with the Communists, the government was prepared to restrict the scope of the amnesty.

The Socialists hold 272 of the 577 seats in the National Assembly, the lower house of parliament, and could be brought down if the 26 Communist deputies voted with a united opposition.

A formal vote was due shortly after midnight.

Only one government in the 32-year history of the Fifth Republic -- that of Prime Minister Georges Pompidou in 1962 under President Charles de Gaulle -- has had to resign on a vote of no-confidence, and even then Mr. Pompidou was reappointed and there were no general elections.

#90129d7180 05/09/1990 ~French/German News Agency
LONDON (MAY 10) - European anti-apartheid groups on Tuesday expressed opposition to the visit by South African President Frederik de Klerk and said that protests were planned for each of the nine countries in his tour.

The Liaison Group of National Anti-Apartheid Movements in the Countries of the European Community said it "regretted the decision of the president of the European Community and heads of government of the majority of member states" to invite De Klerk for meetings.

In a statement issued here on the day the South African leader arrived in France at the outset of his European tour, the Liaison Group said: "We believe it confers an unacceptable degree of respectability on the head of state of the apartheid regime."

The statement said the decision to welcome De Klerk would "undermine the prospect of achieving a political settlement in South Africa based on the ending of the apartheid regime and the creation of a united, non-racial and democratic South Africa."

It said apartheid continued to "kill and maim," in the words of African National Congress Vice-President Nelson Mandela.

Archbishop Trevor Huddleston, head of the British anti-apartheid movement, has written to European Commission President Jacques Delors to express his opposition to the tour.

All European anti-apartheid movements would be taking part in a protest in Brussels on May 17, when Delors is scheduled to meet De Klerk, the statement said.

#90129d7780 05/09/1990 ~French/German News Agency
CANBERRA (MAY 10) - Australia's unemployment rate rose slightly in April to a seasonally adjusted 6.2 percent, up from 6.1 percent in March, the Bureau of Statistics reported Thursday.

The figure was also up on the 6.1 percent recorded in April of last year.

The unadjusted unemployment rate stood at 6.3 percent in April compared with 6.5 percent in March and 6.3 percent a year earlier.

The bureau said its trend estimates, which smooth out seasonal and other effects, continued to show a gradual decline in male employment and an

increase in female employment.

It said the labour force expanded to a seasonally adjusted 8.38 million in April from 8.33 million in March and 8.15 million in April last year.

The seasonally adjusted unemployment rate among teenagers rose to 16.9 percent from 15.8 percent in March and 14.9 percent in April 1989.

#90129e0001 05/09/1990 ~Latin America New Agency

LIMA (MAY 9) EFE - Peruvian President Alan Garcia replaced three of his cabinet members Tuesday, two and a half months before his term comes to an end.

New ministers were named to the Education, Justice and Transport and Communication portfolios after the current holders presented their resignations, according to the Andina official news agency.

Education Minister Efrain Orbegoso is to be replaced by ruling APRA party parliamentary deputy Mercedes Cabanillas, who will be returning to the post she held for more than two years before leaving to run unsuccessfully for the mayorship of Lima last November.

Cabanillas is virtually assured of a seat in the Senate after a more successful campaign in April 8 general elections, the official results of which are still being totalled.

Independent Angelica Bockos de Grillo is to hand over the Justice Ministry to APRA deputy Joffre Fernandez Valdivieso, who is a lawyer and member of the congressional Justice and Human Rights Committee, as well as being APRA's spokesman in Congress on judicial affairs.

APRA member Augusto Valqui Malpica, ex-president of the National Commercial Airport and Aviation Corp. is to take over the Communication and Transport Ministry from Oswaldo Moran Marquez.

Garcia is to swear in the new ministers Wednesday in the government palace in Lima.

LIMA (MAY 9) EFE - Two people have been killed and three wounded in separate attacks against Peru's center-right FREDEMO coalition which backs presidential candidate Mario Vargas Llosa, police reported.

In one of the attacks, an unidentified youth entered a bar late Tuesday in

the city of Huaraz, 409 km north of Lima, and opened fire killing FREDEMO regional congressional candidate Agustin Dextre Cordova.

Dextre was secretary general of FREDEMO's Popular Action party for the Ancash department, of which Huaraz is the capital.

Also Tuesday, unidentified attackers hurled two bombs at FREDEMO offices in the city of Huacho, 103 km north of the capital, killing one person and wounding three others.

The identity of the victims in the explosion was not immediatedly released.

No group has claimed the attacks, but the Maoist "Shining Path" rebel group has frequently threatened to kill those who participate in elections as part of its decade-old insurgency.

Nearly 1,000 people have died in political violence in Peru this year while more than 19,000 have been killed since Shining Path took up arms in 1980.

The latest killings came less than a month before Vargas Llosa is to face independent Alberto Fujimori of the Change 90 movement in a run-off for the presidency following an inconclusive first-round general election on April 8.

Dextre was regarded as the virtual deputy-elect for the Chavin region following the April ballot. He had served as a parliamentary deputy in the early 1980s under the government of then president Fernando Belaunde Terry.

#90129e0004 05/09/1990 ~Latin America New Agency

MEXICO CITY (MAY 9) EFE - Foreign debt threatens world stability and has acted as a brake on the developing world, Pope John Paul II told diplomats on the third day of his visit to Mexico, one of the world's largest debtor nations.

Speaking Tuesday to members of the diplomatic corps in the capital, the Pope said technical measures to resolve the grave threat posed by debt to international equilibrium were insufficient, adding that the crisis' ethical dimensions must also be considered.

Mexico, wich owes dlrs 110 billion to foreign creditors, is the developing world's second largest debtor nation after Brazil.

During his address to some 100 foreign representatives, the pontiff praised Mexican President Carlos Salinas de Gortari for helping to improve relations with the Roman Catholic Church with the recent appointment of

Augustin Tellez Cruces as Mexico's permanent delegate to the Vatican.

Later Tuesday, the Vatican announced that Girolamo Prigione had been appointed as its special envoy to Mexico.

The move came hours after John Paul II declared that relations between Mexico and the Vatican, broken off over a century ago, had entered a new phase of dialogue.

Speculation has been high that an announcement to re-establish diplomatic ties would be made during the pope's visit.

Mexico broke with the Vatican in 1867, charging that the Church had amassed a fortune at the expense of the poor.

The country's constitution has denied the Church institutional legality and includes anti-clerical measures despite the fact that some 90 percent of Mexicans describe themselves as Catholics.

The pontiff's speech to diplomats followed his call to young Mexicans to fight drugs, hedonism and violence, during a youth mass attended by hundreds of thousands in the town of San Juan de los Lagos, 400 km northwest of the capital.

"Will you fall into the temptation of giving over the beautiful gift of your life to the destructive and murderous power of drugs, the blinding strength of hedonism, or the irrational predominance of violence?" he asked, setting off cries of "No!" from the young people.

On Wednesday, the fourth day of the visit, John Paul II was scheduled to visit prisoners in the city of Durango after talks with Church leaders and representives of the Jewish community in the capital.

HAVANA (MAY 9) EFE - Some 16 U.S. fighter jets flew within 5 km of Cuba's airspace in maneuvers which Cuban President Fidel Castro claims are part of a planned invasion, Revolutionary Armed Forces (FAR) officials have reported.

At a press conference Tuesday, attended by Castro's brother Interior Minister Raul Castro, reporters were told the jets came close to violating the Caribbean island's airspace May 5 forcing the Cubans to go on full alert.

The jets came within 80 km of Havana, the officials added.

FAR officials said the incident occurred during one of three U.S. military excercises carried out in the Carribbean, including one from Washington's Guantamano naval base on Cuba.

Castro charged that the maneuvers were part of U.S. plans to invade the island and on May 2 ordered a mass counter-exercise titled "Cuban Shield" involving some 3 million Cubans.

Castro said the defensive maneuver would continue until the U.S. threat was considered over.

Washington has denied that the war games, which were scheduled to finish Wednesday, were directed against Cuba.

LOGRONO, SPAIN (MAY 9) EFE - Basque armed separatists set off a bomb in northern Spain along the route planned for the day's stage of the Vuelta de Espana cycling tour, causing no injuries, regional government officials reported.

The bomb exploded 10 km from the city of Logrono, 260 km northeast of Madrid, on a road leading into the Navarre region. Searches were being carried out for further explosive devices in the area, the officials said.

A telephone caller claiming to represent the Basque armed separatist group ETA earlier told police that several bombs had been planted along roads near Logrono and three other towns where the cycling tour is scheduled to pass later Wednesday.

Some 150 cyclists are taking part in the yearly race which is followed by dozens of organizers and journalists.

ETA has killed more than 600 people in its 22-year-old campaign for the right to independence of northern Spain's Basque region.

The group also claims Navarra should be incorporated to an independent Basque Country.

#90129e0012 05/09/1990 ~Latin America New Agency

JERUSALEM (MAY 9) EFE - The Israeli government has demanded that Antigua explain how an arms cache apparently exported legally to the Caribbean island nation ended up in the hands of Colombian drug traffickers, officials reported Wednesday.

Foreign Ministry officials said the government had handed over all documentation pertaining to the sale of 400 Galil rifles and 100 Uzi sub-machineguns to a three-man investigation team from Antigua which arrived in Israel earlier this week.

"They are aware that this is an affair which has to be investigated in Antigua, but they have asked us to cooperate and we have, as it concerns a friendly country," a ministry spokesman said.

Israel claims the arms were sold to Antigua on a nation-to-nation basis and under the strict condition that they would not be sold or transferred elsewhere.

But a sizeable part of the cache was found last December during a Colombian police raid on a ranch owned by drug trafficker Gonzalo Rodriguez Gacha, who was killed in the swoop.

Antigua denies having ordered the weapons or that they were delivered, while Israel says its documentation proves the contrary.

On Tuesday, the Antiguan team interviewed Israeli reserve Col. Yair Klein who is believed to be behind the scam which brought the guns to Colombia.

Klein, who runs a private military firm and who is already wanted in Colombia for allegedly training drug-cartel hit squads, denies any part in the deal.

He maintains the weapons were moved to Colombia by a group of Panamanians by whom he been contracted to train for a planned ouster of former Panamanian military strongman Manuel Antonio Noriega.

Klein also denies he was involved in training gunmen for Colombia's drug cartels, claiming that the people he instructed were ranchers seeking training against criminals and leftist rebel groups.

An Israeli foreign ministry spokesman Wednesday said Col. Clytle Worker, Antigua's chief of its 90-strong Army had made the first move to import the arms.

In November, however, an Israeli named Maurice Sarfati, and who is reportedly wanted on fraud charges in the United States, took over the deal allegedly on behalf of Antigua's national security ministry and with papers showing him to be a special envoy.

#90129e0013 05/09/1990 ~Latin America New Agency

LIMA (MAY 9) EFE - One million Peruvian commuters were stranded by a

24-hour strike Wednesday in the capital called by 30,000 independent bus drivers demanding an increase in fares.

Bus driver's federation leader Moises Chang said the independent operators had called on the city authorities to raise fares by 130 per cent to 4,300 intis, the equivalent of 13 U.S. cents.

"The current fare neither covers nor justifies the operating costs", Chang said.

He pointed out that Lima Mayor Augusto Belmont had only ordered one increase in fares this year, failing to keep his promise of readjusting them in line with petrol prices, which have gone up four times since January.

With the mayor passing the problem on to the government to sort out, the only way private sector bus drivers could register their protest was by stopping work - a move Chang described as a "warning of a national strike."

At least one million residents of the capital were affected by the walkout.

The municipal bus company, which runs barely 10 per cent of Lima's public buses, has pressed all available vehicles into service but some routes have been suspended, particularly in outlying districts of the capital.

MONTEVIDEO (MAY 9) EFE - Uruguay's main labor union Tuesday called a 24-hour nationwide general strike for later this month to protest economic policies implemented by President Luis Alberto Lacalle's 2-month-old government.

The communist-controlled PIT-CNT union called the protest for May 24 and said it was pushing for salary hikes, better pensions, greater union freedom, more money for the health sector and reforms to education and housing laws.

PUT-CNT is pressing center-right Lacalle for an immediate dlrs 45 pay rise for public sector workers. It also wants the government to set controls on the prices of basic food stuffs which they claim have shot up over the last few days.

Shortly after taking office in March, Lacalle's cash-strapped government ordered 30 per cent hikes in the price of petrol and a rise in income and sales taxes in a bid to slash the budget deficit.

The measure sparked union protests and street demonstrations.

PIT-CNT officials are to meet Friday with Labor and Social Security Minister Carlos Cat to discuss their demands.

#90129e0015 05/09/1990 ~Latin America New Agency

GUATEMALA CITY (MAY 9) EFE - Guatemalan police have arrested a gang of 11 suspected drug traffickers who were allegedly trying to smuggle cocaine worth around 30 million dollars into the United States, officials said Wednesday.

A police spokesman said the shipment of 634 kg of cocaine was on its way from Colombia to the United States when the truck carrying it was stopped Tuesday on a road leading from the capital to the country's Atlantic coast.

During a routine check of its cargo police officers found 27 suitcases full of cocaine.

The spokesman said among the arrested were an American, a Mexican, and a Colombian.

#90129e0018 05/09/1990 ~Latin America New Agency

PONTEVEDRA, Spain (MAY 9) EFE - Spanish anti-riot police Wednesday arrested nine members of the environmental group Greenpeace who were protesting the dumping of dangerous chemicals into the Atlantic from a pulp mill on the northwestern coast.

Greenpeace said that those arrested, four Spaniards, three Britons, a Belgian and a Dutch citizen, disembarked from the organization's ship +Sirius+ in three motor launches.

After landing, they used 60 bags of cement and a huge slab of metal to block a pipeline at the ENCE paper mill near the city of Pontevedra, 480 km northwest of Madrid.

Police fired rubber bullets and smoke grenades to disperse the activists and some 100 local residents who had joined the protest. The pipeline was later unblocked with the help of a crane.

The pulp mill dumps 300 kg of mercury and 7,000 tonnes of other toxic chemicals, including deadly dioxins, into the Atlantic every year, a Greenpeace spokesman said.

Dioxins are the most dangerous carcinogens known.

Those arrested were released shortly afterwards and ordered to appear in court Thursday.

#90129e0022 05/09/1990 ~Latin America New Agency

GUATEMALA CITY, (MAY 9) EFE - The bodies of nine torture victims have been found in Guatemala, police said Wednesday.

Six of the bodies, all men who had been shot, were found within an area of 10 sq km on the outskirts of the capital. All showed clear signs of torture.

Two other bodies, with multiple stab wounds, were discovered by peasants on a highway in the south of the country, while the ninth body was found in a gully in the northern Baja Verapaz region.

None of the victims had yet been identified and police gave no indication of who was responsible for the murders.

Guatemala's 30-year-old civil war has claimed some 100,000 lives, many of the victims killed by right-wing death squads, according to rights groups.

Police also reported Wednesday that two brothers, one a youth of 13, died in a grenade explosion in the northern province of El Peten.

The brothers, both farm workers, died in what was described by police as the "accidental" explosion of a grenade

GENEVA (MAY 9) XINHUA - ZIMBABWE'S PRESIDENT ROBERT MUGABE CALLED WEDNESDAY FOR "DETERMINNED GLOBAL ACTION" TO REVERSE THE WORSENING HEALTH SITUATION IN THIRD WORLD NATIONS.

IN AN ADDRESS TO THE ANNUAL ASSEMBLY OF THE WORLD HEALTH ORGANIZATION (WHO) OF 167 MEMBER STATES, MUBABE SAID THAT THE HEALTH SITUATION IN MANY THIRD WORLD COUNTRIES HAD WORSENED OVER THE LAST DECADE BECAUSE ECONOMIC RECESSIONS, NATIONAL DISASTERS AND REGIONAL CONFLICTS CONSTRAINED THE HEALTH DEVELOPMENT OF THOSE COUNTRIES.

HE STRESSED THAT IF THE INTERNATIONAL COMMUNITY IS TO ATTAIN THE GOAL OF HEALTH FOR ALL BY THE YEAR 2000 AND OF NARROWING THE GAP IN THE HEALTH STATUS BETWEEN THE DEVELOPING AND DEVELOPED COUNTRIES, A GLOBAL ACTION IS NEEDED NOW.

"WITHOUT SUCH COORDINATED ACTION ON A BROAD FRONT, DEVELOPING COUNTRIES WILL FIND IT EXTREMELY DIFFICULT TO ERADICATE POVERTY AND HUNGER AND THEREBY IMPROVE THE HEALTH OF THEIR PEOPLES," HE SAID.

MR. MUBAGE ALSO CALLED FOR THE ESTABLISHMENT OF "AN ENTIRELY NEW INTERNATIONAL ECONOMIC ORDER" ON WHICH THE THIRD WORLD NATIONS COULD SECURE ECONOMIC AND SOCIAL DEVELOPMENT.

#90129h0072 05/09/1990 ~Chinese News Agency

DHAKA (MAY 9) XINHUA - INDIA IS READY TO HAND OVER THE TIN BIGHA CORRIDOR TO BANGLADESH WHICH LINKS TWO BANGLADESH'S ENCLAVES IN INDIA WITH THE MAINLAND OF BANGLADESH, ACCORDING TO A LOCAL PRESS REPORT TODAY.

BUT THE TRANSFER OF THE 178 METER-LONG AND 85 METER-WIDE CORRIDOR WILL BE EFFECTIVE ONLY AFTER THE INDIAN PARLIAMENT RATIFIES THE THE 1974 LAND BOUNDARY DEMARCATION AGREEMENT BETWEEN THE TWO COUNTRIES, A SPOKESMAN FOR THE INDIA HIGH COMMISSION HERE WAS QUOTED AS SAYING .

"INDIA, UNDER A 1982 AGREEMENT, IS COMMITTED TO HAND OVER TIN BIGHA CORRIDOR TO BANGLADESH, BUT THE GOVERNMENT WILL BE IN A POSITION TO DO IT ONLY AFTER 1974 LAND BOUNDARY AGREEMENT IS RATIFIED BY THE PARLIAMENT." THE SPOKESMAN SAID.

THE LEGAL HURDLES TO THE MATTER HAS BEEN REMOVED AFTER THE INDIAN SUPREME COURT IN A JUDGEMENT ON MAY 5 HELD THAT THE TIN BIGHA CORRIDOR SHOULD BE HANDED OVER TO BANGLADESH UNDER AGREEMENTS BETWEEN THE TWO COUNTRIES, THE SPOKESMAN SAID.

THE TWO BANGLADESH ENCLAVES WITH A TOTAL AREA OF 7.21 SQUARE MILES AND A TOTAL POPULATION OF 15,000 LIE JUST ABOVE THE NORTHERN BORDER OF BANGLADESH'S RANPUR DISTRICT. THEY CAN BE LINKED BY THE TIN BIGHA CORRIDOR WITH THE MAINLAND OF BANGLADESH.

#90129h0075 05/09/1990 ~Chinese News Agency

BEIJING (MAY 9) XINHUA - THE CHINESE MAINLAND WILL STRIVE FOR AN EARLY REALIZATION OF DIRECT SHIPPING LINKS WITH TAIWAN PROVINCE, A SENIOR GOVERNMENT OFFICIAL SAID HERE TODAY.

SPEAKING AT A GATHERING MARKING THE 40TH ANNIVERSARY OF THE UPRISING BY SAILORS OF THE HONG KONG-BASED CHINA MERCHANTS STEAM NAVIGATION COMPANY, QIAN YONGCHANG, MINISTER OF COMMUNICATIONS, SAID THAT SHIPPING CIRCLES ON THE MAINLAND ARE WILLING TO DISCUSS NAVIGATION ISSUES WITH THEIR COUNTERPARTS IN TAIWAN.

"WE HOPE WE CAN WORK TOGETHER TO BOOST CHINA'S SHIPPING BUSINESS AND CONTRIBUTE TO THE REUNIFICATION OF THE MOTHERLAND," HE SAID.

ENCOURAGED BY THE VICTORY OF THE LIBERATION WAR ON THE MAINLAND, OVER 700 SEAMEN ON 17 VESSELS FROM THE COMPANY DECLARED A BREAK WITH THE KUOMINTANG AUTHORITIES IN 1949 AND 1950 AND SAILED TO THE LIBERATED PORTS OF DALIAN AND GUANGZHOU.

AT TODAY'S GATHERING, 60 VETERAN SEAMEN WHO PARTICIPATED IN THE UPRISING VOICED THEIR HOPE THAT THE MAINLAND AND TAIWAN WOULD HAVE DIRECT SHIPPING LINKS AS EARLY AS POSSIBLE.

#90129h0079 05/09/1990 ~Chinese News Agency

BEIJING (MAY 9) XINHUA - VIETNAM HAS SHOWN NO SIGNS OF CHANGE IN STANCE DESPITE THE FACT THAT ITS VICE FOREIGN MINISTER DANG NGHIEM BAI RECENTLY SAID THAT IT IS NOT AGAINST DEMOCRATIC KAMPUCHEA PLAYING A ROLE IN THE POLITICAL SOLUTION OF THE KAMPUCHEAN ISSUE, RADIO DEMOCRATIC KAMPUCHEA SAID IN A COMMENTARY TODAY.

THE COMMENTARY SAID THAT RECENTLY, HANOI AND ITS PUPPET PHNOM PENH REGIME HAVE MADE AMBIGUOUS STATEMENTS ABOUT THE STATUS OF DEMOCRATIC KAMPUCHEA, CEASEFIRE AND GENERAL ELECTION IN CAMBODIA. BUT THEY MADE NO MENTION OF TWO CRUCIAL QUESTIONS: U.N. SUPERVISION OF VIETNAMESE MILITARY WITHDRAWAL AND DISSOLUTION OF THE PHNOM PENH REGIME. THE NATIONAL GOVERNMENT OF CAMBODIA LED BY SAMDECH SIHANOUK AND THE RESISTANCE FORCES FIRMLY MAINTAIN THAT THESE TWO QUESTIONS SHOULD BE SETTLED FIRST, AS THEIR SOLUTION WILL PAVE AN EASY WAY FOR THE TACKLING OF THE OTHER ISSUES.

HANOI IS NOT SINCERE FOR SOLVING THE KAMPUCHEAN ISSUE AS LONG AS IT DOES NOT MAKE CLEAR ITS STANDS ON THE TWO QUESTIONS, THE COMMENTARY POINTED OUT.

SEEN FROM WHAT DANG NGHIEM BAI SAID, VIETNAM MERELY AGREED TO LET THE KAMPUCHEAN RESISTANCE FORCES JOIN THE SUPREME COUNCIL ESTABLISHED WITHIN THE PHNOM PENH POLITICAL SYSTEM AND TAKE PART IN THE GENERAL ELECTION ORGANIZED BY THE PUPPET REGIME, THE COMMENTARY SAID. IT ADDED THAT IT IS OBVIOUS THAT HANOI STILL AIMS TO MAKE VIETNAM'S INVASION OF CAMBODIA LEGITIMATE AND TO GET WHAT IT COULD NOT GET IN THE BATTLE FIELDS.

MANILA (MAY 9) XINHUA - PHILIPPINE FOREIGN AFFAIRS SECRETARY RAUL MANGLAPUS SAID HERE TODAY THAT THE CENTRAL BANK OFFICE BUILDING IN MANILA COULD BE ONE OF THE POSSIBLE SITES FOR THE MAY 14 PHILIPPINES-U.S. EXPLORATORY TALKS ON THE FUTURE OF THE U.S. MILITARY BASES IN THE PHILIPPINES.

EMERGING FROM TODAY'S CABINET MEETING, MANGLAPUS SAID THAT THE PHILIPPINE AND THE UNITED STATES PANELS ARE TO CONSULT WITH EACH OTHER TO FINALIZE THE AGENDA OF THE TALKS. HE HINTED THAT THE FAILURE OF THE U.S. TO HONOR ITS FINANCIAL COMMITMENTS TO THE PHILIPPINES WILL BE THE MAIN POINT TO BE PRESSED BY THE PHILIPPINE PANEL.

"THERE HAS BEEN AN ONGOING EXCHANGE OF NOTES ON THE IMPLEMENTATION OF THE AGREEMENT THAT I SIGNED WITH FORMER U.S. SECRETARY OF STATE GEORGE SHULTZ, BUT UP TO NOW WE HAVE NOT RECEIVED THE REPLY FROM THE U.S. EMBASSY TO OUR LATEST NOTE," HE SAID. "THEREFORE I FORESEE THAT THIS WOULD HAVE TO BE TAKEN UP IN THE EXPLORATORY TALKS."

THE FOREIGN SECRETARY SAID THAT WHEN THE PHILIPPINES AND THE UNTIED STATES ENTER INTO A NEGOTIATION, THE PHILIPPINES IS "PREPARED FOR ALL EVENTUALITIES" THAT MAY ARISE IF EVER BOTH COUNTRIES FAIL TO RESOLVE CERTAIN ISSUES.

PHILIPPINE FOREIGN AFFAIRS DEPARTMENT SOURCES SAID THE U.S. EMBASSY IN MANILA HAS REQUESTED TO HOLD THE TALKS IN A SECRET VENUE SO AS TO AVOID ANTI-BASES DEMONSTRATIONS THAT MAY TAKE PLACE AT THE OPENING OF THE TALKS.

#90129h0138 05/09/1990 ~Chinese News Agency

BRAZILIA (MAY 9) XINHUA - THE BRAZILIAN AUTHORITIES HAVE PLEDGED THEIR "FULL AND UNCONDITIONAL SUPPORT" FOR THE PALESTINIAN PEOPLE'S INALIENABLE RIGHT TO SELF-DETERMINATION AND PROMISED TO STRENGTHEN EVEN FURTHER BILATERAL RELATIONS BETWEEN THE TWO PEOPLES, FAROUK KADUMI ANNOUNCED LATE TUESDAY.

DURING A PRESS CONFERENCE HELD HERE, KADUMI, THE PALESTINIAN FOREIGN MINISTER AND THE SECOND MOST IMPORTANT MAN IN THE PALESTINE LIBERATION ORGANIZATION (PLO), TOLD REPORTERS THAT HIS MEETING WITH BRAZIL'S FOREIGN MINISTER, FRANCISCO REZEK, AND THE PRESIDENTS OF THE CHAMBER OF DEPUTIES AND THE SENATE, HAD LED TO THE SOUTH AMERICAN COUNTRY'S PLEDGE TO SUPPORT PALESTINE'S CAUSE. KADUMI WAS ALSO SCHEDULED TO MEET WITH BRAZILIAIRE

FERNANDO COLLOR DE MELLO FOLLOWING THE PRESS CONFERENCE.

ACCORDING TO KADUMI, RELATIONS BETWEEN THE PLO AND BRAZIL ARE VERY GOOD AND BRAZIL, AS A NON-PERMANENT MEMBER OF THE UNITED NATIONS SECURITY COUNCIL, CAN PLAY A POSITIVE AND CONSTRUCTIVE ROLE IN THE MID-EAST PEACE PROCESS.

KADUMI SAID THE U.N. CONFERENCE ON MID-EAST PEACE WAS RUNNING INTO DIFFICULTIES AND OBSTACLES DUE TO INTERFERENCE FROM ISRAEL. HE ADDED THAT HE FELT THE CONFERENCE WITH THE U.N. SECURITY COUNCIL'S FIVE PERMANENT MEMBERS AND THE PARTICIPATION ON AN EQUAL FOOTING OF THE OTHER RELATED PARTIES -- INCLUDING THE PLO -- WAS THE BASIS FOR ACHIEVING LASTING PEACE IN THE REGION.

KADUMI CONDEMNED THE STEADY EMIGRATION OF SOVIET JEWS TO THE OCCUPIED TERRITORIES. THE EMIGRATION OF MORE AND MORE JEWS LED ISRAEL TO LAUNCH NEW ATTACKS AGAINST THE ARABS AND OBSTRUCTED THE FRAGILE REGIONAL PEACE PROCESS. "WE PALESTINIANS HAVE EVERY RIGHT TO EXPEL THEM," KADUMI SAID.

#90129h0139 05/09/1990 ~Chinese News Agency

AMMAN (MAY 9) XINHUA - JORDANIAN KING HUSSEIN TODAY EMPHASIZED THE PRESSING NEED TO CONVENE AN EMERGENCY ARAB SUMMIT AT THIS JUNCTURE WHEN THE ARAB NATION IS FACING CHALLENGES FROM A LARGE INFLUX OF SOVIET JEWS TO OCCUPIED PALESTINE.

KING HUSSEIN MADE THE REMARKS DURING HIS MEETING AT THE ROYAL PALACE HERE WITH THE ARAB LEAGUE SECRETARY GENERAL CHEDLI KLIBI, THE JORDANIAN NEWS AGENCY REPORTED.

THE JORDANIAN MONARCH ALSO INDICATED THAT THE FORTHCOMING ARAB SUMMIT WOULD DEAL WITH THE ISSUE OF ARAB NATIONAL SECURITY AND THE PERILS THREATENING IT, PARTICULARLY JEWISH IMMIGRATION.

THE JEWISH IMMIGRATION POSES THE MOST SERIOUS CONSEQUENCES TO THE OCCUPIED TERRITORIES AND WOULD PAVE THE WAY FOR ISRAELI EXPANSIONIST DESIGNS, HE NOTED.

KING HUSSEIN FURTHER STATED THAT THE UNJUST CAMPAIGN LEVELLED AGAINST IRAQ NECESSITATED AN ARAB POSITION IN SUPPORT OF IRAQ'S RIGHT OF SELF-DEFENSE AND CONFRONTING ANY POTENTIAL AGGRESSION.

AFTER IRAQ HANGED A BRITAIN-BASED JOURNALIST FOR SPYING CHANGES IN MARCH, LONDON AND WASHINGTON HAVE ACCUSED BAGHDAD OF SMUGGLING NUCLEAR DETONATION DEVICES TO IRAQ. IRAQ SAID THIS IS A COMPAIGN PREPARING THE GROUND FOR ISRAELI AGGRESSION.

KLIBI LEFT AMMAN THIS AFTERNOON FOLLOWING A TWO-DAY VISIT WITHIN THE FRAMEWORK OF CONSULTATION WITH ARAB LEADERS ON THE CONVOCATION OF THE ARAB SUMMIT.

#90129h0144 05/09/1990 ~Chinese News Agency

BAGHDAD (MAY 9) XINHUA - WAN LI, CHAIRMAN OF THE STANDING COMMITTEE OF THE CHINESE NATIONAL PEOPLE'S CONGRESS (NPC), ARRIVED HERE TONIGHT ON A THREE-DAY OFFICIAL VISIT TO IRAQ AT THE INVITATION OF SAADI MEHDI SALEH, SPEAKER OF THE IRAQI NATIONAL ASSEMBLY.

WAN WAS GREETED UPON HIS ARRIVAL BY SALEH AND SENIOR MEMBERS OF THE IRAQI NATIONAL ASSEMBLY.

SALEH EXTENDED WARM WELCOME TO WAN AND OTHER MEMBERS OF THE CHINESE DELEGATION, WHILE WAN EXPRESSED HIS PLEASURE FOR VISITING IRAQ.

SALEH SAID WAN'S VISIT WILL "UNDOUBTEDLY CONTRIBUTE TO PROMOTING BILATERAL RELATIONS BETWEEN THE TWO COUNTRIES IN VARIOUS FIELDS, PARTICULARLY IN THE RELATIONSHIP BETWEEN THE IRAQI NATIONAL ASSEMBLY AND THE NPC."

IN RESPONSE, WAN AGREED TO SALEH'S REMARKS, SAYING HIS VISIT WILL SERVE THE INTERESTS OF PEACE IN ASIA.

AFTER A BRIEF REST IN THE VIP HALL OF BAGHDAD INTERNATIONAL AIRPORT, SALEH ACCOMPANIED WAN IN A MOTORCADE TO THE FIVE-STAR "AL-RASHEED" HOTEL WHERE WAN WILL STAY DURING THE VISIT.

WAN WILL HOLD TALKS WITH SENIOR IRAQI OFFICIALS ON MATTERS OF MUTUAL INTEREST TO THE TWO COUNTRIES.

WAN ARRIVED HERE FROM TEHRAN ON A TOUR THAT HAS ALSO TAKEN HIM TO PAKISTAN.

CAIRO (MAY 9) XINHUA - OMAN HAS TAKEN MEASURES TO COMBAT DESERT LOCUST IN THE NORTHERN PART OF THE SULTANATE, WHERE THE FLYING CROP-EATING INSECT HAS BEEN REPORTED, REPORTS FROM THE OMANI CAPITAL OF MUSCAT SAID TODAY.

THE REPORTS SAID THE GOVERNMENT TODAY BROUGHT THE AIR FORCE INTO ACTION ON THE BATINAH COAST AND EASTERN SHARQIYA REGION TO TRY TO BRING THE SITUATION UNDER CONTROL BY FRIDAY.

AGRICULTURE DEPARTMENT DIRECTOR AHMED AL-HINAI WAS QUOTED AS SAYING THE DEPARTMENT'S FIELD WORKERS WERE FIGHTING FROM GROUND TO CONTAIN THE GROWING THREAT TO FARM CROPS.

HE SAID THE DEPARTMENT'S CROP PROTECTION UNIT HAD DEVELOPED A LOCUST CONTROL STRATEGY AND ENCOURAGED FARMERS TO BE INCREASINGLY VIGILANT TO SAFEGUARD THEIR CROP YIELDS.

THE UNIT PROVIDES SUBSIDIZED INSECTICIDE AND SPRAYING EQUIPMENT THROUGH THE YEAR, AND FREE SUPPLIES AND LOGISTIC SUPPORT WHEN THERE IS A LOCUST PLAGUE THREAT.

LOCUSTS ARE AN ANNUAL THREAT TO FARMING IN OMAN AND OTHER COUNTRIES OF THE ARABIAN PENINSULA.

THE REPORTS SAID THAT HEAVY RAINFALL IN OMAN FROM FEBRUARY TO APRIL THIS YEAR PROVIDED EXTRA MOIST GROUND FOR TWO GENERATIONS OF LOCUST EGGS.

LOCUSTS ARE GENERALLY ATTRACTED TO THE ARID PENINSULA ENVIRONMENT WHERE AVERAGE YEARLY RAINFALL IS LOW AND SPORADIC, AND USUALLY LIMITED TO THE SPRING SEASON.

CAIRO (MAY 9) XINHUA - MINISTER OF STATE FOR FOREIGN AFFAIRS BOUTROS BOUTROS GHALI TODAY STRESSED THE PRESSING NEED TO END THE BLOODLETTING IN LEBANON AND SOLVE THE LEBANESE CRISIS THROUGH NATIONAL RECONCILIATION, THE MIDDLE EAST NEWS AGENCY REPORTED.

EGYPT HOPES THAT THROUGH COORDINATION OF EFFORTS BY ALL LEBANESE AND ARAB PARTIES, A FORMULA WILL BE REACHED TO ENTRENCH NATIONAL RECONCILIATION AND ESTABLISH PEACE IN LEBANON, THE AGENCY QUOTED GHALI AS SAYING WHILE MEETING LEBANESE PARLIAMENT SPEAKER HUSSEIN AL-HUSSEINI.

GHALI REAFFIRMED EGYPT'S SUPPORT FOR THE LEBANESE NATIONAL RECONCILIATION GOVERNMENT UNDER PRESIDENT ELIAS HRAWI AS WELL AS THE COUNTRY'S INDEPENDENCE AND TERRITORIAL INTEGRITY.

THE NATIONAL RECONCILIATION GOVERNMENT WAS FORMED LAST MOVEMBER IN LINE WITH AN ARAB LEAGUE-BROKERED PEACE PLAN FOR ENDING LEBANON'S 15-YEAR-OLD CIVIL WAR.

HOWEVER, REBELLIOUS CHRISTIAN LEADER GENERAL MICHEL AOUN HAS REJECTED THE INTERNATIONALLY RECOGNIZED GOVERNMENT AND THE PEACE AGREEMENT, CAUSING A POLITICAL DEADLOCK IN THE COUNTRY.

EGYPT RESTORED DIPLOMATIC RELATIONS WITH LEBANON LAST YEAR FOLLOWING A DECADE-LONG RUPTURE.

AL-HUSSEINI ARRIVED HERE MONDAY LEADING A 12-MAN DELEGATION OF THE

LEBANESE HOUSE OF REPRESENTATIVES FOR A FIVE-DAY VISIT TO EGYPT.

ANKARA (MAY 9) XINHUA - POLICE HAVE SEIZED FISHING BOAT WHICH CARRIED THE LARGEST CONSIGNMENT OF NARCOTICS EVER INTERCEPTED IN TURKEY, EROL TEZCAN, MAYOR OF THE TURKISH MEDITERRANEAN CITY OF ANTALYA, ANNOUNCED TODAY.

THE BOAT WAS INTERCEPTED ON MAY 2 IN TURKISH WATERS NEAR THE TOWNSHIP OF GAZIPASA IN ANTALYA PROVINCE. COAST GUARDS WERE ALERTED WHEN SEVERAL PEOPLE JUMPED OFF THE VESSEL, WHICH WAS 100 METERS OFFSHORE.

POLICE LATER DISCOVERED 6.5 TONS OF MARIJUANA, 10 KILOGRAMS OF HEROIN, A 7.62 MM SOVIET TAKAROF GUN, AN AUTOMATIC RIFLE, AND 214 BULLETS.

THE MAYOR'S STATEMENT DISCLOSED THAT THE VESSEL BELONGED TO THE LEBANESE FISHING TRAWLERS CO. LTD., BASED IN BEIRUT.

SIX MEN, INCLUDING GREEK CAPTAIN GEORGE MEKALOIKONOMOS, FOUR SYRIA NATIONALS AND A PALESTINIAN, WERE DETAINED, THE STATEMENT SAID.

POLICE AUTHORITIES SAID MEKALOIKONOMOS HAD A PAST RECORD OF DRUG SMUGGLING.

ANTALYA SECURITY DEPARTMENT SAID THE DRUGS WERE LOADED ON BOARD THE BOAT AT THE PORT OF MINNIE IN LEBANON, AND WERE SUPPOSED TO BE SHIPPED TO THE GREEK ISLAND OF KHITNOS.

IT SAID THE CREWMEN, UNDER POLICE INTERROGATION, ADMITTED THAT THE DRUGS BELONGED TO MUSTAFA HAYIR, A DRUG SMUGGLER LIVING IN LEBANON.

THE SEIZED NARCOTICS ARE ESTIMATED TO BE WORTH 15 MILLION U.S. DOLLARS AND THEIR VALUE WOULD HAVE HIKED TO AROUND 150 MILLION DOLLARS ON THE EUROPEAN MARKET.

JACKSON, MI (MAY 9) PR NEWSWIRE - CMS Energy Corporation's oil and gas exploration unit, Northern Michigan Exploration Company (NOMECO), today announced a $6 million acquisition of three oil wells in the Lake Fortuna Field, in St. Bernard Parish, Louisiana.

The wells have associated reserves of 760,000 barrels of oil and 1.1 billion cubic feet of natural gas. NOMECO has a 100-percent working interest in the wells and is the operator.

"The Lake Fortuna acquisition represents a meaningful contribution to the achievement of NOMECO's 1990 goal for reserve additions. We remain on schedule toward achieving that goal," said Richard J. Burgess, NOMECO's president and chief executive officer.

NOMECO is among the top 100 U.S. oil and gas companies in production and

reserves. It is Michigan's largest independent oil and gas producer, with activities in 14 states and seven foreign countries.

CMS Energy Corporation (NYSE: CMS) is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth-largest combination utility.

NEW YORK (MAY 9) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL) chairman, Dr. Joseph Elmaleh, issued the following statement today in response to inquiries from the financial community concerning a number of articles appearing in Israeli newspapers that have reported new discoveries of hydrocarbons in the Yam 2 well in the Mediterranean off the coast of Israel:

"Drilling has reached a depth of approximately 17,180 feet and is planned to continue to a total of depth of approximately 17,400. There were shows of natural gas at 17,167 feet, which might be the source of the rumors that have found their way into the press in Israel. However, it is too early to determine whether or not these gas shows are associated with reservoir rock. Any shows of hydrocarbons will be carefully studied and reported by the company after their significance has been analyzed.

"As we reported on April 30, production tests will be conducted on a gas interval at the 13,000 foot level. Tests will start in mid-May on that formation and any others in the present area of drilling that may be justified for testing."

Isramco, Inc. is operator of the Negev Venture 2, which in association with Dr. Armand Hammer, chairman of Occidental Petroleum, a group of North American investors and several Israeli companies is conducting the exploration for oil and gas reserves offshore of Israel in the Mediterranean and onshore in the Negev Desert.

PASADENA, CA (MAY 9) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) announced today the completion of its engineering, procurement, and construction services for a $40 million clean acid manufacturing plant of P.A. Partnership Group at Lee Creek, N.C.

The facility uses a solvent extraction process to clean phosphoric acid to such a degree that it can be used for higher-end markets than fertilizer. Among these markets are detergents, toothpaste, soft drinks, and other foods and household products.

The plant -- built on property of Texasgulf Inc., one of the P.A. Partnership Group members -- has a designed capacity of 120,000 tons of clean phosphoric acid per year.

Engineering and procurement was handled by Jacobs' office in Lakeland, Fla., and construction work was handled by a Jacobs subsidiary, J.E. Merit Constructors Inc., out of Baton Rouge, La. Process technology for the plant was supplied by Albright & Wilson Ltd., of Whitehaven, England, where it now operates a clean acid plant of the type just completed at Lee Creek, N.C.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and operations services to government and industry worldwide.

#90129p2304 05/09/1990 ~PR Newswire

LOS ANGELES (MAY 9) PR NEWSWIRE - John W. Amerman, chairman and chief executive officer of Mattel Inc. (NYSE: MAT), announced today that the company's board of directors has declared a quarterly dividend of 3 cents per share on its common stock. The dividend is payable July 2, 1990, to shareholders of record on June 15, 1990.

"This action recognizes the consistent profitable growth which Mattel has achieved over the past nine quarters, and our continuing positive outlook " Amerman said.

"For the first quarter 1990 we achieved a 95 percent increase in net income on a 20 percent increase in net sales, during a period when the toy industry was relatively flat," he said. "This momentum is continuing in the second quarter, as our strategy to concentrate on core products produces excellent results."

Mattel last paid a dividend on common shares in June, 1983. Amerman also

announced that the company has decided not to extend $75 million of 10-7/8 percent senior subordinated extendible notes, and will therefore repay the notes on the July 15, 1990 due date.

In addition, he said that the Mattel board has authorized the repurchase of up to 500,000 shares over the next 12 months on the open market to fund the company's Stock Option Plan.

Mattel earlier reported net income of $8.4 million or $.17 per share for the first quarter ended March 31, 1990, up from $4.3 million or $.09 per share for the 1989 first quarter. Net sales for the 1990 first quarter were $234.0 million, up from $195.3 million last year.

Mattel Inc., which reported annual revenues of $1.2 billion in 1989, is a worldwide leader in the design, manufacture and marketing of children's toys. With headquarters in Hawthorne, California, Mattel has offices and facilities in 19 foreign countries and sells its products in more than 100 nations throughout the world.

#90129p2311 05/09/1990 ~PR Newswire

PHILADELPHIA (MAY 9) PR NEWSWIRE - SmithKline Beecham (NYSE: SBH) announced today sales from continuing operations increased 19 percent to $1,908 million (1,156 million pounds sterling) and operating profit (trading profit) from continuing operations was up 25 percent to $406 million (246 million pounds sterling), compared to the first quarter of 1989.

Pre-tax profits were $361 million (219 million pounds) compared to $388 million (235 million pound) in the first quarter of 1989, reflecting a $84 million (51 million pounds) increase in interest expense arising from the merger. This interest expense will particularly affect comparisons for the first two quarters of 1990, as the 1989 figures pre-date the merger.

On a pro forma basis, pre-tax profit increased by 21 percent, i.e., assuming increased interest expense in 1989 as if the July 26 merger transactions (issue of Loan Stock and funding of the special cash dividend) had taken place at the beginning of the year.

The disposal on March 30, 1990, of the Ambrosia, Bovril and Marmite food brands is estimated to produce an after tax extraordinary profit of $135 million (82 million pounds). As a result, net income (profits attributable to shareholders) increased by 42 percent to $371 million (225 million pounds).

Earnings were 10.8 pence per Ordinary Share compared to 12.3 pence, and $0.89 (54.0 pence) per Equity Unit compared to $1.01 (61.5 pence). The average number of shares outstanding increased 3 per cent to 1,325.2 million from 1,287.6 million. Approximately 7 percent of both sales and operating profit increases were the result of movements in average exchange rates.

Sales increased by 23 percent led by strong, worldwide growth of key products, including Augmentin and Timentin, the antibiotics for treatment of penicillin-resistant infections, which were up by 54 percent and 42 percent, respectively; Engerix-B, the new genetically engineered hepatitis-B vaccine, recently launched in the U.S., which by more than 100 percent worldwide; Dyazide, the high blood pressure medicine, which continued its strong performance, with a 67 percent increase in the U.S. Eminase, the unique thrombolytic for heart attack patients, had a successful launch in the U.S. Overall sales of Tagamet, the ulcer drug, declined 3 percent, due primarily to trade destocking in Japan as a result of government mandated price reductions and a 3 percent decline in the U.S. These declines were partially offset by increased sales in a number of other countries.

CONTACT: Jeremy Heymsfeld, 215-751-5166, or Dick Williams (Financial) 215-751-7002, both of Smithkline Beecham.

#90129p2316 05/09/1990 ~PR Newswire

COEUR D'ALENE, ID (MAY 9) PR NEWSWIRE - Coeur d'Alene Mines Corp. (NYSE/PSE: CDE) today reported first quarter 1990 net income of $2,442,000 or 24 cents per share, on total revenues of $14,363,000. In the first quarter of 1989, net income was $628,000, or 6 cents per share, on total revenues of $14,055,000.

This year the company enjoyed the highest first quarter gold production in its history. The first quarter 1990 gold production totaled 14,463 ounces compared to 13,299 ounces produced in the first quarter of 1989. Gold prices were also slightly higher, at an average of $407 per ounce. The average gold price for the first quarter of 1989 was $394.

Coeur d'Alene Mines' silver operations continued to be profitable, despite an average first quarter price of $5.19 per ounce, compared to $5.93 per ounce in the first quarter of 1989. Silver production totaled 1,147,997 ounces for the first quarter. A total of 1,191,994 ounces were produced in 1989's first quarter.

First quarter results also reflect a reduction in the cost of mine operations compared to that experienced in the prior year.

COEUR D'ALENE MINES CORP.
(Unaudited)

Three Months Ended March 31:	1990	1989
Total revenues	$ 14,363,000	$ 14,055,000
Total income	6,086,000	3,937,000
Net income	2,442,000	628,000

#90129p2317 05/09/1990 ~PR Newswire

LOS ANGELES (MAY 9) PR NEWSWIRE - Kerr Glass Manufacturing Corp. (NYSE: KGM) today reported a net loss of $1,424,000 (prior to preferred stock dividends) for the first quarter of 1990, compared to a net loss of $419,000 for the first quarter of 1989.

Kerr had a net loss applicable to common stockholders (after deduction for preferred stock dividends) of $1,631,000, or 44 cents per common share (primary and fully diluted), for the first quarter of 1990, compared to a net loss applicable to common stockholders of $626,000, or 17 cents per common share (primary and fully diluted), for the same 1989 quarter.

Roger W. Norian, chairman, president and chief executive officer, said that the decline in earnings was primarily attributable to the glass container business, which experienced increased operational costs. Earnings for the metal products and consumer products businesses also declined during the quarter. Norian stated that the plastic products business recorded substantially improved results in the first quarter of 1990 as compared to a year ago.

Net sales for the 1990 first quarter were $70,971,000, compared to $67,159,000 in the prior year. The increased sales were primarily attributable to higher sales of glass containers and plastic products.

Generally, Kerr's first and fourth quarters are its poorest performing periods because of the seasonal nature of its operations.

The company stated that it is very pleased with the response to its introduction of Kerr pie fillings during late 1989 and the first quarter of 1990. Kerr pie fillings, sold by the company's consumer products business, capitalize on the strength of the Kerr name with consumers and retailers and the company's existing retail distribution network.

Kerr, headquartered in Los Angeles, is a major producer of glass

containers, plastic products, metal crowns, and home canning supplies.

CONTACT: D. Gordon Strickland, VP of Kerr Glass Manufacturing, 213-284-2585.

#90129p2321 05/09/1990 ~PR Newswire

NEW YORK (MAY 9) PR NEWSWIRE - Net income of Woolworth Corporation (NYSE: Z) rose 5.6 percent to $38 million, or 29 cents per share, in the first quarter ended April 28, 1990, from $36 million, or 28 cents per share, in the corresponding year-earlier period, it was reported today by Harold E. Sells, chairman and chief executive officer.

Per-share information has been restated to reflect a recently announced two-for-one split of the common stock.

Revenues Revenues for the thirteen weeks ended April 28, 1990, rose 10 percent to $2,065 million from $1,877 million in the comparable 1989 period. Specialty store revenues increased 16 percent and general merchandise revenues rose 5.4 percent. Domestic revenues rose 9.7 percent and foreign revenues, expressed in U.S. dollars, increased 10 percent. If foreign revenues had been translated into U.S. dollars at year-earlier foreign exchange rates, foreign revenues would have increased 6.6 percent, and total revenues 8.5 percent.

Operating Results Operating profit (income before unallocated items) increased 8.3 percent in the thirteen weeks ended April 28, 1990, to $91 million from $84 million in the corresponding year-earlier period. Specialty store operating profit rose to $52 million from $46 million and general merchandise operating profit rose to $39 million from $38 million. Domestic operating profit increased to $73 million from $68 million and foreign operating profit rose to $18 million from $16 million. Changes in foreign currency translation rates did not have a material effect on operating profit comparisons in the thirteen-week period, the company stated.

Financial Position Short-term debt increased to $820 million on April 28, 1990, from $709 million on April 29, 1989. The rise was primarily due to increased inventories associated with the company's store-expansion program. Shareholders' equity rose $270 million to $2,091 million on April 28, 1990, including an increase of $47 million in the foreign currency translation adjustment component of equity.

As of April 28, 1990, the company operated a total of 8,275 stores, consisting of 6,622 specialty stores and 1,653 general merchandise stores. This is an increase of 420 stores from the 7,855 operated as of April 29 1989.

Recent Developments On April 11, 1990, the board of directors approved a two-for-one split of the common stock in the form of a 100 percent stock dividend to be distributed on May 31, 1990, to shareholders of record at the close of business on May 3, 1990. The board of directors also declared an 11 percent increase in the quarterly cash dividend on the common stock, to 26 cents per share from 23.5 cents per share, after giving effect to the stock split. This is the sixth consecutive year of cash dividend increases, Sells noted. "These actions reflect the company's continuing achievements and our confidence in the future," he stated.

NEW YORK (MAY 9) PR NEWSWIRE - Sanford I. Weill, chairman and chief executive officer of Primerica Corporation (NYSE: PA), and Don G. Powell, chairman and chief executive officer of American Capital Management & Research, Inc. (NYSE: ACA), today announced a proposal to the stockholders of American Capital that Primerica acquire the publicly held shares of American Capital it does not presently own.

In the transaction proposed by Primerica, stockholders of American Capital would receive 0.30 shares of Primerica common stock for each of their American Capital shares in what is expected to be a taxable exchange. American Capital presently has approximately 24.4 million shares outstanding, and is approximately 82.6 percent owned by Primerica. Under the terms of the proposal, Primerica will issue approximately 1.27 million new shares to be exchanged for American Capital shares. Based upon yesterday's closing price for Primerica common stock of $29.625, the value of the transaction is about $38 million.

This proposal is subject to the approval and recommendation of the boards of directors of Primerica and American Capital. In addition, it is subject to the approval of a merger committee composed of independent directors of American Capital, the rendering of a fairness opinion by an independent investment banking firm retained by that merger committee, and if required, the approval of the stockholders of American Capital. Primerica intends to vote its shares of American Capital stock in favor of the proposed transaction. The proposed transaction is also subject to the execution of a definitive agreement, filings with the Securities and Exchange Commission, and certain regulatory approvals and clearances.

American Capital is a Houston-based investment management and marketing organization which provides investment advisory services to 36 mutual funds and closed-end investment companies, and had approximately $12.8

billion in assets under management at March 31, 1990.

Primerica Corporation is a diversified financial services company engaged in life, credit, accident & health, and property & casualty insurance, investment banking and securities brokerage, mortgage banking, mutual funds, asset management, consumer lending and credit cards. The company had assets of approximately $20 billion as of March 31, 1990.

CONTACT: Mary McDermott, 212-891-8870 or Ken Koprowski, 212-891-8871, both of Primerica Corporation; or Sheila Horn of American Capital, 713-993-4111.

ATLANTA (MAY 9) PR NEWSWIRE - The U.S. Environmental Protection Agency will be conducting an inspection of the General Electric Co. in East Flat Rock, N.C., beginning on May 14, to obtain additional information needed to determine if the site should be placed on the EPA's National Priorities List (NPL) of hazardous waste sites.

The NPL identifies abandoned or uncontrolled hazardous waste sites potentially posing the greatest long-term threat to health and the environment.

A screening inspection conducted by the agency in November 1988, indicated the site is contaminated with polychlorinated biphenyls (PCBs), metals, organic compounds and possibly other contaminants. To better define the contamination, the agency will conduct additional sampling including the following:

-- goundwater samples from temporary monitoring wells -- environmental surface soil, subsurface soil, and sediment samples -- goundwater samples from existing monitoring wells

In addition, a geophysical screening of the site will be performed to help delineate former landfill areas.

The data gathered will be used to consider the site for possible inclusion on the NPL and will take into consideration the types and quantities of wastes present, the extent of contamination, and the number of people living or working nearby who could be exposed to the contaminants. The immediate threat from the site has been abated by the company's provision of an alternate water supply to residents with private wells affected by the contamination.

The General Electric facility, located off Spartanburg Highway, consists of more than 50 acres. Operations at the plant involve the manufacture of

outdoor, industrial and commercial lighting fixtures. Aluminum anodizing, electrochemical brightening and polisHing, as well as nickel coating for polishing, and a silica coating process are, or have been, performed at the facility. The company has been in operation since 1955.

NEW YORK (MAY 9) PR NEWSWIRE - Forest Laboratories, Inc. (AMEX: FRX), an international pharmaceutical manufacturer and marketer, today reported record revenues and earnings for its fourth fiscal quarter and for the year ended March 31, 1990.

Net income in the current quarter increased 26 percent to $8,605,000 from the $6,837,000 reported in the prior year's fourth quarter. Primary and fully diluted net income per share equaled $.42 in the quarter as compared to $.34 in last year's fourth fiscal quarter.

For the quarter, net revenues increased 19 percent to $39,793,000 from $33,496,000 as a result of an increase in net sales of 24 percent over the prior year.

For the fiscal year ended March 31, 1990, net income, after deducting the non-recurring merger related costs from Forest's acquisition of UAD Laboratories, increased 27 percent to $29,681,000 from $23,421,000 in the prior year. Primary net income per share equaled $1.45 versus $1.20 in the prior year. Fully diluted net income per share equaled $1.44 as compared to $1.17 in the prior year.

Net revenues for the 1990 fiscal year increased 28 percent to $149,032,000 from $116,691,000.

Howard Solomon, president of Forest, said, "The increase in sales and earnings is due to continued increases in prescriptions and sales of our branded promoted products and our controlled release propranolol and indomethacin generic products. This increase includes the accelerated sales growth of Tessalon, which was the first Forest prescription product promoted by our UAD salesforce in addition to our Forest salesforce. The combined salesforces will be marketing additional products this year including AeroBid and Theochron. We expect excellent growth as a result of this expanded sales effort with our principal branded products. We look forward to continuing improvements in our operations and growth in our revenues and earnings in the year ahead."

DALLAS (MAY 9) PR NEWSWIRE - The JCPenney Television Shopping Channel has named Bozell Inc., to handle its consumer and trade advertising and direct marketing.

JCPenney Television, which celebrated its first anniversary on April 10, said the Dallas-based agency will be used to position the shopping channel as "the" department store retailer in home shopping, with an emphasis on the channel's superior customer service options. All advertising will be developed to complement the department store positioning of JCPenney, the shopping channel's parent company.

Bob Langford, president of JCPenney Television Shopping Channel, Inc., said, "The continuing growth of JCPenney Television has created the need for an enhanced advertising program. We have been impressed with the marketing expertise, creative product, and management style offered by Bozell. We are, therefore, pleased to begin this association with Bozell Advertising."

JCPenney acquired full control of Shop Television Network in April 1989, to maximize the synergies between television retailing and its other core businesses. In the past year, the network's reach has grown from 4.4 million homes to 12.5 million homes.

CONTACT: Peggy Healy, 214-591-1331 or Enid Stepner, 214-591-1330, both of JCPenney.

ST. PAUL, MN (MAY 9) PR NEWSWIRE - Deluxe Corporation (NYSE: DLX) held its annual shareholder meeting last night at the Ordway Theatre in St. Paul. President and Chief Executive Officer, Harold V. Haverty, told shareholders that after 75 years of success, the company is looking forward to building on its solid foundation and that he is optimistic about Deluxe's future.

"With net sales of $1.3 billion in 1989 (Deluxe's 51st consecutive year of increased sales), Deluxe is a leading participant in the U.S. payment systems market," Haverty said, "we also have a growing presence in the direct mail markets for forms, greeting cards, and other related products."

Haverty explained that evolving conditions in the payment systems market have caused Deluxe to broaden its operations over the past seven years. During that time, the company has acquired eight businesses that are

contributing to present operating earnings and cash flow. Deluxe has also started three new internal businesses and has installed new technology in its check printing plants.

"The implementation of these strategic moves has positioned Deluxe for long-term growth, which is our primary objective," Haverty said.

Deluxe shareholders adopted all proposals presented to them. They reelected the board's eight directors, amended the articles of incorporation to clarify the statement referencing the business of the company, and ratified Deloitte & Touche as independent auditors of the company for 1990.

Deluxe Corporation is an industry leader in providing products and services to the financial payment systems industry. The company is the nation's largest check printer and also provides Electronic Funds Transfer (EFT) Software and processing services, ATM card services, new- account verification services, and sales development services to financial institutions. Deluxe's Business Systems Division produces a variety of computer and business forms and related products for small businesses and professional practices. The company's Consumer Specialty Products Division markets greeting cards, stationery, and a variety of related products to households.

CONTACT: Stuart Alexander, 612-483-7358, or Charles M. Osborne, 612-483-7355, both of Deluxe Corporation.

JAMESTOWN, NY (MAY 9) PR NEWSWIRE - Edmond L. Lonergan, president of Electronic Technology Group, Inc. (NASDAQ: ETEK; Boston Exchange: ETE) and Fumi Urata, president of HIWATT Corporation, today announced an agreement in principle for Electronic Technology to produce certain audio amplification products for HIWATT.

Electronic Technology Group, Inc., through a newly formed subsidiary Moog Music Manufacturing, will produce approximately 6,000 units of audio amplifiers for HIWATT Corporation, one of the leading international producers of audio amplification equipment. These units will be for export to Japan and Europe. The value of this agreement is approximately $1,500,000. When coupled with the products being produced by Moog Music for HIWATT's North American distribution, the agreement will result in approximately $5 million in revenues to Moog Music over the next two years.

Urata said that he was very pleased with the prospect of extending the relationship between HIWATT and Electronic Technology. Urata said,

In commenting on the announcement, Lonergan stated that he was extremely pleased that HIWATT had recognized Electronic Technology Group, Inc. as its supplier for its Japanese, European and North American needs. Frank T. Costanzo, CEO of Electronic Technology Group, Inc., stated, "This project, which requires worldwide sourcing of components, moves Electronic Technology and Moog Music Manufacturing into the international arena in a highly visible way."

Electronic Technology Group, Inc. is a manufacturer of high quality electronic assemblies for the medical, industrial controls, transportation and music industries. The company operates production facilities in Jamestown and Buffalo, N.Y., and has recently announced that it had entered into a letter of intent to acquire Liberty Engineering, Inc. of Waltham, Mass.

WASHINGTON (MAY 9) PR NEWSWIRE - Marriott Corporation (NYSE: MHS) said

today that it had completed the sale of the Hamburg Marriott Hotel to Fastighets AB Bohus, a subsidiary of AB Catena of Sweden, for approximately $52 million.

Marriott will continue to operate the hotel under a long-term leaseback agreement.

The Hamburg Marriott Hotel is located in the business center of Hamburg, Germany. Opened in October 1988, it has 279 rooms. The company said that the sale was consistent with its ongoing strategy of managing hotels rather than owning them as real estate.

Fastighets AB Bohus currently owns some 70 office and residential properties in Sweden, and has plans to expand into other areas of Europe.

Marriott Corporation, the world's largest operator of hotel rooms, has over 550 hotels around the world. The company's total sales exceed $7.5 billion in 1989.

HOUSTON (MAY 9) PR NEWSWIRE - Enterra Corporation (NYSE: EN) today announced net income of $1,746,000, or $.13 per share, for the quarter ended March 31, 1990 compared with a loss of $1,161,000, or $.11 per share for the same period in 1989. Revenues in the first quarter of 1990 were $30,378,000 vs. $21,411,000 in 1989.

Thomas S. McIntosh, president and chief executive officer, stated, "First quarter results were led by a strong performance from our domestic oilfield services and equipment operations, reflecting the success of the purchase of the DOTCO fishing tool assets and the merger of our domestic operations in 1989. Operating results at CRC-Evans, while below the record fourth quarter of 1989, were improved over the prior year's first quarter due to stronger U.S. rentals and international sales as well as benefits from two recent acquisitions. Cash proceeds of $62.6 million from the issuance of 4,880,000 shares of common stock during the quarter greatly assist Enterra's aggressive continuing growth program."

Enterra provides specialized services and products for drilling and servicing onshore and offshore oil and gas wells, both within the United States and in foreign countries, and manufactures, sells and rents specialized equipment used in the pipeline construction industry.

ANNAPOLIS, MD (MAY 9) PR NEWSWIRE - During a trade mission to Eastern Europe and the Soviet Union, Gov. William Donald Schaefer today witnessed the signing of a contract between the Polish Airports Authority and Westinghouse Electronic Systems Group to produce a modern air traffic control system for Poland.

"This is one of the largest contracts to be signed by a Maryland company in Poland," said Schaefer. "Just a few weeks ago, I visited Westinghouse, a world leader in electronics and telecommunications. This contract is a perfect example of how Maryland companies can bring the best of modern technology to the emerging democracies of Eastern Europe."

The agreement was signed by Westinghouse Airspace Management Division General Manager J.T. "Jack" Tymann, one of the business leaders accompanying the governor on the mission, and Marek Kaczorowski, acting director general of the Polish Airports Authority.

The agreement came on the first full day of the Maryland delegation's visit to Poland, the second stop on their 12-day mission to Eastern Europe and the Soviet Union.

During a recent visit to the Westinghouse facility in Linthicum, Schaefer previewed the company's new ASR-9 radar, which will be included in the system produced for the Polish Airports Authority. The ASR-9 radar is being installed at 123 of the busiest airports in the United States, including Baltimore-Washington International Airport.

#90129p2361 05/09/1990 ~PR Newswire

PHILADELPHIA (MAY 9) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today issued a unilateral order requiring the Philadelphia Electric Co. (PECO) (NYSE: PE) to respond to the presence of hazardous wastes at a South Philadelphia site.

The order was issued pursuant to Section 106 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (known as "CERCLA" or "Superfund") and the Solid Waste Disposal Act. This order is to protect human health and the environment from the release and/or threatened release of improperly disposed hazardous substances.

An EPA assessment May 5, 1990, found 66 drums of hazardous wastes at the site, bounded by 30th Street, Penrose Avenue, the George Platt Bridge of Penrose Avenue (Route 291) and railroad tracks. PECO leases the site to Colonial Salvage & Wrecking Co., which used it for dumping demolition debris, refuse and garbage. Chevron Inc.'s Girard Point fuel terminal is directly across 30th Street; truck loading operations for jet fuel, diesel fuel and kerosene are within 30 feet of the site. An ARCO oil refinery is within one-quarter mile of the site.

EPA responded to a notice from the Hazardous Materials Unit of the Philadelphia Fire Department, whose representatives expressed concern about the threat of fire and explosion.

EPA's order follows notice of potential liability to PECO Saturday evening.

Failure to comply with the requirements of the order subjects PECO to civil penalties of up to $25,000 per day and/or punitive damages in an amount up to three times the amount of any costs incurred by the United States.

CONTACT: Leanne Nurse of the EPA, 215-597-9825.

DALLAS (MAY 9) PR NEWSWIRE - Oryx Energy Company (NYSE: ORX) today announced the recent completion of six wells with a combined production of nearly 7.5 million cubic feet of gas per day (MMcf/D) and more than 1,000 barrels of oil or condensate per day.

The largest gas producer is the USA Big Creek No. 1-15 in the Wagner Lake Field, Osceola County, Mich. This well was completed in the St. Peter and Prairie du Chien sandstones from perforations between 9,960 and 9,972 feet and 10,000 and 10,034 feet, respectively. The USA Big Creek No. 1-15 flowed at a combined rate of 3.25 MMcf/D and 16 barrels of condensate on a 17.8/64-inch choke at a flowing tubing pressure of 2,133 pounds per square inch (psi) and reached a total depth of 10,200 feet.

The Mittie Walters No. 3 in the Buckwheat Field, Howard County, Texas, is the top oil producer, flowing 609 barrels of oil and 27,000 cubic feet of gas per day through a 10/64-inch choke at a flowing tubing pressure of 780 psi. The well was drilled to a total depth of 10,236 feet and completed in the Siluro-Devonian formation through perforations between 10,180 and 10,204 feet.

Two Texas gas wells, located in different parts of the Lone Star State, each produced more than 1 MMcf/D. The M. Lashley Gas Unit No. 4 well in the Carthage Field of East Texas flowed 2.6 MMcf/d and 74 barrels of condensate through a 20/64-inch choke at a flowing tubing pressure of 1,750 psi. The well was drilled to a total depth of 9,750 feet in the Jurassic Cotton Valley sands and produced through perforations between 8,317 and 9,564 feet. In the Rio Grande Valley's Frost Field, the Garcia L&L "C" No. 6 well flowed at 1.3 MMcf/D and 32 barrels of condensate from the Vicksburg sand through an adjustable choke at a flowing tubing pressure of 2,550 psi. The well was completed through perforations between 5,935 and 5,970 feet and was drilled to a total depth of 7,828 feet.

In Louisiana, the Dibert, Stark & Brown No. 111 in the Chacahoula Field tested 111 barrels of oil and 146,000 cubic feet of gas through a 10/64-inch choke at a flowing tubing pressure of 740 psi.

With working interests ranging from 19.7 to 100 percent, Oryx Energy is the operator of all these production wells. The Dallas-based company conducts its domestic operations through Sun Energy Partners, L.P. (NYSE: SLP). Oryx Energy, the managing general partner and 98-percent owner of the partnership, is the largest independent oil and gas company in the

world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels.

#90129p2366 05/09/1990 ~PR Newswire

PARSIPPANY, NJ (MAY 9) PR NEWSWIRE - A United States District Court in Dallas, has ordered a direct marketing company and its principals to pay Dun & Bradstreet $876,255 in damages and attorney's fees for copyright infringement, Dun's Marketing Services announced today. The court also entered a permanent injunction preventing the defendants from any further copying or distribution of Dun & Bradstreet's copyrighted information.

Chief Judge Barefoot Sanders, of the United States District Court for the Northern District of Texas, found that Southwest Data Processing, Inc. infringed Dun & Bradstreet's copyright in its Dun's Market Identifiers (DMI) database. Dun's Marketing Services, an operating unit of The Dun & Bradstreet Corporation, licenses the DMI database, which contains updated data on nearly 9 million U.S. businesses.

Last November, Dun's Marketing Services obtained evidence that Southwest Data and its principals, Walter H. Cushman and Rodney L. Holloman, were selling unauthorized copies of the DMI database. The court granted Dun & Bradstreet and Dun's Marketing Services an ex parte order restraining Southwest Data from selling any information from the DMI database. The order further allowed federal marshals to seize copies of the DMI database and copies of computer programs created to disguise the information.

Southwest Data is the second company to be held liable for infringing Dun & Bradstreet's copyright in the last six months. In September, Dun's Marketing Services filed suit against Mercury Marketing, Inc. of Dallas, and its principals, William F. Kirkpatrick and Glenn Gillman. There, too, Dun & Bradstreet and Dun's Marketing Services obtained an ex parte order that restrained Mercury Marketing from selling the DMI data. Within days, Kirkpatrick and Gillman admitted to copying and distributing the DMI database. In a November consent judgment, Mercury Marketing agreed to close its doors and cease operations, and Kirkpatrick and Gillman agreed to pay monetary restitution.

The victories demonstrate Dun & Bradstreet's and Dun's Marketing Services' vigilance in protecting their rights in the DMI database. In the past year, Dun's Marketing Services has launched a new data security program, providing for greater scrutiny of the licensing and use of its database, as well as aggressive copyright enforcement efforts.

Dun's Marketing Services, an operating unit of The Dun & Bradstreet Corporation, provides business-to-business marketing products.

ROSLYN, NY (MAY 9) PR NEWSWIRE - Cheyenne Software (AMEX: CYE) today announced that NetFRAME Systems Inc. of Milpitas, Calif. will offer its customers Cheyenne's ARCserve+TAPE(tm) automated network backup system through Businessland computer stores and other NetFRAME resellers. The two companies are jointly developing a special version of the ARCserve+TAPE software to interface with NetFRAME's high performance network server. ARCserve+TAPE for NetFRAME is expected to begin shipping in the third quarter of 1990.

Cheyenne's ARCserve is the first centralized, totally automated backup software solution for Novell NetWare networks. ARCserve provides the

ability to perform unattended, uninterrupted backup services for both file servers and workstations directly to a shared, centrally mounted device. This enables a network supervisor to schedule file server backup to process completely in the background, and for individual workstation backup to occur at any time of day or night, while the workstation is being used to perform other tasks. Cheyenne Software

Cheyenne Software, Inc., founded in 1983 and publicly held since 1985, is a leader in the development of sophisticated Local Area Network (LAN) and business management software products. The company is an Independent Software Vendor (ISV) for Novell, Inc. In addition to ARCserve, Cheyenne has produced Monitrix and NetBack for network management, and The Organization Analyst which is used for corporate restructuring.

NetFRAME Systems Incorporated is a private company that develops, manufactures and markets a family of high performance network servers that are compatible with all industry standard PC network operating systems. NetFRAME's family of products were designed specifically for client/server computing, and provide cost-effective, mainframe-class throughput while bringing higher levels of reliability, data integrity and easier-to-maintain services to the PC LAN environment.

MINNEAPOLIS (MAY 9) PR NEWSWIRE - Best Buy Co., Inc. (NYSE: BBY), today reported sales for April 1990 (April 8 through May 5), the second period of the company's 1990-91 fiscal year.

According to Allen Lenzmeier, senior vice president/finance, April 1990 sales of $36 million were 20 percent more than the $30 million achieved for the comparable four-week period last year. Year-to-date sales for the nine weeks were $87 million, a 19-percent increase over $73 million for the comparable period last year.

Of the company's 49 stores, 34 are currently considered comparable, whose sales increased 5 percent for April 1990. Best Buy considers a store to be comparable the 14th full month following its opening. Seven stores in the St. Louis market were excluded from the comparable store computation due to remodeling. Each store will be closed for remodeling for a period of two to three weeks during the months of April and May. Best Buy now reports sales on a 5-4-4 week basis; net income and earnings per share are reported quarterly.

Best Buy is the fourth largest publicly held consumer electronics and

major appliance retailer in the U.S. The company sells nationally recognized name brand consumer electronic products, 35mm photographic equipment, home office products, entertainment software, and major appliances at 49 stores located in Minnesota, Iowa, Wisconsin, South Dakota, Illinois, Kansas, Missouri and Nebraska.

DENVER (MAY 9) PR NEWSWIRE - Atlas Corporation (NYSE: AZ) announced today that it has completed an economic feasibility study for its Grassy Mountain gold deposit in eastern Oregon. Based on the results of that study, the company's board of directors has authorized Atlas to seek regulatory approval to develop a new gold mine.

According to the study, the company's Grassy Mountain gold deposit in Malheur County could be expected to yield an average of 100,000 ounces of gold and 100,000 ounces of silver per year for at least eight years. Three consulting groups were retained to perform feasibility geology and engineering work on the deposit: Pincock, Allen, and Holt; Kilborn Engineering, (B.C.) Ltd.; and Hazen Research. The feasibility study projects operating cash costs of $128 per ounce to extract the gold, which is found at an average grade of 0.062 ounces per ton of ore. The silver is recovered as part of the gold extraction process.

Atlas will submit a plan of operations next week to the federal Bureau of Land Management (BLM), which administers the publicly owned land. The plan will describe the company's approach to the development, operation and eventual reclamation of the mine site. If the BLM finds the company's plan complete, it will issue a notice to persons interested in commenting on the plan, and begin developing an Environmental Impact Statement (EIS) during the summer. Atlas expects the BLM permitting process, including periods for public comment, to take approximately 18 months. During that time, Atlas will seek several additional permits from the State of Oregon as well as approvals from Malheur County. Pending permits, the company expects to begin mine construction in early 1992 and pour its first gold and silver by early 1993.

Richard R. Weaver, president and chief executive officer of Atlas, said, "This announcement marks the culmination of nearly four years of work that began with the grass roots exploration of Grassy Mountain by Atlas geologists. Developing the Grassy Mountain deposit will be a significant milestone in our emergence as a successful gold company, allowing us to diversify our geographic base and revenue stream. Mining at Grassy Mountain would also bring Atlas into the silver market for the first time, moving towards the company's goal of diversifying into other precious

metals."

"Our feasibility study confirms the quality of the Grassy Mountain reserves as we identified them in 1988 and quantifies the extent of recoverable reserves. The study reveals that the cost of mining this gold is competitive with current industry standards, although Atlas will continually strive to lower its costs of production. Eastern Oregon's gold deposits have been extensively researched by the state's geologists and by private exploration during the past several years, and those efforts now promise to bring a major new industry to the region. We intend to work closely with all local, state and federal regulators to ensure that our mine site complies with all environmental regulations."

During the life of the mine, Atlas would extract approximately 105 million tons of earth and rock, at least 16 million tons of which is metal-bearing ore. Atlas would process the ore using conventional milling and heap leaching technologies, both of which use weak cyanide solutions to extract microscopic particles of gold or silver from crushed rock.

Atlas Corporation is a mining company whose primary business is gold exploration and production.

#90129p2396 05/09/1990 ~PR Newswire

DALLAS (MAY 9) PR NEWSWIRE - Atmos Energy Corporation (NYSE: ATO) today reported net income of $6.0 million, or $.98 per share, on operating revenues of $114.5 million for its second fiscal quarter ended March 31, 1990. This compares with net income of $7.2 million, or $1.19 per share, on operating revenues of $124.3 million for the prior year's second quarter.

Volumes of gas sold and transported by the company during the second quarter totaled 35.2 billion cubic feet (Bcf) compared to 39.5 Bcf during the second quarter a year ago.

The company attributed the decline in results to unseasonably warm weather during the quarter. Weather during the second quarter was 21.2 percent warmer than normal and 14.6 percent warmer than the previous year's second quarter.

For the six months ended March 31, 1990, Atmos reported net income of $10.9 million, or $1.79 per share, on operating revenues of $221.0 million. This compares with net income of $11.6 million, or $1.90 per share, on operating revenues of $218.2 million for the six months ended

March 31, 1989.

Volumes of gas sold and transported by the company during the six month period were relatively flat at 70.0 Bcf for the current year and 70.2 Bcf for the same period the previous year.

Charles Vaughan, Atmos chairman said that the $8.9 million rate increase filed in Kentucky in February is proceeding, with hearings scheduled to begin June 20. He also said that the company is hopeful of having a Kentucky rate increase in effect before the fiscal 1991 heating season and that the company was monitoring rates of return in its other jurisdictions as well.

The board of directors of Atmos today declared a $.29 per share regular quarterly dividend on the company's common stock to be paid on June 11, 1990 to shareholders of record on May 25, 1990.

Atmos Energy Corporation provides natural gas service to more than 527,000 customers in Texas, Louisiana, and Kentucky through its operating companies - Energas Company, Trans Louisiana Gas Company and Western Kentucky Gas Company.

PHILADELPHIA (MAY 9) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) recently transported its 1,000th unit train of fuel oil to the Niagara Mohawk Power Corp.'s (NYSE: NMK) generating station in Oswego, N.Y.

The service began in January 1980.

"We're proud of our enduring relationship with Niagara Mohawk Power," said James A. Hagen, Conrail's chairman, president and chief executive officer. "It is an excellent example of a partnership between railroad and customer that is beneficial to both parties in the long term."

The Conrail service provides the generating station, which is located on Lake Ontario, with an alternative to stockpiling inventory when water deliveries are suspended during the winter months. Before Conrail's service began, it was necessary for the utility to build up to a 5 million barrel inventory of fuel oil to maintain operations when the St. Lawrence Seaway closed to navigation every winter.

Conrail delivers fuel oil to the Oswego facility from Albany, N.Y., in unit trains of interconnected tank cars.

General American Transportation Corp. (GATX) developed the interconnecting cars, which allow each train to be filled and emptied from a limited number of connections. Niagara Mohawk purchased the branch lines serving the plant from Conrail and other owners, and the utility and Conrail invested $2.5 million in track rehabilitation work before service began.

The unique service package for Niagara Mohawk earned Conrail the 1980 Golden Freight Car Award from Modern Railroads magazine as that year's outstanding marketing achievement in the railroad industry.

Conrail operates a rail freight transportation network in 14 Northeastern and Midwestern states, the District of Columbia and the Province of Quebec.

PRINCETON, NJ (MAY 9) PR NEWSWIRE - CYTOGEN Corp. (NASDAQ: CYTO) announced today the designation of OncoRad(R) OV103 as an orphan drug by the U.S. Food and Drug Administration (FDA), for the treatment of ovarian carcinoma.

Orphan drug status may be granted to products used to treat diseases which affect fewer than 200,000 people in the United States. As a result of this designation, CYTOGEN will be entitled to exclusive marketing rights for seven years for this product and tax credits for development and clinical trial expenses.

OncoRad OV103 is a monoclonal antibody-based cancer therapeutic agent for patients with ovarian cancer. Using tumor specific monoclonal antibodies as delivery vehicles, the product targets the cytotoxic radioisotope Yttrium-90 directly to cancer cells in the body. CYTOGEN is currently in Phase I clinical studies with OncoRad OV103 and expects to enter Phase II trials later in 1990.

The American Cancer Society estimated that, in the United States, there will be 20,500 new cases of ovarian cancer diagnosed this year and 12,400 deaths attributable to the disease.

OncoRad OV103 is the second product for which CYTOGEN has received and orphan drug designation. OncoScint OV103, a diagnostic imaging agent for visualizing the presence and extent of malignant disease in patients with ovarian cancer, received orphan drug designation in November of 1989. This product is currently under review at the FDA awaiting marketing approval.

CYTOGEN Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at CYTOGEN are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

NEWTOWN SQUARE, PA (MAY 9) PR NEWSWIRE - ARCO Chemical (NYSE: RCM) announced today it intends to invest approximately $2.5 billion over the next five years to essentially double the size of the company.

Since 1985, the company has accomplished: -- Increased sales from $1.6 billion to $2.7 billion.

-- Improved net income from $89 million to $405 million.

-- Increased core-product capacity 25 percent to 10 billion pounds through cost-effective incremental expansions and construction of grassroots plants.

-- Expanded foreign operations and significantly improved their profitability. Foreign sales and exports now account for 44 percent of total revenues.

-- Increased dramatically the company's production of value-added

derivatives of core products.

-- Significantly improved its manufacturing cost position.

-- And increased R&D funding in the search to fill the company's new-product pipeline and spur future growth.

ARCO Chemical said it clearly feels the impact of -- and is sensitive to -- public concern for the environment. Sorgenti told stockholders about programs currently under way:

-- Adoption of the 10 performance-based principles of Responsible Care initiative developed by the Chemical Manufacturers Association.

-- Environmental goals to reduce air emissions at the company's plants by 85 percent and reduce other waste generation by nearly 40 percent from the 1986 base line by the end of 1992.

-- Formation with other chemical manufacturers of a national company to recycle polystyrene plastics.

-- Development and marketing of "green" products -- those that have environmental advantages. ARCO Chemical said it expects continued strong growth in demand for MTBE, an octane-enhancer for gasoline, that also has a positive impact on reducing auto emissions and improving air quality.

CONTACT: Gerald T. Davis, 215-359-3198, or Millicent W. Pitts (Investors), 215-359-3382, both of ARCO Chemical.

ELMSFORD, NY (MAY 8) PR NEWSWIRE - Dr. Hollis L. Caswell, president of the Unisys Computer Systems Group and senior vice president of Unisys Corporation (NYSE: UIS), today was named chairman and chief executive officer of HYPRES, Inc. HYPRES is the leading U.S. manufacturer of superconducting electronics. Dr. Caswell has served on the board of directors of HYPRES since 1985.

While at Unisys, Dr. Caswell was responsible for engineering, manufacturing and distribution of Unisys computer systems. Previous to his position at Unisys, he had a long and distinguished career at IBM, where he worked in a wide range of technology-related disciplines including systems, output devices, superconductivity and semiconductors. His last position was vice president of the IBM General Technology Division. He holds a Ph.D. in engineering physics from Cornell University Ithaca, N.Y.

Michael F. Maguire, HYPRES' current chairman, will continue to serve the company as vice chairman and advisor. Charles C. Francisco, the company's current president and CEO, will continue to serve as president and board of directors member.

According to Maguire, "The appointment of Dr. Caswell is consistent with HYPRES' decision to focus the company's resources on those areas of digital electronics and sensors where its superconducting technology has the greatest potential.

Dr. Caswell commented, "Having been involved in the superconducting technology field for many years, I am excited about the opportunities now available in this area. Today, stable and reliable hardware based on this technology can be fabricated, and HYPRES leads this breakthrough, having developed and successfully marketed complex systems based on superconductivity since 1987. I welcome the opportunity to tap HYPRES' potential and to direct its strategic thrust in high-growth digital electronics and sensor-based applications. My first priority is to build strong partnerships with major industrial and government leaders who are able to directly benefit from the superior performance of our technology. We intend to see that superconducting electronics becomes an everyday reality." HYPRESS, Inc.

Founded in 1983, HYPRES, Inc., is a privately held company dedicated to the research, development and marketing of products based on superconducting electronics technology. HYPRES houses the world's only self-sufficient microfabrication facility for the volume production of high-quality, reliable superconducting integrated circuits.

EDMONTON, Alberta (MAY 9) PR NEWSWIRE - Chieftain International Inc. (Toronto: CID) has outlined an aggressive exploratory drilling program calling for the company to participate in 30 wells, including 14

exploratory offshore and onshore wells in the U.S. Gulf of Mexico area and two exploratory wells in the British sector of the North Sea.

Exploratory and development expenditures during 1990 are expected to be approximately U.S. $30 million compared with U.S. $15.8 million in 1989, the company told shareholders at its first Annual Meeting held on May 8th. With working capital of US$41.1 million and no long-term debt, the company expects to fund most of its 1990 exploration and development expenditures from operating cash flow.

During the balance of 1990, Chieftain International will participate, with average working interests of 25 percent, in nine exploratory wells in the shallow waters of the Gulf of Mexico and in five onshore exploratory wells in Texas, Louisiana and Mississippi. Included in this program are exploratory wells currently drilling at two offshore locations: High Island Block A-39 and Brazos Block 492, in which Chieftain International has interests of 29 percent and 10 percent, respectively. A well recently drilled on Brazos Block 515, in which the company has a 25 percent interest, is being evaluated.

Development activity in the Gulf of Mexico includes drilling to follow up a gas discovery which was tested during the first quarter on Matagorda Island Block 589. Development drilling will also be done in two areas where gas production commenced during 1989: Matagorda Island Block 604 and West Cameron Blocks 187 and 188 and in the area of a 1989 gas discovery on Eugene Island Block 265. The Company will also participate in a multi-well development drilling program to increase oil recovery from the Aneth and Ratherford Units in Utah.

Chieftain International anticipates that two wells will be drilled on its exploration acreage in the British sector of the North Sea.

BERKELEY HEIGHTS, NJ (MAY 9) PR NEWSWIRE - Customedix Corporation (AMEX: CUS) today announced results for the third quarter and nine months ended March 31, 1990.

"Despite an accounting error of $464,000, which required adjustments in cost of sales and net income, the company showed a gain in revenue and net income for the nine-month period. Aside from this adjustment at our SMS subsidiary, where the problem was located, operations are currently profitable at all of our subsidiaries. We expect operating profitability to continue as we introduce new products in both the dental and medical segments of our business," Gordon S. Cohen, chairman and chief executive officer, reported.

For the third quarter ended March 31, 1990, the company had revenues of $13,520,108 against $12,708,362 for the same period last year. Customedix had a net loss for the quarter of $195,756, or 1 cent per share, compared with a loss of $278,215, or 1 cent per share, in last year's third quarter.

For the first nine months of fiscal 1990, the company had revenues of $39,394,212 compared wtih $38,448,761 for the comparable period last year. Net income for the nine months was $809,556, or 2 cents per share, against $131,487, with no per-share income reported, for the same nine-month period last year.

During the quarter and nine months ended March 31, 1990, the company retired $100,000 in principal, as well as accrued interest on its outstanding 15 percent convertible subordinated debentures due 1997, and in conjunction with this prepaid $100,000 of bank debt. During the nine-month period ended March 31, 1990, the company has repaid approximately $1,485,700 of debt.

CONTACT: Gordon S. Cohen, chairman and chief executive officer, or Barry Kosowsky, assistant treasurer, 203-265-7397, or Andrew A. Miller, chief financial officer, 201-464-2214, all of Customedix

HOUSTON (MAY 9) PR NEWSWIRE - Robert Glenn (Bob) Simpson has been elected vice president-tax, at Tenneco Inc. (NYSE: TGT). In this position he will be responsible for the company's overall tax function; including tax policy, practices and planning.

Simpson, 38, joins Tenneco from Philip Morris Management Corp. where he served as director of federal taxes for Kraft General Foods.

A graduate of Indiana University School of Business and the University of Illinois College of Law, Simpson joined Coopers & Lybrand in Chicago in 1977 and was named tax manager in 1982.

Simpson later joined Kraft, Inc. as tax attorney in 1983. He was promoted to tax counsel in 1986 and was responsible for directing the corporate domestic and international tax planning effort and the international tax function. In 1989, he was named director of federal taxes for Kraft General Foods. While serving as director, Simpson was responsible for the company's domestic tax planning, federal tax compliance and audits, and financial tax accounting.

Tenneco Inc. is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

#90129p2428 05/09/1990 ~PR Newswire

GREENWICH, CT (MAY 9) PR NEWSWIRE - Finevest Foods, Inc. (NYSE: FVF) today reported a net loss of $2,273,000 or $.21 per share for the quarter ended March 31, 1990, compared to a net loss of $1,633,000 or $.15 per share for the quarter ended March 31, 1989. The company returned to profitability during the month of March 1990 as a result of higher margins in its dairy operations caused by lower raw milk costs and the benefits of

its 1989 restructuring program. The company reported operating income of $1,156,000 for the quarter ended March 31, 1990 compared to $297,000 for the 1989 period.

Record high raw milk costs in January and February of 1990 prevented the company from restoring dairy margins to more historical levels until late in the first quarter. Lower raw milk costs and improved efficiencies from the restructuring programs enabled the dairy operations to improve margins and report operating income in March. However, despite strong performance in its frozen food distribution operations, interest costs more than offset the company's overall operating income for the period, resulting in the net loss. The company anticipates that its frozen food and dairy operations will be profitable for the remainder of 1990.

Net sales for the quarter ended March 31, 1990 increased 2.8 percent to $177,784,000 from $172,878,000 in the 1989 period, as dairy sales increased 2.2 percent frozen food distribution sales increased 3.8 percent. The increase in dairy sales resulted from the early 1989 acquisition of a milk processing facility. The increase in frozen food distribution sales was principally due to higher volume from new and existing customers, which was partially offset by business lost last year when several customers were acquired by supermarket chains with in- house frozen food facilities.

Robert S. Goodale, president, stated that "our return to operating profitability is the result of hard work by many employees in our dairy operations, whose efforts have restored margins to more historical levels despite competitive pressures. At the same time, they are continuing a major effort to improve products quality and customer service."

Finevest Foods, Inc. is a leading wholesale distributor of frozen foods and dairy products in the southeastern United States and is one of that region's largest processors of fluid milk, ice cream and other related dairy products.

#90129p2430 05/09/1990 ~PR Newswire

DALLAS (MAY 9) PR NEWSWIRE - An international team of six U.S. and German electronics and aerospace companies, under the project name of "PRISMA" (Primary Imaging Systems for Multiple Applications), is currently preparing for a demonstration of an imaging radar in a high- flying non-metallic aircraft.

The PRISMA team consists of two U.S. corporations: E-Systems, Inc. (NYSE: ESY) and Hughes Aircraft Company and four German companies: Elekluft GmbH, Grob Luft-und Raumfahrt GmbH & Co. KG, Messerschmitt- Boelkow-Blohm (MBB) GmbH, and Telefunken Systemtechnik GmbH.

The platform, designated as EGRETT II, is a new derivative version of the Proof-of-Concept EGRETT I aircraft. Since its initial flight in June 1987 the EGRETT I has successfully flown over 160 flight test missions and demonstrated its usefulness last year as a high-altitude research aircraft in the context of the International Cirrus Experiment.

The easily removable, reconfigurable payload of the EGRETT II demonstrator aircraft will allow use of multiple sensors including a Synthetic Aperture Radar (SAR) with a Moving Target Indicator (MTI) capability, and a real-time data link to the ground.

The initial demonstration is planned to take place in the United States during the last half of 1991. A team consisting of participants of the six companies has been designated and dispatched to E-Systems Greenville, Texas Division where design and integration activities are centered. Demonstrations are planned to take place within the Federal Republic of Germany during the second phase in late 1991.

The EGRETT I Proof-of-Concept aircraft will have its debut for public viewing at the Hannover Air Show (ILA-90) from May 15-20, 1990. Additional information concerning the PRISMA project, the participants, and the spectrum of applications will be available at the Deutsche Aerospace AG (DASA), Grob, E-Systems and Hughes displays.

E-Systems is a major worldwide developer and producer of electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

#90129p2435 05/09/1990 ~PR Newswire

MT. PROSPECT, IL (MAY 9) PR NEWSWIRE - Zenith Data Systems (ZDS) today announced new system prices that further position its laptop personal computers (PCs) as performance leaders that offer greater value. The company also is increasing memory on selected desktop systems to prepare customers for more memory-intensive computing environments, such as graphical user interfaces.

In a move designed to establish the SupersPort 386SX as the volume leader

at the high end of the laptop market, ZDS reduced the prices of the 40-megabyte (MB) and 100MB models to $5,499 and $6,499, from $5,999 and $6,699, respectively.

"Our high-powered SX laptops are now priced with some competitors' 286 systems, making the buyer's decision an easy one," said John P. Frank, ZDS president and chief executive officer.

To reinforce its position as a performance leader now offering greater value in the laptop market, ZDS announced the following price reductions on its SupersPort 286 line. The SupersPort 286e Model 40, which has VGA video, is now $4,999, down from $5,499; the Model 20 is now $4,699, down from $4,999. The SupersPort 286 Model 40, which has CGA video, is now $3,999, down from $4,499; the Model 20 is now $3,699, down from $3,999.

To support the pricing actions on its portables, ZDS is launching a multimillion-dollar print and broadcast advertising campaign in selected major markets, which will begin later this month.

In addition, ZDS has reduced the suggested retail prices of selected accessories and add-on memory for all portable PCs.

To prepare its systems for more memory-intensive operating environments, such as graphical user interfaces, ZDS is now bundling an additional 2MB of memory with its Z-386/25 and Z-386/33 PCs, which brings their total standard memory to 4MB.

ZDS recently lowered the suggested retail prices of its add-on memory to $499 from $699 for 1MB. A 2MB memory chip is now $999 and a 4MB chip is now $1,999, down from $1,199 and $2,399, respectively.

ZDS, a Groupe Bull company, is a leading manufacturer and marketer of portable and desktop microcomputers and monitors for single- and multi-user applications. With headquarters in Mount Prospect, Ill., and principal final assembly operations in St. Joseph, Mich., ZDS has manufacturing and sales facilities in more than 20 countries.

SCARSDALE, NY (MAY 9) PR NEWSWIRE - At its annual shareholder meeting of April 19, 1990, Datafast, Inc. considered Charles C. Varga's nomination for election to its board of directors. Varga was unanimously approved.

James E. Dellarmi, president of Datafast, said, "The consensus of opinion was that Varga's background and experience in our industry would be an asset to the success and continued growth of our company."

Varga, president of The Cerberus Group, Inc., a Frenchtown, N.J. merger consultant and publisher, commented, "I am pleased and delighted to continue our long relationship of mutual trust and respect in this new role."

Dallarmi added, "Charles has brought in several successful acquisitions for us and will work within our industry to develop others."

Charles C. Varga has participated in the computer services industry for more than 25 years. He is the founder of The Cerberus Group, Inc., a professional services firm for the computer software, services, communications, and information industry. The firm provides information industry consulting, primarily corporate research and analysis, strategic and long range planning, acquisition and merger search, selection and qualification of potential candidates. He is also contributing editor to Computerworld appearing in its Industry Insight section and is a member of the editorial board of The Episcopalian/Via Media - The Diocesan Newspaper of New Jersey.

Datafast, Inc., a privately held corporation founded in 1963, is a pioneer and one of the oldest leading independent firms engaged in the business or furnishing complete customized data processing services to clients. These services encompass a full range of accounting and business applications and peripheral support services including data entry, software services, equipment installation, customized forms and mailing services. The company furnishes its services utilizing mainframe and PC computers from its datacenter, with complete facilities for communication of data and online processing.

CHICAGO (MAY 9) PR NEWSWIRE - The board of directors of USG Corp. (NYSE: USG) today announced the election of Eugene B. Connolly, currently president and chief executive officer, as chairman and chief executive officer of the corporation. Anthony J. Falvo Jr., executive vice president and chief operating officer, was elected president and chief operating officer for USG Corp. The elections are effective June 1, 1990.

Robert J. Day, currently chairman of the board, will continue as chairman until his normal retirement on May 31, 1990.

"Over the past several years, Gene Connolly and Tony Falvo have assumed greater responsibilities for the operations and broad affairs of our company," said Day. "They are now well-prepared to assume the responsibilities of chairman and president of USG."

Connolly, 58, began his career with United States Gypsum Co. in 1958 as a sales representative. He moved up through the ranks holding key management positions in a number of subsidiary companies. He also served as president and CEO of United States Gypsum Co., USG Interiors, Inc. and DAP, Inc. He holds a bachelor's degree in management and an MBA degree in marketing from Hofstra University. He has six children and he and his wife Dorothy reside in Barrington, Ill.

Falvo, 59, joined United States Gypsum Co. in 1955 and served in a variety of marketing and management assignments including president of United States Gypsum Co., L&W Supply Corp. and Masonite Corp. He earned a bachelor's degree in business from Fordham University and a master's degree from Columbia University. Falvo and his wife Mary have three children and are residents of Barrington, Ill.

USG is a Fortune 500 Corp. with operating subsidiaries that are leading

manufacturers and distributors of building materials. Its subsidiaries include United States Gypsum Company, USG Interiors, Inc., DAP Inc., L&W Supply Corp., and CGC Inc.

BOSTON (MAY 9) PR NEWSWIRE - The appointment of Peter Gallary as president of The Boston Company Advisors, Inc., and executive vice president of The Boston Company and Boston Safe Deposit and Trust Company was announced today by William J. Nutt, president. Gallary will manage the firm's investor services group.

The Boston Company Advisors, Inc. is a wholly owned subsidiary of The Boston Company that provides administrative, accounting and custody services to mutual fund complexes. These complexes have an aggregate value exceeding $80 billion. Gallary will be responsible for all activities relating to the mutual fund industry and other collective investment vehicles, including limited partnerships, unit investment trusts and offshore funds. The investor services group is comprised of the firm's fund accounting, financial reporting, custody administration and support, data processing systems, legal, marketing and financial administration.

Gallary, 44, will report directly to Nutt who states, "Peter's exceptional background will be of great value to our organization, particularly his experience and emphasis on quality of client services and his expertise in implementing new fund accounting systems. The mutual fund services business is one of our core businesses. It is Peter's mandate to insure that our future growth meets the needs of a diverse clientele."

Previously, Gallary was partner-in-charge of Coopers & Lybrand's northeast region financial services consulting practice, which serves investment companies, banks, insurance firms and brokerage houses. On the national level, Gallary headed Coopers & Lybrand's investment company consulting practice. Prior to joining C&L, Gallary performed general consulting work for Touche, Ross & Co. in Detroit.

The Boston Company is an international financial services firm that provides personal investment banking services to affluent individuals, pension fund management, global custody and trust services to institutions and custody and accounting services to mutual fund companies. The Boston Company is a wholly owned subsidiary of Shearson Lehman Hutton Inc., an American Express company.

MT. PROSPECT, IL (MAY 9) PR NEWSWIRE - Zenith Data Systems (ZDS), a Groupe Bull company, has promoted eight executives to new positions.

Under the new organization, effective immediately: -- Andrew E. Czernek becomes vice president, product strategy and development, reporting to Frank. Formerly vice president, marketing, Czernek is responsible for ZDS' worldwide product-development and product-implementation activities.

-- Joseph H. Solari becomes president, ZDS-Europe, reporting to Frank. Formerly vice president, ZDS-Europe, Solari now is responsible for sales, marketing, distribution and customer service in Europe, the Eastern bloc countries, and other regions most conveniently served by ZDS-Europe's Slough, U.K., headquarters.

-- Arthur D. Lambert becomes vice president, sales and marketing, reporting to Frank. Formerly vice president, worldwide sales, Lambert's responsibilities are broadened to include sales, marketing and customer service for North and South America and the Pacific region.

-- Ronald T. Simkins becomes vice president, planning, reporting to Frank. Simkins will have primary responsibility for ZDS' long-term business planning and will act as a liaison to Groupe Bull's strategy and planning group. He formerly was vice president of sales and marketing for the Components Group of Zenith Electronics Corporation.

In related moves: -- Charles E. Nieman becomes president, Veritechnology Electronics Corp., reporting to Lambert. Nieman, formerly regional vice president for ZDS' southeast sales region, is responsible for the operation of the Heath/Zenith Computers & Electronics centers. He will be based in St. Joseph, Mich.

-- Shan E. Gastineau replaces Nieman as regional vice president, southeast region, reporting to Robert M. Poznanovich, vice president, U.S. sales. Based in Atlanta, Gastineau formerly was district manager, southeast region.

-- Daniel E. Rosensteel becomes vice president, marketing, reporting to Lambert. Formerly vice president, product marketing, Rosensteel is responsible for product marketing, marketing communications and market development.

-- Michael L. Holstein has been appointed director, product development, reporting to Czernek. Holstein, formerly director, Federal Systems engineering, replaces Kevin Mankin, who has left the company to join

another firm.

Continuing to report to Frank are Thomas S. Buchsbaum, vice president, Federal Systems; William E. Johnson, president, Heath Company; David J. Kirkpatrick, vice president, finance; Leo B. Kunkel, vice president, operations; William M. Owen, general counsel; and Edward R. Youngman, vice president, human resources.

ZDS, a Groupe Bull company, is a leading manufacturer and marketer of portable and desktop microcomputers and monitors for single- and multi-user applications.

MINNEAPOLIS (MAY 9) PR NEWSWIRE - John F. Grundhofer, chairman, president and chief executive officer of First Bank System Inc. (NYSE: FBS) today announced that Daniel C. Rohr will join the company as an executive vice president of FBS and manager of the commercial banking group effective May 21.

Rohr, 44, has most recently served as executive vice president and chief credit officer of Columbia Savings & Loan Association in Beverly Hills, which included responsibility for managing the workout of the institution's junk bond portfolio. Rohr joined Columbia in September of 1988 after an 18-year career with Continental Bank in Chicago.

"Dan's entire banking career has been in commercial lending and credit policy functions," Grundhofer said. "He is highly skilled in credit management and I believe he will be a fine addition to round out First Bank System's management team."

Rohr joined Continental Bank in 1970 and served as an account officer in the bank's Eastern Division from 1971 to 1976. He was named manager of the Southeast Division in 1977 and became manager of the Eastern Regional Division in New York in 1983. Rohr was elected senior vice president in 1984 and named loan committee chairman in 1985 with responsibilities for secured lending policies and procedures. He became head of the Energy and Minerals Department in 1986 and was promoted to chief credit officer and chairman of the credit policy committee in January of 1988.

#90129p2462 05/09/1990 ~PR Newswire

HOUSTON (MAY 9) PR NEWSWIRE - Eugene L. Butler, president and chief executive officer of Weatherford International (AMEX: WII), told stockholders today that the company's improved 1989 performance was due to a successful financial restructuring, improved international business and an effective domestic cost-control program linked to an upturn in domestic business in late 1989.

Butler said the highlights of Weatherford's 1989 performance compared to 1988 results included:

-- A 6.3 percent increase in revenues
-- A 13 percent increase in operating income
-- Net income of $6.9 million in 1989 after adjustments for debt restructuring and an accounting change compared to a loss of $500,000
-- Earnings per common share of $0.43, after the adjustments, compared to a loss of ($0.19)

Weatherford's financial restructuring in late 1989 involved the sale of 11.5 million shares of common stock at $3 per share. The net proceeds, about $32.1 million, were used to reduce bank debt. A second offering of 3,450,000 shares of common stock was recently completed at $5.50 per share. The net proceeds, approximately $17.8 million, also will be used principally to reduce bank debt.

Weatherford's common stock has risen from $1 7/8 at Dec. 31, 1988 to $6 3/4 as of last Monday, Butler noted.

The company anticipates a continued strong performance from international operations in 1990, Butler said, particularly in the Middle East, Far East and North and West Africa. Domestic operations, which were profitable in the first quarter, should benefit from improved Gulf of Mexico activity, he said.

Both proposals presented to common stockholders at the meeting passed, including the re-election of Butler and William E. Greehey to the board of directors for three year terms. Butler, 48, has been president of the company since 1979, chief executive officer since 1984 and a director since 1978. Greehey, 53, is chairman of the board and chief executive officer of Valero Energy Corp., a San Antonio, Texas-based company, and has been a Weatherford director since 1984.

The other proposal that passed was the approval of an amendment to the company's restated certificate of incorporation to increase the number of authorized shares of common stock from 30 million shares to 60 million shares.

Weatherford is a diversified international energy service and manufacturing company that provides technical services and manufactures and markets specialty products and equipment used in oil and gas exploration and development.

#90129p2464 05/09/1990 ~PR Newswire

WASHINGTON, (MAY 9) PR NEWSWIRE - U.S. Sen. Arlen Specter (R-Pa.) today warned the professional sports leagues that Congress may be forced to remove their anti-trust exemptions if the trend toward "pay-per-view" continues.

Testifying before the House Subcommittee on Telecommunications and Finance Specter noted that more and more sports television programming is going on pay TV.

"If the professional sports leagues want their anti-trust exemptions," he said, "there should be no charge to the viewers."

The major professional sports leagues have been granted anti-trust exemptions by Congress which allows them to pool their television earnings.

Among those listening to Specter's testimony at the hearing were Fay Vincent, Major League Baseball commissioner; Paul Tagliabue, National Football League commissioner, and David Stern, commissioner of the National Basketball Association, all of whom were invited as witnesses.

The subcommittee is conducting a series of hearings into all aspects of television, including the growth of "pay-per-view" sports programming.

Specter testified that he is fearful that the day will come when the American sports fan will not be able to see the World Series, the Super Bowl and other professional sports championships except on pay TV

Concern over this, he said, led him to get a comment from Tagliabue during a hearing before the Senate Judiciary Committee that the NFL will keep the Super Bowl on free TV at least until the year 2000.

Specter said he has "grave doubts" over the wisdom of allowing the pro sports leagues to have their anti-trust exemptions, "but as long as they have them, they have a duty to the American public."

Critical of the leagues' move toward pay-per-view TV since coming to the Senate in 1981, Specter also expressed strong dissatisfaction with the failure of the leagues to allow for more rapid expansion of franchises to

other cities.

"There should be more professional sports teams," he said. "If there were, owners would not be able to extract so much from cities trying to keep their teams or from cities trying to lure teams away from other cities."

Stating that Congress has been "too soft" on the pro sports leagues, Specter said the Congress "should insist" that they expand to more cities.

"There is no reason why many more cities should not have professional sports franchises," he said.

#90129p2470 05/09/1990 ~PR Newswire

PITTSBURGH (MAY 9) PR NEWSWIRE - At its annual shareholders' meeting today, Chambers Development Co. Inc. (AMEX: CDVB), announced the declaration of its first quarterly dividend on its Class A common stock of a nominal one cent ($.01) per share.

Approved by the board of directors today, the dividend is payable Nov. 14, 1990, to shareholders of record at the close of business on Oct. 1, 1990.

Chambers' Class A common stock enjoys a preference over the common stock (CDVB) in the payment of cash dividends. This declaration is in accordance with that dividend preference.

John G. Rangos Sr., Chambers' president and CEO, said the company has reached the stage in growth and maturity where it is appropriate to pay a dividend.

"During the past four years, the company has announced three 100 percent stock dividends. This cash dividend is based not only on the company's maturity and position, but also on the need to recognize the requirements of the investing public -- that these are current owners and prospective owners of Chambers' stock to whom a dividend is an important and necessary component of the investment decision.

"We believe the declaration of a dividend will enhance the marketability of the stock and will reduce volatility in stock price by providing a broader market," Rangos said. "We think this increased trading ability will enhance the market's confidence in the company's long-term value. We want shareholders and prospective investors to understand and appreciate Chambers' position as a national force in our industry.

"Also we want to broaden and strengthen the base of ownership and present a fully balanced investment option so investors of all types are included " Rangos said.

Chambers Development Co., headquartered in Pittsburgh, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development.

The company also provides security services through its wholly owned subsidiary, Security Bureau Inc., which is among the 20 largest U.S. security companies.

LOUISVILLE, KY (MAY 9) PR NEWSWIRE - Shareholders of Capital Holding Corporation (NYSE: CPH) approved the re-election of three directors to the company's Board during the company's annual meeting today.

Directors re-elected to three-year terms are: Irving W. Bailey II, 48, chairman, president and chief executive officer, Capital Holding Corporation; John L. Clendenin, 55, chairman, president and chief executive officer, BellSouth Corporation; and John L. Weinberg, 65, senior partner and chairman of the Management Committee, Goldman, Sachs & Co.

Shareholders also ratified the appointment of Ernst & Young as the Corporation's independent auditors.

In reviewing the company's recent financial performance, Bailey said, "Over the past 5 years, we've grown earnings an average of 15 percent per year. In 1989, we had earnings growth of 16.5 percent. And, for the first quarter of 1990, earnings per share grew 18.4 percent over the first quarter of last year."

Bailey also discussed the company's vision and strategies for the future. "We are striving to become the most customer-driven marketers in our industry by listening carefully to our customers and exceeding their expectations.

"Our corporate umbrella strategies target five areas, including marketing and acquisitions, time-based and cost-effective competition, use of advanced technology, continued excellence as financial and risk managers, and organization and culture development. Through these elements, we can distinguish ourselves and maintain our growth," Bailey said.

Capital Holding Corporation is one of the nation's five largest stockholder-owned life insurance organizations, with $15.4 billion in assets and $45.1 billion of life insurance coverage in force.
